(APRIL 13) UPI - President Bush and British Prime Minister Thatcher emerged from their meeting in Bermuda today with a warning for the Soviet Union. Bush said he found ''deeply disturbing'' the reports that Soviet President Gorbachev threatened to cut off some supplies to Lithuania if it does NOT withdraw independence-related laws. Thatcher warned that improved relations with the Soviets could NOT continue if Moscow uses force in the Baltic republic.

A French newspaper report today is an apparent embarrassment for the French government, which thanked Libya's Moammar Gadhafi for the release of three European hostages in Beirut this week. France has come under international criticism for thanking Gadhafi for what it called a ''noble and humanitarian gesture.'' The news report now says Gadhafi's own Navy originally captured the hostages and says they were held in Libya, NOT Lebanon.

Nearly 350 demonstrators attempting to prevent abortions on Good Friday were arrested outside a Philadelphia health center today. Authorities say an even larger group of counter-demonstrators surrounded the first group and yelled obscenities, but there was NO violence. Clinic officials say they performed abortions despite the protest.

A spokesman for East German Prime Minister Lothar de Maiziere says the newly installed leader will set a timetable for German unification talks next Thursday. The spokesman says de Maiziere hopes a preliminary treaty with West Germany can take effect on July 1st.

More than 180 firefighters in Bombay, India, finally extinguished a blaze that burned for 16 hours in the basement of one of the city's most luxurious hotels. NO one was killed... as the staff at the Oberoi Towers quickly evacuated more than 800 people. The fire was kept to the basement and ground levels of the 36-story hotel.

#90103u3199 04/13/1990 ~United Press International
(APRIL 13) UPI - President Bush and British Prime Minister Thatcher used their Bermuda summit today to issue tough warnings to the Soviet Union about the situation in Lithuania. Both said that increased Soviet pressure against the independence-minded republic would lead to chillier relations with the West. Said Thatcher- ''We have a duty to say what we think.''

Both Bush and Thatcher also re-affirmed their resolve to find out who committed the Pan Am bombing over Lockerbie, Scotland, in December 1988. Flight 103 exploded killing 270 people. The two leaders said British and U-S officials are still working to solve the case. Bush added... ''These dastardly terrorist acts must stop.''

347 anti-abortion protesters were arrested outside a Philadelphia health center today for trying to keep women from having abortions on Good Friday. The clinic director said most of the 20 abortions scheduled for today went on regardless. 100 protesters staged a sit-in at a Madison, Wisconsin, medical building, blocking stairs leading to an abortion clinic. But police persuaded them to leave after threatening to press charges of criminal trespass.

A former top aide to Attorney General Thornburgh is allegedly under investigation in a Pennsylvania drug probe. The acting U-S attorney in the case has NO comment on reports that a former state deputy attorney general will plead guilty to cocaine charges and testify against Henry Barr. Barr was general counsel to Thornburgh when he was governor of Pennsylvania and followed him to Washington, working in the Justice Department until last year.

#90103u3458 04/13/1990 ~United Press International
(APRIL 13) UPI - Soviet President Gorbachev put more pressure on Lithuania today. He gave the rebellious republic a two-day ultimatum, ordering it to either rescind its declaration of independence or face the cut-off of supplies from Moscow. Lithuanian President Landsbergis responded that the parliament would NOT overturn the declaration and that it would NOT even discuss the ultimatum during the Easter weekend.

President Bush says he found the new Soviet threat to Lithuania- in his words- ''deeply disturbing.'' Bush was in Bermuda for a meeting with British Prime Minister Thatcher. Both leaders made it clear that, if Moscow goes ahead with its threats, relations with the West would suffer. Said Thatcher... ''This is NOT a problem that can be solved by force.''

Poles who have waited 50 years for a confession of Soviet responsibility

for the Katyn Forest massacre had their pleas answered today. Tass reports the Soviet Union apologized for the slayings of 15-thousand Polish officers during World War Two. The Soviets previously blamed the killings on the Nazis. Solidarity leader Lech Walesa hailed the admission of guilt and called for material compensation for survivors.

A Delta rocket soared from the launch pad at Cape Canaveral today to carry an Indonesian satellite back into space. In 1984, the Palapa BR was one of two satellites stranded in a useless orbit when their boosters misfired after launch from the shuttle Challenger. They were retrieved by shuttle astronauts. One satellite was returned to orbit by a Chinese rocket six days ago. The other went up today on a Delta 2 rocket from Cape Canaveral, Florida.

#90103u3492 04/13/1990 ~United Press International

(APRIL 13) UPI - A federal investigator says the fire that killed nine people last week in a Miami Beach hotel was NOT deliberately set. Bureau of Alcohol, Tobacco and Firearms agent Malcolm Brady says the fire started in a crawl space near an elevator shaft. A plumbing crew had worked on a leak in the crawl space 24 hours before the blaze broke out. Brady says investigators are NOT sure what caused the fire to start, but an investigation is continuing.

Friday the 13th brought record low temperatures to the East. The National Weather Service reports 11 cities broke or tied records for the day. Atlantic City, New Jersey... Huntington, West Virginia... and Pinson, Alabama... all recorded record lows in the 20s. Rain was scattered over the Texas Gulf Coast and the northern Pacific Coast. Showers also roamed across the Midwest.

30-thousand people- many of them tourists- descended on the city of San Pedro Cutud in the Philippines today to see the crucifixion of at least 17 people. The authentic re-enactments are part of the city's Good Friday ritual, which increasingly is becoming a public spectacle. A 22-year-old man nailed to a cross reported- quoting here- ''It is very painful,'' explaining he went through with it for the sake of a paralyzed younger sister.

#90103u3592 04/13/1990 ~United Press International

(APRIL 13) UPI - Re-cycled Indonesian satellite reaches orbit... Lithuania ignores Soviet threats... U-S-British summit ends in Bermuda... and the Soviet foreign minister calls Gorbachev the country's last best hope. U-P-I has it all, next:

A satellite that was once retrieved from space by a shuttle was shot back into orbit today as part of an UNprecedented celestial recycling effort.

A Delta 2 rocket thundered to life this evening from Cape Canaveral, Florida, carrying the Palapa BR satellite.

The satellite was ejected into a preliminary egg-shaped orbit. An onboard rocket will fire Sunday to put it into a circular orbit to handle communications in Indonesia.

In 1984, the Palapa was one of two satellites stranded in useless orbits when their McDonnell Douglas boosters misfired.

The aerospace insurance industry was forced to pay Millions of dollars to the owners of the space crafts.

Shuttle astronauts rescued both satellites and brought them back to Earth.

The other satellite was launched Saturday by a Chinese rocket.

An Indonesian spokesman called today's mission ''very significant,'' because it helps unite his country's nearly 14-thousand islands.

#90103u3609 04/13/1990 ~United Press International

(APRIL 13) UPI - Soviet President Gorbachev today threatened to squeeze Lithuania's economic lifeline if the breakaway republic pushes ahead in its quest for independence.

Gorbachev says he will cut off certain supplies to the republic if it does NOT rescind laws related to last month's independence declaration.

The Soviet leader did NOT specify what supplies would be stopped. But Lithuania is dependent on the Soviet Union for many essentials, including oil, gas and cotton.

Lithuanian President Vytautas Landsbergis rejected the ultimatum. He said Lithuania's parliament is on Easter holiday, and will NOT even discuss the threat.

Landsbergis added that Moscow's action has the effect of recognizing Lithuania as a foreign country.

At his one-day summit in Bermuda with British Prime Minister Thatcher, President Bush said he found the reports from Moscow ''deeply disturbing.''

Thatcher warned the Kremlin that escalated pressure against Lithuania

could hurt relations with the West.

Soviet Foreign Minister Eduard Shevardnadze warns that if reforms do NOT succed in the Soviet Union- ''there will be a dicatatorship.''

He said he sees NO other possibilities.

Shevardnadze's stark appraisal was taped last month and broadcast today on a popular Soviet television program

Shevardnadze's assessment contradicts the view of many Western analysts. They say Mikhail Gorbachev's reforms have moved the country too far forward to permit a reversal to totalitarian government.

The white-haired foreign minister also revealed he nearly resigned in December. That's when Soviet lawmakers criticized the military crackdown that left 21 people dead in the capital of Soviet Georgia last April.

Shevardnadze previously expressed anger over claims that the entire Politburo approved the crackdown. Shevardnadze is from the Soviet Georgia.

-30- 2045

#90103u3626 04/13/1990 ~United Press International

(APRIL 13) UPI - 347 anti-abortion protesters were arrested outside a Philadelphia health center today in an annual Good Friday demonstration.

About 800 demonstrators- both pro- and anti-abortion- gathered outside the Elizabeth Blackwell Health Center for Women. The anti-abortion protesters were outnumbered, but the pro-abortion forces remained behind police barricades in what was for the most part a peaceful demonstration.

The nearly 350 people arrested were issued citations for blocking a highway and were released.

The Pro-life Non-Violent Action Project had hoped to halt all abortions at the clinic on Good Friday, but the clinic director said most of the 20 abortions scheduled for today took place.

The Good Friday protest is traditionally the group's largest demonstration of the year.

In Madison, Wisconsin, 100 anti-abortion protesters blocked the stairways at an abortion clinic for several hours today in another Good Friday demonstration. The protesters dispersed when police threatened to charge them with criminal trespass.

#90103u3645 04/13/1990 ~United Press International
(APRIL 13) UPI - Federal anti-drug director William Bennett admits that- one year after he made Washington, D-C, a test case in the war on drugs- the nation's capital is ''still in trouble.''

Bennmett says the record on anti-drug efforts in the District of Columbia is- in his words- ''mixed, spotty, incomplete.''

At a news conference today, Bennett said progress has been made. But he noted that D-C's murder rate- the highest in the nation per capita- has NOT come down. Police link most of the murders to drugs, with 438 killings last year. Bennett calls the lack of progress in that area a- ''bitter disappointment to all concerned.''

Bennett also acknowledged that while the government pledged an extra 100-Million dollars to Washington for anti-drug programs federal officials did NOT provide a single bed for drug treatment in D-C last year.

But Bennett said... ''I'm NOT here to declare failure.'' He pointed out that two drug-treatment centers are due to open in Washington in November.

15 years ago today, armed Christian forces and Palestinian guerrillas exchanged gunfire in scattered violence in Lebanon.

A decade and a half later, the Lebanese civil war rages on, with the numerous factions battling among themselves.

The war has made Lebanon a battleground where various Middle Eastern feuds are played out. Israel has fought Palestinian terrorists there, Christians have fought Moslems, Syrian troops have occupied the country and, since 1988, pro-Syrian Shiite Amal militia have clashed with pro-Iranian Hezbollah militants and, most recently, Christian factions have fought one another.

The presence of U-N peace-keeping troops failed to slow the civil war. 264 U-S troops were killed there, as well as 86 French troops.

15 Western hostages remain held in Lebanon.

Officials estimate the 15-year death toll at 143-thousand.

-30- 2052
#90103u3708 04/13/1990 ~United Press International
(APRIL 13) UPI - Bermuda was the site of a four-hour summit between President Bush and British Prime Minister Thatcher today. The two leaders emerged to say they had discussed- quote- ''just about everything.''

Bush and Thatcher did warn Moscow NOT to increase pressure on Lithuania.

President Bush and Prime Minister Thatcher's remarks came after Soviet President Gorbachev gave the rebellious republic two days to rescind its independence declaration. The Lithuanian president says that woN'T happen.

Soviet Foreign Minister Shevardnadze says if President Gorbachev's program of reform fails, the Soviet Union will fall prey to another dictatorship. Shevardnadze's comments were broadcast on Soviet television today.

Philadelphia police say nearly 350 anti-abortion activists were arrested today during a demonstration outside a women's clinic. About 800 people on both sides of the issue participated in the rally, but the clinic remained open.

A UNmanned Delta-2 rocket put an Indonesian communications satellite back into orbit today, 26 minutes after taking off from Cape Canaveral. The launch comes six years after shuttle astronauts recovered the Palapa-BR satellite from space after it failed to reach the proper orbit.

Agriculture Department officials say tomato seeds exposed to cosmic radiation in orbit and sent to Millions of school children will NOT yield ''killer tomatoes.'' Officials say the seeds have tested negatively for radiation.

#90103u3842 04/13/1990 ~United Press International

(APRIL 13) UPI - President Bush and British Prime Minister Thatcher are warning the Soviet Union NOT to put any more pressure on Lithuania. The two leaders met today in Bermuda, where they heard word of Soviet President Gorbachev giving the Baltic republic two days to rescind its declaration of independence. Bush said he found the ultimatum ''deeply disturbing.''

Gorbachev says Lithuania has two days to reverse laws related to last month's declaration of independence, or else Moscow will cut off certain supplies. They could include essentials such as oil and gas. Lithuanian President Vytautas Landsbergis says the republic will NOT even consider it during the Easter holiday weekend.

A report says one of the most advanced methods of detecting bombs in airport luggage shows disappointing results. The accuracy of the thermal neutrol analyzer was questioned during seven months of tests at Kennedy International Airport in New York. The report says simulated two-pound bombs escaped detection seven percent of the time, and explosives of up to one pound slipped by 25 percent of the time.

India's prime minister lodged strong charges against Pakistan today in rejecting talks about the separatist movement at their border. Prime Minister V-P Singh accused Islamabad of providing arms, drugs and money to Moslem separatists. The rebels are part of a popular uprising against Indian rule of Kashmir region. Pakistan denies the charges.

-30- 1622

#90103u3861 04/13/1990 ~United Press International

(APRIL 13) UPI - A 22-year-old Kansas City, Missouri, man has been charged in a murder spree that has left six women dead since last September. All of the women were African-Americans in their 20's, and most had ties to drug use and prostitution. Ray Shawn Jackson allegedly lured them to their deaths by offering them crack. He also was charged in an attack on a woman last Monday. That woman lived to identify him as her assailant. Bond was set at 700-thousand dollars.

Four retail chains in the western United States are going after what's being called ''green-collar fraud.'' Fred Meyer Incorporated of Portland, Oregon, Raley's of Sacramento, California, Ralphs Grocery of Compton, California, and ABCO Markets of Phoenix have hired a certification company to audit products according to tough environmental and recycling standards. Products that meet the standards will be displayed with seals of approval in the stores.

Authorities say an Ohio driver is in critical condition after crashing into a fence and being impaled by an eight-foot wooden board. A sheriff's sergeant says 28-year-old Tracy Hartranft could speak while being rescued in Columbus. Hartranft fell UNconscious as workers cut through the board with a saw. They left some of the board protruding from his chest and back for doctors to remove. One physician says the board was two inches from the victim's heart.

An Arkansas woman was found in contempt of court this week- for NOT wearing a bra. 21-year-old Melissa Thurston was before Judge Don West on a charge of failing to return three videos to a rental outlet. West ordered the woman to put on a jacket because- in his words- ''her breasts were obviously showing.'' He also tacked on the contempt charge, although he did NOT add any fines or other punishment. Thurston argues she was wearing a ''prim and proper'' high-neck sweater and that she NEVER wears a bra. West says in eight years on the bench he's ''NEVER had a problem like this.''

#90104d6270 04/14/1990 ~French/German News Agency

JAMMU, INDIA (APRIL 14) - Indian authorities imposed an indefinite curfew and deployed troops in two Kashmir towns Saturday after anti-government

protests left three people dead, officials said here.

In New Delhi, a government spokesman denied press reports that a Pakistani air force jet had violated Indian airspace in Kashmir region's Poonch area a day earlier. There was no such violation, the spokesman told reporters.

Moslem militants in Kashmir meanwhile killed a paramilitary policeman and wounded four others by hurling a grenade at a security patrol in the curfew-bound Zaldagar area in downtown Srinagar, Kashmir's summer capital, they said.

An underground group, Pasdarane Islam (Defenders of Islam), claimed responsibility for the grenade attack in telephone calls to local journalists in Srinagar. The group said five policemen died in the attack.

Troops were enforcing peace in Bhaderwah and Kistiwar towns of Doda district after anti-Indian unrest spread across the Banihal divide from the Kashmir valley and reached Jammu province.

Trouble erupted Friday in Bhaderwah when Moslem demonstrators attacked police with stones and bricks and fired a few rounds of bullets, forcing them to open fire.

Three men were killed in the ensueing violence and several were injured, officials said in Kashmir's winter capital here. Six police, including two officers, were injured, they said.

An official spokesman said the demonstration was organised by pro-Pakistan activists after Friday afternoon prayers to protest an indefinite curfew in the Kashmir valley which has prevented Moslems from going to mosques.

In Kistiwar, authorities feared Moslem-Hindu riots could erupt in reaction to the shooting in Bhaderwah, the spokesman said.

The Jammu region has been free of the curfew that has paralysed normal life in the Srinagar valley, where anti-India Moslem militants are most active.

#90104d6320 04/14/1990 ~French/German News Agency

JOHANNESBURG, (APRIL 14) - Nelson Mandela called on the 12-nation European Economic Community to maintain sanctions against South Africa's apartheid regime during a meeting with an EEC delegation here Saturday.

Mr. Mandela, deputy president of the African National Congress, spoke to reporters after an hour of talks with the EEC team at Jan Smuts airport, flanked by Irish Foreign Minister and delegation leader Gerard Collins, Thierry de Beauce of France and Susanna Agnelli of Italy.

Thanking the EEC for its support, Mr. Mandela said: "I asked them to maintain sanctions, and I supported my request by pointing out that 27 years ago when I was jailed I could not vote.

"I have come back after 27 years in prison and I still cannot vote, and that therefore nothing has happened here to justify a review of the strategies which we have adopted generally, and in particular, the question of sanctions."

He said he had also briefed them on talks-about-talks with the government scheduled for May 2-4, and about how the ANC had disciplined jailers and dismissed leaders who had tortured ANC detainees at one of its camps in Angola.

On the rearranged talks, which the ANC suspended in protest against police action in Sebokeng black township near Johannesburg on March 26, when 17 demonstrators were killed, Mr. Mandela said the meeting was at the initiative of the ANC.

"We have been trying to urge the government over the last three years to meet the ANC and they have eventually yielded to that pressure."

#90104u0301 04/14/1990 ~United Press International

CAPE CANAVERAL, FL (APRIL 14) UPI - A $60 million Indonesian satellite lost in space and rescued by shuttle astronauts six years ago was fired back into orbit by a Delta 2 rocket in the final chapter of an unprecedented space success story.

The successful Friday the 13th launch of the Palapa B-2R satellite brought the used spacecraft full circle and further cemented close ties between Indonesia and the United States, which has now launched six radio relay stations for the Pacific island nation since 1976.

''All right!'' said launch commentator Ray Adams after confirmation the satellite was in the proper orbit. ''It was a great success.''

The $50 million Delta 2 thundered to life at 6:28 p.m. EDT and quickly vaulted away from the Cape Canaveral Air Force Station, six days after a Chinese Long March rocket successfully boosted an identical satellite into orbit that was stranded in space along with Palapa B-2R in 1984.

''The success is really very significant to our country,'' said Makarim Wibisomo, a spokesman for the Indonesian government. ''We are right now in a very risky situation because ... we were supposed to launch this satellite several years ago.

''We consist of 13,677 islands. We have terrestrial communications but it is not sufficient,'' he said.

The slender blue-and-white Delta, equipped with nine strap-on solid-fuel boosters for extra power, majestically climbed away through a partly cloudy sky, arcing east over the Atlantic Ocean and putting on a spectacular sky show for local residents and tourists along area beaches.

''Now completely refurbished, (Palapa B-2R is) returning to space,'' said David Braverman, a vice president with Hughes Aircraft Co., builder of both satellites. ''Today we are to witness the completion of this spectacular story.''

Palapa B-2R satellite was ejected into its preliminary egg-shaped orbit with a high point of 23,474 miles and a low point of 115 miles about 26 minutes after blastoff. An onboard rocket will fire Sunday to put the satellite into a circular orbit 22,300 miles above the Pacific Ocean equator in the sky over Indonesia.

It was the ninth success in a row for the Delta 2 since the rocket's maiden launch one year ago.

Once checked out and in operation, Palapa B-2R - the ''R'' stands for re-flight - will replace an aging satellite launched from the shuttle Challenger in 1983 and join one launched by a Delta in 1987 to help link Indonesia's 13,677 islands with quality telephone, television and data communications service.

Palapa B-2R, a cylindrical 1,437-pound satellite measuring 22 feet long and 7 feet wide, is equipped with 24 radio transponders, each one capable of carrying 1,000 one-way voice circuits or a color television transmission.

The operational two-satellite constellation is used to support domestic Indonesian communications as well as those of other nations in the area.

The rebuilt Palapa B-2R satellite was valued at roughly $60 million. Throwing in the cost of the rocket and a $27.5 million insurance premium, the flight Friday represented a $137.5 million project.

Palapa - the name means ''national unity'' - and an identical satellite called Westar 6, originally owned by Western Union, were stranded in useless, lopsided orbits in February 1984 when their solid-fuel boosters, built by McDonnell Douglas, misfired after launch from the shuttle Challenger.

The aerospace insurance industry was forced to pay out $105 million to

Western Union, the owner of the Westar 6 satellite, and some $75 million to Perumtel, the state-owned Indonesian telecommunications agency.

Nine months later, after around-the-clock work by NASA, Hughes and the underwriters, who now owned both relay stations, the two satellites were rescued by spacewalkers Joe Allen and Dale Gardner, who pulled them aboard the shuttle Discovery in one of the most dramatic space missions ever conducted.

The satellites then were carried back to Earth and returned to Hughes for refurbishment and eventual re-launch. Westar 6 later was sold to a consortium based in Hong Kong, renamed Asiasat 1 and successfully launched last Saturday by a Chinese Long March rocket.

Palapa B-2R was bought by Sattel Technologies Inc., a private company that contracted with the government of Indonesia to refurbish and re-launch the satellite.

''The spacecraft was in super shape,'' said Braverman. ''The nine months of orbital exposure it had were very benign and basically we only had to replace the items we used extensively during the nine months, the batteries, the on-board ... propulsion system.''

The Delta 2, an upgraded version of the workhorse Delta rockets launched for years by NASA, was designed to carry military Global Positioning System ''Navstar'' satellites into orbit for the Air Force.

But the $669 million contract to build and launch 20 Delta 2s for the Navstar program required McDonnell Douglas to make the rockets available on a commercial basis as part of a program to encourage development of a private-sector launch industry.

#90104u0305 04/14/1990 ~United Press International

SEATTLE (APRIL 14) UPI - A earthquake measuring 5.1 on the Richter scale, the third and strongest temblor in the area in two weeks, shook buildings in northern Washington and southern British Columbia Friday night, but caused no serious damage or injuries.

The quake, which struck at 10:33 p.m., shook counters so severely at a customs building at a Canadian truck border crossing in British Columbia, the two-story structure was evacuated and traffic was diverted, said a Canadian customs inspector at the Douglas, B.C. port of entry a mile away.

The temblor was first measured at 4.5, but was later upgraded to 5.1 by seismologists at the University of Washington Geophysics Laboratory. The epicenter was about one mile south of Deming in Whatcom County, Wash.

The earthquake was the third and most severe to hit the area in 12 days, said Rick Benson, a UW seismologist. The other two struck on April 2 and April 3 and measured 4.5 and 4.1 respectively. Both of those were centered about a mile north of Deming.

''People in Deming really got a ride (Friday night),'' Benson said. ''We knew there was increased activity in the area, but we had speculated the largest event had occurred. Looking at it now, that wasn't the case.''

''We've had nothing nearly as significant as this,'' Benson added. ''This is pretty high activity for an area. This is not the usual pattern for western Washington.''

The area was hit with a series of aftershocks Friday night, Benson said. However, no data on the size of the mini-quakes was available.

''There are going to be aftershocks,'' Benson said. ''One this size generates dozens of aftershocks. People should be aware of it. It could be a long night.''

Benson said the two previous quakes were apparently foreshocks to Friday night's temblor.

Although the Puget Sound area is subject to sporadic earthquakes, there had been little evidence of a fault in the Deming area before this series of shakers, Benson said.

Benson said he could not rule out entirely that Friday's quake was a foreshock to an even bigger one.

''We can speculate based on the historical activity that there probably won't be,'' Benson said. ''Chances are that this was the big one. But unfortunately there is no historical data so really there is no way to predict.

Benson and his staff had not received any reports of injuries or damages and the border patrol in Lynden, Whatcom County near the Canadian border said there had been no reports of injuries or damages.

-30- 2741

#90104u0308 04/14/1990 ~United Press International

Mike Gartner used his accurate shot to distance himself from his playoff reputation as well as the New York Islanders.

Like a forward shaking off a defender while breaking to the net, Gartner whisked away any notion that he was a post-season flop by netting a hat

trick to lead the New York Rangers to a 6-5, series-clinching victory over the Islanders in the Patrick Division semifinals.

''The way I looked at it coming in,'' said Gartner, ''I either didn't score a goal in my last 9 playoff games, or I've scored 11 goals in my last 15 games.''

The sharpshooting winger, who was obtained by the Rangers to bolster their offense at the trading deadline, was instantly productive for the club down the stretch of the regular season.

''It's all a matter of looking at it positively or negatively'' said Gartner. ''I thought that I've been playing well and the goals would eventually come. We've been winning hockey games and that was the bottom line.''

The goals, which helped the Rangers dispose of their local rivals in five bruising games, were his first, second and third of the 1990 playoffs.

Gartner had gone to Rangers Coach Roger Neilson before the game and asked him if he was happy with his play.

Neilson told him to keep doing what he was doing and the goals would come.

''They can't intimidate him,'' said Neilson after the game, played exactly 50 years after the Rangers' last Stanley Cup victory on April 13, 1940.

''He plays the man and he takes the abuse in front of the net. He's tough mentally.''

Gartner netted the first and last goals for the Rangers in the game, but it was his second goal that turned the tide of the game.

''The Rangers are a fine hockey club,'' said Islanders Coach Al Arbour. ''They're well balanced. They have depth, and I think over the series their power play and their goaltending was the difference in the games.''

The Rangers will face the winner of the New Jersey Devils-Washington Capitals series in the division finals beginning next week.

In the other Patrick Division semifinal, Washington topped New Jersey 4-3 to take a 3-2 lead in the series.

In the Adams Division, Boston downed Hartford 3-2, seizing a 3-2 lead in the best-of-seven series. Montreal also grabbed a 3-2 series lead by defeating Buffalo 4-2.

The Campbell Conference resumes play Saturday night with the Chicago Black

Hawks at the Minnesota North Stars, the Calgary Flames at the Los Angeles Kings and the Edmonton Oilers at the Winnipeg Jets.

Chicago, Los Angeles and Winnipeg all lead their the best-of-seven series 3-2.

Patrick Division
Capitals 4, Devils 3

At East Rutherford, N.J., Dino Ciccarelli scored his NHL-leading eighth playoff goal to break a third-period tie and rally Washington, pushing New Jersey to the brink of elimination.

The Capitals, underdogs in the best-of-seven series, lead the series 3-2 and can advance to the second round of the Stanley Cup playoffs with a victory Sunday night in Landover, Md.

The team that scored first in every game of this series has won. The Capitals took a 1-0 lead into the second period, but had to come back from a 2-1 deficit with a three-goal third period to maintain that pattern.

Washington goaltender Don Beaupre won his second straight game, with 21 saves, giving New Jersey two straight losses for the first time in its four playoff series.

Adams Division
Bruins 3, Whalers 2

At Boston, Cam Neely's second goal of the game, a short-handed talley late in the second period was the margin of victory, gave Boston a 3-2 series lead and pushed Hartford to the brink of playoff elimination.

The Bruins will have the chance to eliminate the Whalers in Game 6, which will be played Sunday night at the Hartford Civic Center.

Boston, who killed nine minutes of penalties in the second period, also scored twice on power plays.

With the game tied 2-2, Hartford went on a power play after Lyndon Byers was called for slashing at 17:23. However, Neely scored an unassisted goal on a wristshot from the top of the right circle, beating Whalers goaltender Peter Sidorkiewicz inside the far post.

The series is the first post-season meeting between New England's NHL teams.

Canadiens 4, Sabres 2

At Buffalo, N.Y., Stephane Richer scored twice and Bobby Smith had a goal and an assist to boost Montreal to a 3-2 lead in their Adams Division semifinal.

Game 6 of the best-of-seven Stanley Cup opening-round series is scheduled for Sunday night in Montreal.

The Canadiens erased a 1-0 deficit by scoring three times in the second period. Richer scored at 18:25 of the second, his fifth goal of the playoffs and second of the game, after faking a pass in front of the net and firing the puck off goalie Daren Puppa's left leg pad for a 3-2 Montreal lead. It was the Canadiens' first lead of the game.

Richer's first goal came at 7:51 of the second when he left defenseman Doug Bodger trailing as he sped in front and beat Puppa, tying the score 1-1.

NEW YORK (APRIL 14) UPI - The federal government is investigating a Florida company accused of selling faulty electronic parts for the space shuttle and Penatgon weapons systems, a published report said Saturday.

The New York Times, citing a Pentagon memorandum and unidentified government officials, said Impala Electronics Inc. of Tampa, Fla., was under investigation on charges it switched labels on resistors.

The memo issued last Oct. 16 and officials said the ''re-marking scheme'' involved buying ''inferior quality'' resistors and changing codings or markings on them used to describe their history or reliability, the newspaper reported.

Resistors are used to regulate currents in electronic systems and there was no evidence the resistors have caused problems on shuttle flights, including the ill-fated flight of the shuttle Challenger in 1986.

Nine of 10 Impala resistors recently tested by NASA failed, but officials did not believe there was any danger to shuttle missions.

Impala and its president, Joseph Pistone, are under investigation by the Tampa office of the FBI, the Defense Department's Criminal Investigation Service and NASA's inspector general, the memo and law enforcement officials said.

''It's inappropriate to comment about the criminal investigations,'' said James Smith, a lawyer for the firm. Pistone was unavailable for comment.

Impala does not make resistors but instead buys them from other companies and distributes them to the Pentagon or NASA contractors or subcontractors such as McDonnell Douglas Corp., Boeing, Raython, the Martin Marietta

Corp. and Honeywell Inc.

Impala's resisitors are used in limited but crucial electronic functions in the space shuttle, Pershing and MX missiles, the F-16 jet and various military helicopters.

A safety alert about the company's ''potentially defective resistors'' was circulated in the memo, which was written by the Defense Criminal Investigative Service, which discovered the scheme during a search of Impala's plant last year.

(APRIL 14) UPI - Thunderstorms whipped up large hail and possible tornadoes in Texas early Saturday, while an extended cold snap made for another chilly morning in the East.

The National Weather Service said thunderstorms bowled across Texas and pelted a three-county area south of Fort Worth with golfball size hail. The NWS radar also indicated the presence of tornadoes in the area, but no sightings were reported.

Cold weather chilled the East, one day after low temperature records were broken in 11 cities. Temperatures dipped below freezing in New England and Upstate New York. Readings were in the 30s and 40s through the mid-Atlantic region and as far south as Georgia.

A cold drizzle fell over the Great Lakes, where early morning temperatures dipped into the low 40s.

Temperatures were in the 30s in the northern and central Plains, 50s in the lower Mississippi Valley and Pacific Northwest and in the 60s in Southern California, Texas and the Gulf Coast. The mercury climbed to the 70s in southern Florida and Arizona.

Forecasters predicted another day of above-normal temperatures in the desert Southwest. It was 98 degrees in Phoenix and 93 in Las Vegas on Friday.

#90104u0394 04/14/1990 ~United Press International

BLOOMINGTON, MN (APRIL 14) UPI - The owners of the Minnesota North Stars have denied a television report that the club has been sold.

In a statement issued Saturday through North Stars President Lou Nanne, Gordon Gund said he and his brother, George, have not reached an agreement

to sell the Stars to Howard Baldwin of Los Angeles.

KSTP-TV reported Friday night that a tentative agreement had been reached to sell the franchise to Baldwin, the former owner of the Hartford Whalers.

The station, quoting NHL sources, said Baldwin has a ''hand-shake deal'' with the Gunds to buy the team for $31 million.

But Gund's statement said there was ''absolutely no deal.''

Baldwin said progress has been made during meetings with the Gunds and he is still optimistic. But he added ''it's premature to say that a deal has been done.''

Nanne said he believes the team will be sold and kept in Minnesota, and, he said, he feels Baldwin has the ''inside edge'' in buying the team.

KTSP-TV said it would stand by its story. ''They (Baldwin and the Gunds) have agreed going into the negotiations that it would be held confidential and didn't want anything being said during the negotiations,'' reporter Robb Leer said. ''So it does not alarm or surprise our station or myself that the parties involved are denying the story.''

The Gunds have asked the league for permission to move the team to Oakland saying they have been losing millions of dollars a year on the operation in Minnesota.

Earlier, Baldwin promised to keep the team in Minnesota if he purchased it.

MINNEAPOLIS (APRIL 14) UPI - The Metropolitan Sports Facilities Commission was awarded $3.6 million Friday for defects in the roof of the Metrodome.

A Hennepin County District Court jury found in favor of the commission which had alleged that the Metrodome's roof violated building codes, that it could be destroyed if deflated in high winds, and that the snow-melting system does not work.

The commission filed a suit against the designers, architects and builders seeking $15 million in damages.

Bill Lester, executive director of the commission, said he was pleased at the jury verdict but noted the amount was significantly less than the commission had sought.

He said commissioners would have to meet within the next week to decide whether they are satisfied with the results of the jury award, or whether they will try to press further legal action.

The jury awarded $3,185,316 for the roof, $424,683 for the snow-melting system and $16,731 for the system that maintains the dome's air pressure.

Roof designers Geiger-Berger Associates and project architects Skidmore Owings & Merrill were held 30 percent responsible for the roof damages, while roof contractor Birdair Structures was assessed the remaining 70 percent.

Geiger-Berger and Skidmore Ownings & Merrill shared responsibility for the snow-melting system and Skidmore Owings & Merrill was judged accountable for the air pressure system.

In his opening statement in the eight-week trial that began Feb. 20, Larry Hanson, the attorney for the commission, said the dome roof deflated on three occasions in the early 1980s because the fabric roof was incapable

of properly melting snowfall in the amounts usually experienced in the Twin Cities. The snow-melting system, which pumps hot air between the two fabric layers of the roof, allows a rapid build-up of snow during heavy snowfall, Hanson said.

#90104u0409 04/14/1990 ~United Press International

MOSCOW (APRIL 14) UPI - Polish President Wojciech Jaruzelski attended a poignant memorial service Saturday for thousands of Polish officers killed during World War II, a day after the Soviets admitted responsibility for the massacre.

Units of the Polish and Soviet armies joined in paying military honors to the dead at Katyn and fired in salute during the two-hour ceremony, which included a reading of the roll of the dead and a prayer service led by a Polish chaplain.

Jaruzelski laid a wreath at the monument to the slain Polish officers, which now has an inscription in Russian reading, ''To Polish officers who died in Katyn,'' without mentioning who was responsible for the deaths. An inscription blaming the Nazis was removed last year.

Soviet President Mikhail Gorbachev ended a half-century of denials Friday when he turned over documents to Jaruzelski that showed Josef Stalin's secret police killed 15,000 Polish officers in what is known as the Katyn Forest massacre.

''The Soviet side expressed profound regret over the Katyn tragedy, declaring that it was one of the most heinous crimes of the Stalin era,'' the Soviet news agency Tass said Friday.

''They fought for a free Poland, were innocent but died far from their families and homeland,'' Jaruzelski wrote in a memorial book at Katyn, about 12 miles west of Smolensk in the western Soviet Union.

Jaruzelski ended the official portion of his visit to the Soviet Union Saturday morning in Moscow. He said he was pleased the Soviets finally acknowledged their responsibility for the killings.

''I think these documents will be a very valuable help to historians, not to mention of great value to the families,'' he said.

It was the Soviet admission of the slaughter of the Polish officers - an incident that has soured relations between the two countries for 50 years.

''It is good when the murderers confess their crime,'' Polish Solidarity leader Lech Walesa said from Gdansk.

Poles and independent historians have claimed since the end of World War II that the Soviet secret police killed the Polish officers. But until the Soviet media began publishing information this month from documents of the NKVD, the wartime Soviet security service, the official line in Moscow was that the Nazis were responsible.

At least two Soviet publications printed evidence of the NKVD's involvement, including lists of officers involved, routes used to move the prisoners and other details.

Tass said Soviet historians discovered documents showing that Polish officers, taken prisoner as the Soviets moved into Polish territory under Stalins non-agression pact with Adolf Hitler, were held in camps by the NKVD.

''The documents show that in April and May of 1940, 15,000 Polish officers that were in these camps were taken out,'' Tass said. ''Three hundred and ninety-four people were transferred to Gryazovetsky concentration camp but the main portion were transferred into the hands of the NKVD.

''There was never again any mention of them,'' the agency said.

About 4,000 of the officers were found in mass graves in the Katyn Forest in the western Soviet Union. The other 11,000 bodies are unaccounted for.

(APRIL 14) UPI - TODAY'S PEOPLE

THE WET LOOK BLONDE: The opening show of Madonna's ''Blond Ambition'' world tour was a wet one. A capacity crowd of 34,000 showed up at the stadium in Funabashi, Japan, Friday and didn't seem to mind the steady rain. Madonna, however, had trouble with her footing in the early numbers and had to keep asking the crew to mop the stage for her and her dancers. ''We're going to do the best we can,'' she apologized to her dripping audience. ''I'll bet you didn't know you were going to get an Ice Capades show, did you?'' Madonna has nine concerts scheduled in Japan and the tickets for the Tokyo shows, which cost as much as $62 each, have been sold out for weeks. After Japan, Madonna starts her U.S. tour in Houston on May 4 and afterward will go to Europe.

THE WINDY LOOK PRESIDENT: President Bush also had to put up with some bad weather, but was equally unperturbed. Strong winds raked the swanky Mid-Ocean Golf Club in Hamilton, Bermuda, Saturday, a day after Bush finished his one-day meeting with British Prime Minister Margaret Thatcher. But the president was intent on playing 18 holes before heading to Camp David to join his family for Easter. Among his golfing partners were Dennis Thatcher, the prime minister's husband, Secretary of State James Baker, national security adviser Brent Scowcroft and chief of staff John Sununu. The stakes weren't high: $1 per person, with no handicaps.

TRUMP ON DRUGS: Add Donald Trump to the list of people calling for the legalization of drugs. Trump spoke at a business function Friday in Miami and said, ''You add it all up, and we're losing badly on the war on drugs. We'll never win that war. In my opinion, you have to legalize drugs in order to win the war. You have to legalize drugs to take the profit out of these drug czars that are making billions of dollars in cash.'' The unavoidable topic of Trump's personal life also came up and he used the occasion to lambast the media. ''There's a huge dishonesty in the press,'' he said. ''This recent situation - almost said this recent affair, which would not have been appropriate - is just ridiculous. They have me linked to women I've never even met.'' He insisted he was only a casual acquaintance of ice skater Peggy Fleming and actress Robin Givens, with

whom the media has romantically linked him.

GLIMPSES: Rob Lowe is busy with his video camera again. Lowe is joining Billy Idol, Paula Abdul and the New Kids on Block in contributing video shorts for CBS's Earth Day special, ''The Hard Rock Cafe Presents Save the Planet,'' to be aired Friday ... Arthur Richard Jackson, 53, the obsessed fan who stabbed actress Theresa Saldana eight years ago, pleaded innocent Friday to charges he has again been threatening the kill her when he is freed from jail ... Productions starring Jack Lemmon and spouses Jessica Tandy and Hume Cronyn were among the winners of National Media Owl Awards, which the Retirement Research Foundation gives for positive, realistic portrayals of the elderly. Lemmon's ''Dad'' was first in the fictional movie category with second going to Tandy's ''Driving Miss Daisy'' and third to Cronyn's HBO movie ''Age Old Friends.''

WASHINGTON (APRIL 14) UPI - The Bush administration, dissatisfied over the continuing political crackdown in China, barred Chinese scientists and economists from this week's White House conference on global change.

The two-day conference, which will be opened Tuesday by President Bush in Washington, fulfills an August 1988 campaign promise to call an

international meeting to discuss the scientific and economic implications of global warming.

In his campaign speech, Bush said he would invite representatives of other countries ''including the Soviet Union and China'' to the meeting.

But the Chinese will be conspicuously absent when some 200 scientists and economists from 17 nations and the European Community gather this week in Washington for the conference.

''The decision (not to invite the Chinese) was made about six weeks ago. Clearly events in China changed'' since Bush made the proposal in 1988, said Michael De Land, a White House official in the office of the Science Adviser.

The Chinese government has been harshly criticized for its move against pro-Democracy students demonstrating last spring in Beijing's Tiananmen Square.

The reason for the Chinese absence at the meeting, according to a deputy spokesman for the conference, Gary Pitchford, remains U.S. dissatisfaction with the pace of Chinese political reforms.

''We're still in a sensitive period in our relations with China,'' Pitchford said. ''The internal situation in China remains unsatisfactory. The invitations to the White House Conference on Global Change were issued in that light.''

The conference will deal with the economic, environmental and scientific implications of the global warming trend. The absence of the Chinese will mean about one-fifth of the world's population will not be represented at the meeting.

Bush signed an executive order Thursday that will allow Chinese students in the United States to remain in the country until at least 1994, in order to escape any possible political punishment in China.

U.S. policy continues to block high-level exchanges with China until there is an easing of the political oppression in China.

There also is a ban on military contacts, although the U.S. government permitted an American commercial communications satellite to be launched by a Chinese rocket last week.

The Chinese government has tightened up on permission for Chinese students and scientists to travel abroad, although the Beijing government indicated it would be willing to resume the Fulbright Scholars Exchange program and would be willing to reopen discussions with the United States about

admitting a Peace Corps contingent.

The communist leadership has not permitted Chinese scientist and dissident Fang Lizhi to leave the country and he and his wife remain secluded in the U.S. embassy in Beijing.

One administration official described the U.S.-China relationship as ''sensitive and complex,'' saying it is further complicated by political pressures within the U.S. government, including congressional demands that Bush step up sanctions to bring American influence to bear on the leadership in Beijing.

BALTIMORE (APRIL 14) UPI - An instrument that measures nuclear power production malfunctioned and was corrected early Saturday at the Calvert Cliffs nuclear plant, about 12 hours after the first restart of the Unit 1 reactor in 11 months.

Baltimore Gas & Electric spokesman Art Slusark said the ''unusual event'' occurred about 2 a.m. and involved a power indicator, one of several systems that indicate the power level of the reactor.

He said that while the instruments were being calibrated, one instrument was registering more production than was being produced.

''One of these systems was reading an inaccurate measure,'' Slusark said. ''It was an error on the conservative side.''

Slusark said power was lowered in Unit 1 and the turbine generator was taken off line. Adjustments were made and the ''unusual event'' was corrected by about 4:30 a.m.

The turbine generator, which produces the electricity, was expected to be returned to service Saturday and was not expected to delay plans to bring the reactor back up to full power temporarily.

''Let me emphasize that this was never an issue of public safety,'' said George Creel, vice president of Nuclear Energy for BG&E. ''It was an instrumentation problem that was handled in a safe and conservative manner.''

Slusark said the Nuclear Regulatory Commission was notified of the problem.

The plant was shut down in May after cracks were found in the Unit 2 pressurizer and federal inspectors wanted to ensure that there were no cracks in the Unit 1 reactor. None were found but the NRC determined there were other equipment and management problems and kept the plant out of operation until changes were made.

The NRC gave Calvert Cliffs clearance to restart the reactor after

concluding the utility met conditions to improve safety and plant operations. In the iterim, BG&E has been forced to purchase electricity from other sources, at about $600,000 per day.

The Unit 2 reactor is expected back on line late this year.

#90104u0591 04/14/1990 ~United Press International

(APRIL 14) UPI - A threat from Mikhail Gorbachev... a warning from George Bush... tough talk by the superpower leaders tops this morning's news from United Press International.

President Bush may have more than a round of golf on his mind today as he wraps up a trip to Bermuda before heading back to the United States.

Bush and British Prime Minister Thatcher met for four hours on the resort island yesterday and issued a stern warning to Soviet President Gorbachev to ease up on Lithuania.

Gorbachev has given leaders of the Baltic republic two days to rescind their declaration of independence or face a cut-off of essential supplies. But Lithuania's president says the parliament of the breakaway republic has NO plans to interrupt its Easter holiday.

The Gorbachev ultimatum is the toughest Soviet coercion since Lithuania declared its freedom March 11th.

Bush called Gorbachev's threat ''deeply disturbing''... and both he and Thatcher say Moscow's relations with the West will be jeopardized by any Soviet escalation of pressure on Lithuania.

The Bush-Thatcher meeting touched on a number of issues other than Eastern Europe, including arms control, South Africa, the upcoming Bush-Gorbachev summit and Iraq's quest for high-tech weapons. Thatcher plans a June meeting with Gorbachev.

After playing golf today, President Bush heads for Camp David to spend Easter Sunday with his family. Bush plans to meet with French President Mitterrand in Key Largo, Florida, next week.

#90104u0594 04/14/1990 ~United Press International

(APRIL 14) UPI - NASA officials expect the ultra-sensitive Hubble Space Telescope to get a little dusty during work to prepare the shuttle Discovery for a delayed April 25th launch.

But they don't think the dust will cause any problems with the deployment or operation of the telescope when it's finally placed in orbit by the Discovery crew.

Tuesday's scheduled launch was scrubbed when an auxiliary power unit on the shuttle malfunctioned.

The Hubble telescope is loaded in the shuttle's cargo bay, and removing it at this late date would almost certainly push the mission back until autumn.

In spite of Discovery's problems, NASA appears to be moving ahead of the Soviets when it comes to putting women in space.

The Soviets have NOT put a woman in orbit since 1984. The official in charge of training cosmonauts admits that current Soviet policy is that women are NOT up to strenuous activities such as walking in space.

He also referred to the- quote- ''moral and ethical problems'' raised by men and women sharing the same space capsule.

NASA officials say they have NO such qualms about putting women in orbit. One NASA official says ''there is absolutely NO reason'' for women to be refused duty in space. Of the 86 U-S astronauts on active duty, 12 are women.

-30- 1457

#90104u0604 04/14/1990 ~United Press International

(APRIL 14) UPI - A French newspaper puts a new twist on the release of three European hostages in Lebanon this week.

The report says that Libya's Colonel Gadhafi was NOT the mediator that helped gain the captives release... but the captor, holding the hostages in Libya... NOT in Lebanon.

Quoting sources in Beirut, Paris and Brussels, the paper says it was the government of Algeria that served as intermediary to free a 31-year-old French woman, Jacqueline Valente, her Belgian boyfriend and their baby daughter.

French officials could NOT confirm or deny the report. The Foreign Ministry told U-P-I that it's unclear precisely where and when the freed hostages and five other persons were taken prisoner. It's also unclear who actually carried out the operation.

The newspaper cast doubt on a claim by the extremist Abu Nidal group that it captured eight passengers on a tuna boat off the coast of the

Israeli-occupied Gaza Strip in 1987. The paper says that some officials believe the boat was intercepted by Libya's navy off the Lebanese coast.

East Germany is about to take one of its first concrete steps toward German reunification.

In East Berlin yesterday, a spokesman said Prime Minister Lothar de Maiziere will set a timetable next week for unification talks.

The spokesman said the prime minister hopes a preliminary treaty with West Germany can take effect July 1st. The talks will focus on provisions of a treaty to form an economic, monetary and social union of the two German states.

De Maiziere is expected to announce a date for the preliminary unification talks next Thursday when he spells out his government's platform in a speech to Parliament.

The prime minister led his conservative Christian Democratic Party to victory last month in East Germany's first free parliamentary election. He was chosen Thursday to be the country's first non-communist leader.

#90104u0608 04/14/1990 ~United Press International

(APRIL 14) UPI - Lawyers trying to save the life of condemned killer Robert Alton Harris are demanding the judge that refused to stay his execution be barred from the case.

On April 3rd, Harris came within 12 hours of being the first person executed in California since 1967. The U-S Supreme Court intervened, by upholding an indefinite stay of execution to give a federal appeals court time to review new legal arguments.

Defense lawyers filed papers yesterday in an effort to bar Federal Judge William Enright of San Diego from the case. He earlier denied a Harris appeal for an evidentiary hearing for new arguments about his psychiatric condition. The judge also criticized defense lawyers for saying previous lawyers did NOT competently represent Harris.

If a three-judge appeals court panel approves an evidenitary hearing, that hearing would take place in San Diego. So defense lawyers want to avoid another bout with Enright.

Lawyers for Harris say that, had the jury heard arguments that Harris was afflicted with an organic personality disorder and other brain dysfunctions, it likely would NOT have condemned him to die.

Environmentalists want to help consumers choose products that meet tough environmental standards, right down to their advertising claims.

The National Toxics Campaign argues that there is ''too much undocumented, unsubstantiated, false and misleading advertising in the market place.''

So, environmentalists joined with four Western retailers and grocery chains to reward goods that meet strict guidelines to benefit the environment. The plan calls for manufacturers to pay an independent group... The Green Cross Certification Company... on a fee-for-service basis to audit their products to possibly qualify for a Green Cross Recyclying Seal of Approval.

The seal would be awarded if a product is made from at least 50 percent recyled or sustainable materials... has NO detected residue of highly toxic emissions... will NOT deplete the ozone, and if advertising claims for the product can be verified.

New York Attorney General Robert Abrams gave the idea his endorsement.

-30- 2320

#90104u0666 04/14/1990 ~United Press International

NEW YORK (APRIL 14) UPI - Police Saturday pressed their search for a gray-haired man who shot and killed a mugger after a violent subway robbery and then calmy walked off at the train's next stop.

Police said they hoped two developments - the arrest of a suspect who allegedly was an accomplice to the mugging and the discovery of the weapon used to threaten the robbery victim - would help lead them to the middle-aged man.

The man, riding a Manhattan-bound No. 4 train in Brooklyn Thursday night, was beaten, robbed and threatened with a gun before he drew his own weapon firing three shots, one of which hit Ricky Pickett in the chest and killed him.

A wristwatch with a broken clasp, apparently taken from the shooter, was found in the pocket of Pickett, 25, who police said had a history of robbery arrests dating back to 1984.

Police were hunting the mugging victim because they investigate all shootings, said Sgt. Norris Hollomon, a police spokesman.

The victim's case has drawn comparisons to that of Bernhard Goetz, who shot four youths who asked him for $5 on a subway train in 1984.

Goetz, who was never actually attacked, was acquitted in the shooting but

was eventually convicted on charges of possessing an unlicensed gun. He served eight months in prison and still faces civil lawsuits.

Authorities have stressed that the latest incident differs signficantly from the Goetz case because the victim was beaten and robbed before he fired his gun.

''This is not the Bernhard Goetz case,'' said Deputy Chief Joseph DeMartino, commander of Brooklyn Detectives. ''This is an individual who was clearly being robbed and lost his property and drew a weapon and shot his assailant.''

A friend of Pickett's who allegedly was part of the gang that robbed the shooter was arrested on robbery and assault charges late Friday night after being questioned by authorities, Hollomon said.

He said that because Melvin Kirkland, 17, ''played an active role in the incident,'' his arrest may help authorities find the mugging victim.

In addition, authorities were searching for as many as three other people who may have been accomplices to the mugging.

Police Saturday said the weapon used to threaten the mugging victim, a .25-caliber automatic handgun, was recovered, but they refused to specify where or when it had been found.

Pickett was among a group of up to 20 young men headed for a disco in Manhattan who were seen passing around a gun, a bottle of brandy and a marijuana cigarette while riding the subway in Brooklyn, police said.

After beating another man, Pickett turned his attention to a white, gray-haired rider dressed in a beige raincoat and brown slacks who had been sitting in the muggers' car.

Davis said Pickett and his gang grabbed the older man, pulled him out of his seat, beat him, threw him down into another seat and kicked him.

The middle-aged man fought back, firing the fatal shot before walking into another car, police said. When the train pulled into next stop, the Borough Hall station, the shooter and the rest of the group all scattered.

#90104u0673 04/14/1990 ~United Press International

LOS ANGELES (APRIL 14) UPI - At least 55 members of Operation Rescue were arrested Saturday trying to blockade a health clinic in the last of seven days of anti-abortion protests, authorities said.

More than 500 demonstrators from both sides of the abortion issue began massing on the Family Planning Associates clinic about 7 a.m., police Sgt. Alan Bollinger said. The same clinic was the site of a protest during Easter Week last year that led to more than 750 arrests.

By 8 a.m., about 100 officers, some on horseback and others wearing helmets and wielding batons, were also at the scene. Buses were called to take those arrested to a field jail, Bollinger said.

Arrests began shortly after 9 p.m., and by 10:30 a.m., at least 55 people had been arrested, handcuffed with plastic bands and led onto buses.

The gathering appeared to be equally divided between members of the anti-abortionist Operation Rescue, who have vowed to block access to clinics performing abortions, and supporters of abortion rights, who claimed to have escorted at least eight patients safely inside.

Operation Rescue spokesman Guy Keith said the blockade ''is to save unborn babies from the abortionists. It's Easter week and there is a religious connotation to it.''

The group's foes called the anti-abortionists ''fanatic demonstrators'' and claimed the protesters were outnumbered by their opponents.

''Operation Rescue is disintegrating,'' said Kathy Spillar, national coordinator for The Fund for the Feminist Majority. ''Their numbers are but a fraction of what they were at this site a year ago.''

About 200 other abortion rights supporters, members of the Clinic Defense Alliance of Los Angles, kept vigils at other area clinics, saying they were concerned that Operation Rescue demonstrators would take their protest elsewhere.

Operation Rescue members have targeted various Southern California health clinics in the past week, forming human blockades to keep out patients who are scheduled for abortions.

Friday, police in the Orange County city of Tustin arrested 48 members of the militant group on complaints from the owner of a clinic they had blockaded. The Friday arrests were the first in a series of Easter Week protests.

#90104u0716 04/14/1990 ~United Press International

SPRINGFIELD, IL (APRIL 14) UPI - Abraham Lincoln, the nation's 16th president, was remembered at his grave Saturday on the 125th anniversary of his assassination.

Lincoln was struck by a bullet from the gun of actor John Wilkes Booth at Ford's Theater in Washington, D.C., on April 14, 1865, and died a day later.

About 150 people, mostly members of Midwest veterans groups, attended a somber ceremony in near-freezing temperatures at Lincoln's tomb at Oak Ridge Cemetery in his hometown of Springfield.

Lincoln lived in Springfield - in the only home he ever owned - as a lawyer and state legislator from 1844 until after he was elected president in 1860.

During the tribute, Charles Corfman, commander-in-chief of the nationwide group Sons of Union Veterans, read the farewell address Lincoln gave in Springfield on Feb. 11, 1861.

In that speech, given as left to take the oath of office in Washington, Lincoln said he would probably have to end his close relationship with the people of central Illinois.

''It is rather ironic that he would speak like this so shortly before his assassination. It was prophetic,'' Corfman said.

An exhibit opened Saturday at the Lincoln Home Visitor Center in Springfield with artifacts from Ford's Theater, where Lincoln was shot while watching the play ''Our American Cousin.''

The display includes one of two coins placed on Lincoln's eyelids after he died, a lock of his hair and the blood-stained collar that a doctor removed while trying to save the dying president.

#90104u0729 04/14/1990 ~United Press International

MOSCOW (APRIL 14) UPI - Lithuania's leaders met Saturday to discuss a Soviet threat to cut off key supplies and the republic's president again rejected Moscow's ultimatum to rescind a declaration of independence by Easter Sunday.

Lithuanian President Vytautas Landsbergis repeated after a meeting of the presidium of the republics Council of Ministers that the republic would not meet a Sunday deadline set by Moscow for independence measures to be revoked.

Landsbergis said the full Council of Ministers would meet Monday and the Parliament would meet as scheduled Tuesday, but he added there was no chance the republic would back away from independence in the face of the

threatened cutoff of supplies.

Wryly referring to the ultimatum Friday from Soviet President Mikhail Gorbachev and Prime Minister Nikolai Ryzhkov as an ''Easter present,'' Landsbergis said it was unclear how much Lithuania would be hurt if oil and other products from the Soviet Union were cut off.

''First we have to get an accurate count of our resources, then we will see what Moscow will do exactly,'' Landsbergis told local reporters in the republic's capital Vilnius.

An account of the news conference was provided by the Lithuanian information office. The Kremlin refuses to allow foreign reporters to travel to Vilnius.

Landsbergis said the republic produces plenty of food and light industries could continue if Moscow carries out the threat, but the biggest problem would be energy.

Lithuania is dependent on the Soviet Union for oil and gas, which it is able to purchase for less than one-third of the open-market price. Landsbergis said oil supplies would reach a critical stage a month or two after a total cutoff if there was no help from the West.

Since it declared its intention to secede from the Soviet Union, Lithuania has approached Scandinavian and other Western countries about oil and other supplies, but there have been no definite agreements.

Landsbergis said Lithuania also would try to establish economic ties directly with other Soviet republics, where independence sentiments may find some sympathy.

The latest threat shows that the Soviet leadership may be beginning to accept the fact Lithuania will secede, the Lithuanian president said.

''If Moscow makes us pay hard currency that will show they consider us a foreign state,'' he said.

Soviet economists have estimated that if Lithuania is forced to pay hard currency and market prices for Soviet goods the republic would face a $5.6 billion trade deficit.

Friday's letter from Gorbachev and Ryzhkov said the republic's ''position in the federal state tightens into an ever tighter knot.''

''We are looking to the Lithuanian Supreme Soviet and Council of Ministers to take decisions that will restore the republic's position to that of March 10, 1990,'' before the declaration of independence, the letter said.

If the measures are not rescinded, the letter said, Soviet enterprises will be told to stop supplying Lithuania with goods also sold on the world market.

The ultimatum drew swift criticism in the West.

President Bush and British Prime Minister Margaret Thatcher, meeting for a one-day summit in Bermuda, said the new pressure could hurt relations with the Soviets. ''Now is no time for escalation,'' Bush said.

British Foreign Secretary Douglas Hurd, who met with Gorbachev earlier in the week, also criticized the ultimatum.

''Unless it is handled through dialogue rather than coercion there would be a penalty to pay in terms of Russia's dealings with the West,'' Hurd told the British Broadcasting Corp.

U.S. Senate majority leader George Mitchell, who lead a delegation of Democratic senators that just completed an official visit to the Soviet Union, told reporters: ''The action taken yesterday was wrong. We condemn it.''

In Rome, Pope John Paul II met with a top Soviet adviser Saturday and sent a telegram of encouragement to bishops in mainly Catholic Lithuania.

''In these hours of trepidation and of hope I am particularly close to the Lithuanian church,'' the pope's telegram said.

(APRIL 14) UPI - President Bush hits the golf course early today on the resort island of Bermuda, where he concluded one day of talks yesterday with British Prime Minister Thatcher. The two leaders closed their talks on the Western alliance by warning Soviet President Gorbachev that the use of force is an unacceptable response to Lithuania's bid for independence from Moscow.

A Delta-2 rocket launch yesterday helped shed an Indonesian satellite's trail of bad luck by putting the 60-Million-dollar relay station into a successful orbit. An onboard rocket will fire tomorrow to put the satellite in a orbit about 22-thousand miles above Earth in the skies over Indonesia. The satellite was sent into a useless orbit in 1984, but U-S astronauts retrieved it nine months later. The Delta-2 rocket yesterday put the refurbished satellite back in space.

Northern Washington state and southern British Columbia were rattled

yesterday by an earthquake measuring five-point-one on the Richter scale. The quake shook counters so severely at a customs building on the Canadian border at British Columbia that the two-story structure was evacauated. There were NO reports of serious injuries or damage.

New York police are searching for a subway rider who resisted would-be robbers and fatally shot one of his attackers. Police say the man was beaten and robbed Thursday night on a Manhattan subway train before he finally pulled a handgun and fired, killing Ricky Pickett. Police say 25-year-old Pickett had a history of robbery arrests dating back to 1984.

About 200 Emory University students held a rally yesterday protesting racial harassment of a black student whose relatives say is suffering from emotional trauma from several incidents. Relatives say Sabrina Collins had racial slurs painted on the walls of her room at the Decatur, Georgia, school. Both black and white students at the rally say Emory University allows a climate that encourages racism.

The Bush administration eased travel restrictions for foreigners with AIDS attending U-S conferences. Immigration officials say the policy change eliminates AIDS tests for foreigners going to ''professional, scientific or academic conferences'' judged as ''in the public interest.'' Other types of travelers must undergo AIDS testing and apply for 30-day waivers to enter the United States.

#90104u0805 04/14/1990 ~United Press International

WASHINGTON (APRIL 14) UPI - Senate majority leader George Mitchell, returning Saturday from Moscow, condemned a Soviet threat to cut off some supplies to Lithuania if the republic does not rescind its independence declaration.

Mitchell, D-Maine, who led a delegation of Senate Democrats to Berlin and Moscow, characterized a two-hour meeting Thursday with Soviet leader Mikhail Gorbachev as ''frank and wide-ranging'' and said the group discussed economic reform in the Soviet Union, arms control and Lithuania.

''During our meeting, President Gorbachev stated his intention to resolve the situation in Lithuania by peaceful, non-violent means,'' Mitchell said at a news conference at Andrews Air Force Base in suburban Maryland upon his return from the Soviet Union. ''But an act need not involve direct violence to be wrong.

''The action taken yesterday was wrong. We condemn it,'' he said. ''By threatening to stop supplies of certain essential products from other Soviet republics to Lithuania, the Soviet Union is obviously trying to intimidate and coerce the Lithuanian people.

''Such tactics are unwise and inappropriate,'' Mitchell said in describing the ultimatum as an ''escalation'' of tensions between Moscow and the Baltic republic, which declared its independence from the Soviet Union on March 11.

Accompanying Mitchell on the trip were senators Bill Bradley, D-N.J., Thomas Daschle, D-S.D., Wyche Fowler, D-Ga., John Glenn, D-Ohio, Paul Sarbanes, D-Md., and James Sasser, D-Tenn.

The majority leader noted that his meeting with the Soviet leader took place a day before the leadership in Moscow announced its intention Friday to impose a limited economic blockade on the rebellious republic.

''The discussion we had with (Gorbachev) focused on the question of the use of force,'' the Democratic leader said. ''He explained the situation from the Soviet perspective and described in some length the reasons for that Soviet position.''

Mitchell declined to advocate any U.S. response to the Soviet threat, noting that the delegation would be meeting ''soon'' with President Bush to report on the visit.

''We do not know what the president will decided to do,'' Mitchell responded when asked if he thought Bush should cancel his planned May 30-June 3 summit with Gorbachev in the United States in light of the Soviet ultimatum.

The senator said he was not carrying any specific messages to Bush from Gorbachev other than ''his general wishing the president well and looking forward to seeing him at the summit.''

(APRIL 14) UPI - President Bush teed off on a golf course on the resort island of Bermuda this morning to wind down from a marathon round of talks yesterday with British Prime Minister Thatcher. The two leaders concluded their talks with a warning to Soviet President Gorbachev that force constitutes an unUNacceptable response to Lithuania's bid to secede from the Soviet Union.

Millions of people are confined to their homes under a curfew in India's Kashmir state, where a paramilitary officer was killed today in a grenade attack by Moslem separatists. Kashmir has been under a curfew for nine days, with many residents complaining about a worsening food shortages. Kashmiri Moslems are demanding independence from Hindu-dominated India.

New York police say three men chased a frightened teen-ager onto a city bus in Brooklyn, firing shots into the floor that sent passengers and the driver fleeing into the street. Police say the youths hijacked the bus. But the bus was found later six blocks away with the engine still running. NO one was hurt. Police are still UNsure what the original chase was all about.

Seven people aboard a single-engine plane were injured yesterday when the plane crashed on takeoff at Grand Canyon National Park Airport. Six victims were taken to a Flagstaff hospital. The plane went down in a ravine about a mile from the end of the runway at the airport, which is just outside the boundaries of the Grand Canyon National Park.

The king of Nepal told his country that he was sorry people died in the six-week pro-democracy movement. At least 52 poeple wre killed in protests that began in February. In a speech to mark the Nepalese New Year 2047, King Birendra vowed today that politics in the Himalayan kingdom ''have now taken a new turn.'' Last week, the king lifted a 29-year-old ban on political parties after violent protests threatened his 18-year rule.

Residents of Springfield, Illinois, scheduled weekend observances marking the 125th anniversary of the assassination of Abraham Lincoln. The former president was hit by a bullet from actor John Wilkes Booth's gun as Lincoln watched a play at Ford's Theater in Washington. Lincoln died the next day, April 15th, 1865. A wreath-laying ceremony at Lincoln's tomb is planned and a display of artifacts at the only home Lincoln ever owned.

#90104u0905 04/14/1990 ~United Press International

VATICAN CITY (APRIL 14) UPI - Pope John Paul II ended a day of prayer and meditation Saturday as he presided over a candle-light Easter Eve vigil in St. Peter's basilica attended by up to 20,000 pilgrims and tourists.

Wearing white-and-gold vestments, the Polish-born pope led the world's 840 million Catholics out of the 40-day penetential period of Lenten mourning and into the joyous 50-day Easter period that runs until the Sunday of Pentecost.

The lavish three-hour vigil inside the world's largest Christian church began with John Paul bearing a 5-foot candle and leading a spectacular procession of cardinals, priests, altar boys and Swiss Guards through through the darkened basilica on a chilly spring night.

The 69-year-old pope had used a sharp knife to inscribe in candle with the sign of the cross, the year of the ceremony and the first and last letters of the Greek alphabet, alpha and omega, which signify Christ's eternal nature.

Into the flame of the candle John Paul inserted five grains of incense signifying the wounds that Christ suffered during his Good Friday crucifixion.

The papal procession paused three times on its way to the ornate carved bronze Bernini canopy at the basilica's center. By the third stop, thousands in attendance had ritually lighted their own candles, bathing the vast hall in flickering light until the church's lights were switched on.

Characterizing the ceremony was the Easter message: ''The church calls its children to this vigil in prayer.''

At midnight, Rome erupts with the sound of bells - silent throughout Saturday's day of mourning - ringing in the city's 500 churches to proclaim Christ's resurrection.

Catholics consider Easter the most important of all religious celebrations believing that the resurrection confirms Christ's divinity.

The candle ceremony was followed by a high mass, the baptism of 20 pilgrims and the blessing of water to be used in liturgical rites throughout the year.

On Easter morning the pope celebrates an open-air mass before some 200,000 pilgrims and tourists on the portico of St. Peter's Basilica. At that time he delivers his blessing ''Urbi et Orbi'' (to the City and the World) from the basilica's central balcony overlooking St. Peter's Square.

#90104u0952 04/14/1990 ~United Press International

(APRIL 14) UPI - President Bush got in some golf this morning in Bermuda... where he met yesterday with British Prime Minister Thatcher. Bush told reporters today that he heard NO more word on a Soviet threat to impose a partial blockade on independence-minded Lithuania. Bush and Thatcher warned Moscow yesterday against the use of force in response to Lithuania's bid to break with the Kremlin.

NO reports of serious damage or injuries in a strong earthquake that rumbled through northern Washington state and southern British Columbia last night. The quake measured five-point-one on the Richter scale and was centered about one mile south of Deming in Whatcom County, Washington. University of Washington seismologists say the quake was the third and most severe to hit the area in 12 days.

Chinese sources say the Beijing government issued an internal directive

forbidding any events marking the first anniversary of a reformist leader's death. Sources report the Communist Party's Central Committee order was sent to all government offices. The death of Hu Yaobang last April 15th triggered pro-democracy protests that ended when troops opened fire on protesters June 3rd and 4th.

Timber workers and environmentalists are at odds over the northern spotted owl. About seven-thousand loggers and millworkers jammed downtown Portland Oregan yesterday to protest efforts to protect the owl. A federal report recommends making three-Million acres of woodlands off limits to loggers to protect the bird. It lives mainly in centuries-old forests that have never been logged. Industry officials say the move would cost 30-thousand jobs.

Films starring Jessica Tandy and Jack Lemmon were the big winners announced yesterday the National Owl Awards, given annually for realistic portrayals of the elderly. The movie ''Dad'' won in the Television and Theatrical film fiction category. It starred Lemmon as a man who rediscovers his relationship with an adult son. The second place winner in the category was the Oscar-winning film ''Driving Miss Daisy,'' which starred Tandy.

A poll shows Cincinnati area residents want a controversial exhibit of homosexually explicit photographs by Robert Mapplethorpe to remain display at an art gallery. A University of Cincinnati's Institute for Policy Research poll shows 59 percent of Hamilton County residents want the photos to be shown. A grand jury last week indicted the gallery on obscenity charges.

#90104u0959 04/14/1990 ~United Press International

PALM SPRINGS, CA (APRIL 15) UPI - A young man was struck by a car and injured Saturday as police braced for the end-of-the-season onslaught of spring break vacationers who annually converge on the desert resort.

The accident was the latest serious incident involving high school and college students who flock to the Southern California desert as part of the annual rite of spring that often turns into a non-stop bacchanal featuring thousands of partyers.

Last week, a teenage girl died and three others were injured when a drag-racing car crossed the center line of a Rancho Mirage highway and crashed head-on with a small sports car. A vacationing student seeking directions to a motel was shot and wounded early Wednesday, while five other people congregating at a gasoline station were robbed at gunpoint.

In Saturday's incident, the victim, described by police as in his late

teens or early 20s, was hit by a car on East Palm Canyon Boulevard outside a district heavily dotted with hotels. No additional details were available.

By Saturday afternoon, Palm Springs police reported a total of 909 arrests during the weeks-long spring break. Of those arrests, 539 people were booked into Palm Springs Jail and the remainder were cited and released.

Of those taken to jail, 337 were arrested on suspicion of public drunkenness or other alcohol-related crimes. At least 4,874 citations have been issued since students began arriving in the city four weeks ago, police Lt. Lee Weigel said.

The city, which normally has a population of about 40,000, is the involuntary host to some 70,000 celebrants each spring. Weigel said the largest crowds hit the town during Easter Week.

''It could very easily be at that mark now,'' Weigel said. ''We've had spring breakers in town for about four weeks, but nothing near this magnitude.''

To cope with the influx, the 80-member Palm Springs Police Department bolsters its ranks with about 60 police officers on loan from other departments. To pay for the additional law enforcement, a special $15 surcharge is added to each citation issued during the party period.

The reinforcements were added following the 1986 spring break when vacationing students went on a rampage, throwing rocks and bottles at police and causing thousands of dollars in damage to local businesses.

#90104u1001 04/14/1990 ~United Press International

RIGA, Latvia, U.S.S.R. (APRIL 15) UPI - Nearly 600 breakaway Communist Party members formed a new party Saturday dedicated to the creation of an independent Latvia with full rights to private property.

''The voters have voted for an independent, sovereign Latvia,'' said Ivars Kezbers, the former Communist ideology chief chosen to lead the new party. ''This demands a change from us as well.''

The split among the Latvian Communists followed March 18 elections in which nationalist activists gained control of the Latvian republic's Parliament.

The delegates to the founding congress Saturday included 263 Communists who walked out of the 25th Congress of the Latvian Communist Party last week to reject ties with the Moscow-controlled party, and 302 other local Communist officials from throughout the republic.

Kezbers, the 45-year-old leader of the new party, was ideology chief of the Latvian Communist Party until he joined the April 7 walkout.

Some of the Latvian government's highest officials joined the breakaway Communists, among them Prime Minister Vilis Bresis, Deputy Prime Minister Alfreds Chetanis and Foreign Minister Eizens Pocs.

Kezbers said ''(Mikhail) Gorbachev is one of the main forces moving our perestroika (restructuring) forward,'' but Bresis said the Soviet president will likely react negatively to the radical Communists' split.

''He won't be especially happy about this, but you have to get used to these sort of political processes,'' Bresis said.

Gorbachev sharply criticized the Lithuanian Communist Party's decision in December to break from Moscow and went to that republic in January to try to halt the move.

The new Latvian party voted to withdraw from the Soviet Communist Party and then adopted ''Independent Communist Party of Latvia'' as a temporary name until a party-wide referendum expected to drop the Communist affiliation entirely.

The party claims 32,000 supporters it says will become members, including non-Communists and some of the Moscow-aligned Latvian party's 180,000 members.

''The political goals of our organization are a democratic society and an independent Latvia,'' said Marite Rukmane, one of the leaders. ''To reach this goal, the (new) Communist Party of Latvia must become an independent organization whose ties with other parties are based on mutual respect and cooperation.''

Late Saturday, the new party adopted a platform calling for an independent Communist Party, a free Latvia, all forms of private property and rejection of both the goal of a utopian communist society and the republic's 1940 annexation by the Soviet Union.

''We are for real internationalism,'' Vilis Krumins, director of the Latvian museum of natural history, told the delegates. ''We are against Russian chauvinism.''

Popular Front leaders who orchestrated the nationalists' election triumph last month predicted Latvia's new Parliament will declare the republic's independence soon after it convenes May 3.

The radical Communists scheduled a one-day meeting Saturday to to allow

delegates to celebrate Easter Sunday in the republic, whose majority Latvian population is split mainly among Lutherans and Roman Catholics.

Residents of Riga stood outside the University of Latvia building where the delegates met and sat on benches in a park across the street, listening to radio broadcasts of the congress and holding animated debates on its speeches.

Five people stood outside the building's entrance with signs and banners including one that read: ''Throw out the occupiers. Freedom to Latvia.''

Unlike in the secession-bent neighboring republic of Lithuania, where a vast majority of the Communist Party leadership broke from Moscow on Dec. 20, the Latvian radicals who walked out of their party's congress represented only about one-third of its leadership.

The conservative Latvian communists remaining loyal to Moscow, who still run the republic's party-controlled media and all party buildings, reacted to the breakaway faction's desertion with a mixture of glasnost-style tolerance and Brezhnev-era intimidation.

The loyalists allowed the radicals' founding congress to be broadcast on Latvian television and radio, but they shut down the Rigas Balss newspaper of the party's Riga branch after it endorsed the independent communists.

#90104u1016 04/14/1990 ~United Press International

LONDON (APRIL 14) UPI - Several hundred Britons incensed over a controversial tax scheme burned their poll tax bills Saturday as thousands of demonstrators took to the streets in cities across England to peacefully denounce the plan.

About 2,000 demonstrators marched at Halifax, West Yorkshire, about 200 miles north of London, the British Broadcasting Corp. said. Some demonstrators tossed their poll tax bills into a contained fire.

In nearby York, organizers told the BBC they burned about 100 poll tax forms to show their contempt for the community charge - a highly unpopular new tax that went into effect April 1 in England and Wales.

Similiar demonstrations were reported in Brighton, Bath and Tunbridge Wells but with no reports of public disorder.

The peaceful demonstrations came two weeks after a similar tax protest erupted into a riot in central London, in which citizens battled police, overturned cars, looted shops and set buildings afire.

The tax requires local city councils to set a flat sum that must be paid by every Briton who is at least 18 years old, with some exceptions, and does not vary according to wealth.

#90104u1056 04/14/1990 ~United Press International

(APRIL 14) UPI - President Bush heads back to Washington today from Bermuda, where he met yesterday with British Prime Minister Thatcher. Bush says when he gets back, he'll check intelligence reports on the latest Soviet pressure being applied against Lithuania. Moscow yesterday threatened a partial economic blockade against the rebellious republic. Bush and Thatcher responded by warning Mikhail Gorbachev that force against Lithuania is unacceptable.

Two more Greyhound buses were hit by gunfire, but there were NO injuries. Officials say a bus headed for Nashville, Tennessee, from Birmingham, Alabama, was hit by a bullet early this morning near Warrior, Alabama. Last night, a bus was hit by a bullet just outside Dallas, Texas. They're the latest snipings in the strike that has been plagued by violence since 63-hundred union drivers walked off the job March 2nd.

NASA engineers say April 25th is ''about the best we can expect'' for a launch date for the shuttle Discovery. The ship was grounded Tuesday four minutes before launch when one of its three auxiliary power units malfunctioned. A new unit is being installed next week, and the batteries will be recharged in the Hubble Space Telescope, which is Discovery's payload. NASA says the telescope's ultra-clean mirror will be exposed to only a tiny bit of additional dust during the delay.

#90104u1078 04/14/1990 ~United Press International

(APRIL 14) UPI - The king of Nepal appeared at a ceremony today marking the Nepalese New Year, expressing sorrow for the lives that were lost during the pro-democracy reform movement in the Himalayan kingdom. Last week, the king lifed a 29-year-old ban on political parties in response to demands from protesters. At least 52 people died during six weeks of violent protests that had threatened to end the king's 18-year rule. Reinstatement of political parties was one of the movement's chief demands.

One of the leaders of last year's pro-democracy movement in China re-appeared in Paris today with her husband. Chai Ling said she arrived in France two weeks ago after 10 months underground trying to escape from China. Chai, who will be 24 tomorrow, called on Western nations to toughen sanctions against Beijing. She's one of 21 dissidents wanted by the Chinese government following last June's massacre in Tiananmen Square that crushed the pro-democracy movement.

#90104u1122 04/14/1990 ~United Press International

FAIRBURN, GA (APRIL 15) UPI - A high school track star who collapsed and died following a warm-up jog with teammates had an abnormal heartbeat, medical authorities said Saturday.

An autopsy was performed on Craig Tarleton, 17, a junior at Campbell High School in the small town southwest of Atlanta.

Medical examiners said preliminary results showed Tarleton had an abnormal heartbeat and that additional tests were ordered to determine the cause of death.

''They want to do more work on the case,'' said Sgt. Richard Eskew, an investigator with the Fulton County Medical Examiner's Office. ''They want to do some blood work and will know more next week.''

Tarleton, who held the school's 2-mile record, fell to the track during a light workout Friday around 1 p.m. He was taken to Fulton Medical Center, where he was pronounced dead at 3:45 p.m., a hospital spokeswoman said.

Though classes were not in session because of the Good Friday holiday, the track team was practicing in preparation for a weekend meet, school officials said.

A teammate said Tarleton had completed a 1 1/2-mile warm-up run, took two or three steps and fell.

''The coach came and told him to breathe and it looked like he was gasping for air,'' said Gerus Patterson.

Tarleton, who was aiming for a college track scholarship and hadn't ruled out a shot at the Olympics, also was on the football team and was a former wrestler.

At a football practice in 1988, he collapsed and was resuscitated by two coaches, said principal Ralph Lynch Jr.

''After that, he went through extensive exams at the hospital, and they declared him fit to continue in his activities,'' Lynch said.

Tarleton's father, Harold, said his son began running when he was 6-years-old and had accumulated about 100 medals and trophies.

#90104u1217 04/14/1990 ~United Press International
MANAGUA, Nicaragua (APRIL 14) UPI - A Nicaraguan Indian rebel delegation arrived in Managua for talks with the representatives of President-elect Violeta Chamorro Saturday with an offer of partial disarmament as a gesture of good will.

The delegation representing more than 2,000 Miskito Indian rebels from the Atlantic Ocean coast of Nicaragua, was also scheduled to talk with members of the outgoing Sandinista government, rebel spokesman Adan Artola said.

Artola said 260 members of the Miskito rebels who are camped in Honduras

would give up their arms Monday as a gesture to Chamorro's 14-party National Opposition Union coalition, or UNO.

But whether the remaining 1,750 rebels in eastern Nicaragua would disarm prior to Chamorro's April 25 inauguration ''depends on the guarantees we are given, including protection from attack and imprisonment and provisions to begin civilian lives again,'' Artola told United Press International.

Most of these rebels have nothing other than their guns and the uniforms on their backs, he said.

A negotiating team from the Contra rebel group, meanwhile, is scheduled to arrive from Tegucigalpa, Honduras, on Monday for highly publicized disarmament talks prior to the transfer of power from President Daniel Ortega to Chamorro.

A Contra team headed by Commander Ruben, chief negotiator for the 10,000-strong rebels, was scheduled to arrive in Managua for discussions to set a timetable for disarmament and demobilization.

Chamorro's U.S.-backed opposition won a surprise victory over Ortega in Feb. 25 elections, and the U.S.-backed Contras have since vowed to give up their armed struggle against the Nicaraguan government.

-30- 1902

#90104u1413 04/14/1990 ~United Press International

(APRIL 15) UPI - Americans prepared Saturday for religious and secular observances of Easter Sunday with egg hunts, a round of spring skiing, vigil services and a controversy over feeding ''Easter bunnies'' to the homeless.

Blind children from the Washington, D.C., area gathered at the Washington Monument for the annual Easter egg hunt hosted by U.S. Park Police and telephone company employees.

The children found the hidden Easter treasures by listening for a beeping from a battery-operated sensor located near the eggs.

''I like Easter egg hunts because I get to have candy and prizes,'' said enthusiastic egg searcher Lauren Tuckman, 4, of suburban Maryland, who has been blind from birth.

In Newport, R.I., a favorite resort of the rich and super-rich, youngsters searched for eggs outside the mansion of the late William S. Wetmore, a 19th-century trade merchant.

In New York, hundreds converged on East Meadow at Central Park for the city's 36th annual Easter Egg Roll. There was also a puppet show, face painting and a ''bunny hop'' line.

Egg hunts and Easter bunnies on skis were among the attractions all weekend at ski resorts in Maine, New Hampshire and Vermont.

As children across America waited for an overnight visitor to fill their Easter baskets with jelly beans and chocolate goodies, a Missouri minister infuriated some parents, distributing flyers announcing plans to serve ''the Easter bunny for dinner'' to the hungry and homeless.

Free rabbit dinners were scheduled Sunday at the Rev. Larry Rice's New Life Evangelistic Centers in St. Louis, where about 400 were expected, and in Kansas City. Chickens and donated rabbits were distributed to the poor in Jefferson City and Columbia.

''I can tell people are irritated,'' Rice said. ''The reason they're irritated is they haven't thought through the true meaning of Easter.

''They don't realize that that poor little Easter bunny is detracting from the whole image of Easter, which is the resurrection of Christ,'' he said. ''Jesus never told us to idolize a rabbit. He told us to feed the hungry.''

''We believe the most humane thing to do is take rabbit, which is low in cholesterol, low in calories and high in protein, and feed people with it '' he said.

Christians across the country wound up a solemn Holy Week with candlelit Holy Saturday vigils, a final preliminary to Sunday's joyous commemoration of the Easter resurrection.

Thousands were expected to see in the holiest day on the Christian calendar Sunday with a sunrise service atop Stone Mountain, an 875-foot granite monolith 16 miles east of Atlanta.

For most, the annual Easter trek up the mound was to begin at 4:30 a.m. But for the less adventurous, an alternative service at the base of the mountain was to be led by gubernatorial candidate and former Atlanta Mayor Andrew Young, a clergyman.

The Easter story was not the only event commemorated this weekend. In Boston, parishioners planned a Sunday evening re-enactment the April 1775 hanging of the lanterns in Old North Church to warn patriots in Charlestown that the British were leaving Boston by water to march on Lexington and Concord, an event that started Paul Revere's legendary ride and the Revolutionary War.

Holy Week religious observances were also adopted for political purposes.

Dozens of people marched through Boston neighborhoods on Good Friday, using the stations of the cross to draw attention to the violence that has plagued the city. In suburban Brookline, Mass., about 300 protesters conducted the stations of the cross in front of three clinics where abortions are performed.

In Mercury, Nev., some 60 anti-nuclear activists planned an Easter Sunday religious service and protest outside the gates of the Nevada Test Site. Many of the clergy-based protesters expected to be arrested, Nevada Desert Experience spokesman Peter Ediger said.

On Good Friday, 54 protesters were arrested for trespassing onto the top-secret test site during the Nevada Desert Experience's ninth annual 40-day Lenten Desert Experience, which began in late February.

About 50 activists held religious services and a vigil at the site's main gates Saturday to protest nuclear weapons testing. But no arrests were reported, Ediger said.

#90104u1431 04/14/1990 ~United Press International

(APRIL 14) UPI - A published report says the federal government is investigating a Florida company accused of selling faulty electronic parts for the space shuttle and Pentagon weapons systems. The report cites a Pentagon memorandum and unidentified government officials as saying Impala Electronics of Tampa, Florida, may have switched labels on resistors.

Chinese sources say authorities have issued an internal directive forbidding any ceremonies to mark the first anniversary of the death of reformer Hu Yaobang. Hu's death on April 15th, 1989, was the initial spark for last year's massive democracy protests. The directive forbids any mourning... and says those who do will- quoting here- ''be dealt with severely.''

There's more dissent in the Soviet Baltic republics... this time in Latvia. More than 500 breakaway Communist Party members met today in Riga at a founding congress to form a new party dedicated to the creation of an independent Latvia. The new party is expected later today to adopt a platform that includes a rejection of the republic's 1940 annexation by the Soviet Union.

Authorities in Kansas City, Missouri, have charged a 22-year-old man with killing six women since September. Police say Ray Jackson was also charged with aggravated assault in an attack Monday on a woman who survived. Police say several of the victims were addicted to crack and most had

links to prostitution. The six bodies were found in or near a park close to Jackson's home.

An Agriculture Department spokesman says killer tomatoes did NOT return to Earth after six years in space as part of an orbiting NASA experiment. The seeds were exposed to cosmic radiation... but NASA says they showed NO signs of radioactivity before being sent to four-Million students. Fears were expressed earlier this week that seed mutations could produce ''toxic fruit.''

#90104u1518 04/14/1990 ~United Press International

SAN DIEGO (APRIL 14) UPI - A rare California Condor chick, due to hatch this weekend, died in its shell Saturday, zoo officials said.

Tom Hanscom, a spokesman for the San Diego Wild Animal Park, said the egg had been incubating for 57 days and park personnel were planning to help the chick out of its shell at 8 p.m. Saturday, but the chick died about six hours earlier.

He said the chick poked a hole through the shell of the egg Wednesday and condor experts had been keeping a close watch on the egg.

''We had been observing the chick constantly with hourly checks. The chick appeared normal at 1 p.m.,'' Hanscom said. ''At 2 p.m. there was no activity. The egg was removed from the incubator and we found the chick was not breathing.''

Hanscom said park zoologists were unsure what happened to the chick and planned a necropsy within the next few days.

''This is the first time we have lost a chick at this stage,'' he said.

Both the San Diego Wild Animal Park and the Los Angeles Zoo have been conducting an active California Condor breeding program for several years.

A total of 15 eggs - 10 of them fertile - were laid by condors this year at the two Southern California facilities.

Hanscom said four condor chicks have hatched so far this year and five other eggs are in incubators, with the next egg set to hatch ''very soon'' in Los Angeles.

He said one chick was hatched in captivity in 1988 and four in 1989.

There are now 36 California Condors in existence, with 17 of the rare birds in the Los Angeles Zoo and 19 at the San Diego Wild Animal Park.

#90104u1576 04/14/1990 ~United Press International

(APRIL 14) UPI - East Germany's new defense minister says he doubts that a unified German army will be formed in the near future. Rainer Eppelmann told an East Berlin newspaper that he foresees NO merger of the West German and East German armies as long as both NATO and the Warsaw Pact exist.

Medical examiners in Fairburn, Georgia, are performing an autopsy today to determine what caused a high school track star to collapse and die yesterday following a warm-up jog with teammates. 17-year-old Craig Tarleton, a junior, held the record for the two-mile run at Campbell High School.

An advocate for the homeless in St. Louis says he plans to serve free rabbit dinners Easter Sunday to remind people of the meaning of the religious holiday. The Reverend Larry Rice says 800 people are expected to dine on the free meal of ''Easter bunny'' at shelters in St. Louis and Kansas City.

-30- 1046

#90104u1739 04/14/1990 ~United Press International

(APRIL 14) UPI - A published report says the federal government is investigating whether a Florida company sold faulty electronic parts used in the space shuttle and weapons systems.

The report cites a Pentagon memorandum and unidentified government officials.

It says Impala Electronics of Tampa, Florida, is under investigation on charges it switched labels on resistors.

The memo and officials said the scheme involved buying ''inferior quality'' resistors and changing markings on them describing their history or reliability.

Resistors are used to regulate currents in electronic systems. But there is NO evidence the resistors have caused problems on shuttle flights.

Nine of 10 Impala resistors recently tested by NASA failed. Yet officials did NOT believe there was any danger to shuttle missions.

An Impala attorney said it's ''INappropriate to comment about the criminal investigations.''

-30- 1075

#90104u1752 04/14/1990 ~United Press International

(APRIL 14) UPI - Philippine army troops performed anti-coup maneuvers this week, and military rebels warned the United States NOT to support the government of President Aquino.

In a statement sent to news agencies, the rebels said Aquino will ''definitely not be able'' to complete her six-year term that's to end in 1992.

The group... which calls itself the Revolutionary Alliance for the Masses-Soldiers of the Filipino People... accused Aquino's government of corruption and lack of political will to institute reforms.

The rebel group says it NEVER has targeted U-S installations or personnel... but warned that Washington will be responsible if they are forced to act against Americans.

President Bush ordered U-S warplanes to fly so-called ''persuasion flights'' over Manila during the first day of a coup attempt in the Philippines last December. The flights helped turn the tide against the rebel forces.

A spokesman for Aquino's security force confirmed that anti-coup maneuvers were held yesterday and Thursday at the presidential palace and Congress.

-30- 1241

#90104u1774 04/14/1990 ~United Press International

(APRIL 14) UPI - Polish President Jaruzelski attended a memorial service today in memory of some 15-thousand Polish officers killed by Soviet security forces during World War Two in the Katyn Forest massacre.

In the ceremony at the site of one of the mass graves of Polish officers... units of the Polish and Soviet armies joined in paying military honors to the dead. Katyn Forest is about 12 miles west of Smolensk in the western Soviet Union.

Jaruzelski laid a wreath at the monument to the slain Polish officers, which now has an inscription in Russian reading, ''To Polish officers who died in Katyn.'' The inscription does NOT mention who was responsible for the deaths.

Moscow ended 50 years of denials yesterday when it turned over documents showing Josef Stalin's secret police killed the officers. Until yesterday, the official Soviet line has been that the Nazis were responsible.

In Gdansk, Solidarity leader Lech Walesa said- quoting here- ''It is good when the murderers confess their crime.''

-30- 1180

#90104u1786 04/14/1990 ~United Press International

(APRIL 14) UPI - A flier advertising a meal in Kansas City says the hungry and homeless will ''have the Easter bunny for dinner'' tomorrow.

The Reverend Larry Rice said 800 needy people are expected to dine on the free meal at shelters in St. Louis and Kansas City.

Rice is the director of the New Life Evangelistic Center. He says the resurrection of Jesus Christ that is commemorated on Easter has been forgotten by people who he says ''idolize a little rabbit.''

Rice says many people are more upset about the rabbit meal he's offering than about some of the political things he's gotten involved in. Rice recently filed a lawsuit to block construction of an indoor stadium in St. Louis.

He says- quote- ''Jesus NEVER told us to idolize a rabbit. He told us to feed the hungry.''

-30- 952

#90104u1854 04/14/1990 ~United Press International

(APRIL 14) UPI - In the face of a threatened Soviet economic embargo, Lithuanian President Landsbergis says there will be NO turning back from a declaration of idependence from Moscow. Lithuania's leaders met today to discuss the Soviet threat... and Landsbergis says the Council of Ministers would meet on Monday.

Homeless advocates in Atlanta are charging city officials with waging a silent war on the city's street people. Activists say that since March 1st police have arrested hundreds of people on charges such as public drunkenness in an attempt to clear downtown areas of street people.

Reports from England say thousands of anti-poll tax demonstrators took to the streets in British cities today for a series of peaceful protests. The protests come two weeks after a similar tax protest erupted into a riot in central London, with citizens battling police and setting buildings afire.

Neighbors of the Yale Bowl in New Haven, Connecticut, say they'll welcome Paul McCartney with open arms despite a claim by city officials that a concert by the former Beatle would be disruptive. An informal poll was conducted among 200 Westville area residents.

A report from Los Angeles says the city's unpaid parking ticket problem is the worst in the state. The report says the unpaid tickets total 249-Million dollars. Officials say the worst offenders have accumulated between 50 and 178 tickets each on their cars or trucks.

Franklin, New Hampshire, residents are angry about ''overtones of satanism'' in the case of a man charged with the sexual assault of three children. The victims reportedly told police that one of their assailants wore shirts with satanic symbols. One woman called the satanic links- quoting here- ''a bunch of you-know-what.''

-30- 1943

#90104u2117 04/14/1990 ~United Press International

(APRIL 14) UPI - African National Congress leader Nelson Mandela

acknowledges A-N-C guerrillas tortured their fellow soldiers during a 1984 mutiny in a camp in Angola. But Mandela is quick to point out that those responsible for the incident were disciplined. The admission comes as a blow to the A-N-C which repeatedly has accused the South African government of torture.

Senate Majority Leader George Mitchell is back in Washington today following a trip to the Soviet Union where he met with President Gorbachev. The Maine Democrat is criticizing the Kremlin leader's threat to cut off supplies to Lithuania if the Baltic republic doesN'T rescind it declaration of independence. Mitchell calls the tactic- qutoe- ''UNwise and inappropriate.''

Easter weekend is sparking an array of religious and secular celebrations across the United States. Blind children gathered at the Washington Monument today for an annual Easter egg hunt. The children found their treasures by listening for a beeping from a battery-operated sensor located near the eggs. And, bunnies on skis are all the rage this weekend at ski resorts in Maine, New Hampshire and Vermont.

Rebels plotting to topple Philippine President Corazon Aquino today warned the United States to be- quoting here- ''quiet before the storm.'' The military rebels said Aquino will NOT be able to finish her term ending in 1992. The rebels warn in a statement to news agencies that if the United States intervenes, its forces will be attacked.

-30- 1671

#90104u2257 04/14/1990 ~United Press International

(APRIL 14) UPI - The standing committee in Lithuania's Council of Ministers met in Vilnius today to discuss how to react to a Soviet ultimatum. Lithuanian President Vytautas Landsbergis stuck to his guns after the meeting by rejecting Soviet calls to rescind independence-related laws by tomorrow. In Rome, Pope John Paul met with a top Soviet adviser and sent a telegram of encouragement to bishops in mainly Catholic Lithuania.

One-third of Latvia's Communist Party leadership today followed Lithuania's lead and formed a new party to seek independence for their republic. The move follows March elections in which nationalists gained control of Latvia's Parliament. The new party leader says the vote ''demands a change.'' Some of the government's highest officials joined the breakaway, including the prime minister, deputy prime minister, and foreign minister.

Two leaders of Operation Resue are among 85 people arrested in Los Angeles today at an abortion clinic hit with a protest for the second consecutive year. Police say more than 500 demonstrators from both sides of the

abortion issue gathered at the clinic. A leader of The Fund for the Feminist Majority said Operation Rescue's numbers are but a fraction of what they were at the site one year ago.

(APRIL 14) UPI - Poland's president today laid a wreath at the monument to 15-thousand slain Polish officers in Katyn Forest. The Polish and Soviet armies joined in paying military honors to the fallen soldiers. The ceremony comes one day after the Soviet Union accepted blame for the World War Two massacre. But the monument NO longer mentions who was responsible. An inscription blaming the Nazis was removed last year.

A church director in St. Louis says he's going to feed rabbit to the hungry on Easter to remind people of the true meaning of the holiday. The Reverend Larry Rice says he expects 800 people to take him up on the free meal. Rice says Millions of Americans are going hungry while people idolize a ''little rabbit.'' He says Easter should commemorate the resurrection of Jesus Christ, who told followers to help the poor.

Police in Palm Springs, California, are bracing for the final spring-break crowd to descend upon the desert resort. There have been several serious incidents related to the non-stop partying of visiting college students. Last night a young man was stuck by a car... and last week a teen-age girl was killed and three others injured when a drag-racing car crossed the center line and smashed head-on into another car.

-30- 1424

(APRIL 14) UPI - Around the world, around the clock, Easter and other news next from U-P-I...

Tomorrow Christians will observe the Easter holiday with joyous celebration, ending a traditionally solemn Holy Week. And children across America are waiting for an overnight visitor to fill up their Easter baskets with all kinds of goodies.

In Washington, D-C, today, there was an annual Easter egg hunt sponsored by the U-S Park Police for blind children. The youngsters were able to find the treasures by listening for a battery-operated sensor beeping near the eggs.

New York held its 36th annual Easter Egg Roll on the East Meadow at Central Park. Hundreds gathered for the festivities which included a puppet show, face painting, and a ''bunny hop'' line.

And free rabbit dinners are being offered to the needy tomorrow night at two churches in St. Louis and Kansas City. Some parents are upset by fliers that said the centers are going to serve the- quoting here- ''Easter Bunny for dinner.''

But the Reverend Larry Rice says people are irritated because they've forgotten the true meaning of Easter. Quoting Rice- ''We believe the most humane thing to do is take the rabbit, which is low in cholesterol and calories and high in protein and feed people with it.''

#90104u2451 04/14/1990 ~United Press International

(APRIL 14) UPI - The president of Lithuania today refused to veer off a course for his republic's independence in a political game of chicken with the Soviet Union.

President Vytautas Landsbergis in Vilnius says there's NO chance the Lithuanian Parliament will reverse any laws associated with its declaration of independence last month.

Moscow yesterday demanded a reversal of some of those laws within two days. Otherwise, Soviet President Gorbachev threatens to stop supplying Lithuania with goods also sold on the world market.

The presidium of Lithuania's Council of Ministers met today to discuss a plan of action. Landsbergis said the biggest problem in an embargo would be energy.

Secretary of State Baker today said Moscow's message is ''only a threat.'' Before leaving Bermuda, President Bush said he is awaiting more information on the matter.

Repair work started today on the broken hydraulic power unit on the shuttle Discovery.

Engineers at Cape Canaveral, Florida, took off the unit from the shuttle's engine room. They prepared to remove and recharge the Hubble Space Telescope's high-tech batteries for a second launch try April 25th.

A replacement auxiliary power unit... which governs such functions as steering... is scheduled to be installed and test fired Wednesday. The power breakdown grounded Discovery last Tuesday just four minutes before liftoff.

In the meantime, the Hubble Space Telescope's six batteries will be removed and recharged.

Work on the shuttle Columbia's mission next month is on hold because of an apparent hydraulic leak in its nose landing gear system.

With NO spare time to handle such a problem, Columbia's May 9th launch on a Spacelab astronomy mission faces a delay.

#90104u2459 04/14/1990 ~United Press International

(APRIL 14) UPI - About 300 American atheists gathered for their national meeting in St. Petersburg, Florida, today. Atheist leader Madalyn Murray O'Hair addressed the group and urged members to step up efforts to separate church and state.

O'Hair said in the 1990's atheists will have fight to have the ''In God We Trust'' phrase removed from United States currency. She also said nativity scenes should be removed form city property and religious symbols stricken from city and state seals.

Quoting O'Hair- ''We have to remove the religious graffiti under government control.

The atheist leader also mentioned a comment made by President Bush during the 1987 campaign. The president was quoted by a reporter for an Atheist publication as saying- ''I guess I'm pretty weak in the atheist community. My belief in God is important to me.''

O'Hair quoted Bush as saying- ''I doN'T know if atheists should be considered citizens... This is one nation under God.'' O'Hair noted many atheists have died for America and the rights of citizens.

O'Hair has been an outspoken atheist advocate since 1963 when she won a U-S Supreme Court case which removed Bible reading and prayer from public schools.

#90104u2472 04/14/1990 ~United Press International

(APRIL 14) UPI - New reports indicate that British customs agents now believe the steel pipes bound for Iraq may have been meant to shoot satellites into orbit.

British officials originally speculated the Iraq-bound pipes were part of a huge gun barrel when they seized the shipment Thursday.

Pipe manufacturer Sheffield Forgemasters has said the pipes were merely for use in a petrochemical plant.

Just over two weeks ago, Britain seized what it said were parts for nuclear weapon triggers also bound for Iraq.

Christian pilgrims in Jerusalem today rushed to light handfuls of candles in an Easter eve ceremony heralding the so-called miracle of the holy fire.

The one-thousand year-old tradition commemorates the resurrection of Jesus.

Old women quickly grasped at the flames from their candles before placing their open palms on their foreheads, crossing themselves and praying. Candle wax dripped over their hands and clothing as they held clusters of 33 candles, one for each year Jesus is believed to have lived.

More than 15-hundred Christian pilgrims and curious visitors packed the Church of the Holy Sepulchre in the Old City of Jerusalem to watch the proceedings.

Greek Orthodox Patriarch Diodoros led a procession three times around the Holy Sepulchre before entering it alone to await the ''holy fire.''

Greek and Armenian Orthodox followers consider the lighting of the fire to be a miracle performed without human intervention.

#90104u2519 04/14/1990 ~United Press International

(APRIL 14) UPI - At least 230 members of the anti-abortion group Operation Rescue were arrested in Los Angeles today while trying to blockade a health clinic. Two key organization members are among those arrested. The clinic was the site of a similar protest last year which led to 750 arrests.

At least three people were wounded today when a gunman walked into San Diego's Mission Bay Memorial Hospital and started shooting. Police say a doctor and paramedic are among the injured. The gunman escaped.

Two top advisory councils to Soviet President Gorbachev met today to discuss ways to speed up economic reform in the Soviet Union. The transition is bound to bring added hardship to the Soviet people because of inflation and unemployment.

East Germany's new defense minister predicts the two Germanys will NOT combine military forces any time soon, despite accelerated moves toward economic and social reunification. Rainer Eppelman says a main obstacle is the touchy issue of allowing NATO soliders on East German territory.

-30- 1199

#90104u2654 04/14/1990 ~United Press International
(APRIL 14) UPI - President Bush had little to say today about the Soviet Union's threat to shut down supply lines to Lithuania. While playing golf in Bermuda, Bush said he had NOT seen an intelligence report yet, but would know more later. The president is in Camp David, Maryland, for the rest of the holiday weekend. Secretary of State Baker said in an interview that Moscow's position so far is- as he put it- ''only a threat.''

Lithuanian President Vytautas Landsbergis refused to blink in his republic's showdown with the Soviet Union. The Lithuanian Council of Ministers met today. Afterwards, Landsbergis maintained the republic's parliament will NOT rescind laws backing up its declaration of independence. The Soviet Union said yesterday it will cut off certain supplies if the laws areN'T overturned today or tomorrow.

San Diego police are searching for a gunman who walked into Mission Bay Memorial Hospital today and opened fire, killing one person and wounding at least two others. Authorities say a physician and paramedic are among the victims. It was NOT immediately clear if the gunman knew any of the victims.

Los Angeles police arrested 230 anti-abortion activists in front of a women's health clinic today. The protest was the final of seven days of demonstrations organized by Operation Rescue. A group spokesman said- ''It's Easter Week and there's a religious connotation to it.'' The same clinic was the site of a similar protest last year that resulted in more than 750 arrests.

JAKARTA (APRIL 16) - Indonesia's huge steel plant in Java's westernmost city of Cilegon will have an output capacity of 2.5 million tons of steel when its expansion projects are completed in 1993, press reports said Monday.

Junior Minister of Industry Tungky Ariwibowo was quoted by the Kompas daily as saying that the tenders for the expansion projects of the 12-year-old steel complex were completed and work would be finished in 1993.

The Krakatau steel industry, which moved into the black in 1986 after continuous losses in its first eight years of operation, has a current annual production of between 1.5 to 1.7 million tonnes of steel, official figures show.

JAKARTA (APRIL 16) - Indonesia has decided to pipe natural gas from the Natuna field in the South China Sea to the westernmost Indonesian island of Sumatra, reports said here Monday.

"Pipelining gas from Natuna to Arun (in northern Sumatra), about 1,400 miles (2,250 kilometres) away, will be more economically feasible than setting up a new LNG (Liquefied Natural Gas) complex in Natuna," Mines and Energy Minister Ginanjar Kartasasmita was quoted as saying by the English-language Jakarta Post daily.

The Natuna gas will be piped to a LNG plant of the state oil company Pertamina in Arun in Indonesia's westernmost province of Aceh to support a long term extention plan for the plant, he said.

A pipeline will also be built to link the Natuna field to the industrial island of Batam, south of Singapore, and to the Duri onshore oil field in Sumatra where the gas will be used to support the field's steam flood enhanced oil recovery project, he added.

VATICAN CITY (APRIL 15) - Pope John Paul II in his Easter message to

Christians around the world Sunday welcomed the return of democracy to many countries and called for a dialogue on Lithuanian independence.

In his address to 150,000 faithful in Saint Peter's Square, the pope singled out Lithuania saying that "a respectful and comprehensive dialogue" was needed to allow Lithuanians to peacefully achieve their aspirations.

The pope on Saturday met with Soviet President Mikhail Gorbachev's personal adviser Vadim Zagladin for talks believed to have touched on Lithuania.

He also issued a message of support to Lithuanian Roman Catholic Church leaders saying he felt "closer than ever to the aspirations of the Lithuanian people".

The meeting with the Kremlin official came a day after Mr. Gorbachev threatened to slap an economic blockade on Lithuania unless it annulled laws passed to support its independence declaration by Monday.

The Vatican's ambassador to Moscow last week indicated that the Vatican was willing to act as a mediator in the Lithuanian crisis if both sides wanted.

Italian communist party newspaper Unita said that Mr. Zagladin had been sent by Mr. Gorbachev to examine how the Vatican could play a role in ending the face-off between the Kremlin and the Baltic republic which declared itself independent on March 11.

In further moves concerning Lithuania, a leading Lithuanian official was to fly from Washington to Rome on Wednesday to meet Catholic church leaders. The official, Stasys Lozoraitis, is a charge d'affaires in the Lithuanian embassy in the Vatican.

The Vatican has maintained diplomatic ties with Lithuania, which is predominantly Roman Catholic, despite the Soviet annexation of the republic in 1940.

The Pope in his Easter message said that "after the years of dictatorship which have deprived men and women of their basic freedoms, the true dimension of the spirit has been discovered anew".

"Today the reawakening of many democracies is leading to dialogue and trust between peoples. And the world is coming to understand once again that man cannot live without God, without the Truth, in him, makes him free," he added.

MADRID (APRIL 16) - A spanish businessman kidnapped more than eight months ago in Quito, capital of Ecuador, was released by his captors on Sunday, a spokesman for the Spanish interior ministry disclosed.

Pablo Martin Berrocal, 55, a well-known impresario of bullfights, had been dragged from a taxi on August 9 while on his way to his hotel in Quito by six men wearing police uniforms.

The circumstances are still a mystery. It is not clear whether ransom was paid for Berrocal's release.

Spanish newspapers speculated that the kidnappers may have been members of guerrilla groups or the Basque separatist underground movement, Eta.

JAMMU (APRIL 15) - Thousands of doctors in Kashmir Sunday threatened to quit their jobs to press for the immediate withdrawal of a 10-day-old curfew in the valley.

A United Action Committee grouping doctors employed at government and private hospitals said they would resign en masse Monday if Governor Jagmohan does not lift the round-the-clock curfew by then.

The committee said in a statement here that many patients, mainly women and children, had died because of a lack of medical attention and non-availability of medicines during the curfew in force since April 6.

All markets have been shut and transport has gone off the roads. The administration relaxed the curfew for two hours Saturday in 13 "non-vulnerable" sectors in the summer capital Srinagar and in five other towns.

The doctors' committee alleged that diseases such as meningitis and gastroenteritis had broken out in an epidemic form in parts of the valley, but patients were unable to get medical help because of the curfew.

Kashmir authorities imposed the curfew after Moslem militants fighting for the state's secession from India kidnapped three hostages, who were killed by their captors Tuesday.

The curfew has remained in force to enable security forces to continue a massive search operation for the kidnappers.

JERUSALEM (APRIL 15) - Israeli peace activists as well as Christian and Moslem Palestinians staged a show of solidarity Sunday to mark Easter in the holy city of Jerusalem.

Palestine Liberation Organisation leader Yasser Arafat, meanwhile, called on Christians and Moslems to stand "side by side" in what he called the struggle to defend Jerusalem and its holy sites from Israeli settlement.

More than 500 members of the Israeli movement Peace Now held a meeting here to support Jerusalem's Christian residents in their protests against the settlement of U.S. Jewish immigrants in the Old City's Christian quarter.

Israeli police prevented the group from marching to the Church of the Holy Sepulchre, near where around 100 Jewish settlers on Wednesday occupied a hospice belonging to the Greek Orthodox Church.

But Moslem religious and nationalist leaders gathered outside the church in a show of solidarity for Greek Orthodox Patriarch Diodoros I, who was knocked down when police used tear gas to disperse Arab protesters Thursday.

Several thousand tourists and pilgrims took part in the traditional Easter Day services at the church, which were held in turn by the Armenian, Latin and Greek Orthodox communities.

The hospice at the centre of the dispute once housed Greek Orthodox pilgrims but had in recent years been leased by the Greek Orthodox patriarchate to an unknown tenant.

The Jewish settlers claim the tenant legally sub-let the hospice, but the patriarchate says it did not authorize the transaction.

On Thursday, the patriarch appealed to a Jerusalem court, which ordered the settlers to leave. But they appealed to another Jerusalem court which allowed them to stay temporarily.

Speaking in Tunis, Mr. Arafat praised Patriarch Diodoros for having "opposed alongside his brothers" the Jewish settlers at the hospice.

He called on Palestinians to stand "side-by-side with your brothers defending Al-Qods (Jerusalem) and the Holy Sepulchre so that all the invading colonizers will leave our land and the flag of liberty and freedom will fly over the mosques and churches of Jerusalem."

PANAMA CITY (APRIL 15) - Kidnappers holding the four-year-old grandson of

a former military official are demanding a million dollars for the child's release, the newspaper Panama America reported Sunday.

The boy was kidnapped five days ago when assailants stormed his parents' home in a well-to-do area of Panama City.

The child's grandfather is Marcos Justines, former chief of staff of the Panama Defense Forces, which were crushed when United States invaded Panama December 20 and ousted military ruler Manuel Antonio Noriega.

Mr. Justines was arrested after the invasion on charges he plundered 42 million dollars from the central bank.

Panama America said the boy's parents refused to comment on reports they were negotiating with the kidnappers.

Police last week arrested two people who had tried to abduct the wife of a former government banker linked to Mr. Noriega.

Mr. Noriega is currently jailed in the United States awaiting trial on drug trafficking charges. The trial is due to begin in January.

#90105u0007 04/15/1990 ~United Press International

BOSTON (APRIL 15) UPI - An original portrait of Benjamin Franklin, painted while he was American envoy to Paris, was stolen from the Boston Public Library, police said Saturday.

The painting by French artist Joseph Siffred Duplessis was stolen sometime Friday from the main library's Cheverus Room, where it hung 12 feet high on the wall.

A custodian noticed the painting was missing, its gilded 3-by-4-foot frame lying on the floor, when he made his rounds at 5:20 p.m. Friday, police said. The library closed for the day at 5 p.m., police said.

The valuable painting was donated to the library in 1858 by Boston bookkeeper Edward Brooks.

It was produced at the behest of a married woman who befriended Franklin, 70, upon his arrival in Paris in 1776. Before Franklin left nine years later, she insisted that he sit for Duplessis so she would have a memento of their relationship, library officials said.

The robbery came less than a month after thieves posing as police stole 12 priceless and uninsured art treasures from the Isabella Stuart Gardner Museum in Boston.

Duplessis (1725-1802) was also the portrait painter of King Louis XVI. After the French Revolution, he was director of the Versailles galleries.

Art critics have called the Franklin painting ''a great beauty as a work of art; in perfect preservation and may be regarded as the most authentic and satisfactory likeness of the great American philosopher, statesman and philanthropist.''

Richard J. Early, assistant superintendent of the library building, said reduced attendance on Good Friday and congestion from widespread Boston Marathon preparations in Copley Square, where Monday's event ends, may have aided the thief.

#90105u0138 04/15/1990 ~United Press International

NEW YORK (APRIL 15) UPI - The Bush administration has interpreted the law banning the importation of South African steel in a way that has allowed thousands of tons of the material to enter the United States, a published report said Sunday.

Commerce Department officials said more than 900,000 tons of the steel and iron worth at least $350 million had entered the country since the 1986 law which was intended to ban such imports, The New York Times reported.

The law says, ''Nothwithstanding any other provision of law, no iron or steel produced in South Africa may be imported into the United States,'' and was passed over President Reagan's veto.

Lawyers at the Treasury Department said the word steel did not include fabricated steel products such as girders, beams and plates use to build bridges, department documents, including letters to Congress and steel importers, said.

Bryce Harlow, an assistant secretary of the Treasury, did not explain the department's rationale except to say it was based on ''established legal principles.''

The State, Treasury and Commerce departments all said they were aware of the policy and each contended the others were responsible.

Rep. John Dingell, D-Mich., chairman of the House Energy and Commerce Committee, said the Customs Service appeared to be accepting ''the most outrageous legal arguments of steel importers rather than trying to assess the clear intent of Congress in statutes which govern the import of steel products.''

South Africa accounts for a relatively small part of all the steel and iron imported into the United States with Japan and South Korea supplying far larger percentages. South Africa does supply a large part of the imports in certain categories.

With the release of Nelson Mandela, Congress is expected to reconsider the sanctions bill and administration officials said they would relax the restrictions if all political prisoners were freed and substantial progress was made in dismantling apartheid.

#90105u0161 04/15/1990 ~United Press International

LOS ANGELES (APRIL 15) UPI - Two top leaders of Operation Rescue were among at least 246 members of the anti-abortion group arrested Saturday in an attempted blockade of a health clinic near downtown, authorities said.

The protest was the final event of seven days of demonstrations organized by Operation Rescue, a national anti-abortion group.

More than 500 demonstrators from both sides of the abortion issue began amassing at the Family Planning Associates clinic about 7 a.m., Sgt. Alan Bollinger said. The same clinic near downtown was the site of a protest during Easter Week last year that led to more than 750 arrests.

Operation Rescue spokesman Guy Keith said the blockade ''is to save unborn babies from the abortionists. It's Easter Week and there is a religious connotation to it.''

More than 350 police, some on horseback and some in riot gear, began arresting protesters about 9 a.m., and by 5 p.m. 242 people had been taken into custody and booked into the city's main jail on suspicion of trespassing, said Sgt. Eugene Hovelsen. Bail for those arrested for trespassing was set at $250.

Two high-ranking officials of the group - National Field Director Joseph Foreman and Western U.S. Director Jeff White - were arrested on suspicion of conspiracy to obstruct justice, a felony, for their alleged role in planning the demonstration and were being held in lieu of $5,000 bail, Sgt. Chester Ross said. Four other demonstrators were arrested on the same charge.

Sue Finn, a spokeswoman for the group, said the two men were in Los Angeles as guests of local Operation Rescue members but she said they were not involved in organizing the blockade.

In a sensational trial last year in Los Angeles Municipal Court, White, who stood trial with Operation Rescue founder Randall Terry, was acquitted of trespassing on the clinic during last year's Easter Week blockades.

He pleaded no contest last week to misdemeanor conspiracy charges stemming from last year's protests and was sentenced to spend 120 days in jail, Finn said. He has not begun serving the sentence.

Finn said as many as 200 Operation Rescue demonstrators would remain at the clinic until charges against Foreman and White were reduced to match those against the other arrestees.

''These two men were singled out and given unjust charges and these people will remain there in solidarity with them until the charges are reduced,'' Finn said. ''Either the police will have to deal with a whole bunch of (demonstrators) or they will do what is right with Joseph and Jeff.''

The gathering appeared to be equally divided between members of the anti-abortionist Operation Rescue, who have vowed to block access to clinics performing abortions, and supporters of abortion rights, who claimed to have escorted at least eight patients safely inside for their scheduled appointments.

Last year's Easter Week blockade sparked complaints by Operation Rescue members that police broke arms and caused other injuries by using ''pain compliance'' techniques. Police using such methods inflict pain to make protesters move away from demonstration sites.

The group's foes called the anti-abortionists ''fanatic demonstrators'' and claimed the protesters were outnumbered by their opponents.

''Operation Rescue is disintegrating,'' said Kathy Spillar, national coordinator for The Fund for the Feminist Majority. ''Their numbers are but a fraction of what they were at this site a year ago.''

About 200 other abortion rights supporters, including members of the Clinic Defense Alliance of Los Angeles, kept vigils at other area clinics, saying they were concerned that Operation Rescue demonstrators would take their protest elsewhere.

Operation Rescue members have targeted various Southern California health clinics in the past week, forming human blockades to keep out patients who are scheduled for abortions.

On Friday, police in the Orange County city of Tustin arrested 48 members of the militant group on complaints from the owner of a clinic they had blockaded. The Friday arrests were the first in the series of Easter Week protests.

MANILA, Philippines (APRIL 15) UPI - At least 11 communist rebels and a soldier were killed in a fierce gunbattle in the northern Philippines, the military said Sunday.

A military report said government troops were on patrol before dawn Saturday near a remote village in Rizal, 230 miles north of Manila, when they encountered a band of communist guerrillas of the New People's Army. The 12 were killed in an ensuing battle.

In the eastern Philippines, authorities captured a police officer Saturday evening who led renegade troops in an assault on a provincial airport during a 1987 coup attempt, officials said.

Capt. Leovic Dioneda, who had a $13,600 reward for his capture, was arrested while visiting his family in Sorsogon, 230 miles southeast of Manila.

Military spokesman Col. Juanito Rimando said Dioneda also led hundreds of rebel troops in Manila during the December 1-9 1989 coup attempt which nearly toppled the government of President Corazon Aquino.

At dawn Sunday, troops also raided a hideout of fugitive coup leader Gregorio ''Gringo'' Honasan in suburban Quezon City but did not find the charismatic former army colonel.

The 159,000-member armed forces have been placed on red alert - the maximum state of readiness - during Holy Week as rumors of a new coup attempt gripped the capital.

In a statement sent to news agencies Saturday, military rebels vowed Aquino would ''definitely not be able'' to complete her six-year term.

#90105u0169 04/15/1990 ~United Press International

(APRIL 15) UPI - The Los Angeles Kings bounced the defending Stanley Cup champions out of the playoffs for the second year in a row Saturday night when Mike Krushelnyski scored at 3:14 of the second overtime to give the Kings a 4-3 victory over the Calgary Flames.

Steve Duchesne, who scored his first two goals of the series in the third period to force the overtime, took a slap shot that was kicked out by Calgary goaltender Mike Vernon. Krushelnyski dove at the rebound and arced the puck over the outstretched glove of Vernon and just below the crossbar.

''I didn't know it went in,'' said Krushelnyski, who was lying face-down on the ice when the puck went in the net.

''All I heard was a big scream.''

The Flames had what would have been the game-winning goal disallowed with 2:23 left in the first overtime period. Brian MacLelland poked the puck

between the pads of goaltender Kelly Hrudey. The goal judge turned on the red light, but referee Denis Morel apparently lost sight of the puck and blew the whistle.

''I'll admit it crossed the line partially, but from my vantage point it never crossed the line completely,'' Hrudey said.

Hrudey stopped 14 shots in overtime and 36 of 39 shots overall.

In taking the first-round series four games to two, Los Angeles advances to the Smythe Division final against either Edmonton or Winnipeg.

The Kings, who eliminated Edmonton in the first round last year, became only the fifth club to knock off the NHL champions in consecutive seasons.

Wayne Gretzky put the Kings up 1-0 68 seconds into the game, but Calgary tied it at 4:51 on a goal by Joe Nieuwendyk.

Doug Gilmour scored with 1:43 left in the second period to give Calgary a 2-1 lead before Duchesne knotted the score with his first 61 seconds into the third period off a deft feed from Gretzky.

Calgary took a 3-2 lead with only 4:12 to play on a goal by Joe Mullen.

The Kings tied it 3-3 with 1:43 left in regulation when Duchesne ripped a slapshot from the right circle past screened goaltender Mike Vernon, once again after a set-up from Gretzky.

The game was one of three Stanley Cup series in the Campbell Conference.

In the remaining Norris Division semifinal, Minnesota topped Chicago 5-3 to tie that series at three games each. St. Louis won its series and will face the winner of the Chicago-Minnesota series beginning Wednesday night.

In the other Smythe Division contest Edmonton edged Winnipeg 4-3. That series will also go to a seventh game Monday.

The Wales Conference resumes play Sunday night with New Jersey at Washington, Boston at Hartford and Buffalo at Montreal.

Washington, Boston and Montreal each have a 3-2 lead in their series. The New York Rangers beat the New York Islanders 4-1 and will play the winner of the Washington-New Jersey series beginning Thursday night at Madison Square Garden.

NORRIS DIVISION

North Stars 5, Blackhawks 3

At Bloomington, Minn., Aaron Broten set up three goals to lead Minnesota and send the Norris Division semifinal to a seventh game in Chicago Monday.

The Blackhawks have only played six seven-game playoff series in their long history, winning twice. Minnesota has lost five of seven seven-game playoffs.

The North Stars got goals from Shawn Chambers, Perry Berezan, Neal Broten, Larry Murphy and Dave Gagner.

Greg Gilbert opened the scoring for Chicago and the Blackhawks added two goals in the final period.

Aaron Broten, who scored nine goals and nine assists in 35 games after he was acquired for Bob Brooke in a deal with New Jersey this season, set up two first-period goals as the North Stars took a 3-1 lead and never looked back.

North Stars goalie Jon Casey made 27 saves.

Minnesota Coach Pierre Page reserved praise for his team after the victory.

''I was estatic about the way we won 4-0 in here Tuesday and said so,'' said Page. ''And then we went down to Chicago and Thursday and forgot how to win. I don't know if our guys have learned how to respond to praise.''

Chicago Coach Mike Keenan, however, did have some encouraging words for the North Stars.

''They won the first game of the series in our building,'' he said, ''so who am I to say that they can't do that again?''

SMYTHE DIVISION

Oilers 4, Jets 3

At Winnipeg, Manitoba, linemates Esa Tikkanen and Jari Kurri scored the first and last goals for the Oilers to stave off elimination.

Edmonton came out flying and outshot the Jets 12-2 in the first period on the way to a 3-0 lead.

Tikkanen made it 1-0 at 5:29 of the first period, redirecting Reijo Ruotsalainen's shot under Winnpeg goaltender Bob Essensa.

Mark Messier and Gregg also scored in the period, but Winnipeg fought back and tied the score 3-3 on a second-period score by Mark Kumpel and

third-period goals by Doug Smail and Doug Evans.

That set the stage for Kurri's dramatic game-winner.

Kurri's goal, at 13:10 of the third period, came on a wicked 20-foot slapshot that just found the inside of the far post behind Essensa.

''I'd have prefered somebody else taking that shot,'' said Jets Coach Bob Murdoch.

''I played the shot right. I came out and cut the angle, but he managed to find the top corner,'' said Essensa. ''It was a great shot.''

#90105u0171 04/15/1990 ~United Press International

KARACHI, Pakistan (APRIL 15) UPI - The leader of an opposition party representing Mohajir migrants from India announced Sunday he had ended a six-day-old hunger strike because the government had agreed to work for peace in troubled Sind province.

Altaf Hussain, head of the Mohajir Qaumi Movement, spoke before dawn from his bed on a public address system to thousands of cheering supporters gathered outside his home.

He had begun the fast April 8 to press authorities to take action against those responsible for the deaths of a number of his supporters killed earlier this month in political violence in Karachi, capital of southern Sind province.

He said he decided to end the protest action after three hours of talks late Saturday with Sind governor Fakruddin Ibrahim, whom he said had agreed to ''continue to work for peace in the province.''

Hussain said Ibrahim had also promised that ''all the criminals and assassins will be apprehended without delay and dealt with severely.''

The Mohajir party, which has 14 members in the National Assembly, joined the opposition last September, charging the government of Prime Minister Benazir Bhutto was not promoting their interests. Mohajirs, whose families came to Pakistan from India following the partition of the subcontinent in 1947, comprise about 40 percent of Karachi's population.

#90105u0177 04/15/1990 ~United Press International

SAN DIEGO (APRIL 15) UPI - A middle-aged man, distraught over the death of his father during surgery Saturday, returned to the hospital 12 hours

later and unleashed a blaze of gunfire that killed two people and wounded two others - including a physician, officials said.

A veteran nurse and a student emergency room worker were shot and killed, police said.

The gunman, identified as Bradford Warren Powers Jr., 46, of La Jolla, approached a nursing station about 12 feet inside the emergency room entrance at Mission Bay Memorial Hospital around 5 p.m. and began firing indiscriminately with a handgun, then fled the building, police said.

He was taken into custody by police about less an hour later in Oceanside, about 40 miles north of San Diego, police said. Powers, who is unemployed, called Oceanside police and surrendered about 5:40 p.m.

''It is our understanding that his father had been brought in at 5 a.m. suffering from an aneurysm,'' police spokesman Dave Cohen said. ''He was taken into surgery and they were repairing the aneurysm when he went into cardiac arrest.''

Cohen said a student emergency medical technician training at the hospital was killed in the hail of gunfire. A wounded nurse transported to the Scripps Memorial Hospital trauma center died in surgery around 7 p.m., Cohen said. Her identity was not released.

Dr. Michael Hughes, an emergency room physician, was shot in the abdomen and taken to Scripps, where he was listed in good condition, hospital spokesman Michael Bardin said.

Hughes was not the doctor who performed the surgery on the gunman's father officials said.

''It is my understanding that the doctor involved in the surgery this morning was not here at the time of the shooting,'' Cohen said.

The fourth victim, who was treated and released from Mission Bay, was identified as Frederick Mowrer, 38, an attorney from Albuquerque, N.M., who was vacationing in San Diego with his wife and 2-year-old daughter. Mowrer was in the emergency room seeking treatment for his ill child when he was wounded in the buttocks by the gunfire, Cohen said.

The gunman ran from Mission Bay after the shooting, and police searched the Mission Bay Golf Course, which is directly across from the medical center. The gunman drove north on Interstate 5 into oceanside, where he surrendered. Police recovered a handgun from the suspect's car.

The emergency room at the small, three-story 150-bed hospital, which normally has a daily patient population of about 70, was closed following

the shooting and other hospitals were expected to handle the medical facility's normal emergency patients through the weekend.

Steve Hall, executive director at Mission Bay, said the hospital staff were ''most upset.'' ''It was a very close-knit group. The nurse had been here for more than 10 years.

An unidentified hospital supervisor said, ''This emergency room obviously is devastated. It would be hard to treat people close to you.''

Hall said that hospital staff members, when they heard about the shooting, returned to Mission Bay Saturday evening to see if they could help.

#90105u0178 04/15/1990 ~United Press International

NEW YORK (APRIL 15) UPI - A cab driver was shot and killed in the Bronx with a single gunshot to the head, becoming the fifth car service driver slain in the borough since early March, police said Sunday.

The victim was shot at 11:55 p.m. Saturday while driving for the Seaman Car Services and investigators did not know if he had been robbed or if the killing was related to the previous attacks, said Sgt. Nick Vreeland, a police spokesman.

The driver, Rafael Montes de Oca, 38, of the Bronx, was found dead in his cab on East 188th Street between Webster and Park avenues in the Fordham section, several neighborhoods south and west from the location of the other shootings.

''I don't know whether it's connected to the other cab drivers who were killed, if it was a robbery or what,'' Vreeland said. ''They're still trying to get a handle on it.''

''They're looking into the possibility this one's connected but it's hard to determine that right up front,'' he said.

Police searched the area near the shooting but turned up nothing and had no description of the killer. An anonymous male called 911 and reported an injured cab driver bleeding heavily.

Mayor David Dinkins last week announced a $10,000 reward for the gunman believed to be responsible for the deaths of three of the Bronx cab drivers who were killed during robberies in the Eastchester and Williamsbridge sections in the northeast part of the borough.

All of the victims were slain with the same .22-caliber handgun and were each robbed of between $50 and $100, police said. The latest shooting

occurred near the center of the borough, about two miles from the other slayings.

The fourth cab driver was killed in an unrelated shooting and died last Thursday.

#90105u0182 04/15/1990 ~United Press International

BANGKOK, Thailand (APRIL 15) UPI - Khmer Rouge leader Khieu Samphan accused the Vietnamese-backed Cambodian government of trying to kill former Cambodian monarch Prince Norodom Sihanouk, Khmer Rouge Radio said Sunday.

The clandestine radio, monitored in Bangkok, quoted Khieu Samphan as saying that Vietnamese-backed Phnom Penh troops fired dozens of artillery shells at Sihanouk's residence of Serepheap in Cambodia on Wednesday.

It said the attack forced Sihanouk to flee into Thailand's border province of Surin, 220 miles northeast of Bangkok.

Sihanouk is the nominal leader of a three-pronged resistance - which includes the Khmer Rouge - fighting to oust the Vietnamese-installed Cambodian government.

''I most angrily expose and denounce this criminal act of the Vietnamese enemy and its puppets,'' the radio reported Khieu Samphan said in a statement.

The statement noted Sihanouk had recently proposed a new round of talks between the resistance and the Cambodian government in a bid to settle the 11-year conflict.

''The Vietnamese enemy aggressors and their puppets responded to all these peace initiatives with artilllery shells,'' Khieu Samphan said.

Vietnam invaded Cambodia in 1978 and ousted the Khmer Rouge, which was blamed for the deaths of more than 1 million people during its 1975-1978 rule.

#90105u0184 04/15/1990 ~United Press International

BEIRUT, Lebanon (APRIL 15) UPI - Rival Christian forces fought in east Beirut Easter Sunday, even as the Maronite's patriarch warned the continuing violence may eventually force Christians to evacuate Lebanon.

Police said machine-gun blasts rang out across war-battered Christian enclave, mingling with the sound of tolling chruch bells as thousands of

faithful Christians crammed into churches for Easter.

Troops loyal to Christian military leader Gen. Michel Aoun and his rival Samir Geagea sporadically exchanged automatic gunfire in the morning after fiercer overnight violence, police said.

Police said one person was killed and four others were wounded in mortar and rocket attacks during the night, raising the official toll of the 2 1/2 month conflict to 921 dead and more than 3,010 wounded.

Also Sunday, Arab League envoy Lakhdar Al Ibrahimi held a series of talks with local leaders about the possibility of implementing a peace accord that was worked out by the Lebanese Parliament in Taif, Saudi Arabia, last October.

Aoun, in an interview with the east Beirut-based Ad Diyar newspaper, reiterated Sunday that he rejected the accord because it does not call for an immediate withdrawal of Syrian troops from Lebanon.

''I have nothing to do with this agreement,'' he said. ''I did not take part in making the Taif accord. It's not my problem,'' Aoun said.

Lawmakers meeting in Taif approved a power sharing agreement between Christians and Moslems that led to the election in Parliament of Elias Hrawi, a Christian, as president. But Aoun, 54, has refused to relinquish the presidential palace in the district of Baabda, 5 miles southeast of Beirut, to Hrawi.

Moslem political sources said Ibrahimi, who has held talks with several key politicians since he arrived in Beirut earlier in the week, would not meet Aoun, who has considered himself Lebanon's ''legitimate'' ruler.''

''If you continue the fight, nothing will be left but a scorched earth,'' Maronite Patriarch Nasrallah Sfair warned in his Easter sermon, indirectly appealing to fellow-Christian Aoun to stop the military compaign to crush Geagea's forces.

''We have sought to stop the war, but they continued to fight and killed innocent people searching for bread on the streets,'' Sfair said. ''All Christians would flee the country if you continue the war.''

Unofficial reports said that more than 200,000 civilians have fled the 310-square-mile Christian enclave since the outbreak of fighting between the rival forces.

#90105u0194 04/15/1990 ~United Press International

WASHINGTON (APRIL 15) UPI - Sen. Spark Masayuki Matsunaga, who rose from stevedore to senator and served Hawaii in Congress almost from the time his island home became a state, died Sunday in Toronto, where he was being treated for prostate cancer, an aide said. He was 73.

The three-term Democrat was admitted to a hospital Saturday because of complications which arose after he arrived in Toronto earlier last week for treatment at an oncology clinic, press aide Edward J. Greaney said.

His wife, Helene, and two of his five children, a daughter, Merle, and a son, Keene, were with him in Toronto, Greaney said. He died sometime before 2 a.m. Sunday, the aide said

Matsunaga announced early this year that he was suffering from prostate cancer and revealed in February that the cancer had spread to his bones, Greaney said.

Matsunaga was elected to the House in 1962, two years after Hawaii became the 50th state, and served there until he was elected to the Senate in 1976 after a bitter primary fight to succeed Sen. Hiram Fong, R-Hawaii.

During his lengthy career on Capitol Hill, Matsunaga was a Democrat regular who almost always voted with his party but rarely became a leading figure in major policy debates.

There were two major exceptions, both of which involved causes close to his heart: the creation of a ''peace academy'' and the payment of reparations to Japanese-Americans who were put into internment camps during World War II. He succeeded in both efforts.

''He was proudest of his 20-year effort to have the enabling legislation passed for the U.S. Academy of Peace,'' Greaney said. ''He had been wounded ... in World War II and the Peace Academy was a particular project of his throughout his congressional career.''

Matsunaga also was known for his eagnerness to escort visitors from Hawaii around the Capitol and, until he was stricken with cancer, for his impeccable attendance record.

Although a powerful and popular politician in Hawaii, Matsunaga was not well known nationally despite his long career of public service.

Matsunaga was born Oct. 8, 1916, in Kukuiula, Hawaii, worked as a stevedore and warehouseman while going to high schook and graduated from the University of Hawaii and Harvard Law School.

He was a public school teacher in 1941 when the United States entered World War II and returned in 1945 as an Army captain. He was a member of

the famed Nisei Regimental Combat team, was wounded twice during battles in Africa and Italy and won the Bronze Star and Purple Heart.

Matsunaga, a practicing lawyer starting in 1954, plunged into Hawaii politics the same year, winning election to the territorial House of Represenatives. He served there until 1960, icluding one year as House majority leader.

Elected to the House in 1962, he won re-election for six more terms before winning election to the Senate. Matsunaga was re-elected to the Senate in 1982 and 1988.

#90105u0197 04/15/1990 ~United Press International

BEIJING (APRIL 15) UPI - Police hauled off a lone citizen who tried to place a funeral wreath in Tiananmen Square Sunday to honor the late Communist Party chief Hu Yaobang, whose death a year ago triggered last spring's massive pro-democracy protests.

The incident occurred days after Chinese authorities had sent a telegram to all government units forbidding any ceremonies or mourning marking the politically sensitive anniversary of Hu's death.

In the only reported incident of dissent, onlookers in the square - center of last year's protests and of a violent government crackdown last June - watched police dragged away a young man who attempted to lay a wreath in memory of Hu and the protesters who were killed in the square.

Despite unusually heavy security - including armed troops circling the square on motorcycles - the man, who was not identified, tried to place a white floral wreath at the Monument to the People's Heroes, an obelisk at the square's center and the headquarters of last spring's protests.

The sensitive site had been cordoned off since early morning by unarmed guards from the People's Armed Police, a paramilitary force.

The wreath bore two streamers reading ''Mourn comrade Hu Yaobang'' and ''Mourn the heroes who died for democracy and liberty,'' acccording to a witness, who said the man was hauled off by police after a brief struggle.

Police also confiscated several tapes from a Cable Network News television crew filming the incident. The tapes were later returned by a police officer, who told CNN Beijing correspondent Mike Chinoy that the protester had been ''a mentally disturbed person from outside Beijing.''

As they often have been recently, police vans were parked in and around the square. Two red fire trucks equipped with powerful water cannons stood

by as authorities braced for any signs of protest over last year's crushed democracy movement.

Similar precautions were in evidence April 1, the day overseas dissidents had urged Beijing residents to ''take walks'' to the square in protest, and on April 5, a major Chinese festival honoring the dead.

Beijing university campuses were quiet on the first anniversary of Hu's death. China's state-run press carried no mention of the relatively liberal former Communist Party chief, whose death on April 15 last year led to the hanging of wall posters eulogizing Hu and criticizing current hard-line leaders.

From that beginning, the student-led protests gathered steam and burst into the streets in the biggest demonstrations in 40 years of Communist rule. The movement was crushed when the army fired on demonstrators June 3-4 in a push to clear Tiananmen Square.

Subdued students struggled Sunday with the poor job prospects and memories of missing classmates.

''A friend told me today he wished we could start another movement, but there's no base for it now,'' said a history student active in last spring's protests.

''People are scared. The Communist Party is like a tiger: It's eaten people before and it will do it again,'' he said, adding that he still thinks of Xiao Wu, a classmate shot the night of June 3 as he rode his bicycle behind a convoy of armed troops.

At Beijing University, a center of the 1989 movement, a few students lingered to read official notices posted on a board where bold declarations of protest and criticisms of the national leadership once drew daily crowds.

The most common notices posted Sunday were advertisements for study guides and classes for the Test of English as a Foreign Language. The test is required for Chinese and foreign students applying to study at many Western universities.

Despite tough new laws restricting overseas study, which the leadership apparently blames for inflaming students with democratic ideals, many Chinese students are concentrating on passing the test in hope of going abroad.

#90105u0202 04/15/1990 ~United Press International

JERUSALEM (APRIL 15) UPI - Sen. Robert Dole, R-Kan., said Sunday he had concluded from his tour of the Middle East that the Senate's recent recognition of a united Jerusalem as the capital of Israel was ill-timed and diverted attention from peace efforts.

Dole, leading a five-member Senate fact-finding delegation, also reiterated his belief that American foreign aid policy must be revised. He said the president should have more power to determine who receives aid and Congress should reduce its ''earmarking'' of aid for particular countries.

Dole and his four Senate colleagues have visited Jordan, Egypt, Syria and Iraq during their Middle East tour. In Israel, they met with caretaker Prime Minister Yitzhak Shamir; Labor Party leader Shimon Peres, who is seeking to form a new government and replace Shamir; former Defense Minister Yitzhak Rabin; and other Israeli officials, as well as prominent Palestinians.

Among the topics discussed with Israeli officials was a March 22 non-binding Senate resolution, passed on a voice vote, stating that Jerusalem ''is and should remain the capital of Israel.''

Israel annexed part of Jerusalem after the 1967 Six Day War and now considers the city the national capital, despite Palestinian claims that Arab East Jersualem should be part of a proposed Palestinian homeland.

The U.S. government recognizes Tel Aviv as the Israeli capital and the Bush administration is not bound by the Senate resolution.

Jerusalem Mayor Teddy Kollek believes Jerusalem should be the capital of Israel, but told the Senate delegation the resolution served no useful purpose and was poorly timed, Dole said.

''I think as I travel around and even as I visited in Israel, I concluded that it was ill-timed, that we were involving ourself in something that is going to be negotiated as the peace process starts,'' said Dole, who plans to make a statement in the Senate on the issue on Wednesday.

''All it does is tend to stir up rhetoric again with the Arab countries and Israel and that's not our purpose,'' the Republican leader said. ''Our purpose is to get the peace process going. (But) I found as we traveled in some of the Arab countries, they all want to talk about this resolution instead of the peace process. We were getting off the track.''

Asked about the erosion of public support in the United States for Israel, Dole said the 28-month-old Palestinian uprising, known in Arabic as the intifada, has had an impact on American perceptions.

''It's sort of like Vietnam all over again,'' Dole said. ''People watch television. ... They don't know what the facts are, but they are going to make judgments. If it's a small child who's hurt, they're going to say, 'They shouldn't have done that.' Maybe (Israeli soldiers) were provoked, but nobody looks behind all that.''

Dole also warned Middle Eastern countries that the United States is ''broke'' and that substantial increases in the foreign aid budget are unlikely.

''Foreign aid is not popular in America,'' Dole told reporters at the end of the delegation's four-day stay in Israel. ''I think there is a feeling by some that everybody just loves foreign aid and they just want us to send more over to any country.

''We have all these new members of the family at the table,'' he said. ''Their first names are Bulgaria and Romania and Czechoslovakia and go right down the list, Panama, Hungary,'' he said. ''We've got African countries that get an average of $1 per person in aid, where the average in Israel is greater,'' reaching $10,000 a person.

Dole said he was proud of the U.S. record on aid to Israel - $40 billion in recent years - and said he would not recommend cuts in military aid to the Jewish state. But he said some people would question certain economic aid provided, such as a $400 million supplemental aid package for housing guarantees to Israel.

''We've got 3 million homeless in America. We don't have a program for them,'' Dole said.

#90105u0274 04/15/1990 ~United Press International

WASHINGTON (APRIL 15) UPI - Children under age 6 are the poorest Americans, with nearly a quarter of them - about 5 million in all - living in families with incomes below the poverty line, a study showed Sunday.

The report by the National Center for Children in Poverty at Columbia University in New York was described by its authors at a first-of-its-kind look at young children who are poor.

Using published and unpublished federal statistics, the center said its portrait of poor young children challenges the ''monolithic view of poverty that says people are poor because they won't work.''

The majority of poor children live in families with at least one parent in the labor force, meaning they have a job or are looking for one, and with at least one parent who graduated from high school, it said.

Only 28 percent of the children live in families that rely on public assistance for all their income, with 37 percent of them in families whose income all comes from employment, the study said.

In 1987, the last year for which comparative statistics were available, there were about 32.5 million Americans below the federal poverty line, including 13 million under age 18 and 5 million under 6.

The study said 23 percent of children under 6 were living in poverty, compared with 19 percent of people ages 6 to 17, 11 percent of those 18 to 64 and 12 percent of those 65 and older.

The federal poverty line is based in part on the government's estimate of how much money is needed for a minimally adequate diet. In 1989, the poverty line was $9,890 for a family of three and $12,675 for a family of four.

The study noted that in addition to the young children below the poverty line, another 2.7 million lived in ''near-poor'' families with incomes between 100 percent and 150 percent of poverty.

''Many of these families have as much difficulty as officially poor families,'' the report said. ''When we look closely at children living near poverty, we find they are often indistinguishable from children living in poverty.''

The study said the poverty rate for young children remained stable at about 17 percent between 1968 and 1979, before rising to 25 percent by 1983. Since then, it has dropped only slightly despite an improving economy, it said.

The largest group of poor young children are white, but minority youngsters are more likely to be poor. Forty-eight percent of black children under 6 and 42 percent of young Hispanic children live in poverty compared with 13 percent of white children of the same ages.

Poor children are more likely than other children to have been born either outside marriage, to teenage mothers or in large families. But, 38 percent of poor children live in married-couple families and 51 percent live in families with two or fewer children, the study said.

Child poverty rates are highest in central cities but most poor children live outside urban areas - 28 percent in rural areas and 13 percent in suburbs. The South had the highest percentage of children living in poverty of any region.

The report said America is not the only industrial country with poor

children but noted it differs from other industrial countries because ''the concept of a social insurance system ... does not guide our thinking or our actions.''

''We respond to crises rather than preventing them, and we pay a high price,'' Judith Jones, director of the center, wrote in an introduction to the report.

''What can we conclude?'' she said. ''We need to implement comprehensive approaches to assisting poor young children and families over the early years of family formation - approaches that incorporate the concepts of prevention and equity, stability and continuity, and enrichment rather than remediation.''

#90105u0290 04/15/1990 ~United Press International

NEW YORK (APRIL 15) UPI - Two men charged in a case that has highlighted the city's tense race relations are to go on trial Monday for the shooting death of a black teenager in an attack by a bat-wielding gang of whites in a predominantly white section of Brooklyn.

Keith Mondello, the alleged ringleader of the mob, and Joseph Fama, the accused triggerman, are to be the first of eight young men tried in the killing of Yusuf Hawkins, 16, in Bensonhurst.

Opening statements were to begin in state Supreme Court in Brooklyn Monday morning before Justice Thaddeus Owens. Both men are both accused of murder.

The black teen was shot dead Aug. 23 during an attack by a gang of about 30 whites that prosecutors charge was racially motivated.

The slaying in Bensonhurst, a predominantly white section of Brooklyn, inflamed racial tensions citywide and triggered a series of protest marches, some of them violent.

Fama and Mondello, both 19, are to be tried together but before separate juries, because Mondello has allegedly fingered Fama as the gunman.

Brooklyn District Attorney Charles Hynes' case has been plagued by setbacks, including the resignation of a prosecutor who said he did not want to become a ''token'' black at the trial. Hynes himself only took over the case in January after he won election for the district attorney's post in November.

In addition, a key prosecution witness, John Vento, reneged on an agreement to testify against his friends, fleeing to Ohio, where he later surrendered to authorities. Vento was then indicted on murder charges and

was expected to go on trial with five others at a later date.

One of the prosecution's other key witnesses, Gina Feliciano, has been treated for drug abuse, raising questions about her credibility on the stand.

Feliciano's plans to invite black and Hispanic friends to the predominantly white neighborhood for her 18th birthday party sparked the tensions that led to Hawkins' killing, police said.

The white mob apparently thought Hawkins and his friends were in Bensonhurst to attend the party. They were actually in the neighborhood to look at a used car and were lost when they were attacked.

Fama's lawyer, David DePetris, has denied his client shot Hawkins dead, and expressed hope Friday that the young man would get a fair trial.

''I always thought it would be impossible to get a fair trial,'' DePetris said. ''My client had been convicted by the media before he even surrendered, but we have a jury that says it can be impartial.''

Jury selection for Fama and Mondello was completed Thursday after two weeks of screening about 300 potential panelists, many of whom were excused after they told the judge news reports led them to believe the accused triggerman was guilty.

Both juries have the same ethnic composition. They each include seven whites, three blacks and two Hispanics, and are from a cross-section of Brooklyn neighborhoods, white and blue-collar jobs and all levels of education.

#90105u0303 04/15/1990 ~United Press International

CAPE CANAVERAL, FL (APRIL 15) UPI - Engineers readying the shuttle Discovery for a second launch attempt were given Easter Sunday afternoon off after the installation of a new hydraulic power unit.

Work to recharge the batteries in the shuttle's cargo - the Hubble Space Telescope - was running ahead of schedule, NASA said.

''Everything's ship-shape. We're rolling up the rug here,'' NASA spokesman George Diller said. ''I don't think it could have gone any better. There was so much room for surprises, but we didn't have any.''

Work to fix a hydraulic leak in the shuttle Columbia's nose landing gear system, meanwhile, also was on track for the veteran spaceplane's delayed roll out to launch pad 39A next Sunday - the same day Discovery's second

countdown is scheduled to begin on nearby pad 39B - for blastoff next month on a Spacelab astronomy mission.

It will be the first time two shuttles have been on NASA's twin launching stands since Columbia blasted off Jan. 12, 1986, with the ill-fated Challenger poised on pad 39B for what turned out to be its 10th and final voyage 16 days later.

As it now stands, Discovery is scheduled for launch at 8:30 a.m. EDT April 25 with Columbia following suit in the second week of May, slightly behind schedule because of the hydraulic leak and Discovery's problems.

Discovery and its four-man, one-woman crew were grounded last Tuesday just four minutes before blastoff when one of the ship's three ''auxiliary power units,'' or APUs, malfunctioned.

The APUs provide hydraulic power to steer the shuttle by moving its wing flaps, rudder and engine nozzles. While shuttles technically can fly with just one, NASA safety rules forbid a launch unless all three APUs are working properly.

The faulty unit was removed from Discovery's cramped engine room Saturday and a replacement was bolted into place Sunday on the back side of the rear payload bay bulkhead.

If all goes well, toxic hydrazine fuel will be loaded aboard Monday and the APU will be ''hot-fired'' Wednesday to prove the shuttle's steering system will be ready for flight April 25.

The goal of the 35th shuttle mission is the long-awaited launch of the $1.5 billion Hubble Space Telescope, the most powerful instrument ever built to study the universe from high above Earth's obscuring atmosphere.

At the time of the initial launch try last Tuesday, the telescope's six high-tech nickel-hydrogen batteries, which provide power for the instrument until its solar panels can be unrolled in orbit, were fully charged.

But with the delay, the powerpacks have been drained and the batteries, in two 500-pound sets of three, were removed from the giant instrument Saturday night and taken to a laboratory at the nearby Vehicle Assembly Building for recharging.

First, they were chilled to 32 degrees. Then, what little remaining charge they held was deliberately exhausted. After that, the 130-hour recharging procedure began. If all goes, well, the batteries will be re-installed next Saturday.

''The battery guys are leaving,'' Diller said at noon. ''They did their discharge a little while ago and now they've got their batteries going on full charge.''

The battery removal and APU replacement work had never before been attempted with a vertical shuttle at the launch pad. For that reason, NASA managers were somewhat conservative in setting a new target launch date.

But even though the repair work was running ahead of schedule Sunday, NASA managers say it is doubtful Discovery's launch date will be moved up a day because of Columbia's move to the pad Sunday and required work at pad 39A.

''There are some very good meshes between the two timelines,'' Diller said. ''It fits very neatly to hold (Discovery's) launch on Wednesday (April 25).''

#90105u0310 04/15/1990 ~United Press International

JERUSALEM (APRIL 15) UPI - Thousands of Christians celebrated Easter Sunday with processions and joyful services throughout Jerusalem, but the militant Israeli Jews who moved into a Christian Quarter house remained a source of tension.

The Israeli Peace Now organization held a small demonstration inside the Old City, protesting the actions of the 150 Jews who made a 72-room building their home Wednesday in defiance of Christian Arabs who live in the area.

The Greek Orthodox Church, which owns the sprawling structure located a few hundred yards from the Church of the Holy Sepulchre - built on the tomb where many Christians belive Christ was buried before the Easter resurrection - is seeking to evict the newcomers. The settlers claim they have a right to live anywhere in Jerusalem and paid a former tenant for the right to live in the house.

Paramilitary border and riot police continued to keep watch outside the building. On Thursday, police used tear gas to break up a demonstration outside the house led by Greek Orthodox Patriarch Diodoros I.

On Easter morning, an Arab woman, speaking Hebrew, told the young religious Jews in the doorway of the house, ''I know why you came here: to become Christians.''

Inside the complex, small children rode bicyles down musty corridors while the adults, many carrying automatic rifles or pistols, worked busily to make the ramsackle residence habitable.

Yael Cohen, 26, who emigrated to Israel three years ago from Toronto, said she did not think moving into the building was a controversial action.

''I wanted to come to live in Jerusalem,'' she said holding her 9-month-old daughter Moriah. ''I'm not scared. I feel comfortable here.''

Cohen admitted that all residents had to have an escort when they left the house. An elderly Moslem owner of a nearby souvenir shop refused to talk about the militant Jews.

''Peace is the best,'' he said. ''I am very happy here.''

The centrist Shinui party announced it was trying to call a special session of the Parliament to discuss the move, which has been denounced by Jerusalem Mayor Teddy Kollek.

Meanwhile, thousands of Christian pilgrims of all denominations celebrated Easter in churches throughout Jerusalem. This year, Easter fell on the same day on both the Roman Catholic and Greek Orthodox calendars.

Latin Patriarch Michel Sabbah led a procession of Franciscan monks and worshipers to the Church of the Holy Sepulchre. Inside the vast dark church, he said a high mass on an altar in front of the tomb.

At the entrance of the church, women poured perfume on the red limestone ''Stone of Unction'' upon which tradition holds that Jesus's body was anointed after he died on the cross. The women kissed the stone and rubbed the oil on their heads.

At midday Sunday, the Greek patriarch led a procession through the narrow streets of the Christian Quarter to the church, where he also held a service.

Protestants held Easter services at dawn at the Garden Tomb, located outside the Old City, the place where they believe Jesus was buried and rose from the dead.

The number of pilgrims and tourists visiting Jerusalem during Holy Week was considerable higher than in the past two years, when the Palestinian uprising kept many visitors away.

#90105u0339 04/15/1990 ~United Press International

(APRIL 15) UPI - Around the world... around the clock... here's the latest news from U-P-I:

Lithuanian President Landsberis says the republic will NOT meet Soviet

President Gorbachev's ultimatum for reversing its declaration of independence. Gorbachev has given Lithuania until Sunday to abandon its path toward independence or face a possible supply cut-off.

President Bush is spending the rest of the weekend at Camp David after returning to Washington from Bermuda Saturday afternoon. The president is keeping close tabs on the situation in Lithuania and is receiving intelligence reports. Secretary of State Baker says Moscow's threat against the Baltic is ''only a threat.''

San Diego police say a man, distraught about his father's death in surgery... walked into Mission Bay Memorial Hospital Saturday and opened fire, killing two people and wounding two others. Police say the man fled the hospital after the shooting and was taken into custody about an hour later. A police spokesman says the gunman's father died at the hospital earlier Saturday.

A church director is offering free Easter rabbit dinners to the homeless in St. Louis and Kansas City Sunday night. The Reverend Larry Rice says he's offering the free meal to remind people what Easter is all about. In his words- ''Millions of Americans on Easter Day are going hungry while we idolize this little rabbit.''

Atheist leader Madalyn Murray O'Hair was in St. Petersburg, Florida, Saturday to address about a convention of 300 American Atheists. O'Hair urged group members to push more actively for separation of church and state. She also is calling for the removal of ''In God We Trust'' from United States currency.

In Spokane, Washington, a woman who alleges she was NOT hired as a court clerk because of her good looks had her 75-thousand-dollar lawsuit dismissed. But Connie Hart say's NOT planning an appeal. The lawyer who represented the county says state law does NOT allow civil rights suits ''based on denial of employment based on one's physical appearance.''

#90105u0368 04/15/1990 ~United Press International

COEUR D'ALENE, ID (APRIL 15) UPI - Young white-supremacist skinheads plan to return to Idaho to honor Adolf Hitler on Friday, a week after the state gave final approval to a law making Martin Luther King Jr.'s birthday a state holiday.

The neo-Nazi Aryan Nations Church is sponsoring its second annual ''Aryan Youth Action Conference'' next weekend for U.S. and Canadian skinheads, and like last year the event is timed to coincide with Hitler's birthday.

Idaho officials routinely denounce the tiny church in rural Kootenai

County, 10 miles outside Coeur d'Alene and 400 miles north of Boise, for falsely portraying the state as a haven for racists.

Human rights leaders hope the signing of the King holiday bill by Gov. Cecil Andrus last week will make it clear to the nation that white supremacists are unwelcome in Idaho.

''It's just another indication that people who see Idahoans as supporters of the Aryans are dead wrong,'' said Marilyn Shuler, director of the Idaho Human Rights Commission.

''This is the beginning of a new image for Idaho,'' added Eric Love, student body president at Boise State University and former president of the BSU Black Student Union.

Idaho already had the most comprehensive legislation in the nation limiting the activities of hate groups, with laws making racial harassment a felony, forbidding paramilitary training by hate groups and requiring police to keep statistics on hate crimes.

Andrus's signature on the King legislation left just three states without holidays honoring King: Montana, New Hampshire and Arizona.

''We stand united against racism and for brotherhood. We deplore intolerance and are uplifted by respect for the rights of all,'' the governor said.

But Aryan leader Richard Butler persists in a dream of turning Idaho and the rest of the Northwest into a homeland reserved exclusively for white Christians.

More than two dozen of Butler's followers banded together as The Order in the early 1980s and launched a white supremacist terrorist campaign that included murders, bombings and robberies. Butler was acquitted on sedition charges in 1988.

This year's skinhead convention will include sessions on political action, ''character building,'' the burning of anti-Aryan books and self-defense tips from a former professional wrestler, says an Aryan handout announcing the event.

The church declined to estimate how many skinheads will attend or elaborate on what will take place.

''It's no one's business,'' said a church spokesman, who identified himself as Steve Nelson. ''What we're trying to do is to protect the people coming from harassment and keep it low-key.''

Police estimated 50 to 60 supremacists attended the 1989 skinhead conference honoring Hitler's 100th birthday.

They were opposed by some 600 human rights activists from around the Northwest, who staged a protest march and rally.

There was no violence, but one skinhead was arrested on traffic charges after speeding out of the church compound past a group of reporters and photographers.

''We don't need a media circus like last year,'' Nelson said.

Last year's convention was marked by a dispute among civil rights groups, some of which opposed the protest march and rally because they believed it would only attract attention to the supremacists.

This year the Aryans' opponents are simply monitoring plans for the conference and have announced no protest activities.

-30- 3697

#90105u0383 04/15/1990 ~United Press International

WASHINGTON (APRIL 15) UPI - Congress and the administration hinted at possible economic retaliation Sunday against any dramatic move by Soviet President Mikhail Gorbachev to tighten the screws on Lithuania.

The officials indicated that Gorbachev might be forced to forfeit a U.S.-Soviet trade agreement as the price for cutting off vital goods to Lithuania, which voted on March 11 to secede from the Soviet Union.

But while warning that escalation of the confrontation would jeopardize trade relations and ''a lot of other things'' on the U.S.-Soviet agenda, Senate Democratic leader George Mitchell signaled congressional backing for the wait-and-see approach taken by President Bush.

''We ought not be announcing in advance what we're going to do when we don't know for sure what they're going to do,'' Mitchell, who returned Saturday from Moscow, told the CBS News program ''Face the Nation.''

Gorbachev, struggling to reassert control over Lithuania, threatened an economic blockade Friday as its bid for independence inspired breakaway movements in the other Soviet-annexed Baltic republics of Latvia and Estonia.

In the face of a Sunday deadline, Lithuania's leaders remained defiant. Bush, who earlier termed the development ''deeply disturbing,'' monitored the situation from Camp David, Md.

At the White House, there was no air of imminent crisis. ''We've seen threats before that weren't carried out,'' one official explained. Gorbachev, the official emphasized, would be measured ''by actions, not deadlines.''

As Bush weighed his options, congressional leaders and administration officials said the conflict, if unabated, could well lead to a slowdown in bilateral cooperation on a range of fronts, including a key Gorbachev priority: expanded trade relations.

''I look at the arms control issues as being mutually beneficial to the United States and the Soviet Union,'' Senate Republican leader Robert Dole told NBC's ''Meet the Press.'' ''And if we can get a good agreement that's in our interest, we ought to do that.''

But in areas ''that may only be in the Soviet interest,'' he continued, ''why should we try to be helpful to them when they're doing this to Lithuania and will probably follow up with other countries if they declare their independence?''

An administration official said suspension of some of the initiatives Bush announced at the Malta summit in December to improve economic ties and bolster the Soviet economy - including a trade agreement and observer status for the Soviets at multilateral trade talks - were among the options considered Friday when officials from the State Department, Defense Department, CIA and other agencies met on Bush's directive to analyze the situation and weigh possible responses.

U.S. and Soviet negotiators are working on a landmark accord that would clear the way for increased trade by awarding the Soviet Union lowest-possible tariff treatment as a Most Favored Nation.

In suggesting that agreement-in-the-works, targeted for completion by next month's Bush-Gorbachev summit, be held up as the cost to Moscow of its moves against Lithuania, Dole noted that the United States is ''probably powerless to do a great deal'' more to influence the standoff.

One alternative with little, if any, support in or out of the administration was cancellation of the Bush-Gorbachev summit set for the end of May in Washington.

Mitchell said the summit would give Bush a chance to ''register specifically, directly, face to face, the displeasure that he feels and wants to convey to Gorbachev.'' Dole agreed Lithuania should not affect ''areas where we mutually benefit,'' such as the summit and arms control.

Bush last week spurned appeals from Baltic-Americans to bolster the Lithuanian leadership through ''de facto recognition'' of its 11 break

from Moscow.

At the time, White House press secretary Marlin Fitzwater said Bush, who has avoided antagonizing Gorbachev out of broader concern for U.S.-Soviet relations, did not want to ''make Lithuania's task more difficult by inflaming the situation.''

Several times last week, Bush and his aides justified his caution by recalling how the 1956 revolt against communism in Hungary, emboldened by U.S. support, was crushed by Soviet troops.

#90105u0404 04/15/1990 ~United Press International

SAN DIEGO (APRIL 15) UPI - A gunman who burst into a hospital emergency center and shot four people, killing two, was apparently distraught over the death of his father during surgery earlier in the day, police said Sunday.

The gunman, Bradford W. Powers Jr., 46, of La Jolla, walked up to a nursing station inside the emergency room entrance at Mission Bay Memorial Hospital around 5 p.m. Saturday and began firing indiscriminately with a handgun, then fled the building, police said.

Powers telephoned police in Oceanside, about 40 miles north of San Diego, and surrendered less than an hour later.

Police speculated that the murderous outburst was linked to the death of the suspect's father in surgery at Memorial Bay earlier in the day.

''It is our understanding that his father had been brought in at 5 a.m. suffering from an aneurysm,'' police spokesman Dave Cohen said. ''He was taken into surgery and they were repairing the aneurysm when he went into cardiac arrest.''

Edward T. Rooney, 30, of Cardiff, a student emergency medical technician training at the hospital, was killed in the gunfire. Deborah Kay Burke, 36 a nurse, was taken to the Scripps Memorial Hospital trauma center, where she died in surgery around 7 p.m., Cohen said.

Dr. Michael Hughes, an emergency room physician, was shot in the abdomen and taken to Scripps, where he was listed in good condition, hospital spokesman Michael Bardin said. Hughes was not the doctor who operated on the gunman's father.

''The doctor involved in the surgery ... was not here at the time of the shooting,'' Cohen said.

The fourth victim, who was treated and released from Mission Bay, was identified as Frederick Mowrer, 38, an attorney from Albuquerque, N.M., who was vacationing in San Diego with his wife and 2-year-old daughter.

Mowrer was in the emergency room seeking treatment for his sick child when he was wounded in the buttocks by the gunfire, Cohen said.

The gunman ran from the hospital and drove north on Interstate 5 into Oceanside, where he surrendered. Police recovered a handgun from the suspect's car.

The emergency room at the small, three-story 150-bed hospital, which normally has a daily patient population of about 70, was closed following the shooting. Other hospitals were expected to handle the facility's emergency patients through the weekend.

Steve Hall, executive director at Mission Bay, said the hospital staff was ''most upset.'' ''It was a very close-knit group. The nurse had been here for more than 10 years.

An unidentified hospital supervisor said, ''This emergency room obviously is devastated. It would be hard to treat people close to you.''

#90105u0418 04/15/1990 ~United Press International

LONDON (APRIL 15) UPI - Negotiations broke down Sunday between authorities and the diehard prisoners holding much of Strangeways Prison in Manchester as the inmates' siege entered its third week, officials said.

While negotiators remained in contact with the estimated 12 prisoners occupying the prison, the talks to end the siege temporarily broke down early Sunday afternoon, a Home Office spokesman said.

The spokesman declined to disclose reasons for the breakdown but said he believed it was part of the regular ebb and flow that has characterized the discussions. The riot erupted April 1 without any specific inmate demands, but prisoners since have expressed unhappiness with jailhouse conditions.

Confusion continued over the number of inmates still occupying the prison.

The Home Office said the number was ''less than 13'' but prisoners on the rooftop held up a slate Saturday night indicating they numbered only 10, The Sunday Correspondent newspaper reported.

The discrepancy raised fears that up to three inmates may be dead among the debris of the Victorian-era jail in Manchester, 200 miles northwest of

London.

''We can't obviously know at this time whether there will be bodies found '' the spokesman said.

With barricades of debris soaking in cooking oil at the entrance to each wing and a bonfire burning in one of the wings, the holdouts may be planning to end their siege with a final gesture such as setting fire to the prison, the newspaper quoted prison sources as saying.

The prisoners still held the central rotunda, from which they could control access to the jail's five main wings.

The Prison Officers' Association was pressing for intervention by the army to break the siege if it were not resolved by Monday night, the newspaper said.

A prison chaplain who was injured when the riot broke out in the prison chapel April 1 prayed for an end to the siege during Easter church services held in the officers' club room at the jail.

Outside, authorities continued their campaign of using loud music, sirens, swooping helicopters and other tactics to try to break the resolve of the holdout inmates.

Negotiators had returned to their talks Saturday with inmates across gateways and stairwells that were blocked by wreckage created in the dispute.

#90105u0422 04/15/1990 ~United Press International

BONN, West Germany (APRIL 15) UPI - Chancellor Helmut Kohl and East German Prime Minister Lothar de Maiziere will meet this month in the first German summit since East Germany's communists were ousted at the polls, it was reported Sunday.

The summit can take place as soon as Kohl returns from his Easter vacation April 23 and is expected to focus on the merging of the two Germanys' currencies, West Germany's Die Welt am Sonntag newspaper said.

The two leaders have discussed by phone their plans for the meeting several times since de Maiziere took office Thursday as East Germany's first non-communist prime minister, the newspaper said.

Several items are on the summit agenda, including discussion of the first steps to be taken toward the economic, social and monetary union that is seen as a key step toward unification.

Their aim is to outline the main provisions of a treaty on the union by the beginning of May, Die Welt reported. Both men have said their target for the union is July 1.

In Berlin Sunday, several thousand East and West Berliners took part in the city's first East-West Easter peace march.

The demonstrators, mostly young, marched on a rainy day from East Berlin's Monbijou Platz, through the Berlin Wall at the Heinrich Heine crossing point and on to West Berlin's Hermann Platz.

West Berlin police estimated the participants at 6,000, although organizers put the number at 15,000.

At a rally at Hermann Platz, a main square in the city's American sector, Petra Morawe of East Germany's New Forum party was booed when she criticized the participation in the march of the East German Communist Party and its youth organization.

Konrad Weiss of East Germany's Democracy Now party canceled his plans to address the crowd because of the communists' participation.

Weiss's place as speaker was taken by Peter Kirchner, chairman of the East Berlin Jewish Community.

The West Berlin Social Democratic Party took part in the march although it said it opposed communist participation.

#90105u0428 04/15/1990 ~United Press International

FORT BRAGG, NC (APRIL 15) UPI - A unit of the Army's crack Green Berets is being re-established at Fort Bragg for training in preparation for possible assignment to Africa, a report published Sunday said.

The 3rd Special Forces Group, deactivated near the end of the Vietnam War, is being reborn at the Army base near Fayetteville to specialize in Africa The News & Observer of Raleigh reported.

Part of the Special Forces mission is to prevent insurgencies in developing countries or to stop revolutions by helping to strengthen national institutions, Maj. Bill Chadwick, Special Forces officer in charge of starting the new unit, told the newspaper.

''I really believe we are the Peace Corps with M-16s,'' he said.

The unit's scheduled reactivation on June 29 is part of the renewed

emphasis on U.S. special operations that began in 1980.

The new unit will join four existing Special Forces groups as part of the Army Special Operations Command based at Fort Bragg, The News & Observer said.

Some 1,300 new troops will be brought to Fort Bragg by October 1992, the newspaper reported.

Green Berets spend much of their time training and advising foreign armies Chadwick said, but they also are prepared to organize guerrilla wars and carry out commando raids and special reconnaissance missions.

Each group specializes in a geographic region by studying its language and culture. Green Beret units focus on Latin America, East Asia, the Pacific, Southwest Asia and Europe.

In recent years Special Forces teams from the existing groups have worked in the African nations of Burkina Faso, Nigeria, Zaire, Kenya and Tanzania.

The new group will focus exclusively on Africa, Chadwick said, adding no firm decisions have been made on where to station the group.

After the unit is activated, he said, the Army operations would begin by rotating companies of Green Berets to Africa for four- to six-month tours.

''One of the problems is that Africa is so far away it would be beneficial to establish a logistical base over there,'' he said. ''Zaire would probably start out as the most logical place, but that is still up in the air.''

TAMPA, FL (APRIL 15) UPI - An explosion ripped through a Port of Tampa petroleum refinery Sunday, killing one man, and authorities searched for another worker thought to be in the refinery at the time of the ensuing blaze.

The blast occurred at about 11 a.m. EDT in a gasoline vapor unit, officials at Citgo Petroleum Corp. said.

Citgo officials would not say what caused the explosion. The identity of the dead man was not released.

Tampa firefighters put out the huge blaze with foam in about an hour. The explosion apparently occurred in a gasoline vapor capture unit of the refinery.

PANAMA CITY, Panama (APRIL 15) UPI - Former Panamanian President Marco Aurelio Robles, who held the country's highest office from 1964 to 1968, died in a Miami hospital following a long illness, a family friend said Sunday. He was 84.

Robles had lived in Florida since he handed the nation's highest office over to Arnulfo Arias Madrid on Oct. 1, 1968. Arias was ousted in a military coup ten days later.

Robles is survived by his wife, Petita Sara de Robles, who called a family friend in Panama to inform him of the former president's death Saturday.

The friend told United Press International that Robles' body would be flown to Panama Tuesday and that funeral services will be held Wednesday at the Cristo Rey church in Panama City. He did not specify the cause of death.

Robles was general manager of the Panamanian National Bank, minister of government and justice and a deputy in the National Assembly before becoming president in 1964.

A number of Robles' former Liberal Party colleagues hold high office in the government of current President Guillermo Endara.

In 1965, Robles signed a joint declaration with President Lyndon Johnson, agreeing to draw up a new Panama Canal treaty.

The treaty was designed to end clashes between U.S. students and Panamanians, which were sparked by a ruling that called for the Panamanian flag to be hoisted along with the Stars and Stripes at a school in the canal zone.

#90105u0467 04/15/1990 ~United Press International
(APRIL 15) UPI - The leader of Kashmir's main armed separatist group said Sunday ''it is a lie'' that he had ordered the April 10 killing of three hostages in Kashmir but insisted that hostage-taking and murder are ''within the rights'' of Kashmiris fighting for independence from India.

''(The Indian government) said that I ordered these persons kill those hostages from American soil,'' said Amanullah Khan, 56, chairman of the Jammu Kashmir Liberation Front. ''Now the Indian government has approached the State Department that I should be deported. But it is a lie.''

Speaking to United Press International by telephone from Los Angeles, Khan said Indian troops and police sent to quell Moslem separatists ''had raped women and killed babies, and that gave every Kashmiri the right to retaliate.''

Khan announced in New York April 9 that three hostages seized in Kashmir had been killed. But when the three were indeed found dead April 10, India declared they had been killed one day after Khan's statement. India therefore charged that Khan had ordered the hostages' slaying from U.S. soil.

The three hostages, a Hindu factory manager and an Islamic scholar and his secretary, were held by a group claiming to be the Jammu Kashmir Students Liberation Front, a student wing of Khan's group.

Khan said he could not be sure they were not held by a splinter group not under his direct control.

Khan, who holds a Pakistani passport, said he came to the United States to publicize his cause and raise funds. He hopes to meet with congressional leaders to press the United States to support Kashmiri independence.

Khan said his goal is to form an independent state by merging the Kashmir region of Pakistan and all of the Indian state of Jammu and Kashmir.

He said he would not negotiate with New Delhi on the posibility of granting autonomy to Moslem areas of Kashmir.

''India has gone back on pledges of local autionomy in 1953'' and at other times, he said.

He denied his group gets weapons from Pakistan and declined to cite the number of fighters and weapons under his control.

''They're available on the open market,'' he said of his group's arms.

Khan disputed critics who condemn the taking and killing of hostages, saying such actions are the right of his independence fighters.

''They are within their rights in every way,'' he said.

#90105u0516 04/15/1990 ~United Press International

FORT LAUDERDALE, FL (APRIL 15) UPI - A charter bus carrying 20 Collier County deputies home from a bachelor party slammed into an Interstate 595 retaining wall early Sunday, injuring 11 officers and the driver.

The driver and one deputy had to be cut from the demolished coach and another deputy was thrown through the windshield onto the highway, Fort Lauderdale police said.

None of the deputies were seriously injured. The driver was to udergo surgery Sunday for leg and foot injuries. Only two deputies remained hospitalized.

Police Officer Michael Balke said the bus was headed west on State Road 84 near the Fort Lauderdale-Hollywood International Airport, when the accident occurred about 3:05 a.m.

The area is under construction and the driver, Judson Moore Latta, 65, missed a detour that would have taken him to I-595 and a connecting route back to Naples. Instead, the bus headed south on a dead-end road, with the driver apparently unaware he was near the end of the roadway.

''The bus slammed through one of several signs marking the end of the avenue, bounded over a strip of concrete then shot across Perimeter Road and headlong into the concrete I-595 retaining wall,'' a police report said.

The deputies told police they came to Fort Lauderdale Saturday afternoon for a bachelor party for one of their fellow officers.

''After an evening of bar-hopping, all returned to the bus for the ride home and work by Monday,'' police said. ''Latta, they said, joined them for dinner but did not enter the bars or participate in the celebration.''

#90105u0528 04/15/1990 ~United Press International

WASHINGTON (APRIL 15) UPI - Advocates for the homeless marched Sunday to the Capitol and prepared to sleep on the Capitol grounds to publicize their call for restoration of the federal housing budget.

The Community for Creative Non-Violence and the National Coalition for the Homeless organized the march and rally to call on Congress to restore the $25 billion cut from the federal housing budget since 1981, said David Hayden, a homeless advocate from Roanoke, Va.

Several hundred people, many of whom spent a week this winter camped out with the homeless in the District of Columbia, participated in the Easter activities to urge Congress to pass legislation restoring the money, Hayden said.

The events bring to an end the ''winter campaign,'' during which homeless

advocates from across the nation alternated, for a week at a time, sleeping under a bridge in the southeast area of the District under Interstate 395.

''I know we've been successful,'' Hayden said of the winter campaign. ''We were hoping legislation would be introduced when Congress came back into session (following the holiday) ... and we do know legislation has been written.

''If it weren't for this campaign, the legislative process would not be where it is right now,'' said Hayden, adding, ''We will continue the struggle until the $25 billion taken out of the budget since 1981 is restored.''

Hayden, who helped organize last October's Housing Now march on Washington said members of Congress promised then to work to restore the $25 billion.

The activities Sunday began at 1 p.m. EDT with a procession from The Community for Creative Non Violence to the west steps of the Capitol for the rally. Participants were to then eat a meal on the east side of the Capitol.

The group planned to sleep out on the Capitol grounds ''to make visible the most terrible consequence of the lack of decent affordable housing ... homelessness,'' Hayden said.

#90105u0596 04/15/1990 ~United Press International

(APRIL 15) UPI - San Diego police say they captured a middle-aged gunman about one hour after he indiscriminately fired his pistol yesterday evening in a hospital emergency room. The barrage of gunfire killed two people and injured another pair. The bloodshed was inspired by the death of the assailant's father during emergency surgery at the hospital earlier in the day. Officials at the small facility expect it to remain closed today.

India and Pakistan are waging a war of words to accompany mounting tensions between the two nations along their border. Pakistan's minister for defense yesterday declared that although his country seeks peace, it will respond with force to any acts of Indian agression. Indian Prime Minister V-P Singh warned Friday that India will teach Pakistan a lesson if it continues supplying arms to separatist Indian militants.

Leaders of the nationalist Latvian Popular Front say they expect the Baltic republic's newly elected Parliament to declare Latvia's independence from Moscow early next month. Nearly one-third of the leaders of Latvia's ruling Communist Party created an offshoot party yesterday

dedicated to the creation of a free Latvian state. One official says he expects President Gorbachev to react negatively to the radical party.

Lithuania's nationalist leaders say they will NOT allow Gorbachev's most recent ultimatum for them to repeal their declaration of independence to overshadow their observance of the Easter holiday. Gorbachev and Soviet Prime Minister Ryzhkov Friday issued a demand for Lithuania to return to its former relationship with Moscow or face an embargo of supplies from other Soviet republics.

#90105u0600 04/15/1990 ~United Press International

(APRIL 15) UPI - Los Angeles police say officers did NOT use unwarranted force in arresting more than 200 anti-abortion activists who illegally tried to shut down a women's health clinic yesterday. Officials of Operation Rescue say they're considering a police brutality lawsuit because of what they say was the harsh way police broke up a demonstration by the radical anti-abortion group.

Talks are underway today between the Nepalese government and opposition members. The two sides are meeting to discuss the dissolution of the Hindu kingdom's Parliament and the formation of a multi-party interim government. Some three-thousand demonstrators gathered outside the meeting place and chanted the ''people canNOT be deceived this time.''

A Smyrna, Georgia, parade was the scene of a freak accident yesterday when a motorcycle policeman collided with a go-cart-driving Shriner. The collision occurred when the officer received an emergency call and rode in the opposite direction of the parade route. Both men are listed in serious but stable condition this morning. The mishap took place about 20 minutes after the festivities commenced.

In what amounts to a classic case of ''you-can't-fire-me-I-quit,'' the eclectic rock-and-roll band The Grateful Dead says it's NOT upset by a decision by a Wisconsin outdoor facility's decision NOT to book the band this summer. The group's publicist says that's because The Dead had decided NOT to play rural Alpine Valley Music Theater.

#90105u0616 04/15/1990 ~United Press International

MOSCOW (APRIL 15) UPI - Soviet television showed Easter masses Sunday and Russian Christians filled churches across the Soviet Union under the new religious freedom of the perestroika era.

Christian faithful across the wide land heard the Easter message of Pimen, the patriarch of Moscow and all Russia, read out in all the dioceses of

the Russian Orthodox Church.

In Roman Catholic Lithuania, Lithuanians also flocked to churches where they were enjoined to be calm in the face of an threatened economic boycott by Moscow over the Baltic republic's struggle for independence.

The Russian Orthodox Christian observances began Saturday night with believers carrying candles and marching in processions around the gold-domed churches in the vast land.

''Christ has risen from the dead,'' people sang during the processions.

At midnight bells chimed, and early Sunday Russians went to cemeteries to remember their dead.

In the second largest Soviet city, Leningrad, ''it was the first time in decades that so many Leningraders watched the Easter Divine service,'' the official Tass news agency said.

Also for the first time in decades, the head of the Leningrad Eparchy was allowed to address believers through the press by releasing ''Church Life in the Northwest,'' Tass said.

Hundreds of churches have been reopened under the reforms of Soviet leader Mikhail Gorbachev, who has told the press that he himself was baptised and thinks it quite normal.

Soviet dictator Josef Stalin had closed all but a handful of churches, using the shuttered places of worship as storehouses and offices.

For the second year in a row, Easter services were shown on Soviet television, with the most extended coverage from the Troitsky Monastery in Moscow.

Soviet television also aired parts of Pope John Paul II's Easter mass at St. Peter's Basilica, but did not carry the pontiff's remarks on Lithuania. In brief Easter greetings in 54 languages, John Paul called on Lithuanians to follow the path of ''respectful and comprehensive dialogue'' in pursuing their ''aspirations.''

On Saturday, the pope sent a message to the president of the Lithuanian bishops' conference, saying, ''In these hours of trepidation and of hope, I am particularly close to the Lithuanian church.''

The pope also met Saturday with top Soviet international affairs adviser Vadim Zagladin and received a message from Gorbachev.

Worshipers across the Soviet Union listened to the Russian Orthodox

patriarch's Easter message, which also urged the population to work for Gorbachev's reforms.

''Christ rose from the dead and resurrected us for kind deeds,'' Pimen said. ''Let us always remember how much Christ loved his native land.

''Let everyone work hard for the benefit of our dear motherland which is following a difficult but blessed path of the comprehensive renewal of our life.''

Despite the 72 years of communist rule and its atheistic ideology, there have always been more Christians than Communist Party members in the Soviet Union.

Christian believers outnumber the 20 million Communist Party members threefold, and Gorbachev has allowed them to worship as they please.

Gorbachev's mother, a devout Christian, attends church every day in his childhood village of Privolnoye near Stavropol in southern Russia.

Not only the Orthodox Christians but Moslems have benefited under the new found freedom, and new mosques have been opened in Central Asia.

Soviet Jews now can study Hebrew openly, have clubs and synagogues are being refurbished in the big cities with open help from foreign Jewish communities.

#90105u0754 04/15/1990 ~United Press International

(APRIL 15) UPI - A 46-year-old La Jolla, California, man is in police custody in San Diego this morning after shooting and killing two people and wounding two others yesterday evening in a hospital emergency room. Bradford Warren Powers Junior entered the facility about 12 hours after his father had died while undergoing emergency surgery. Officials say Powers turned himself in less than an hour after his rampage.

New York police are trying to determine if last night's murder of a cab driver in the city's Fordham section of the Bronx was a robbery or if it is related to three previous killings of cabbies since last month. The driver was shot once in the head. A police spokesman says it's too soon to tell if the string of 22-caliber pistol killings is connected. There are NO suspects in the case.

South African police are providing sketchy details of what they say is continued intra-racial fighting among rival black groups in Natal . The violence has claimed the lives of at least 19 people in a 24-hour period, including five people who died when a gunman opened fire on a funeral

procession. President de Klerk has additional security forces to curb the fighting.

Organizers of the anti-abortion Operation Rescue are accusing Los Angeles police of roughing up people who took part in the group's attempt to obstruct business at a women's health clinic yesterday. A spokeswoman for the group says its possible that Operation Rescue will sue the L-A-P-D for forcibly taking into custody more than 200 of the group's protesters.

#90105u0756 04/15/1990 ~United Press International

(APRIL 15) UPI - New York police say they may be on the trail of a mugging victim who shot and killed one of his assailants Thursday night aboard a subway train. Police say they have arrested one of the gang members involved in the attack and say the 17-year-old male may be able to identify the middle-aged man who pulled a pistol and fired several shots after being beaten and robbed by the youths.

The head of Cambodia's Khmer Rouge guerrilla group accuses the Cambodian government of trying to kill the Asian country's former monarch. In comments broadcast on clandestine rebel radio, the guerrilla official says government troops fired dozens of artillery shells into Prince Norodaom Sihanouk's residence. The report says Wednesday's attacks forced Sihanouk to flee into neighboring Thailand.

A group in Dallas is laying the groundwork that will make it possible for 100 Soviet children to come to the United States to have serious facial deformities surgically repaired. The Dallas-based International Craniofacial Foundation says it has lined up a number of airlines to fly the kids free while doctors have agreed to perform the surgery free of cost.

The Yugoslav news agency says hundreds of foreigners, mostly males, are hunting the countryside in search of wild mushrooms that are said to charge one's sex drive. Rumor has it that officials in the area prevented the spread of the news of the mushroom's fertility-enhancing power until recently. It is NOT known if the story is an old-wive's tale.

-30- 1685

#90105u0881 04/15/1990 ~United Press International

(APRIL 15) UPI - A dispatcher for a New York cab fleet says taxi drivers are reluctant to enter the Bronx after a fifth cab driver was shot and killed in the borough last night. The latest victim was shot once in the head. Police are NOT sure if the cabbie was robbed. Authorities say they will investigate the homicide to see if it fits the pattern that three of the murders follow.

Senate majority leader George Mitchell says Soviet President Gorbachev's threat to Lithuania to return to Moscow's fold is ''unwise and inappropriate.'' Mitchell, who returned to Washington yesterday after a visit last week to Berlin and Moscow, condemned the Kremlin's ultimatum to the Baltic republic to rescind its declaration of freedom or face embargoes.

Lebanese police say gunfire offset the sound of ringing bells in east Beirut this morning as rival Christian militias vied for control of the battered Christian enclave. Security sources say the latest episode of violence left one person dead and four others wounded. The bloodshed comes as an Arab League envoy tries to gain support for peace in Lebanon.

Officials at the San Diego zoo are unsure why a rare California Condor chick died in its shell yesterday. The chick had been incubating in its shell nearly two months and zoo personnel planned to help it from its shell last night. But when the chick's vitals were checked in the afternoon, it was NOT breathing. A zoo spokesman says four condor chick eggs have hatched this year and another five are in incubators.

#90105u0992 04/15/1990 ~United Press International

(APRIL 15) UPI - Three-term Democratic Senator Spark Masayuki Matsunaga of Hawaii died today in Toronto at the age of 73. Matsunaga was admitted to a hospital yesterday and died of complications from prostate cancer. He had arrived in Toronto earlier last week for treatment at an oncology clinic. Matsunaga was elected to the House in 1962, two years after Hawaii became the 50th state. He was elected to the Senate in 1976.

Police in San Diego say a man who was upset over the death of his father during surgery yesterday returned to the hospital 12 hours later and began firing indiscriminately with a handgun. A veteran nurse and a student emergency room worker were killed. Two others, including a physician, were wounded. The gunman, identified as Bradford Powers Junior, surrendered less than an hour later in Oceanside, about 40 miles north of San Diego.

Police in China today dragged away a young man who attempted to lay a wreath in Tiananmen Square in memory of the late Communist Party chief Hu Yaobang and the protesters who were killed in the square. Chinese authorities had sent a telegram to all government units forbidding any ceremonies or mourning marking the politically sensitive anniversary of Hu's death, which inspired last spring's massive pro-democracy protests.

The threat of war is increasing in India and Pakistan today. Arrests of suspected Moslem separatists continued in Indian Kashmir. The separatists have called for massive protests once a 10-day shoot-to-kill curfew is

lifted. Both sides have substantial forces along their 12-hundred mile border, which India claims is the entry point for weapons and training for Moslem terror groups.

Despite a serious dry spell, officials in Singapore continue to enforce a strict law that requires toilets to be flushed after use. First time offenders who forget to flush are fined 75-dollars and repeat offenders must pay 250-dollars. Undercover environmental health officials pretend to wash their hands or use urinals in public rest rooms in order to catch the offenders.

(APRIL 15) UPI - Pope John Paul today used his traditional Easter Sunday message to hail the collapse of dictatorships. Speaking to some 200-thousand pilgrims and tourists gathered in St. Peter's Square, the pontiff said he hopes Lithuanians will achieve their independence aspirations- in his words- ''through a respectful and comprehensive dialogue.''

In Jerusalem, processions and joyful services were held throughout the walled Old City today as thousands of Christians celebrated Easter Sunday. But the celebrations were marked by tension as militant Israeli Jews continued to occupy a Christian Quarter house in Jerusalem in defiance of the Christian Arabs who live in the area.

Three-term Democratic Senator Spark Masayuki Matsunaga died early today in Toronto where he was being treated for prostate cancer. He was 73. Matsunaga was elected to the House in 1962, two years after Hawaii became the 50th state. He served there until he was elected to the Senate in 1976.

South African police report more bloodshed in strife-torn Natal province. Authorities say at least 19 people were killed in violence by rival black factions during a 24-hour period. The dead include five who were killed when gunmen opened fire at a funeral. In the worst incident, police say 10 blacks were killed and two injured ''in what appeared to be faction fighting.''

71 world beauties will be competing tonight to become the 39th Miss Universe. For the first time, the international beauty pageant will include a Soviet contestant and a black American. The annual contest will be held at the Shubert Theater in Los Angeles.

-30- 1789

(APRIL 15) UPI - South African black nationalist leader Nelson Mandela is in Britain today for his first visit in 28 years. Mandela is planning to attend a rock concert in his honor and meet with fellow anti-apartheid campaigners and exiles... but he ignored Prime Minister Thatcher's invitation to meet. Mandela has denounced Thatcher's easing of British sanctions against South Africa as ''absolutely disastrous.''

The Easter Bunny was arrested in Santa Rosa, California. But police say it wasn't a mistake or a joke. 38-year-old Clyde Lashbaugh was arrested for violating his parole as a registered sex offender. Lashbaugh was wearing a full bunny suit while working a photo booth at a downtown shopping mall.

-30- 868

#90105u1125 04/15/1990 ~United Press International

(APRIL 16) UPI - Detroit Manager Sparky Anderson, surrounded by new faces this season, watched two of his additions lift the Tigers to victory Sunday.

Mark Salas clubbed a two-run homer in the eighth inning and Dan Petry pitched two shutout innings of relief, leading the Tigers to a 6-4 victory over the Baltimore Orioles.

The Tigers, losers of 103 games a year ago, improved to 3-4 with their second win in three games against the Orioles.

''I don't know where we'll finish,'' Anderson said. ''We might finish last but we're not a joke. I know all the magazines and papers are picking us for last place - and maybe we'll finish last - but we've got a few players now.''

The Tigers dove headlong into the free-agent market during the winter, signing Tony Phillips, Lloyd Moseby and Cecil Fielder to bolster what was

a woeful offense in 1989.

Phillips played last season with the world champion Oakland Athletics, whiled Moseby moved over from the AL East champ Toronto Blue Jays. Fielder hit 38 home runs last year in Japan for the Hanshin Tigers.

''I read where one writer said our team was a joke. We're not a joke,'' Anderson insisted.

It was two lesser-publicized additions who played key roles in Sunday's victory.

Petry, who returned to the Tigers after pitching last year for California, pitched two innings of one-hit shutout relief in place of Jeff Robinson, walking two batters, for his first victory for Detroit since Sept. 15, 1987.

Salas lined his two-run home run just over the right-field fence with two out in the eighth inning. Gary Ward opened with a single off Jay Aldrich, 1-1, and went to second on a sacrifice by pinch hitter Ed Romero.

Jose Bautista replaced Aldrich and got pinch hitter Tracy Jones to ground out before Salas, who entered the game as a pinch hitter in the seventh, lined a 1-1 pitch over the fence to decide the game.

In other American League games Sunday, Toronto edged Kansas City 5-4, New York defeated Texas 3-1, Oakland shut out Seattle 3-0, California topped Minnesota 4-1 and Chicago beat Cleveland 4-1. The game between the Milwaukee Brewers and Boston Red Sox was rained out.

In the National League, it was: Pittsburgh 4, Chicago 3; Philadelphia 4, St. Louis 0; Cincinnati 13, Atlanta 6; Los Angeles 5, Houston 4; and San Diego 4, San Francisco 3.

-- AROUND THE AL --

BLUE JAYS 5, ROYALS 4

At Kansas City, Mo., Junior Felix stroked four hits and doubled home three runs in a five-run sixth inning to lift Toronto. Dave Steib, 2-0, scattered nine hits over six innings for the win, striking out four and walking one. David Wells, the fourth Toronto pitcher, pitched the ninth for his second save. Kansas City reliever Steve Crawford, 0-1, took the loss.

YANKEES 3, RANGERS 1

At New York, Steve Sax singled home Roberto Kelly with one out in the

eighth inning to rally New York. Sax's liner to right came off reliever Jeff Russell, 0-1, and made a winner of Eric Plunk, 2-0, the fourth New York pitcher. Dave Righetti pitched the ninth for his second save.

ATHLETICS 3, MARINERS 0

At Seattle, Mark McGwire hit a two-run homer and Bob Welch and three relievers combined on a four-hit shutout to lead Oakland. Welch, 2-0, worked 6 1-3 innings, allowing three hits, walking one and striking out three. Dennis Eckersley pitched the final inning for his third save. Seattle starter Brian Holman, 1-1, gave up six hits and three runs in seven innings.

ANGELS 4, TWINS 1

At Anaheim, Calif., Chuck Finley scattered three hits over eight innings and Chili Davis singled home two runs in the third inning to break a tie for California. Bryan Harvey pitched a hitless ninth inning for his first save. Minnesota starter Kevin Tapani, 1-1, was victimized by a pair of errors in the third inning, as two of the three Angels runs were unearned.

WHITE SOX 4, INDIANS 1

At Chicago, Lance Johnson drove in two runs to help Greg Hibbard, 1-0, win his first start of the season. Bobby Thigpen pitched the ninth for his third save. Kevin Bearse, 0-1, making his major league debut, took the loss.

#90105u1349 04/15/1990 ~United Press International
(APRIL 15) UPI - South African black leader Nelson Mandela is snubbing British Prime Minister Thatcher during his first visit to Britain in 28 years. Mandela made plain before his arrival in London today that he will ignore Thatcher's invitation to meet because Britain eased sanctions against Pretoria. The black leader was expected to meet with fellow anti-apartheid campaigners and exiles... and address an expected crowd of 70-thousand people at Wembley Stadium for a rock concert in his honor.

In New York, trial opens tomorrow for two men charged in the racially-motivated slaying of a black teen-ager in Brooklyn's Bensonhurst neighborhood. Keith Mondello, the alleged ringleader in the mob attack last August, and Joseph Fama, the accused triggerman, are the first of eight young men to be tried in the killing of Yusuf Hawkins. The teen was shot dead during an attack by a bat-wielding gang of about 30 whites.

A new study shows that the poorest Americans are children under age six. The Report by the National Center for Children in Poverty at Columbia University in New York says nearly a quarter of pre-school children... about five-Million... live in families with incomes below the poverty line. It says the majority of poor children are from families with at least one parent working or looking for work.

NASA officials say work to ready the space shuttle Discovery for a second launch attempt is running ahead of schedule. And with everything in ''ship-shape,'' officials today gave work crews this Easter Sunday afternoon off after the installation of a new hydraulic power unit. Discovery is scheduled for blastoff April 25th. The orbiter was grounded last Tuesday just four minutes before blastoff when one of its three ''auxiliary power units'' malfunctioned.

The Internal Revenue Service and post offices nationwide are bracing for an avalanched of last-minute filings tomorrow night. The I-R-S is giving Americans an extra 24 hours to file their income tax returns this year because the traditional April 15th tax deadline fell on Easter Sunday. Taxpayers in New England and the Northeast who mail their returns through the I-R-S regional office in Andover, Massachusetts, have until Tuesday to get in their taxes out because Monday is a state holiday in Massachusetts... Patriot's Day.

-30- 2509
#90105u1439 04/15/1990 ~United Press International
(APRIL 15) UPI - Mikhail Gorbachev's threat of an economic embargo against Lithuania apparently could jeopardize trade relations between Moscow and Washington. Congressional leaders and administration officials

hinted today that a U-S-Soviet trade agreement might be forfeited.

Maverick Communist Boris Yeltsin has been nominated to run for president of the Russian Federation, the largest of the Soviet Union's 15 republics. The republic's parliament will choose the president when it meets in Moscow on May 16th. If Yeltsin wins, it could give him a potential power base against Mikhail Gorbachev.

A shoot-to-kill curfew that's been in effect for 11 days in the disputed Kashmir region of India has created food shortages and other hardships, and doctors say it could get worse. They say lack of fresh food and medical care could lead to outbreaks of disease, and they're threatening to resign if the curfew ISN'T lifted tomorrow.

Engineers at Cape Canaveral today installed a replacement for the faulty hydraulic power unit that postponed last Tuesday's launch of the shuttle Discovery. Work to recharge the batteries on the Hubble Space Telescope is running ahead of schedule. The telescope is now scheduled to be taken into space by Discovery on April 25th.

Senator Spark Masayuki Matsunaga... who served Hawaii in Congress almost from the time it became a state... died early today. An aide says Matsunaga died in Toronto, where he was being treated for prostate cancer. He was 73. Matsunaga helped lead the successful fight for reparations to Japanese interned during World War Two.

-30- 1773

#90105u1453 04/15/1990 ~United Press International

(APRIL 15) UPI - A study of poverty among children shows that nearly one quarter of the children in the United States live below the poverty line. The report byColumbia University's National Center for Children in Poverty says federal statistics show that most poor children live in families with at least one parent working, or looking for a job.

Americans have until tomorrow night to file their taxes because April 15th fell on Easter Sunday this year. Postal workers are bracing for the usual rush of last-minute filers. A tax worker in Portland, Oregon, says one woman went into labor while working on taxes, but insisted on finishing the paperwork before going to the hospital.

Americans fed thousands of homeless and prayed together to celebrate Easter today. Actor Charlton Heston read the Easter scripture at the 70th Hollywood Bowl Easter Service to a standing-room-only crowd. The service was dedicated this year to the rebirth of religious freedom in Eastern Europe.

Easter brought NO end to fighting between armed Christian forces in

Beirut. Machine gun blasts mingled with the sound of tolling church bells during Easter services. Police said one person was killed during the night. The Maronite patriarch warned that continuing violence could drive Christians out of Lebanon.

South African anti-apartheid leader Nelson Mandela arrived in London today for his first visit to Britain in 28 years. Mandela plans to attend a rock concert in his honor tomorrow, and he's expected to meet with anti-apartheid campaigners and exiles. But he declined Prime Minister Thatcher's invitation to meet.

-30- 1781

#90105u1595 04/15/1990 ~United Press International

(APRIL 15) UPI - The U-S hints at economic retaliation over Lithuania... Doctors, nurses and other health workers threaten to quit in India's troubled Kashmir state... Americans scramble to meet tax deadline... And Easter is celebrated from coast to coast... U-P-I has these top stories and more, next.

The Bush administration apparently is considering possible economic retaliation if Mikhail Gorbachev carries out his latest threat against Lithuania.

Gorbachev on Friday threatened to cut off vital goods to Lithuania if the rebellious republic does NOT withdraw its declaration of independence by today. Lithuania has refused.

Today in Washington, congressional leaders and administration officials hinted that a U-S response might be to suspend work on a U-S-Soviet trade agreement.

Senate Republican leader Robert Dole said that he DOESN'T think the United States should ''be helpful to'' the Soviets ''when they're doing this to Lithuania.''

An administration official said topics discussed at a meeting Friday on possible responses included suspension of work on initiatives to improve U-S-Soviet economic ties. Among those initiatives is a U-S-Soviet trade agreement.

In Lithuania, people flocked to Easter masses today, and the republic's cardinal urged calm in the face of the ''impending economic boycott'' by Moscow.

-30- 1517

#90105u1614 04/15/1990 ~United Press International

(APRIL 15) UPI - A shoot-to-kill curfew in India's disputed Kashmir region is taking its toll on residents.

The curfew, imposed April 6th after three people were kidnapped by separatists, has created food shortages and other hardships. And doctors in the region say the situation could get worse.

They say the curfew is preventing people from getting fresh food and medical care, and they say it could lead to outbreaks of disease among the four-Million people under curfew.

The director of a hospital in Srinagar, the summer capital, says about one-thousand patients normally come to the hospital daily for outpatient care. Now, he says, only two who live next to the facility are able to come.

Thousands of government-employed doctors, nurses, paramedics and other health workers are threatening to resign unless the curfew is lifted tomorrow.

Americans who like to put off filing their income tax returns have an extra day to delay this year.

With April 15th falling on Easter Sunday, the deadline for filing returns isN'T until midnight tomorrow. But the Internal Revenue Service and the U-S Postal Service both expect a last-minute rush.

In Portland, Oregon, a tax service employee tells of one woman who went into labor while she and her husband were working on their taxes. The couple insisted on finishing their taxes before going to the hospital to have the baby that night.

The preparer was so nervous that he made a mistake.

Another tax preparer in Indianapolis says he's had couples living together out of wedlock who try to pass themselves off as brother and sister.

And a preparer in Boston says one woman flashed the man who did her return. He says the woman was happy, and ''just wanted to give him a thrill, too.''

-30- 1944

#90105u1648 04/15/1990 ~United Press International

(APRIL 15) UPI - British officials say negotiations broke down today with diehard prisoners holding much of Strangeways Prison in Manchester, England.

A Home Office spokesman declined to disclose reasons for the breakdown, but says he believes it's part of the regular ebb and flow that has characterized the discussions.

Negotiators remain in contact with the prisoners.

The prisoner riot erupted 15 days ago without any specific inmate demands. But prisoners have since expressed anger over jailhouse conditions.

Many prisoners have ended the rebellion. The Home Office says the number of holdouts is ''less than 13'' but prisoners reportedly held up a slate last night indicating they number only 10.

The discrepancy raises fears that as many as three inmates may be dead in the century-old jail.

The prisoners are soaking barricades of debris in cooking oil at the entrance to each of the jail's wings and have a bonfire burning in one of the wings.

Police say a gunman who shot four people in a San Diego hospital... killing two... was apparently distraught over the death of his father during surgery earlier in the day.

Police today said Bradford Powers Junior walked into an emergency room at Mission Bay Memorial yesterday and began firing indiscriminately with a handgun. He then fled the building.

Powers telephoned police in Oceanside about 40 miles away, and surrendered less than an hour later.

Police said Powers' father went into cardiac arrest earlier after being brought in with an aneurysm. The doctor involved in the surgery was NOT present at the time of the shooting.

But a student emergency medical technician training at the hospital and a nurse were killed in the gunfire.

One doctor was wounded, but is in good condition, and a fourth victim was treated and released.

-30- 2009

#90105u1692 04/15/1990 ~United Press International

(APRIL 15) UPI - Americans celebrated Easter Sunday with traditional prayers and at least one UNtraditional, drive-through service in Texas. The Christian holiday was also observed in Jerusalem, and Pope John Paul gave his Easter message at the Vatican.

One of the biggest U-S observances was in Los Angeles, where actor Charlton Heston read from scripture before a standing-room-only crowd in the Hollywood Bowl at its 70th annual Easter Service.

In Wichita Falls, Texas, the Salvation Army held a drive-through service from the roof of the Army's Corps Building. The 15-minute service was repeated all morning, and drew an estimated 25-hundred people.

In Jerusalem, thousands of Christians celebrated with processions and joyful services. This year, Easter fell on the same day on both the Roman Catholic and Greek Orthodox calendars.

At the Vatican, Pope John called for peaceful and ''respectful'' dialogue over Lithuania's demands for independence. The pope's Easter message was delivered to an estimated 200-thousand people in St. Peter's Square.

-30- 1224

#90105u1770 04/15/1990 ~United Press International

(APRIL 15) UPI - U-S officials are hinting that a planned U-S-Soviet trade agreement might be in jeopardy if Moscow goes ahead with its threat to cut off vital goods to Lithuania. A Bush administration official says such an option was discussed at a meeting Friday that included the State Department, the Pentagon and other agencies.

In Lithuania, the republic's cardinal urged people to ''stay cool'' in the face of the ''impending economic boycott'' by Moscow. Soviet President Gorbachev on Friday gave Lithuania until today to withdraw its declaration of independence. An official in Vilnius says NO action will be taken on Easter Sunday, despite the ultimatum.

Officials in Tampa, Florida, say one man was killed today when an explosion ripped through a petroleum refinery at the Port of Tampa. Authorities are searching for another worker thought to have been in the refinery at the time. A fire that resulted from the blast was extinguished in about an hour. Citgo Petroleum Corporation officials would NOT say what caused the explosion.

Fog laid thick over the South this Easter Sunday. Light winds combined with moisture from recent rain to produce fog that cut visibility to less than a few hundred yards. The fog sat in patches from Florida to Indianapolis. Heavy rain doused much of the nation, and snow fell in northern New England and the upper Great Lakes.

The leader of the main separatist group seeking independence for India's Kashmir state says India's claim that he ordered the killing of three hostages ''is a lie.'' India said Amanullah Khan ordered the April 10th

killing of three hostages held by a group claiming to be a student wing of Khan's group. Khan is in the United States seeking support for his cause.

The political leader of the Irish Republican Army today vowed that his group will continue its struggle until the British give up control of Northern Ireland. Gerry Adams is president of Sinn Fein, the political wing of the I-R-A. He spoke in Belfast at an Easter Sunday rally commemorating a 1916 anti-British uprising.

Another cab driver has been shot and killed in New York City. Last night's slaying brings to five the number of cabbies who have been gunned down in the Bronx in the past five weeks. Cab drivers panicked by the killings have refused to work at night, to drive in certain areas of the Bronx, or to pick up ''suspicious looking'' passengers.

The former president of Panama is dead at the age of 84. The family of Marco Aurelio Robles says the former president died yesterday in a Miami hospital following a long illness. Robles held his country's highest office from 1964 to 1968. His successor was ousted in a coup 10 days after taking office.

-30- 2916

#90105u2109 04/15/1990 ~United Press International

(APRIL 15) UPI - Today is the deadline for Lithuania to withdraw its declaration of independence, but an official in Vilnius says it's NOT going to happen. He says NO meetings were planned for Easter Sunday because it's ''an important day in Lithuania.'' Soviet President Gorbachev issued the ultimatum Friday... threatening to cut off some vital goods to the rebellious republic unless it withdraws its independence declaration.

President Bush is holding his options in reserve as he waits to see what will happen next in Lithuania. On Friday, Moscow threatened a partial economic embargo if Lithuania does NOT withdraw its declaration of independence. Today, some congressional leaders hinted that a planned U-S-Soviet trade pact might be in jeopardy if the threat is carried out. But Senate Democratic leader George Mitchell said he supports Bush's wait-and-see approach.

Christians across Eastern Europe celebrated Easter freely today for the first time in years. Romania's new NON-communist government declared tomorrow a national holiday. That marks quite a change from the rule of executed leader Nicolae Ceaucescu, who had forbidden public observance of religious holidays. At the Vatican, Pope John Paul said the spiritual world is reawakening after years of suppression during world wars and dictatorships.

South African anti-apartheid leader Nelson Mandela is in Britain for his

first visit in 28 years. He arrived in London today, and thanked the British people for their support in his struggle against apartheid. He'll meet with anti-apartheid campaigners and exiles, but he WON'T be meeting with Prime Minister Thatcher. Mandela earlier denounced Thatcher's easing of sanctions against South Africa, calling the move ''disastrous.''

-30- 1934

#90105u2133 04/15/1990 ~United Press International

(APRIL 15) UPI - Citgo says one of its workers was killed in Tampa, Florida, today in an explosion at a petroleum refinery. A company spokesman says the man was trying to repair a unit that collects petroleum vapors and condenses them back into liquid. Apparently, leaking vapors accumulated at ground level and something ignited them. The resulting fire forced the oil company to shut down loading operations at the port.

New religious freedom allowed Christians to fill churches to celebrate Easter across the Soviet Union today. Soviet television aired Easter masses, while the message of the patriarch of Moscow and all of Russia was read in all the dioceses of the Russian Orthodox Church. In Roman Catholic Lithuania, priests called on church-goers to be calm in their struggle for independence.

A St. Louis minister served free rabbit dinners to the homeless today as part of his message that the true meaning of Easter is being subverted. The Reverend Larry Rice says Easter has degenerated into what he terms rabbit worship. He says the result is that we're wasting an important source of food- rabbits- while the homeless go hungry. More than 350 people answered Rice's invitation to ''have the Easter bunny for dinner'' at a St. Louis shelter.

-30- 1427

#90105u2265 04/15/1990 ~United Press International

(APRIL 15) UPI - It was standing-room-only at California's Hollywood Bowl during the amphitheater's 70th annual Easter Service- dedicated this year to the rebirth of religious freedom in Eastern Europe. Across the country in New York, Cardinal John O'Connor celebrated Easter Mass at St. Patrick's Cathedral. Outside, protesters demanded the church be taxed because of its support of the anti-abortion movement.

At the Vatican, Pope John Paul delivered his Easter Sunday message from the balcony of St. Peter's Basilica. He called for peaceful and ''respectful'' dialogue in the Lithuanian crisis. He also cited the collapse of dictatorships worldwide as a chance to discover the ''true dimensions of the spirit.'' Vatican officials estimated the crowd in St. Peter's Square at 200-thousand. The message was televised live to more than 20 countries.

Lithuania's Roman Catholic cardinal urged calm today in the face of what he termed ''an impending economic boycott'' by Moscow. The Kremlin on Friday threatened to cut off some vital goods if Lithuania does NOT withdraw its declaration of independence by today. Lithuania has refused to do so. Pope John Paul mentioned the Baltic republic in his Easter message- parts of which were broadcast on Soviet television. But his remarks on Lithuania were cut.

Today, April 15th, is traditionally income tax day... but this year the deadline to file is being extended one more day because of the Easter holiday. Despite the extra day, officials still expect an avalanche of last-minute filings. Workers at the I-R-S regional office in Philadelphia, for example, expect up to two-and-a-half-Million last-minute returns. As tax preparer Bruce Thompson of Portland, Oregon, said- ''It's frantic as usual.''

-30- 1938

#90105u2297 04/15/1990 ~United Press International

(APRIL 15) UPI - Police say a man who shot and killed two people and wounded two others in a San Diego hospital yesterday apparently was upset because his father died in surgery at the hospital earlier in the day. Investigators say Bradford Powers Junior walked into the emergency room at Mission Bay Memorial Hospital and opened fire at random... killing a student in training and a nurse. He then fled, but later surrendered to police 40 miles away.

Authors of a new study on children and poverty say federal statistics challenge the idea that people are poor because they woN'T work. The report from Columbia University in New York finds most poor children are in families with at least one parent working or looking for a job. 37 percent live in families whose income all comes from work. Only 28 percent live in families that rely on public assistance for all their income.

Chinese police today arrested a man who tried to place a wreath in Beijing's Tiananmen Square to honor the late Communist Party chief Hu Yaobang and pro-democracy protesters. Today is the first anniversary of the death of the relatively liberal Hu. Last June, the government killed hundreds of demonstrators at the square and had forbidden any ceremonies marking the deaths.

A condor chick hatched today at the Los Angeles Zoo as part of a wildlife recovery project. The six-ounce chick was christened Tumusai, an Indian word for ''spirit'' or ''shadow.'' The bird is scheduled to eat its first meal of minced mice tonight. The chick is the 10th of the rare birds hatched in captivity. Its egg was taken from its parents shortly after it was laid, which has encouraged them to produce another egg the same season.

-30- 1873
#90105u2404 04/15/1990 ~United Press International
(APRIL 15) UPI - Christians in America and around the world celebrate Easter...

Lithuania faces an impending economic boycott from Moscow if it doesn't recant its independence declaration...

And legendary film actress Greta Garbo dies...

These stories... and more... next, from United Press International:

Americans celebrated Easter today in a variety of locations- churches, amphitheaters and- in one Texas city- on a rooftop.

In New York City, Cardinal John O'Connor celebrated Easter Sunday Mass at St. Patrick's Cathedral. In Los Angeles, a standing-room-only crowd packed the Hollywood Bowl for the amphitheater's 70th annual Easter Service.

A different kind of observance occurred in Wichita Falls, Texas, where the Salvation Army held a drive-through service on the roof of the Army's Corps Building.

In Stamford, Connecticut, a Ukrainian bishop talked about Catholics in Eastern Europe who were celebrating Easter freely for the first time in decades.

Many of those countries have just emerged from Communist dictatorships, and today marked the first free observance of Easter for thousands of people in Romania, Bulgaria and other nations.

Across the Soviet Union, Russian Christians filled churches that have been re-opened under Mikhail Gorbachev's reforms.

And at the Vatican, Pope John Paul delivered his Easter message from the balcony of St. Peter's Basilica... to an estimated 200-thousand people gathered in St. Peter's Square.

#90105u2475 04/15/1990 ~United Press International
(APRIL 15) UPI - An explosion today at a petroleum refinery in Tampa, Florida, left a worker dead.

The blast occurred in a Citgo vapor recovery unit at the Port of Tampa. The unit is designed to prevent petroleum fumes from leaking while barges

and tankers unload petroleum.

Fire officials identify the dead worker as 39-year-old Nicholas Dean.

A fire department spokesman says Dean was repairing the vapor recovery unit at the time of the explosion. Leaking vapors apparently accumulated near the ground and somehow ignited.

The flames severely scorched the side of a gasoline tank. But the fire department quickly applied large amounts of foam to suppress the blaze before the tank exploded.

The spokesman says all operations at the terminal have been suspended pending an investigation of the blast.

NASA engineers put a new hydraulic power unit into the shuttle Discovery today.

Discovery was grounded Tuesday just four minutes from blastoff when one of the ship's three auxiliary power units malfunctioned.

The units provide hydraulic power to steer the shuttle. While shuttles can fly with just one, NASA safety rules forbid a launch unless all three units are working properly.

The power pack will be tested Wednesday to prepare for an April 25th flight.

Work is ahead of schedule to recharge the batteries for the shuttle's cargo- the Hubble Space Telescope.

Says a NASA spokesman- ''Everything's ship-shape.''

Work to fix a hydraulic leak in the shuttle Columbia's nose-landing gear system is also on track. That spaceship is scheduled to roll out to the launch pad at Cape Canaveral, Florida, next Sunday.

#90105u2481 04/15/1990 ~United Press International

(APRIL 15) UPI - Activists plan to sleep on the grounds of the nation's Capitol building tonight to show Congress the plight of the homeless.

Several hundred homeless advocates marched to the Capitol and shared a meal today. The march and rally caps a winter in which many activists spent a week camped out with the homeless in Washington, D-C.

The Community for Creative Non-Violence and the National Coalition for the

Homeless organized the march. They are calling on Congress to restore the 25-BILLION dollars cut from the federal housing budget since 1981.

Homeless advocate David Hayden says the group has helped to force the writing of legislation on homelessness, and hopes bills will be introduced when Congress re-convenes following the Easter holiday.

In Singapore, it's a serious offense if you DON'T flush a public toilet... even though a dry spell has created a water shortage in the Southeast Asian city.

Under the law imposed last year, first-time offenders who forget to flush are fined 75 dollars and repeat offenders must pay 250 dollars. Those who commit a third or subsequent offense are slapped with a 500-dollar fine.

An Environment Ministry spokesman explained the need for the law, saying- ''Public health canNOT be compromised.'' He says- ''Toilets have to be flushed after use.''

And how are the non-flushers caught? Undercover officials are stationed in public restrooms, where they pretend to wash their hands while watching for culprits.

There's been a public outcry to suspend the law because of a dry spell that's cut water stocks in reservoirs to 67 percent. But officials reject that plea, saying the amount of water used in each flush is minimal.

#90105u2506 04/15/1990 ~United Press International
(APRIL 15) UPI - Easter observances ran the gamut today, from the traditional to the NOT-so-traditional. The Salvation Army in Wichita Falls Texas, conducted a ''drive-thru'' roof-top service, visible to motorists in nearby parking lots.

East Bloc nations marked their first free Easter today with jammed church services. In Bulgaria, the president sent greetings to worshipers and encouraged its members to observe the religious holiday.

Soviet President Gorbachev gave Lithuania until today to negate its declaration of independence. But a Lithuanian official said- ''We are NOT planning on holding any meetings today because it's Easter, and Easter is an important day in Lithuania.''

President Bush is in Camp David this holiday weekend, keeping his options regarding Lithuania in reserve. Congressional leaders and administration officials say Moscow's trade relations with the United States may suffer if the crisis escalates.

The legendary screen actress and recluse Greta Garbo has died at the age of 84. A spokesman for the New York-Cornell Medical Center announced Garbo's death and said NO further information would be released at the request of her family.

-30- 1344

#90105u2511 04/15/1990 ~United Press International

(APRIL 15) UPI - Senator Spark Masayuki Matsunaga of Hawaii died in Toronto today after battling prostrate cancer. He was 73. The three-term Democrat began serving his island state in 1962, two years after Hawaii became a state.

New York cabbies are in a panic following last night's shooting death of a fellow driver in the Bronx. The victim was the fifth taxi driver to be gunned down during the past five weeks. Police say three of the drivers were shot with the same gun.

Rival Christian Lebanese forces continued fighting in East Beirut today, despite the Easter holiday. The Christian Maronite patriarch, a religious leader in the region, says Christians may have to flee if the battling does NOT stop.

Nepal's opposition leaders were NOT able to reach an agreement with the government today after meeting for 12 hours. The opposition wants parliament dissolved and a new multi-party government formed. Negotiations are continuing.

Seattle researchers say long-term use of a cancer-fighting drug is more effective than cortisone in treating severe asthma. Doctors at Virginia Mason Medical Center say 24 of 25 patients who used the anti-cancer drug were able to cut cortisone use by more than 50 percent.

-30- 1389

#90105u2608 04/15/1990 ~United Press International

(APRIL 15) UPI - Greta Garbo... the Swedish-born actress whose career made the leap from silent movies to talkies... died today in New York at age 84. Hospital officials disclosed NO more information at the request of the family. Garbo gained fame in films with titles such as, ''The Temptress,'' ''A Woman of Affairs'' and ''Flesh and the Devil.'' She retired in 1941 to live a life of reclusiveness, and was perhaps best known for the line, ''I vant to be alone.''

Thousands of Christian pilgrims celebrated Easter today in churches throughout Jerusalem. The Latin Patriarch led a procession to the Church of the Holy Sepulchre, where he said a high mass. The Greek patriarch also

held a service at the church, with Easter this year falling on the same day in both the Roman Catholic and Greek Orthodox calendars. Protestants held Easter services at dawn at the Garden Tomb outside the Old City.

Tomorrow begins a week of environmental events in California leading up to Earth Day 1990 next Sunday- the 20th anniversary of the original Earth Day. The week kicks off with a global warming conference at the University of California at Berkeley... and a seven-day, 420-mile bicycle trek to publicize threats to open space in the San Francisco Bay area. In Southern California, Los Angeles environmentalists plan street festivals, park cleanups and a ''Save the Dolphins'' walk.

San Diego police say the man that opened fire in a hospital emergency room yesterday and shot four people, killing two, apparently was very upset over his father's death. Police say Bradford Powers' father had been brought to Mission Bay Memorial Hospital earlier, and died of cardiac arrest during surgery. The gunman surrendered to police about one hour after the shooting.

-30- 1931

#90105u2612 04/15/1990 ~United Press International

(APRIL 15) UPI - South Africa reports a military unit sent to keep the peace in Natal province was ambushed today. One soldier was killed. Radio South Africa says another black man was killed by a mob in the same area later in the morning. The deaths follow fighting yesterday which left 20 blacks dead. Troops were ordered into the area two weeks ago to end years of fighting between the African National Congress and the rival Zulu tribal movement Inkatha.

Dozens of rallies took place across Ireland today to commemorate the Easter 1916 uprising against the British. At one rally at the Milltown cemetery in Belfast, Irish Republican Army political leader Gerry Adams said the I-R-A will NOT lay down its weapons until British forces withdraw completely from Ireland. The 1916 uprising triggered a series of clashes that led Britain in 1920 to withdraw from 26 of Ireland's 32 counties.

Authorities in Santa Rosa, California, have arrested the Easter Bunny, but say it's NO laughing matter. A 38-year-old man wearing a full bunny suit was arrested Thursday for violating his parole as a sex offender. Police say the man was at a downtown shopping mall posing for photos with children. The suspect recently was released from prison on sex charges. One of his parole conditons is that he avoid contact with children under age 18.

An Internal Revenue Service worker says his office is being flooded by callers asking whether they have an extra day to file tax returns. The answer is yes, because April 15th falls on a Sunday this year. The

deadline is now midnight tomorrow. Thousands of people will file for extensions anyway. The extensions push back the return due date to August 15th. But all taxes owed still are payable by tomorrow. Only the paperwork is delayed.

-30- 1952

#90106b0015 04/16/1990 ~Business Wire

NEWARK, CA (APRIL 16) BUSINESS WIRE - Two Count Holding Co. Friday reported operating results for the year and the fourth quarter ended December 31, 1989.

The company's net loss was $56,000, or 1 cent per share, for the 1989 year compared to a loss of $875,000, or 11 cents per share, for the prior year. Sales for the 1989 year were $48.1 million compared to $38.1 million in 1988. Earnings from operations were $468,000 in 1989, compared to a loss of $829,000 in the prior year.

Two Count incurred losses of $288,000 in 1989 related to affiliated companies, compared to losses of $416,000 in 1988.

In the fourth quarter, Two Count had sales of $8.8 million compared to $8.3 million in 1988. The net loss during 1989's fourth quarter was $666,000 compared to a loss of $682,000 in 1988. The current year's fourth quarter included a loss of $439,000 related to affiliated companies as compared to a loss of $227,000 during the similar period of 1988.

William Walsh, chairman and chief executive officer, said results for the current year demonstrate the turn around capability of Two Count and the additional profitability available with the company operating at the increased sales levels achieved in 1989.

Two Count, a publicly traded company since April 1988, is a leading distributor of ice cream and related products, serving supermarkets, convenience stores, health care facilities and schools, throughout northern California.

#90106b0022 04/16/1990 ~Business Wire

PORTLAND, OR (APRIL 17) BUSINESS WIRE - Pope & Talbot Inc. Monday reported record first quarter sales and earnings.

Net income for the quarter ended March 31, 1990, was a record $11,022,000, or $.94 per share, 17 percent higher than the $9,437,000, or $.80 per

share, reported in 1989. Included in this year's quarter is $1,929,000, after tax, or $.16 per share, from sale of timberland in Oregon. Company sales of $149,054,000 were 2 percent higher than for 1989's initial three months.

Profits from the company's pulp mill near Halsey, Ore., approximated last year, as the mill ran well during the quarter and pulp prices were firm. The Consumer Products Division had higher earnings than for the 1989 quarter, despite continuing operating challenges caused by equipment problems at the company's Ransom, Pa., tissue mill. Operating earnings in Wood Products were below those for 1989, with the principal cause being higher log costs that were not offset fully by higher lumber sales prices.

Peter T. Pope, chairman, president and chief executive officer, was optimistic as he looked into the future. ''Lumber markets have firmed and operations should continue strong at least through the summer,'' he said. ''Pulp demand and pricing remain very good for our specialty pulps '' he continued, ''and wood chip costs have declined significantly in recent weeks. We expect further good comparisons in tissue and diapers.'' Mr. Pope concluded, ''On balance, another very good year is expected for both sales and earnings.''

Pope & Talbot Inc. is a publicly held, Portland-based paper, pulp and wood products company traded on the NYSE. Pope & Talbot was founded in 1849 and has operations throughout the United States and in Canada.

#90106b0033 04/16/1990 ~Business Wire

MISSISSAUGA, ONTARIO (APRIL 16) BUSINESS WIRE - The Battery Technologies Inc. Group and HiBar Systems Ltd. of Richmond Hill, Ontario, jointly announce the creation of a new joint venture company.

BTI and HiBar Systems have been collaborating on the formulation and design of BTI's revolutionary new rechargeable alkaline manganese (RAM-tm) battery technology. HiBar Systems is designing a complete full scale Turnkey manufacturing facility for sale to BTI licensees. The prototype of this Turnkey facility is currently being constructed and will be housed in a new facility to officially open June 8 in Richmond Hill, Ontario.

This new joint venture will be integrally involved in the coordination of sales of licenses and production equipment. The joint venture will participate in all licencing activities for the RAM technology and will assist in the transfer of this technology on a worldwide basis.

The joint venture will be involved in all turnkey sales to licensees, and in product implementations, marketing and promotion relating to these sales. The efficiency of this joint operation is expected to improve the profitability of both of the joint venture partners.

As a result of this restructuring, the joint venture partners take pleasure in announcing the appointment of Kenneth R. Brands as senior advisor in the management group of the joint venture.

Brands is the past president of Duracell Canada, a position he held in excess of 17 years. Brands has been an active consultant to industry and government since leaving Duracell. His extensive experience in all areas of the battery business, both domestic and internationally, will be an invaluable asset to the new joint venture. This appointment is effective immediately.

#90106b0037 04/16/1990 ~Business Wire

EL SEGUNDO, CA (APRIL 16) BUSINESS WIRE - Rockwell International Corp. Monday reported net income for its second fiscal 1990 quarter, ended March 31, of $173.4 million, or 70 cents per share, exceeding last year's second-quarter income of $166.7 million, or 65 cents per share, before the one-time gain from the sale of a business.

For the first six months of fiscal 1990, net income was $319.2 million compared to 1989 six-month income of $326.7 million before the one-time gain. Comparable per-share amounts of $1.29 for the 1990 six-month period exceeded the $1.27 for the 1989 period reflecting the benefit of the company's stock repurchase program.

Sales of $3.15 billion in 1990's second quarter and $6 billion in the first six months were substantially the same as the comparable 1989 periods.

The March 1989 sale of the company's Measurement & Flow Control Division resulted in an after-tax gain of $104 million, or 40 cents per share. Including this gain, last year's second-quarter net income was $270.7 million, or $1.05 per share, and net income for the first six months of 1989 was $430.7 million, or $1.67 per share.

The higher second-quarter Electronics sales and earnings were accounted for by the commercial businesses with continued strong performances by Avionics and Allen-Bradley industrial automation, together with significantly improved profitability of Telecommunications.

The Aerospace business contributed strong sales and earnings in the current quarter, principally through its space programs, but earnings were below those of the comparable 1989 period which benefitted from more favorable contract adjustments in aircraft and space programs.

The Graphics business also had strong earnings performance for the quarter and further benefitted from a gain on the sale of a product line.

Automotive's second-quarter earnings declined significantly from last year's second quarter principally due to depressed truck markets.

Rockwell International is a $12 billion multi-industry company applying advanced technology to a wide range of products in its electronics, aerospace, automotive and graphics businesses.

#90106b0042 04/16/1990 ~Business Wire

PHOENIX (APRIL 16) BUSINESS WIRE - CyCare Systems Inc. (NYSE:CYS) Monday reported net income of $779,000, or 14 cents per share, on revenues of $20 million for the first quarter ended March 31, 1990.

Last year first quarter net income was $800,000 or 14 cents per share, on revenues of $22 million.

Income before taxes was reported at $1.3 million, compared with $1.4 million in the corresponding quarter of 1989.

Jim Houtz, CyCare chairman and chief executive officer, stated, ''The company's first quarter performance demonstrates the continued positive effects of its profit improvement plan. Initial delivery of the new C1500/1550 product to the market began in March 1990. We look for improved system sales in the second quarter, benefiting from a full three months of C1500/1550 sales.''

Cycare is one of the nation's leading providers of computerized information processing, systems and services to the healthcare industry with over 4,800 clients, including physicians, medical group practices, faculty practice plans, hospitals and managed care organizations.

Headquartered in Phoenix, the company's business, product and sales/service centers are located in Atlanta; Arlington Heights, Ill.; Cleveland; Dallas; Detroit; Dubuque, Iowa; Houston; Long Island, N.Y.; Miami; Minneapolis; Portland, Ore.; San Antonio, Texas; San Diego; Spokane Wash.; Wausau, Wis.; and Woodland Hills, Calif.

#90106b0046 04/16/1990 ~Business Wire

LOS ANGELES (APRIL 16) BUSINESS WIRE - Health Care Property Investors Inc. (NYSE:HCP) Monday reported record net income for the three months ended March 31 of $5,232,000, or 50 cents per share of common stock, on revenues of $17,325,000.

This result compares with net income of $3,371,000, or 41 cents per share of common stock, on revenues of $14,929,000 for the corresponding quarter of 1989. The per share amount represents a year-to-date increase of 22 percent.

In commenting on the results for the quarter, Kenneth B. Roath, chairman and chief executive officer of the company, said that record cash flows from operating activities totaled $9,088,000, or 86 cents per share of common stock. Cash flows from operating activities for the comparable quarter in 1989 amounted to $5,963,000, or 73 cents per share of common stock.

Roath said that the year-to-date increase in per share cash flows was 18 percent, well in excess of the current rate of dividend increases. The increase in the cash flows is attributable to the receipt of greater amounts of additional rents, initial rents from recently acquired facilities and rents from facility construction completed during 1989.

Also contributing to higher cash flows were lower interest costs and higher interest income attributable to the receipt of proceeds from the sale of common stock, and continued improvement in cash flows at the two long-term care facilities operated by the company.

The operating results for the current quarter were enhanced by the positive factors discussed above, offset in part by start-up costs of new congregate care facilities and increased administrative costs. Per share amounts of income and cash flows were slightly lower than they otherwise would have been due to the sale of 2,250,000 shares of common stock in February 1990.

Health Care Property Investors Inc. is a self-administered equity-oriented real estate investment trust that invests in health- care-related facilities throughout the United States, including long-term care facilities, acute care, rehabilitation and psychiatric hospitals, congregate care centers, and assisted living facilities.

PALO ALTO, CA (APRIL 16) BUSINESS WIRE - Watkins-Johnson Co. (NYSE:WJ) Monday reported sales of $74,560,000 and net income of $2,360,000 for the first quarter of 1990, ended March 30.

Net income amounted to 29 cents per share, based upon 8,163,120 average shares outstanding.

For the first quarter of 1989, sales were $80,773,000 and net income amounted to $5,198,000, or 62 cents per share, based upon 8,399,782 average shares outstanding.

During the first quarter of 1990, Watkins-Johnson bought 457,000 shares of its common stock under the company's current stock-repurchase authorization.

The company's firm order backlog on March 30 stood at $284,751,000, up from the $281,524,000 recorded at the end of 1989's first quarter. Of the current backlog, 77 percent is shippable within 12 months. Seventy-nine percent of 1989's first-quarter backlog was shippable within one year.

DALLAS (APRIL 16) BUSINESS WIRE - National Realty L.P. (ASE: NLP) Monday announced operating results for the year ended Dec. 31, 1989.

For the year limited partner net loss was $32.5 million, or $3.59 per unit on revenues of $96.6 million, compared with limited partner net loss of $23.2 million, or $2.52 per unit, on revenues of $98.2 million in the prior fiscal year.

During the three months ended Dec. 31, 1989, the limited partnership recorded a loss of $18.2 million, or $2.01 per limited partner unit, on revenues of $24.0 million. In the last three months of 1988, the partnership lost $16.8 million, or $1.82 per unit, on revenues of $24.9 million.

Rental income on properties the partnership held in 1989 and 1988 increased 1.3 percent in 1989 even though total rental income was down because of property sales during the year. Higher interest expenses and significant renovation and tenant improvement expenses were the primary causes for the increased operating loss.

The partnership recorded depreciation and amortization expenses of $16.4 million and $18.0 million for 1989 and 1988, respectively.

During 1989 the partnership recorded a net realizable value provision of $7.7 million, compared with a provision of $13 million in 1988.

National Realty L.P. is a national real estate investment partnership engaged in the acquisition, financing, operation, and sale of real estate and real estate assets. The limited partners' ownership represents 98 percent of the total partnership. -0- T

SUNNYVALE, CA (APRIL 16) BUSINESS WIRE - Advanced Micro Devices Monday reported that first-quarter revenues were essentially flat compared with both the run-rate of the immediate-prior quarter and the comparable quarter of 1989. Revenues of $271,472,000 resulted in marginal profitability on operations. Interest income and a one-time gain realized upon completion of the previously announced sale, leaseback and technology transfer transaction with Sony USA, enabled AMD to report net profit of $13,119,000. After the preferred stock dividend, the quarterly profit amounted to 13 cents per common share.

Sales in the fourth quarter of 1989--a 14-week quarter-- were $285,255,000 with a net profit of $11,822,000, which amounted to 11 cents per common share after the preferred dividend. In the comparable period a year ago, AMD reported sales of $269,620,000, with a net profit of $10,071,000, or 9 cents per common share after the preferred dividend.

''A surge in orders for erasable programmable read-only memories (EPROMs), microprocessors and programmable logic devices (PLDs) (AMD's core businesses) came too late in the quarter to offset the effects of price attrition,'' said W.J. Sanders III, chairman and chief executive officer. ''As a result, while shipping a record number of EPROMs and PLDs, we were unable to increase revenues and margins suffered. Our order pattern improved late in the quarter, and bookings exceeded billings by the widest margin in two years,'' he continued.

''While orders from U.S. manufacturers were weak, demand for AMD products in Europe and Southeast Asia, especially from the personal computer sector was strong. International sales reached a new high of 51 percent of total sales during the quarter. Sales of products manufactured with CMOS technology exceeded 27 percent of total sales, another record for AMD.

''Personal and networked computers represent a major growth opportunity for AMD in the near term, and offer an opportunity for improved revenues and margins. If recent order patterns continue, we expect modest revenue growth in the current quarter and strong growth in the third quarter,'' Sanders concluded.

OAKLAND, CA (APRIL 16) BUSINESS WIRE - Golden West Financial Corp., (NYSE PSE, MSE:GDW) parent of World Savings and Loan Association, announced Monday that reported earnings, or net income from all sources, amounted to $47 million, or 75 cents per share, for the first quarter of 1990, a 34 percent increase over the $35 million, or 56 cents per share, posted for the like three months in 1989.

At the same time, Golden West announced that first quarter core earnings, which represent profits from the company's basic business activities, totaled $44 million, or 69 cents per share, a 44 percent improvement over the $30 million, or 48 cents per share, recorded for the three months ended March 31, 1989.

Additionally, the company reported that total assets reached the $20 billion mark for the first time in Golden West's history.

New loans added to Golden West's mortgage portfolio during the first quarter amounted to $875 million.

Golden West is a savings and loan holding company with assets in excess of $20 billion. The company's principal subsidiary, World Savings and Loan Association, headquartered in Oakland, currently has 113 authorized offices in that state, 61 in Colorado, 10 in Kansas and seven in Texas.

A separate subsidiary, World Savings and Loan Association of Ohio, conducts business through eight facilities, while a third subsidiary, World Savings and Loan Association of America, located in the state of Washington, operates two branches in the Seattle area.

With a total of 201 approved offices, the Golden West system comprises one of the largest multi-state branch networks in the country. Options on Golden West's stocks are traded on the Philadelphia Options Exchange.

LOS ANGELES (APRIL 16) BUSINESS WIRE - Occidental Eastern, a wholly owned subsidiary of Occidental Petroleum Corp., Monday announced that an extended production test of the Lufeng field in the South China Sea began April 11, 1990.

The Lufeng 22-1-3 well, drilled in late 1989, began producing at

approximately 10,000 barrels per day of 31 degree API gravity oil.

Production flows from the well to a semi-submersible floating well platform and then into a floating production, storage and offloading vessel, a converted 45,000 dead weight ton tanker. Water depth in the area is approximately 1,100 feet. The Lufeng discovery well, Lufeng 22-1-2, was drilled in early 1989 and was tested for 12 days at 10,600 barrels of oil per day in June 1989.

The Lufeng field is located about 120 miles offshore the People's Republic of China. The test is being conducted to confirm design parameters and reservoir performance prior to full-scale development of the field in 1991. The production test system uses proven technology. Safety and environmental concerns have been addressed in the design criteria.

Occidental Eastern is operator of the project, with a 65 percent interest. Ampol Exploration and AGL Petroleum of Australia each have a 10 percent interest. Repsol Exploracion, S.A., of Spain has a 15 percent interest.

#90106b0143 04/16/1990 ~Business Wire

EVERETT, WA (APRIL 16) BUSINESS WIRE - John Fluke Mfg. Co. Inc. (ASE:FKM) Monday, April 16, 1990, reported earnings per share growth of 26 percent on unchanged sales and earnings for its second quarter of fiscal 1990 ended March 30, 1990, as compared to last year.

Earnings were $3.7 million, or 53 cents per share, on approximately 7.1 million shares and share equivalents. This compares with the same level of earnings, which equaled 42 cents per share on approximately 8.8 million shares and share equivalents in fiscal year 1989's second quarter.

Sales for the quarter totaled $62.1 million compared to $62.4 million a year ago.

Orders for the period totaled $60.9 million, slightly more than the prior year's second quarter of $60.1 million. U.S. customer orders increased 6 percent to $39 million compared with $37 million for the same quarter last year. This increase was primarily due to the continued good performance of the company's strong distribution network. Government orders were improved from the first quarter, but are still lower than last year, as expected. European orders through N.V. Philips matched last year's levels. The greatest area of strength internationally is still in Japan, Singapore & Taiwan. These markets have double-digit growth rates. Despite this growth in some Asian markets, continued sluggish commercial and U.S.

Department of Defense buying creates continuing uncertainty in the overall level of projected order growth. Any significant change from this pattern appears unlikely for the remainder of the fiscal year. This calls for continued conservative management of expenses and careful directing of marketing and product programs toward prime growth areas. This approach should preserve the earnings per share trend for the remainder of the fiscal year.

Since Fluke's U.S. commercial sales channel includes the company's defense contractor customers, the softening of U.S. military spending generally offsets the gains in other commercial business. As the company pursues a deepening penetration in networks of customers such as commercial aviation automotive, power utilities and engineering education over the next several quarters, there is the potential to ultimately mitigate the negative impact of defense spending cuts.

John Fluke Mfg. Co. Inc. is a leading supplier of electronic instrumentation and services that improve the productivity of technical users engaged in research, service, design, manufacturing and calibration.

Fluke focuses on customers who are manufacturers and users of electronic and electrical equipment in defense and aerospace, government agencies, computers and peripherals, electronic instrumentation, communications, utilities, automotive and consumer electronics. Founded in 1948 and headquartered in Everett, Fluke employs more than 2,300 people and had sales of $247.8 million in its most recent fiscal year, ended Sept. 29, 1989.

REDMOND, WA (APRIL 16) BUSINESS WIRE - Nintendo of America Inc. announced Monday an international campaign directed against video rental outlets and other retailers, distributors and importers who are renting or selling counterfeit Nintendo(R) video game cartridges for play on the Nintendo Entertainment System(R) (NES).

Nintendo said that lawsuits for copyright infringement have already been filed in U.S. District Courts in Los Angeles, Minneapolis and Florida to halt the sale of counterfeit Nintendo software. A lawsuit has also been commenced in Federal Court in Ottawa, Canada against defendants located in Quebec, Ontario and British Columbia, and an order authorizing the seizure of counterfeit Nintendo cartridges has been issued by that court.

Additional copyright infringement suits will be filed in other areas of

the United States and Canada in the next two weeks.

The lawsuits charge the defendants with willful infringement of Nintendo's copyrights by the importation, rental and sale of ''multiple game cartridges'' which contain up to 40 counterfeits of Nintendo and Nintendo licensed video games in a cartridge. In addition, some defendants are also charged with the sale of counterfeit ''Super Mario 3'' game cartridges.

Howard Lincoln, senior vice president of Nintendo said, ''What's happening here is an outrageous theft of Nintendo's valuable intellectual property rights. Crooks in the Far East have made verbatim copies of legitimate Nintendo video games and have packaged these counterfeits in multiple game cartridges.

Nintendo indicated that multiple game cartridges and other counterfeit cartridges have not been found in authorized Nintendo dealer locations and ''World of Nintendo'' outlets. ''So far our investigators have only found the counterfeit cartridges in video rental outlets and non-authorized Nintendo retail stores,'' he said. ''We have asked our authorized dealers and distributors to be on the lookout for counterfeit cartridges,'' he said.

The lawsuits ask that the defendants be enjoined from distributing, advertising, promoting or selling counterfeit Nintendo cartridges. In addition Nintendo said it will insist on a recovery of monetary damages from each defendant found liable for renting or selling counterfeit games.

Nintendo is no stranger to nationwide campaigns to eliminate counterfeits of its products. In the early 1980's Nintendo was confronted with massive counterfeiting of its immensely popular ''Donkey Kong'' arcade games. Nintendo successfully instituted over thirty lawsuits around the country. The problem was eliminated.

Nintendo of America Inc. sells personal, home and arcade video games in the United States. The Redmond-based company is the headquarters for the company's marketing operations in North America and is a subsidiary of the world's largest manufacturer and marketer of video games, Nintendo Co. Ltd.

PHOENIX (APRIL 16) BUSINESS WIRE - AT&T and the state of Arizona Monday announced a joint telecommuting trial aimed at lowering employee commuter miles and improving the Valley's air quality.

''Telecommuting is an important part of the state's travel reduction plan '' said Gov. Rose Mofford. ''We are currently taking several steps toward a solution for the state's air quality problem. Telecommuting is the newest, and hopefully one of the brightest, options for employees.

''Telecommuting has been trialed very successfully in California, and it offers similar promise for Arizona.''

Art Othon, executive assistant to the governor, and John Pappas, director of AT&T Computer Systems, announced the program Monday at a news conference held at AT&T's Phoenix headquarters, 2800 N. Central Ave.

During the six-month trial, scheduled to begin April 30, more than 150 employees from AT&T and the state departments of Environmental Quality, Water Resources, Game and Fish, and Commerce will work from their homes several times a month. If the trial is successful, the program will be expanded to include other eligible employees.

The community benefits of telecommuting include decreased peak-hour congestion, air pollution and fuel consumption. Extensive programs can decrease public transportation capital and operating costs due to lower usage of surface streets, as well as create additional employment opportunities for mobility-limited individuals.

Employees can expect to see decreased commuting time, cost and frustration; increased flexibility in scheduling; an improved work environment with fewer interruptions; and gained ability to work at personal ''peak time.''

Employers can benefit from increased staff productivity; improved employee morale due to greater levels of trust and responsibility; reduced turnover; reduced demand for office space; and reduced absenteeism.

Following the trial, AT&T and the state will share the results and benefits of the experience with other Valley employers who are interested in participating in the AT&T, State of Arizona Telecommuting Program.

SAN FRANCISCO (APRIL 16) BUSINESS WIRE - McKesson Corp. (NYSE:MCK)

announced Monday that it has completed its acquisition of the publicly held shares of PCS, Inc. through the merger of a McKesson subsidiary into PCS.

As a result of the merger, PCS is now an indirect, wholly owned subsidiary of McKesson, and all public stockholders of PCS are entitled to receive $20 in cash for their shares. The merger follows a tender offer by McKesson for PCS's publicly held shares at the same $20 per share price.

McKesson also said that former PCS stockholders will be mailed instructions to follow in order to obtain the cash payments they are entitled to receive as a result of the merger.

BURBANK, CA (APRIL 16) BUSINESS WIRE - Southwest Airlines Monday marked its debut at the Burbank Glendale Pasadena Airport when it began flying between Burbank and both Oakland and Las Vegas.

Herb Kelleher, Southwest's chairman of the board, president and chief executive officer, commemorated the inaugural with a ribbon-cutting ceremony at the Burbank Airport at 10:45 a.m. Monday.

Numerous dignitaries and business leaders participated in the ceremony. The renowned Snychronized Briefcase Drill Team also performed a special Southwest Airlines salute. Several of the guests then boarded Southwest's flight No. 604 for the airline's inaugural to Oakland.

Said Kelleher, "Southwest plans to be here for a long time, and we want Californians to know we're on their side - by providing air travel they can depend on and unrestricted fares that will help save them and their companies lots of money."

Southwest, which is the first and only airline at the Burbank Airport to provide a passenger loading bridge as well as an accompanying elevator for passengers with disabilities, operates 20 flights daily between Burbank and Oakland, with the first departure from Burbank at 7 a.m. and the last at 7:05 p.m.

Fares are very low: in fact, $59 is the most a traveler will pay for a completely unrestricted one-way ticket between Southern and Northern California. And, by buying in advance and flying on off-peak hours, a customer can pay as little as $29 one way.

The airline also offers 12 flights a day between Burbank and Las Vegas, with the first leaving Burbank at 8:10 a.m., the last departing at 9:05 p.m. The maximum price between the two cities for an unrestricted "Anytime Fare" is $49 one way.

In an unparalleled effort to dramatize Southwest's low-fare commitment to travelers between Burbank and both Oakland and Las Vegas, the airline instituted a "cashback" plan Monday that pays passengers, in cash, the difference between Southwest's unrestricted and unlimited $59 "Anytime Fare" to Oakland and the $186 "walk-up" fare of other airlines.

Southwest passengers who paid $186 for a Southwest one-way ticket received $121 back in cash at the gate as they boarded. Las Vegas travelers took advantage of the same offer - paying $131 for a one-way "walk-up" fare and getting $82 back in cash. The cashback offer ends May 6 but the $49 and $59 maximum one-way fares will remain.

DALLAS (APRIL 16) BUSINESS WIRE - Sterling Software Inc. (NYSE:SSW) said its Intelligence and Military Division, headquartered in Bellevue, Neb. has been awarded a new 27-month contract by Rome Air Development Center to support the Air Force Intelligence Agency MAXI External Assistance Two (MEAT) Program.

Sterling has been the prime contractor for the MAXI effort since 1986 and currently provides support for over 30 systems worldwide.

The contract, valued at approximately $8.7 million, provides for operational support of MAXI capabilities as part of a continuing program to standardize automated message handling capabilities for the Department of Defense. Sterling will provide software design and development services, implementation of new software releases for all currently supported systems, and maintenance for all operational systems.

Sterling Software, headquartered in Dallas, specializes in systems and applications software products, and in professional services for the U.S. federal government. Of Sterling's total revenue of $180.2 million in 1989 $82.6 million was from the Federal Systems Group.

SAN FRANCISCO (APRIL 16) BUSINESS WIRE - Bank of San Francisco Co. (ASE:BOF) reported net income of $796,000 for the first quarter of 1990.

This represents a 73 percent improvement over the first quarter 1989 results of $460,000. Net interest income for the quarter was $4,729,000, an increase of 37 percent over the $3,464,000 for the first quarter of 1989. Non-interest income increased 13 percent to $1,228,000.

Net income per share for the first quarter was 33 cents on a fully diluted basis vs. 20 cents for the like period in 1989. Average shares outstanding for the period were 2,390,768 on a fully diluted basis, vs. 2,363,535 average shares for the like period in 1989.

At the quarter end the company's total assets were $361,851,000, up 34 percent from the $270,604,000 reported at March 31, 1989. Total deposits were $335,757,000, an increase of 36 percent from a year earlier.

Net loans and leases increased 44 percent over the prior year to $264,510,000. At quarter end, the allowance for possible loan losses was $4,460,000, representing 1.66 percent of total loans compared to 1.62 percent at the end of the first quarter of 1989.

Stockholders' equity at March 31, 1990, was $21,547,000 or $9.48 per share. The company's primary capital which consists of stockholders' equity and the allowance for possible loan losses remains strong at 7.10 percent of total assets.

Bank of San Francisco Co. is the parent company of Bank of San Francisco. The 10-year-old financial services company provides a broad array of credit and investment services to professionals, successful business people, and affluent individuals and to their enterprises throughout the San Francisco Bay Area.

KANSAS CITY, MO (APRIL 16) BUSINESS WIRE - Kansas City Southern Industries Inc. reported first quarter 1990 earnings of $9.5 million, equivalent to 91 cents per share, for the quarter ended March 31, 1990, an increase of 27 percent over 1989.

In making the announcement, the company noted that income from continuing operations rose 90 percent over 1989, when a non-recurring gain experienced in the first quarter of 1989 from the partial sale by The Kansas City Southern Railway of its investment in Trailer Train is excluded. The company attributed the significant improvement in earnings to several factors:

- A $4 million (+ 37 percent) increase in transportation operating income, from strong carloadings of its railroad operations, KCS Lines.

- A $900,000 (+ 13 percent) increase in financial services operating income from higher revenues and overall improvement in profitability of the company's three financial services subsidiaries: DST Systems Inc., Janus Capital Corp. and Southern Leasing.

- Lower interest expense from a combination of lower debt levels and restructuring of indebtedness resulting in lower rates, both of which were completed in late 1989.

- The divestiture of investments in fiber optics and pharmaceuticals in late 1989 and first quarter 1990 which, in the first quarter of 1989 provided no contribution to earnings and in the case of pharmaceuticals, operated at a loss.

COLUMBUS, OH (APRIL 16) BUSINESS WIRE - D. Michael Crites, United States Attorney for the Southern District of Ohio; Allen K. Tolen, special agent in charge of the Federal Bureau of Investigation; Donald Mapley, resident agent in charge of the Bureau of Alcohol, Tobacco and Firearms; and Col. Thomas Rice, superintendent of the Ohio State Highway Patrol, announced Monday that Dennis L. Daniels, 42, of 94 South Harris St., Columbus, Ohio, has been charged in the United States District Court in Columbus with two federal offenses relating to the shooting of a Greyhound bus en route to Cincinnati on March 9.

Daniels has been employed as a driver with Greyhound Lines for 10 years.

Specifically, the federal grand jury returned an indictment on April 13, charging in Count 1 that Daniels tampered with and damaged the bus in reckless disregard for the safety of passengers therein. In Count 2, the grand jury charged Daniels with the use of a firearm in the damaging of the bus. Crites said that the indictment was unsealed today after Daniels was arrested at his residence.

If convicted of Count 1 of the indictment, Daniels faces a maximum prison term of 20 years and a $250,000 fine. If convicted on Count 2 of the indictment, he faces a mandatory consecutive term of imprisonment of five years and an additional $250,000 fine.

Crites praised the investigative efforts of the Ohio State Highway Patrol, Federal Bureau of Investigation and the Bureau of Alcohol, Tobacco and Firearms in identifying Daniels as an alleged perpetrator involved in the drive-by shooting of the Greyhound bus. Crites stated that the investigation is continuing.

#90106b0284 04/16/1990 ~Business Wire

FORT WORTH, TX (APRIL 16) BUSINESS WIRE - Burlington Northern Inc. (BNI) reported first quarter 1990 net income of $63 million, or $.82 per share,

on 76.5 million shares.

Net income included an extraordinary item resulting from an extinguishment of debt which increased net earnings by $7.5 million, or $.10 per share. First quarter net income for 1989 was $33 million, or $.44 per share, on 75.2 million shares.

BNI operating income was $156 million on revenues of $1.183 billion compared to $121 million on revenues of $1.125 billion for the same quarter a year ago. Because of a recent ICC ruling, the accounting treatment of shortline revenues has been changed for 1990. Prior to 1990 fees paid to the shortlines for transportation services were recorded as operating expenses by BNI. The ICC now requires that they be offset against related revenues. First Quarter 1990 revenues were reduced by $35 million as a result of this ruling. First Quarter 1989 revenues have not been restated. Operating and net income are not affected by this change.

Traffic volume (ton miles) increased by 10 percent over the prior year. Traffic mix changes resulted in lower revenue per ton mile and lower costs per ton mile. Unit costs were lower than is apparent, but were adversely affected by additional accruals recorded by the company for personal injury claims and for the possible outcome of future labor negotiations under national handling.

#90106b0314 04/16/1990 ~Business Wire

MILWAUKEE (APRIL 16) BUSINESS WIRE - Johnson Controls Inc. (NYSE/BSE/MSE/PSE/PhSE:JCI) Monday, as forecast by the company in late March, reported a significant decline in earnings, principally due to costs of $8 million arising from the insolvency of a casualty insurance carrier, lower automotive income and higher interest expense.

Johnson Controls sales for the three months ended Mar. 31 were $1.1 billion vs. $864 million a year ago. The company explained that the gain in sales primarily reflects the inclusion of revenue from Pan Am World Services, which Johnson Controls acquired in May 1989.

Operating income totalled $33.8 million, down from $46.1 million in the 1989 second quarter. Net income declined to $8.1 million from $19.4 million. Primary and fully diluted earnings per share for the 1990 quarter were 15 cents compared with 53 cents and 51 cents on a primary and fully diluted basis, respectively, a year ago.

James H. Keyes, president and chief executive officer, said that results

from its automotive seating business were hurt by the low level of domestic vehicle production during the quarter. While operating income declined by almost one-third, sales were modestly higher due to shipments from new European facilities.

Sales of control systems and services to the non-residential buildings market increased, reflecting a higher level of construction and service activity. Operating income was lower primarily because of reduced income from certain international contracts and higher marketing expenses. Worldwide orders exceeded the 1989 quarterly level.

The company said that battery sales and unit shipments were slightly ahead of the prior year while operating income was marginally lower.

Sales of plastic containers increased in the current quarter because of shipments from new European operations. Domestic sales and operating income, however, declined as price decreases outpaced the reduction in PET resin costs.

For the six months ended Mar. 31, 1990, consolidated sales totalled $2.2 billion, up from $1.7 billion. Operating income for the first half of 1990 was $90.2 million vs. $102.9 million in 1989. Net income in 1990 declined to $36.4 million from $50.2 million.

Primary earnings per share were 82 cents and $1.37 for 1990 and 1989, respectively, while fully diluted earnings per share were 80 cents and $1.31 for 1990 and 1989, respectively.

Keyes, reiterating his Ma.h 28 forecast, said that based on the current business outlook, the company should be able to attain favorable comparisons in the second half, allowing net income for the full year to exceed the $98 million achieved for 1989.

KNOXVILLE, TN (APRIL 16) BUSINESS WIRE - In a record third quarter ended March 31, 1990, Clayton Homes Inc. (NYSE:CMH) reports net income of $4.5 million, up 30 percent from the prior year.

Fully diluted earnings per share rose 25 percent to 25 cents up from 20 cents last year.

Revenues for the quarter advanced 16 percent to $60.8 million from $52.2 million. Although industry shipments declined 10 percent for January and February, homes sold by the company in the quarter increased 9 percent to 2,872 from 2,628 in the prior year. Revenues from financial services and other income grew 32 percent to $10.6 million.

Net income for the nine months rose 16 percent to $11.9 million. Fully diluted earnings per share increased 14 percent to 67 cents from 59 cents. Revenues climbed 6 percent to $179.1 million from $168.4 million.

Homes sold totaled 8,487, a 2 percent increase from 8,364 sold the prior year. Revenues from financial services and other income grew 24 percent to $28.3 million.

FALLS CHURCH, VA (APRIL 16) BUSINESS WIRE - Sysorex Information Systems Monday announced the promotion of Robert Foley Jr. to president of the company from his previous position as executive vice president.

In announcing the appointment, the company's founder A. Salam Qureishi, who remains chairman and chief executive officer, said Foley will oversee the company's government and commercial systems integration operations in the United States as well as those in Europe. Operations in Saudi Arabia will continue to be directed by Qureishi.

Since Foley joined Sysorex Information Systems in 1988, the company has been awarded microcomputer systems integration contracts totaling over $150 million from the U.S. Postal Service, U.S. Mint, General Services Administration, U.S. Department of Agriculture, Social Security Administration and Internal Revenue Service.

Prior to joining Sysorex, Foley was vice president, Systems Integration for Science Applications International Corp. Previously, he was general

manager, marketing for General Electric's Federal Systems Integration Division and a marketing manager with Electronic Data Systems where he directed a team that won bids totaling more than $500 million.

Foley has a B.S. degree from Florida State University and an M.S. degree from Johns Hopkins University.

Sysorex Information Systems was founded in 1980. The computer services company specializes in systems integration and the development and management of large-scale information systems for government, both domestic and foreign.

EL MONTE, CA (APRIL 16) BUSINESS WIRE - Marshall Industries (NYSE:MI) announced Monday the signing of an agreement to distribute Stag Microsystems' line of EPROM and PAL programmers, making Marshall Stag's only national distributor.

Stag manufactures a complete line of programming units, topped by their flagship System 3000 unit. Many of Stag's programmers, including the System 3000, operate as stand-alone units which do not require interfacing with a company's host computer, making them ideal for use in R & D or where a smaller programming capability is required.

Stag also makes U.V. Erasers, Gang Programmers and software development tools, all of which are available through Marshall locations across the United States.

J. R. Greenfield, vice president of marketing for test equipment at Marshall, believes the addition of Stag will solidify Marshall's position as a leader in providing its customers with the latest technological innovations. ''This is our first entry into the programmer marketplace.

''Stag's complete line allows our customers to set up a programming station with one phone call to us,'' said Greenfield. ''Stag has an excellent reputation in Europe and has continually introduced innovative new products.

''For instance, their Tangent PLCC handler is the only one of its kind small enough to sit directly on top of a portable programmer like the Stag

ZL30A, and is priced within most customers' reach,'' he concluded.

Stag's vice president of sales, Paul Norrington, is also excited about the relationship. ''We chose Marshall as our U.S. distributor because of their ability to give in-depth commercial and technical support to their wide customer base with a product line that constantly changes with state-of-the-art developments,'' said Norrington.

Marshall Industries, listed on the New York Stock Exchange, supplies and services the electronics industry through a network of industrial electronic distribution centers located throughout the United States and Canada.

Marshall's products include electronic components, integrated circuits, connectors, memory and computer products, electronic production supplies and hand tools and electronic assembly equipment.

BELMONT, CA (APRIL 16) BUSINESS WIRE - Monday MMS International released an enhanced version of ProfitFinder, Version 1.60, now making foreign exchange quotes available to subscribers.

Quotes for 10 major currencies are contributed by 44 major brokers and dealers in the global currency markets on a 24-hour basis. Historical high, low and closing prices are now also available to ProfitFinder subscribers for these currencies.

MMS' ProfitFinder, which was first introduced in January, makes real-time MMS market analysis and financial information available to PC users for the first time. MMS is the world's leading provider of timely market analysis used by over 20,000 of the world's top traders and investors through quote vendors such as Telerate and Reuters.

''ProfitFinder provides the same highly respected MMS analysis, news and quotes to a new marketplace, the institutional investor. We have enhanced our financial information products by harnessing today's PC technology to allow the investor to do more than just view a page of data or wade through a sea of information,'' stated Mike Mayhew, manager of MMS International's PC product division.

ProfitFinder provides 24 hour, real-time analysis of the financial markets by MMS analysts based around the globe. Optional news services and comprehensive, intra-day quotes are also provided for selected markets.

MMS International is the primary source of economic and financial information for money managers and traders worldwide. A network of 60 MMS economists and market analysts provide forecasts and analysis of the international debt, currency, equity and futures markets through on-line quote vendors such as Telerate, Reuters, the Bridge Information System and the MMS PC network, ProfitFinder.

MMS offices are located in major financial centers around the world, including New York, Chicago, London, Tokyo and Hong Kong.

#90106b0656 04/16/1990 ~Business Wire
BIRMINGHAM, AL (APRIL 1) BUSINESS WIRE - Birmingham Steel Corp. (NYSE:BIR) Monday announced net income of $5,531,000 and earnings per share of 45 cents for the quarter ended March 31, 1990.

Earnings for the like period last year were $9,427,000, or 76 cents per share. Net sales for the quarter were $108,054,000, up slightly from

$106,148,000 reported in the prior year. Steel shipments rose 9 percent to 315,000 tons from 290,000 tons in the third quarter of fiscal 1989.

For the nine months ended March 31, 1990, the company reported net income of $16,818,000 and earnings per share of $1.37. Earnings in the like period of the prior year were $31,750,000, or $2.57 per share. Sales rose to $327,634,000 from $323,184,000 as steel shipments increased 5 percent to 941,000 tons from 898,000 tons for the like period last year.

James A. Todd, Jr., president and chief executive officer commented: ''Compared with the financial results of the preceding quarter, the third quarter results reflect improved profitability and operating performance. Strong demand for steel products enabled the company to deplete much of the higher cost inventories manufactured during earlier periods of production curtailment. Although overall profitability improved in the third quarter, margins continued to be affected by finished product price discounting without compensating declines in scrap raw material costs.''

Todd continued: ''Initial operations of the new Kankakee melt shop, which began in December 1989, have been successful and in accordance with management's expectations. Kankakee's third quarter production costs were substantially lower than in the second quarter, and margins were further enhanced by record steel production and shipments in March.

Birmingham Steel operates steel mini-mills producing steel and steel products, primarily reinforcing bar, and is the largest U.S. manufacturer of steel roof support systems used in underground coal mining.

#90106b0659 04/16/1990 ~Business Wire

SAN JOSE, CA (APRIL 16) BUSINESS WIRE - Cypress Semiconductor Corp. (NYSE:CY) reported Monday the financial results for the first fiscal quarter for 1990 which ended on April 2, 1990.

Revenues in the first quarter 1990 were a record $52.8 million, an increase of 14 percent over the $46.2 million posted for the first quarter 1989 and an increase of 4 percent over the $50.8 million posted for the fourth quarter 1989.

Net income for the first quarter 1990 was $8.30 million, up 16 percent from $7.13 million in the first quarter 1989 and up 3 percent from $8.05 million in the fourth quarter 1989. Earnings per share in the first quarter 1990 were 22 cents per share, up from 19 cents per share in the first quarter 1989 and up from 21 cents per share in the fourth quarter

1989.

During the first quarter 1990, Cypress and its subsidiaries introduced 12 new products bringing the total number of products in the Cypress catalog to 171:

o A family of two new MAX Erasable Programmable Logic Devices (EPLDs). The 4,000-gate CY7C342 and 1,000-gate CY7C344 are the first in a family of PLDs (Programmable Logic Devices) implemented in the MAX architecture, which provides gate-array densities with the ease of use of PLDs.

o The PLD C2OG1OB, a 15-nanosecond version of an industry standard, 24-pin programmable logic device (PLD Group).

o An industry leading 12-nanosecond 64K SRAM, the CY7B185, with a 8Kx8 configuration (Aspen Semiconductor subsidiary).

o The CY7C433, the industry's first 4Kx9 FIFO (First-In-First-Out) memory. At 25-nanoseconds, it provides a combination of speed and density never before offered in FIFOs (Logic Group).

o A family of seven high-speed Static Random Access Memory (SRAM) modules varying in density from 1-megabit through 8-megabits in a variety of architectures and pinouts (Multichip Technology subsidiary).

Cypress Semicondutor Corp. is a leader in the design, development and manufacture of a broad line of high-performance digital integrated circuits which are fabricated using its proprietary 1.2 and 0.8 micron CMOS, BiCMOS and Bipolar technologies.

Cypress has seven product lines including PLDs (Programmable Logic Devices), Static RAMs (Random Access Memories), PROMs (Programmable Read Only Memories), Logic Devices, high-speed ECL (Emitter Coupled Logic) devices designed and manufactured by its Aspen Semiconductor Corp. subsidiary, high-speed Modular Products designed and manufactured by its Multichip Technology Inc. subsidiary and RISC microprocessors designed and manufactured by its Ross Technology Inc. subsidiary.

KINGSTON, NY (APRIL 16) BUSINESS WIRE - Leading energy project developer Besicorp Group Inc. (BESI), in a joint venture with Kamine Development Corp. (Kamine), a New Jersey-based firm, announced today the approval by

the State of New York Public Service Commission (PSC) of two power purchase contracts.

Over the 25 year term of the contracts, Niagara Mohawk Power Corp. will purchase electricity generated by the Syracuse and Natural Dam cogeneration projects.

The Syracuse project is a 79 megawatt natural gas-fired cogeneration facility which will be constructed at the LCP Chemical and Plastics site, located at Solvay, N.Y. The cogeneration facility will provide steam to the host's chemical plant with electricity being sold to Niagara Mohawk. The planned on-line date for the project is spring 1993. Projected average electric revenues are $74 million per year for the term of the contract.

The Natural Dam project is a 49 megawatt natural gas-fired cogeneration facility which will be constructed at a James River Corp. site, located at Gouverneur, N.Y. The cogeneration facility will provide steam to the paper mill with electricity being sold to Niagara Mohawk. The planned on-line date for the project is spring 1993. Projected average electric revenues are $46 million per year for the term of the contract.

According to Besicorp President and CEO Michael F. Zinn, ''The LCP and Natural Dam projects have been under development by our company for two years and represent our next anticipated project financing closings. The PSC approvals represent significant milestones in their development which add substantially to their value.''

Besicorp and Kamine have jointly completed financings for 135 megawatts of gas-fired cogeneration plants which are in operation or under construction and have several hundred megawatts of additional projects under way.

#90106b0668 04/16/1990 ~Business Wire

SANTA ANA, CA (APRIL 16) BUSINESS WIRE - EECO Inc. (ASE:EEC) Monday announced that publication of its financial reports for 1989 has been delayed.

Based on preliminary figures the company expects to report a loss of approximately $10.3 million on sales of $63 million. The estimated loss consists of a $6.7 million loss from continuing operations, a $2.2 million loss from discontinued operations, and a $1.4 million net loss from disposal of discontinued operations, subject to revision on completion of the audit.

The company's auditors, Ernst and Young, cannot complete their audit until the outcome of current negotiations for the sale of the EECO Maxi-Switch Computer Keyboard subsidiary is known.

The potential purchaser of the subsidiary and the company have agreed in principle on the terms of a proposed sale agreement. However, the company's primary lender, which holds liens on the assets involved must approve the proposed terms before the sale can be finalized. This bank has been apprised of the details of the proposed agreement.

The company and the potential purchaser contemplate that a sale can be finalized by mid-May. However, the company is unable at this time to predict whether or not the sale of its Maxi-Switch subsidiary will be achieved.

The company's credit agreement with the bank expired on March 31 but the bank has taken no steps to declare the loan is in default. Such a decision by the bank would have a material adverse affect on the company's operations. In this event, the company would be forced to immediately attempt to secure other sources of funding which may not be available due to the company's current financial condition.

#90106b0669 04/16/1990 ~Business Wire

GLENVIEW, IL (APRIL 16) BUSINESS WIRE - Zenith Electronics Corp. will receive an additional payment of $15 million (plus interest from Dec. 28, 1989) from Groupe Bull for Zenith's computer products business, the company announced Monday.

The additional payment, the result of 30 days of negotiations under provisions of the sale agreement, brings the final sale price for Zenith's computer business to about $511 million. Zenith sold its computer products business to Paris-based Groupe Bull on Dec. 28, 1989, and received an advance payment of $496.4 million in cash.

Groupe Bull had claimed earlier that post-closing adjustments should result in a refund from Zenith of approximately $49 million; Zenith, on the other hand, concluded that Groupe Bull still owed it an additional payment.

If the companies had been unable to reach agreement by negotiation, the matter would have been submitted to arbitration. Arbitration would have been uncertain as to outcome and would have involved significant

management time and expense.

Because the negotiated final payment was less than the net receivable that Zenith had recorded on its books at year-end, Zenith's first-quarter 1990 results will reflect a charge to discontinued operations of about $11 million.

#90106b0670 04/16/1990 ~Business Wire
BEVERLY HILLS, CA (APRIL 16) BUSINESS WIRE - GIANT GROUP LTD. (NYSE:GPO) of Beverly Hills, Calif., and Smurfit International B.V. a wholly owned subsidiary of Dublin, Ireland based Jefferson Smurfit Group plc have announced that they have executed a definitive agreement pursuant to which Smurfit International has agreed to purchase from GIANT all of the issued and outstanding stock of Golden State Newsprint Co. Inc. and Pacific Recycling Co. Inc. for $95 million cash plus $25 million additional cash consideration if Smurfit International elects to effectuate certain changes in the production capacity of Golden State.

The acquisition includes Golden State's 135,000 ton-per-year, 100 percent recycled newsprint mill located in Pomona, Calif., and 10 waste paper reclamation facilities operated by Pacific Recycling that process approximately 152,000 tons of waste paper per year.

The transaction has been approved by the respective boards of directors of the participating entities and is subject only to receipt of a regulatory approval. The parties anticipate that the transaction will be closed during the second quarter of 1990.

For further information regarding GIANT GROUP LTD. please contact Burt Sugarman 213/273-5678, chariman and chief executive oficer of GIANT GROUP LTD.

#90106b0674 04/16/1990 ~Business Wire
FRAMINGHAM, MA (APRIL 16) BUSINESS WIRE - The TJX Cos. Inc. (NYSE:TJX), announced Monday that it will provide a $185 million reserve ($172.1 million, after a $12.9 million tax provision) against its investment in

the 6 percent Cumulative Convertible Sender Preferred stock of Ames Department Stores Inc. and for other possible contingent liabilities associated with the 1988 sale of Zayre Stores to Ames.

This action was precipitated by Ames' Apr. 9, 1990 announcement of an estimated substantial loss for Ames' most recent fiscal year, as well as the resulting uncertainty concerning Ames.

As the reserve being established is a result of these subsequent events and is related to the sale of Zayre Stores to Ames, it will be recorded in TJX's financial statements for the past fiscal year and will therefore affect TJX's previously announced results for the fiscal year ended Jan. 27, 1990.

This will be redirected as a charge of $161.0 million, after taxes, to ''Loss on the disposal of discontinued operations'', and a charge of $11.1 million, after taxes, or 16 cents per share, to ''Income from continuing operations.'' The charge to Income from continuing operations fully reserves against dividends-in-kind on the Ames preferred stock previously recognized by TJX.

After these charges, Income from continuing operations for the full year ended Jan. 27, 1990 was $75.7 million, or $1.16 per share. Including the discontinued operations, the net loss for the year was $78.3 million or $1.10 per share.

TJX noted that pursuant to the establishment of the reserve its investment in Ames Preferred stock would be carried at no value; however, this does not involve any cash expenditures or cash cost to the company. TJX believes that most of the leases sold to Ames are valuable assets, since they carry rental rates well below current market rates.

In light of Ames' recent announcement, however, the company believes it would be prudent at this time to provide a reserve for possible contingent liabilities, including those related to the leases.

TJX also announced that its board of directors increased the company's regular quarterly dividend by 15 percent to $.115 per share from the previous quarterly rate of $.10 per share. The dividend is payable May 31 1990 to shareholders of record May 10, 1990.

The TJX Companies Inc. is a major off-price specialty apparel retailer, with 353 T.J. Maxx stores, 553 Hit or Miss stores, and the nation's leading women's fashion off-price mail order catalog, Chadwick's of Boston.

#90106b0689 04/16/1990 ~Business Wire

CLEVELAND (APRIL 16) BUSINESS WIRE - National City Corporation today reported record net income of $64.5 million, or $1.06 per share, for the first quarter of 1990. The quarterly results represent an increase of 3 percent over net income of $62.4 million, or $1.03 per share, for the first quarter of 1989.

Edward B. Brandon, chairman and chief executive officer of National City Corporation, attributed the earnings increase to higher net interest income on a larger earning asset base and a 24 percent increase in fee income primarily from higher item processing revenues, trust and mortgage servicing fees.

At March 31, 1990, total assets were $23.0 billion; stockholders' equity was $1.5 billion. Loans rose to $15.9 billion and total deposits were $17.7 billion. First quarter results included the January 1990 acquisition of Gem Savings Association of Dayton, Ohio, with assets of $1.5 billion.

Non-performing assets as of March 31, 1990, were $284.6 million, compared with $255.5 million at year-end 1989. Loan loss reserves at March 31, 1990, were $258.9 million.

Future earnings will reflect continued fee income growth, cost savings from consolidation of acquired businesses and sustained asset quality. Mr. Brandon added, ''We expect 1990 earnings to compare favorably with last year's results.''

National City Corporation is a $23 billion bank holding company headquartered in Cleveland, Ohio. The Corporation's principal banking units include National City Bank, Cleveland; BancOhio National Bank, Columbus; and First National Bank of Louisville. Other member banks include National City Bank, Akron; First National Bank, Dayton; Gem Savings Association, Dayton; CommerceNational Bank, Lexington; and Ohio Citizens Bank, Toledo. National City also has 10 community banks serving cities and towns throughout Ohio, Kentucky and southern Indiana. National City's subsidiaries and divisions offer a wide range of other financial services such as credit card, retail payment and airline ticket processing trust and investment management, leasing, merchant and mortgage banking, venture capital, small business and community investment, and credit life insurance. These units include Franklinton Financial Services, National Processing Company, First Kentucky Trust Company, National City Trust Company, NCC Merchant Banking, National City Mortgage Co., W. Lyman Case & Company, National City Community Development Corporation, and National City Life Insurance Company.

National City Corporation's common stock is traded on The New York Stock Exchange under the symbol ''NCC.''

NEW YORK (APRIL 16) BUSINESS WIRE - Loral Corp. announced Monday that Hugh Bennett has been named a group vice president reporting to Frank C. Lanza, president and chief operating officer of Loral Corp.

His appointment is effective immediately.

In this newly created position, Bennett is responsible for four Loral divisions -- Conic, Instrumentation and TerraCom, all located in San Diego Calif. and Data Systems in Sarasota, Fla.. He will be based in San Diego.

These businesses generate over $200 million in annual revenues, primarily in ground and airborne telemetry systems and products, and aviation recorders, all markets for which Loral is the market leader.

It also includes flight termination systems, satellite transponders, command control high power amplifiers, data link systems, instrumentation recorders and HF and microwave communications products.

Bennett, 57, joined Loral in 1974 when he sold the Conic Corp., of which he was a founder and owner, to Loral. He received an engineering degree from the University of Texas at Austin. He and his wife, Jacklyn, have one son, Scott, and reside in San Diego.

Loral Corp. (NYSE:LOR) is a high-technology company that primarily designs and manufactures defense electronics.

VANCOUVER, BRITISH COLUMBIA (APRIL 16) BUSINESS WIRE - Queenstake Resources Ltd. (TSE:QTR) recently announced the acquisition of several contiguous exploration properties in the Farrell Mine District of Pershing County, Nev.

Collectively known as the Snowsquall Project, the leased properties consist of 238 unpatented claims covering 4,760 acres.

Access to the property is by Highway 399 west from Lovelock to the Seven Trough - Sulfur road and then proceeding north to the Farrell District turnoff. The claim group lies 4 miles to the west of the main highway and is accessed by two unimproved roads that traverse the Ner, Doc, Snowsquall and Stone Claim groups. Lovelock is the supply centre for local mining and agriculture activities and is served by interstate 80 and the Southern Pacific Railway.

The access roads are county maintained year round as they service the Trinity Silver Mine five miles east of the project and the Granges' Hycroft - Crofoot Mine, some 15 miles to the north of the Snowsquall property.

The claim group is in the rolling foothills of the Seven Troughs Mountain Range with the primary exploration target at an elevation of 5,000 feet. Surface exploration and open pit mine production can be carried out year round. The claims extend from the foothills to the east onto the valley floor that provides an extensive area for both a millsite and heap leach pads. Adequate water for mine requirements can be obtained from wells.

The Farrell Mining District was discovered in 1905 with production of approximately 150,000 tons of ore averaging 1.2 ounces per ton gold and 4.0 ounces per ton silver from the Seven Troughs area located 5 miles south of the Snowsquall property.

BEACHWOOD, OH (APRIL 16) BUSINESS WIRE - Responding to accelerating consumer demand for household products that are environmentally safe but effective, Magic American Corp. Monday unveiled what is believed to be the first line of environmentally safe, high-performance cleaning products that are totally non-polluting, non-toxic and 100 percent biodegradable.

EarthRite, the line of cleaning products introduced today -- including Tub and Tile Cleaner, Toilet Bowl Cleaner and Wood & Paneling Cleaner -- is:

o Made from only non-toxic ingredients - with no phosphates, chlorine, petroleum distillates, synthetic dyes, perfumes or coloring agents.

o Tested for performance to the highest standards Americans have come to expect from traditional household cleaners. Each product carries a money-back guarantee to ensure satisfaction.

o Free from all animal testing.

o Packaged in recyclable plastic bottles.

o Accompanied by informative booklets on each bottle made from recycled paper, including a toll-free telephone number (1-800-328-4408) which consumers can call to obtain information on EarthRite products and environmentally safe practices around the home and office.

In addition, EarthRite will donate a percentage of its profits to non-profit organizations dedicated to conservation.

Unlike routine household cleaning products which contain chemicals dangerous to the environment, EarthRite ingredients are environmentally safe and completely biodegradable with no harmful side effects to people, animals or the environment.

EarthRite formulations are based on the use of naturally grown ingredients non-polluting food-grade additives, naturally occurring detergent builders, rapidly biodegradable spontaneous emulsifiers and treated water.

For example, to encourage the practice of recycling, EarthRite bottles are made from one type of plastic -- easily recyclable HDPE. A recycling symbol on the bottom of the bottle shows what type of plastic is used to make sorting easier at the recycling center.

EarthRite is a division of Magic American Corp., a leading namufacturer and supplier of household cleaning products internationally since 1934. It is headquartered in a suburb of Cleveland.

NEW YORK (APRIL 16) BUSINESS WIRE - Peers & Co. announced Monday that it has established an office in Chicago to offer the full range of merger and acquisition advisory services to public and private companies.

The announcement was made by Paul K. Kelly, president of Peers & Co.

Kelly said the Chicago M&A office will be headed by Jerome J. Cetnar, who will be joined by Robert B. Barr and L. James Lawson III. Previously, Cetnar was managing director and head of the PaineWebber investment banking office in Chicago, and Barr and Lawson were first vice presidents in the investment banking office in Chicago. The three have worked closely together since 1981.

''These three men were hired to build a major midwest M&A presence for Peers and significantly expand the firm's activities in representing companies in the sale of their divisions as well as the sale of entire public and private companies,'' Kelly said.

The Cetnar, Barr and Lawson team have tended to specialize in industrial manufacturing companies and during the past five years have completed over 30 M&A assignments. The three have represented companies such as AB Electrolux, Acme-Cleveland, AMCA International Ltd., M.A. Hanna Co., TRW, Dranetz Technologies and Dickey-john in assisting on sale or acquisition transactions.

''Examples of our activities include advising on the acquisition of Inter-Continental Hotels Corp. by Seibu Saison Group for $2.3 billion, the acquisition of Union Special Corp. by Juki Corp. for $100 million, the investment by Kikkoman Corp. in the management-led buyout of the worldwide processed food business of Del Monte Corp. for $1.5 billion and the joint venture agreement of Yamamura Glass Co. Ltd. with Ball Corp.

Peers & Co. is a private merchant banking firm, which provides client advisory services in regards to domestic and international M&A and real estate transactions. Peers has a particular capability in advising clients on cross-border transactions, primarily involving Pacific Basin and European countries.

Peers also makes acquisitions and investments as principal. Peers ownership includes two strategic partners: Kemper Financial Cos. Inc. and the Long-Term Credit Bank of Japan.

#90106b0726 04/16/1990 ~Business Wire

ROCHESTER, NH (APRIL 16) BUSINESS WIRE - Cabletron Systems Inc. (NYSE: CS) Monday reported record operating results for its fourth fiscal quarter and fiscal year ended Feb. 28, 1990.

Fourth quarter net sales of $30.1 million represented a 62 percent increase over sales of $18.6 million reported in the fiscal 1989 fourth quarter. International sales were $7.9 million in the fourth quarter of 1990, a 108 percent increase over the $3.8 million in the fourth quarter of fiscal 1989.

Net income in the fourth fiscal quarter totalled $6 million, or 23 cents per share, compared to pro forma net income of $3.9 million, or 16 cents per share, in the comparable quarter of the preceding fiscal year. Worldwide sales for fiscal year 1990 were $104.7 million, a 91 percent increase, compared to $54.8 million in fiscal 1989.

Pro forma net income for fiscal year 1990 totalled $22.3 million, or 87 cents per share, compared to pro forma net income of $11.8 million, or 48 cents per share, for the fiscal year 1989.

This represents an 89 percent increase in net income and an 81 percent increase in earnings per share on the higher number of outstanding shares resulting from the company's initial public offering of common stock in the first quarter of the recently ended fiscal year.

"We are pleased with the performance of the company in the fourth quarter and for the fiscal year," noted S. Robert Levine, President and CEO of Cabletron. "Revenues reflected rapid growth in demand for our MMAC (network hub) products, as well as entry, late in the third quarter, into the market for our Desktop Network Interface cards.

"Profits reflected those revenues as well as very substantial investments in engineering, technical support, manufacturing and marketing. In particular we expanded our financial commitment to sophisticated software-based network management. We are now better able than ever to respond to the complete networking needs of our customers."

Headquartered in Rochester, Cabletron is a leading independent developer and manufacturer of standards-based network management solutions including software, hardware and connectivity products. The company currently has a worldwide installed base of over 1.3 million nodes.

CONTACT: Cabletron Systems Inc., Rochester, Ed Cortes, (603) 332-9400 or Beaupre & Co. Public Relations, Christine Flaherty, (603) 436-6690.

#90106b0733 04/16/1990 ~Business Wire

TORONTO (APRIL 16) BUSINESS WIRE - National Business Systems Inc. (NBS) announced Monday that shareholders at the annual and special meeting held on April 12, overwhelmingly approved the terms of the recapitalization plan and the amending of the articles of the company:

-- to change the name of the company from National Business Systems Inc. to Consolidated NBS Inc. (TSE:CNB)

-- to consolidate the issued and outstanding common shares of the company on a 1-for-10 basis and

-- to create three new classes of preferred shares and to vary the rights attaching to the common shares.

In announcing the shareholder approval of the Recap plan, Tim Casgrain, president of Consolidated NBS Inc., pointed out that the main elements of the recapitalization plan include:

-- The exchange by noteholders of $20 million aggregate principal amount of senior subordinated notes for $20 million of convertible debentures which are convertible into class AAA cumulative participating preferred shares.

-- The company making an offering of rights to its shareholders, which will entitle shareholders in the aggregate, to subscribe for and purchase approximately $20 million aggregate principal amount of convertible debentures. Hees International Bancorp Inc. (Hees) will provide a stand-by commitment to purchase any convertible debentures not subscribed for under the rights offering, thereby assuring that NBS will receive $20 million, in aggregate from the rights offering. The proceeds of the rights offering will be used to repay indebtedness under the credit facility.

Summarizing his address to the shareholders, Casgrain, stated ''NBS management continues to focus its effort on sales growth, while maintaining operating expenses at reasonable levels. Fiscal 1990 continues to be a year of building sales and operating profits. NBS is the second largest Transaction Automation and Card Technology Company in the world and we are trying harder.''

NBS has been designing and manufacturing POS terminals and authorization

devices since 1977, making it one of the first manufacturers of such terminals in the world and the second largest in the USA. NBS' other divisions are world leaders in embossing, encoding and imprinter design and manufacturing. NBS is a world leader in card (credit/debit/smart) technology, operating three manufacturing plants in the USA, Canada, and the UK that together produce more than 400 million cards a year.

#90106b0749 04/16/1990 ~Business Wire

PORTLAND, ME (APRIL 16) BUSINESS WIRE - American Cyanamid Co. announced Monday record first quarter sales and net earnings for the third consecutive year.

Net earnings were $91 million, or 95 cents per share, up seven percent compared to $85 million, or 91 cents per share, in the first quarter of 1989. Worldwide sales in the first quarter of 1990 rose three percent to $1.273 billion from $1.232 billion in the same period last year.

The company's 1989 results and financial information have been restated to include the accounts and operations of Praxis Biologics Inc., a vaccine developer and producer acquired in a transaction accounted for on a pooling of interests basis in November 1989. The restatement resulted in a reduction of previously reported first quarter 1989 net earnings of eight cents per share.

At the company's annual meeting held in Portland today, George J. Sella Jr., chairman and chief executive officer, said the performance was led by gains in the company's medical business and improved results in its chemicals business.

The Medical Group recorded worldwide increases in both sales and operating earnings vs. the prior year. The performance was led by increased sales of ethical pharmaceuticals, consumer health and medical device products.

Sales and operating earnings of the Agricultural Group declined in the first quarter of 1990 compared to the same period a year ago. Sales of Pursuit herbicide, used in the mid to northern United States for weed control in soybeans and other leguminous crops, were lower in the first quarter of 1990 compared to introductory sales of the product in the first quarter of 1989.

Sales of several agricultural products increased in the first quarter of 1990 compared to the same period the previous year, including U.S. sales of Scepter herbicide for use in soybeans primarily in the mid to southern

United States and international sales of Prowl herbicide used on grass and broadleaf weeds in major crops.

Worldwide sales of the Chemicals group were about even in the first quarter of 1990 compared to the same period a year earlier, while operating earnings increased.

Worldwide sales and operating earnings of the Shulton Group were lower in the first quarter of 1990 compared to the same period in the previous year. The company recently announced that it had retained the services of an investment banker to study courses of action to maximize returns on its consumer products business and to explore alternatives, including divestiture or joint venture of the Shulton Group.

Cyanamid is a research-based biotechnology and chemical company which develops medical, agricultural, chemical, and consumer products and manufactures and markets them throughout the world.

ATLANTIC CITY, NJ (APRIL 16) BUSINESS WIRE - Resorts International Inc. (RII) Monday announced the filing of an amended plan of reorganization and a proposed form of a disclosure statement describing the plan with the U.S. Bankruptcy Court in the district of New Jersey.

Resorts International Inc. and Griffin Resorts Inc. also announced their 1989 year-end results.

The reorganization plan covers holders of notes and debentures issued by RII, Griffin Resorts Inc. (GRI) and Resorts International Financing Inc. (RIFI).

The company stated that, following various discussions with the official bondholders committees and other bondholders, the plan contains the following amendments to a previous plan announced on Nov. 13, 1989 and filed on Dec. 22, 1989:

-- Interest will begin accruing on the New Senior Secured Series A and Series B Notes upon the earliest to occur of: (i) approval of the reorganization plan by the bondholder committees; (ii) the affirmative

vote of the bondholders to approve the plan; and (iii) the effective date of confirmation of the plan.

-- The holders of RIFI and RII Notes will receive an additional $20 million principal amount of New Senior Secured Series B Notes.

-- Merv Griffin will invest a total of $26 million in cash in the company.

In its disclosure statement, the company stated its intention to commence efforts to sell its Paradise Island operations following consummation of the reorganization plan.

Except for the changes described above, the principal term of the amended reorganization plan remain substantially the same as the proposed plan filed by the company on Dec. 22, 1989 and provide for the exchange of their debt securities for new debt securities as follows:

Holders of the GRI 13-7/8 percent First Mortgage Notes due 1998, and 13-1/2 percent Senior Secured Reset Notes due 1995 are to receive an aggregate of:

-- $187.5 million principal amount of New Senior Secured Series A Notes with a four-year term bearing interest at the following rate: 6 percent in the first year, 9 percent in the second year, 12 percent in the third year and 15 percent in the fourth year. The company will have the option to pay interest on these notes in additional Series A Notes or in cash. The notes will be secured by a first lien upon substantially all of the assets of RII and its subsidiaries.

WOODBURY, CT (APRIL 16) BUSINESS WIRE - Graystone Companies Inc., a leading supplier of computer-based publishing and marketing support services to Fortune 500 companies, Monday released its 1989 financial report. The company also released its preliminary first quarter 1990 financial results.

The company noted that the results do not reflect proceeds raised through the recent exercise of 500,000 warrants into 500,000 common shares. The exercise of the warrants raised $1.5 million in capital by the middle of March, 1990. These funds were utilized to pay off all bank loans ($333,000) and to provide working capital. The company retained a $200,000 line-of-credit facility with a major bank.

Graystone had revenues of $1.55 million for 1989, its first year of operation. The company has losses of $700,000, equivalent to 49 cents per share.

Preliminary results for the first quarter of 1990 show $600,000 in revenues, against losses of $260,000. First quarter revenues represent a gain of 131 percent over last year's results of $261,428 for the same period, with a loss of $10,838.

The company reports that its losses are a result of expenses associated with the acquisition of a critical mass of people, facilities and computer systems needed to take advantage of growing marketplace demand for the company's leading-edge computerized services.

"Until March of 1990," said Ronald D. Mallett, Graystone chairman, "the company lacked the capacity to fund expanded marketing and sales efforts and to adequately prepare itself for anticipated marketplace demands.

"The expansion cost have been high," he continues, "but Graystone now exists as one of the larger, fully integrated prepress electronic

publishing services businesses in the country. We ended the year with record activity in propsoal and bid work, a trend that continues -- with approximately $3.4 million currently under written proposal and/or formal bid.

"We also began a formal marketing program in March 1990, and added four sales people and account executives. We are well positioned to become a significant force in the industry in the coming decade; as reflected in our planned return to profitability, and growth in sales."

NEW CANAAN, CT (APRIL 16) BUSINESS WIRE - Century Communications announced results of the quarter and the nine months ending Feb. 28, 1990 Monday.

Total revenues for the third quarter were $58,215,000, up 17.8 percent over the $49,422,000 in the comparable 1989 quarter. Operating income before depreciation and federal income taxes was equal to 49.8 percent of revenues or $28,960,000, an increase of $3,098,000 over the $25,862,000 of the third quarter of 1989.

The loss for the quarter was $20,749,000 1/8(32) cents per share3/8 compared to a loss of $9,421,000 1/8(15 cents per share)3/8 for the same quarter in 1989.

Total revenues for the nine month period were $165,564,000, an increase of $25,182,000 or 17.9 percent over the prior fiscal year's first nine months. Operating income before depreciation and federal income taxes was equal to 50.5 percent of revenues or $83,632,000, an increase of $9,014,000 over the $74,618,000 reported in the first nine months of 1989.

The net loss for the nine months was $50,351,000 1/8(77) cents per share3/8 compared to a net loss of $18,267,000 1/8(28) cents per share3/8 for the comparable nine months of the prior year.

Century operates 55 cable television systems in 24 states and Puerto Rico serving approximately 830,000 primary basic subscribers. Century also owns and operates four radio stations and owns or has agreed to purchase cellular telephone systems which serve markets with a population of approximately 2,225,000.

CINCINNATI (APRIL 16) BUSINESS WIRE - Cincinnati Bell Inc. announced today it has acquired ADI Research Inc., a full-service marketing research and consulting firm.

Chairman and CEO D.H. Hibbard said, ''Acquiring ADI is another step in our plan to develop the nation's highest quality marketing services company.''

ADI is a privately held corporation with headquarters in Cincinnati. It will operate as a division of MATRIXX Marketing, Cincinnati Bell Inc.'s telemarketing and related marketing services subsidiary.

The terms of the agreement were not disclosed and will not have a material effect on Cincinnati Bell Inc.

ADI specializes in the custom design, analysis, and interpretation of marketing research studies.

Hibbard explained that MATRIXX Marketing is positioning itself to become a leader in integrated marketing services offering telemarketing and marketing research.

ADI Research founder and president, Michael Dean, will continue to lead the company. Senior Vice Presidents John Fox and Sally Moore will also retain their positions. ADI has 130 full and part-time employees. Dean founded ADI in 1976.

In addition to the Cincinnati headquarters, ADI operates offices in Dayton Ohio; Milwaukee; and Washington D.C.

Cincinnati Bell Inc. supplies telecommunications, information and telemarketing services.

Services include: information systems, data processing and systems consulting, discount long distance telecommunications, market research, electronic database services, telecommunications equipment supply and repair, and inbound, business-to-business and outbound consumer-relations telemarketing as well as a full range of telecommunications services in the Cincinnati metropolitan market.

BEVERLY HILLS, CA (APRIL 16) BUSINESS WIRE - Litton's Data Systems division, Van Nuys, Calif., has been awarded a $10.5 million contract by the U.S. Navy to produce 11 more shipboard Identification Friend or Foe (IFF) central processors and associated equipment.

Contract options for seven additional systems could raise the value of this award to approximately $18 million.

The system, designated AN/UPX-24, is the Navy's primary shipboard IFF processor. Litton has already delivered 28 processor systems, which are key units of ships' electronic equipment designed to interrogate aircraft at long range to help determine whether they are friendly or hostile.

The AN/UPX-24 is part of the electronics suite for the Navy's Wasp class (LHD-1) multipurpose amphibious assault ships, Ticonderoga class (CG-47) Aegis guided missile cruisers and Arleigh Burke class (DDG-51) Aegis

guided missile destroyers.

Litton's Data Systems division is a unit of the company's Command, Control and Communications Systems group. It is a world leader in development and production of systems for military command and control and digital communications.

Litton is a technology-based company providing advanced electronic and defense systems, resource exploration services and industrial automation systems for U.S. and world markets.

CINCINNATI (APRIL 16) BUSINESS WIRE - Cincinnati Bell Inc. (NYSE:CSN) recorded net income of $18.3 million, or 29 cents ($0.29) per common share on revenues of $221.3 million, for the first quarter of 1990.

First quarter revenues decreased 0.5 percent from $222.5 million in 1989. Net income decreased 25.5 percent from $24.6 million and earnings per common share decreased 25.6 percent from 39 cents ($0.39).

The results were announced at the company's annual shareowners' meeting. ''We are not planning, nor do we expect to achieve, the fast rate of growth in net income and earnings per common share that we did in 1988 and 1989,'' said D.H. Hibbard, chairman and chief executive officer.

''We are preparing for stronger growth in the long run. In addition, we expect 1990 to be a good year.''

Referring to the goal to double the size of the company again over the next five years, Hibbard said that Cincinnati Bell is investing in the growth of each of its major subsidiaries. ''The growth curve won't necessarily be smooth. And it will require a bit of patience.

CALGARY, ALBERTA (APRIL 16) BUSINESS WIRE - Sceptre Resources Limited (ToS, Mo, ASE:SRL) announced Monday that it will offer for sale a total of

22 Canadian oil and gas property ''Packages,'' representing a total of approximately 700 barrels per day of oil and liquids production and 21 million cubic feet per day of natural gas production.

The sale properties generated 1989 net operating revenue of approximately $8 million. The majority of the Packages have a Sceptre-operated component to them.

Waterous Securities Inc. (''Waterous'') has been retained as advisor and agent to conduct Sceptre's disposition program. Waterous is responsible for the overall coordination and execution of this offering.

The sale of the Packages will be by way of an ''Open Silent Offering,'' featuring a disclosed ''minimum price'' for each of the Packages, and an iterative bidding process.

The initial memorandum will be available the week of April 16, 1990 and the data rooms will be open, on the Waterous premises, the week of April 23, 1990.

The asset disposition program is a component of Sceptre's previously announced initiative to rationalize the company's properties, streamline operations, and further reduce corporate debt. The proceeds from the disposition will be substantially used to reduce long-term bank debt.

For information the divestiture program, contact Sandra E. Powell, Partner Waterous Securities Inc., Calgary, at (403) 265-8005.

Sceptre Resources Limited is a large, independent Canadian exploration and production company listed on the Toronto, Montreal and American stock exchanges under the symbol SRL.

#90106b0793 04/16/1990 ~Business Wire

INDIANAPOLIS (APRIL 16) BUSINESS WIRE - Eli Lilly and Co. Monday reported record sales and earnings for the first quarter of 1990.

Sales were $1.241 billion, an increase of 18 percent over last year. Net income was $341 million, a 20 percent gain over the first quarter of 1989. Earnings per share were $1.16, versus 99 cents one year ago.

In discussing the company's first-quarter results, Lilly Board Chairman Richard D. Wood said, "Worldwide sales of pharmaceutical products rose

significantly in the quarter and were led by the antidepressant Prozac. Other products that contributed to the growth included Axid, Ceclor, Dobutrex, and Humulin."

The medical instrument systems companies also contributed to the first-quarter sales growth. That group's growth continued to be led by Advanced Cardiovascular Systems, Inc. (ACS), and Cardiac Pacemakers, Inc (CPI). The ACS sales growth was highlighted by the Hartzler ACX, an angioplasty catheter introduced in 1989. Ventak, an implantable defibrillator, was the primary contributor to CPI's sales growth.

Sales of diagnostic products were greater in the quarter, while worldwide sales of animal health products were approximately level with the first quarter last year.

Wood added, "We are also pleased that manufacturing costs and operating expenses grew at a slower rate than sales. These results were achieved while the company continued to invest aggressively in its research programs."

WALTHAM, MA (APRIL 16) BUSINESS WIRE - Meditrust (NYSE:MT) announced Monday a 33 percent increase in cash flow from operating activities, a 35 percent increase in revenues and a 26 percent increase in net income for

the first quarter ended March 31, 1990 as compared to the first quarter of 1989.

Cash flow from operating activities, the basis on which dividends are determined, was $10,808,000 or 62 cents per share (based on 17,454,192 shares) for the three months ended March 31, 1990 vs. $8,134,000 or 52 cents per share (based on 15,720,859 shares) for the comparable period in 1989. Revenues for the three months ended March 31, 1990 were $20,384,000 up from $15,148,000 in the first quarter of 1989.

Net income for the 1990 first quarter was $6,528,000 or 37 cents per share vs. $5,183,000 or 33 cents per share for the first quarter of 1989. These increases were primarily the result of additional investments made during the previous 12 month period.

''Meditrust's first quarter operating results represent a successful beginning for the 1990's and are an indication of continued growth and profitability during the upcoming year,'' stated Jonathan S. Sherwin, president of Meditrust.

Meditrust, with headquarters in Waltham, Mass., is the nation's largest health care real estate investment trust, with investments diversified among 13 different operators of 96 health care facilities in 23 states totaling approximately $700 million of investments.

The company specializes in the sub-acute segments of the health care industry, including investments in alcohol and substance abuse treatment centers, long-term care facilities, psychiatric hospitals, rehabilitation hospitals and retirement communities. A.M.A. Advisory Corp., a Delaware corporation, is engaged as the advisor to Meditrust.

MILWAUKEE (APRIL 16) BUSINESS WIRE - Badger Meter Inc. (AMEX:BMI) Monday reported increased sales and earnings for the first quarter of 1990.

Net sales for the three months ending March 31, were $18,838,000, a 3.9 percent increase from sales of $18,129,000 for the first quarter of 1989. Net earnings were $662,000 for the first quarter of 1990, up 13.4 percent from $584,000 in the first quarter last year.

Earnings per share were 43 cents for the first quarter of 1990, a 13.2 percent increase from 38 cents in the first quarter of the prior year.

''Sales increased in both the Industrial and Utility divisions. The gross profit margin for the first quarter of 1990 was up from the margin at this time last year. This is due to a number of factors including price increases, increased sales of products with higher margins, and improved productivity resulting from the purchase of new automated production machinery in our Milwaukee and Tulsa plants,'' said James L. Forbes, president and chief executive officer of Badger Meter.

The company's backlog was $11,115,000 at March 31, 1990, compared with the backlog of $11,437,000 at March 31, 1989. ''Our plan is to prepare now for increased sales efforts later in the year following the introduction of a number of new products in each division,'' Forbes said.

Badger Meter is a leading marketer and manufacturer of products using flow measurement and control technology serving industrial and utility markets worldwide.

SAN JOSE, CA (APRIL 16) BUSINESS WIRE - Sony Microsystems Co. (NYSE:SNE), based in San Jose, Calif., Monday announced that Sony Corp., Tokyo, has signed a strategic agreement with Oracle Corp.(NASDAQ:ORCL), of Belmont, Calif., the world's largest supplier of database software and services.

The agreement calls for Oracle to port its ORACLE relational database management system (RDBMS) and applications development software products to Sony's NEWS family of Unix workstations. Sony and Oracle will cooperatively market the Oracle software to data processing facilities, businesses and software development companies.

Under the terms of the agreement, Oracle will provide its products directly to Sony end users. Sony and Oracle will market the Oracle software to these users through Sony's Synergy cooperative marketing program, which includes the Synergy catalog of products available for use with the NEWS workstations. Oracle retains the exclusive rights to sell and grant sublicensing and distribution rights for its products.

The Oracle RDBMS comprises the kernel, an integrated data dictionary, and a variety of all-purpose database utilities to handle all generalized RDBMS operations.

SQL Forms is an applications generator and run-time system featuring screen painting for user interface design and layout. The program can produce full-screen, interactive applications. SQL Plus is an interactive command utility for data access and report writing. SQL ReportWriter, Oracle's newest report writer, builds a limitless variety of reports without programming.

SQL Menu is a tool for designing and maintaining menu interfaces to the

ORACLE database. SQL Net is the enabling technology for client/server computing and the distributed database architecture of the ORACLE RDBMS, providing network independence.

CASE Dictionary is a design, development and documentation tool used to control all phases of the system life-cycle, from requirements definition through documentation and maintenance. Protocol Set C supports IBM's SNA protocols, including LU6.2, under MVS and MS-DOS. Protocol Set B includes the protocols for TCP/IP under Unix.

Oracle Corp., headquartered in Belmont, is the largest supplier of DBMS software and the third-largest software and services company in the world. Oracle develops and markets an integrated line of software products for database management, application development, decision support and office automation, as well as families of financial and manufacturing applications packages.

Sony Microsystems Co., headquartered in San Jose, is a division of Sony Corp. of America. Sony Microsystems markets state-of-the-art computer industry hardware and software in the United States.

STOUGHTON, MA (APRIL 16) BUSINESS WIRE - Reebok International Ltd. Monday announced that Boston-based Hill, Holliday, Connors & Cosmopulos has been named agency of record for the Reebok United States account.

''The presentation from all the agencies were outstanding,'' said John Duerden, president, Reebok Worldwide. ''It was an exceptionally competitive review. Hill, Holliday, Conners & Cosmopulos won the account for a creative strategy that uniquely positions the Reebok brand in the '90's.''

The Reebok International U.S. account is $70 million in combined advertising and sales promotion. The new advertising campaign will air during te back-to-school season. This decision does not affect Reebok's international account recently awarded to Chait/Day/Mojo.

The competing agencies, in addition to Hill, Holliday, Conners & Cosmopulos, were Chiat/Day/Mojo; Levine, Huntly, Schmidt & Beaver; Waring & LaRosa Inc. and DDB Needham Worldwide Inc.

Reebok International Ltd., headquartered in Stoughton, is the leading designer and marketer of active lifestyle and performance products, including footwear and apparel. The company's operating units include Reebok Worldwide, Avia, Ellesse North America, Rockport, and Boston Whaler Boats. Sales for 1989 total $1.822 billion.

ROSWELL, NM (APRIL 11) BUSINESS WIRE - Hondo Oil & Gas Co. (AMEX: HOG) announced that its Sutherland Federal No. 1 Well in Campbell County, Wyoming, completed in the Minnelusa formation in late February, is presently producing 110 barrels of oil per day with no water.

The company owns interests in several additional locations and is preparing to drill an offset well.

Additionally, the company announced that the Crossroads '3052' No.2 Well offsetting the company's recent discovery in Irion County, Texas, has been drilled to total depth and temporarily abandoned. The company may, at a future date, reenter the well.

The discovery well, the Crossroads '3052' No. 1 well completed in early February 1990, is currently producing at the rate of 200 barrels per day. The company is continuing to evaluate and test the No. 1 well and is also performing additional seismic work.

Upon completion of evaluations of the seismic data and information from the two wells, the company intends to drill an additional well in the

Crossroads area.

REDMOND, WA (APRIL 16) BUSINESS WIRE - Nintendo of America Inc. announced Monday that U.S. Customs agents had arrested four people on April 12 in Wilmington, N.C., for dealing in counterfeit Nintendo video game cartridges, including a Taiwanese couple who were caught bringing counterfeit video games into this country.

Nintendo said its attorneys and investigators had been working for weeks with customs agents in the Wilmington area to seize the counterfeit cartridges. An elaborate undercover ''sting'' operation involving hidden cameras, microphones and some $10,000 in marked money was used to apprehend the counterfeiters.

The four arrested persons are Kenn Ketchum and Brad Isom of Florida and Sylvie and Paul Sun from Taiwan. Each was charged with trafficking in counterfeit goods in violation of 18 United States Code 2320.

Nintendo said that customs agents had seized approximately 700 counterfeit Nintendo cartridges in the ''sting.'' These cartridges were offered to the agents for $60,000. The cartridges were ''multiple game cartridges'' containing up to 40 counterfeits of Nintendo and Nintendo licensed video games.

Howard Lincoln, Nintendo's senior vice president, said, ''This successful sting was the result of close cooperation between U.S. Customs and Nintendo. It represents the first of many coordinated actions which Nintendo is taking throughout the United States and Canada to stop the illegal rental, sale and importation of counterfeit Nintendo cartridges.''

Lincoln said that the most common type of counterfeit Nintendo cartridges can readily be identified. ''The cartridges are approximately half the size of legitimate Nintendo cartridges and require an adapter for play on the NES,'' he said. Lincoln indicated that Nintendo does not market ''mulitple game cartridges'' containing 8-in-1, 10-in-1, 20-in-1 or 40-in-1, etc. video games.

''If a video rental outlet or retailer is renting or selling a multiple game cartridge with an adapter, that cartridge is a counterfeit product,'' said Lincoln.

Nintendo of America sells personal, home and arcade video games in the

United States. The Redmond, Wash.-based company is the headquarters for the company's marketing operations in North America, and is a subsidiary of the world's largest manufacturer and marketer of video games, Nintendo Co. Ltd.

NEW YORK (APRIL 16) BUSINESS WIRE - Wertheim Schroder & Co. Inc., the international investment bank, announced Monday that Peter Young has joined the firm in its New York office as managing director and head of investment banking activities in the chemical sector.

The announcement was made by James A. Harmon, chairman and chief executive officer of Wertheim Schroder.

Young was formerly at Salomon Brothers as head of their worldwide chemical mergers and acquisitions effort. Prior to that, he was with J.H. Whitney & Co., and before that he spent five years at Bain & Co. in corporate strategy consulting.

Wertheim Schroder & Co. Inc., the international investment banking, asset management and securities firm, was founded in 1927. In 1986, the firm broadened its global capabilities and positioned itself for increased international growth by forming a partnership with Schroders plc in which the managing directors of Wertheim Schroder and Schroders plc each own 50 percent of the voting equity of the privately held firm.

In 1989 the firm formed strategic alliances with three other financial institutions, Mitsubishi Trust and Banking Corp., the Bank of Boston and Massachusetts Mutual Life Insurance Co., each holding 4.9 percent non-voting stakes in the firm.

INDIANAPOLIS (APRIL 16) BUSINESS WIRE - The board of directors of Eli Lilly and Co. Monday declared a second quarter dividend for 1990 of 41 cents a share on outstanding common stock.

The dividend is payable June 9, 1990, to shareholders of record at the close of business on May 15, 1990.

This is the same as the previously announced quarterly rate and brings to 82 cents the total dividends declared for 1990.

Lilly also announced today that the board of directors has approved a program authorizing the company to spend up to $1 billion to purchase shares of its common stock and a portion of its outstanding warrants. The common stock purchased under the program will be used to satisfy, in part, the company's obligation to issue shares of common stock upon the exercise of the outstanding warrants and for other corporate purposes. The stock and warrants will be purchased from time to time in the open market at prevailing prices or in privately negotiated transactions.

The purchase program announced today is in addition to the $1 billion antidilutive stock purchase program announced in December of 1987. Under that program, the company has purchased approximately $500 million of its common stock to replace shares issued under its stock plans and acquisition earnout agreements, to satisfy the conversion of its 10-year notes, and for other corporate purposes.

At the end of March, the company had 279 million shares of common stock outstanding and 13 million warrants outstanding. The warrants are exercisable into two shares of common stock at a price of $75.98 per warrant through March 31, 1991.

MONTREAL (APRIL 16) BUSINESS WIRE - BioChem (ME,TSE:BCH) for the fiscal year ended Jan. 31, realized a net income of $225,000 or 3 cents per share compared to a loss of $945,000 or 17 cents per share for the preceding fiscal year.

These results were achieved after research and development expenses of $3,875,000, a substantial increase over the $2,922,000 of such expenses in the previous fiscal year. The company expenses all of its research and development costs.

Revenues amounted to $6,206,000, an increase of almost 100 percent over the $3,158,000 achieved in the previous fiscal year.

This increase in revenue resulted from strong growth in each of our revenue sources: sales, royalties, R and D contracts and interest income.

In terms of financial position, the year-end balance sheet shows total

assets of $28,761,000 with shareholders' equity of $25,831,000 compared to $17,421,000 and $14,750,000, respectively, for the previous year.

Our AIDS diagnostic kit is showing itself to be clearly more sensitive and specific than the majority of such kits on the market. Our potential AIDS drug, BCH-189, is currently in the final phase of pre-clinical trials and we anticipate that it will commence human clinical trials later this year.

In the vaccine sector, the company completed, in February, the acquisition of a 50 percent interest in North American Vaccines Inc. (NAVA). In addition, the company expects to complete shortly the acquisition of the vaccine operations of the Institut Armand-Frappier.

IAF BioChem is an innovative Canadian pharmaceutical company specializing in the research, development, manufacturing and marketing of high quality products for the prevention, treatment and detection of diseases involving the immune system.

Based in Laval and Montreal, IAF BioChem is a public company whose shares are traded on the Montreal and Toronto stock exchanges.

BALTIMORE (APRIL 16) BUSINESS WIRE - MARCOR Environmental Inc. Monday announced that it has filed a registration statement with the Securities and Exchange Commission for an initial public offering of 1.5 million shares of common stock.

All of the 1.5 million shares will be offered by the company. It is currently estimated that the initial public offering price will be between $9 and $11 per share.

MARCOR Environmental Inc. is an environmental services company primarily providing asbestos abatement contracting services to private and public sector clients on the East and West coasts of the United States through its operating locations in Baltimore, Md; Washington D.C.; Philadelphia; Rochester, N.Y.; Salisbury, Md; San Francisco; Los Angeles and Jacksonville, Fla.

The company specializes in performing complex abatement projects for large industrial complexes, commercial concerns and school systems within the rigid time frames dictated by the customers' operating schedules and other constraints.

Since its inception in 1980, the company has performed over 3,000 asbestos abatement contracts for approximately 1,400 customers. The company also provides soil and groundwater remediation services and emergency spill response to industrial and commercial customers through its offices in Rochester, N.Y. and Philadelphia.

Alex. Brown & Sons Inc. and Smith Barney, Harris Upham & Co. Inc. will co-manage the offering.

The company will use the net proceeds of the offering to pay S Corporation distributions, reduce indebtedness and for general corporate purposes including working capital.

HOPKINGTON, MA (APRIL 16) BUSINESS WIRE - EMC Corp. expects revenues and profits for the first quarter of 1990 to show a substantial improvement over the same period last year according to EMC Chairman and Chief Executive Officer Richard J. Egan.

"Although we are awaiting confirmation of the final numbers," said Egan, "We expect to show earnings of three to four cents per share on revenues of approximately $40 million for the first quarter of 1990."

These results represent a record for the first quarter revenues in the company's history as well as a dramatic improvement over the $24 million revenue figure and substantial loss during the same period last year.

Final first quarter numbers will be released shortly, following review by the company's independent auditors. The company chose to issue preliminary results because according to Mr. Egan, "The recent attention our stock has received from being one of the first quarter's best performing issues on the New York Stock Exchange has generated a great deal of interest in the investment community."

TOKYO (APRIL 16) - Japan's industrial output in February shrank 0.2 per cent from January and not 0.5 percent as previously reported, the Ministry of International Trade and Industry said in a revised report Monday.

The ministry also said that output grew 3.4 percent from February last year, upwardly revising its preliminary estimate of 3.2 percent growth.

The decline in the month-to-month figure was the first in five months and compares with 0.1 percent growth in January and zero growth in December.

The main factor behind the revision was beer production which proved to be higher than initial estimates due to increased consumer demand ahead of a price increase in March, a ministry official said.

Overall shipments by manufacturers fell 0.5 percent, less than the prelimary estimate of 0.8 percent, while inventories climbed 0.2 percent compared with the earlier estimate of 0.3 percent.

The ministry said last month that the industrial slowdown was temporary as it mainly reflected unexpected factors such as factory accidents and seasonal factors such as annual plant overhauls. The main sectors affected by the slowdown were the chemical and steel industries, it said.

#90106d0890 04/16/1990 ~French/German News Agency

Manama (APRIL 16) - The oil market has reached ''saturation point'' in light of crude production by the Organisation of Petroleum Exporting Countries (Opec) at over 24 million barrels per day, according to an authoritative report Monday.

The Cyprus-based Middle East Economic Survey (Mees) said that, despite this, the main Opec producers ''are all continuing to produce at high level and show no sign whatever of any readiness to ease up and losing market shares''.

These producers are Saudi Arabia, Iraq, Iran, Kuwait, the United Arab Emirates, Venezuela and Nigeria. The official Opec ceiling is 22.1 million bd for the first half of this year.

According to Mees, crude storage on land and floating is fast approaching ''the point where it can take no more'', while particulary Gulf suppliers are still pushing volume into a saturated market with ever more competitive price terms.

In addition, refiners, whose supply programs are fully catered for until June or even July, cannot absorb additional volume now, whatever the prices.

In response, some suppliers such as Iran have made deals which involve keeping already available crude in storage close to market for delivery in two months.

''If suppliers go on pressing volume and selling even further forward, they will simply be pushing a wave of oil in front of them and spoiling the oil market in the second half as well as the second quarter,'' Mees quoted a marketer in a major company as saying.

#90106d0920 04/16/1990 ~French/German News Agency

BEIJING (APRIL 16) - China's central bank has cut interest rates on bank deposits to stimulate demand, the official China Daily reported Monday.

The People's Bank of China cut the interest rate on benchmark one-year deposits to 10.08 percent from 11.34 percent after retail inflation fell

into the single digits, an unidentified bank official was quoted as saying.

"The move may also encourage sales of goods and help guide proper consumption by society... at a time when the nation faces slack market sales," the official said.

Annual interest on three-month deposits fell to 6.3 percent from 7.56 per cent, while the new rate on three-year funds was 11.88 percent against 13.14 percent previously.

The move follows cuts in loan interest rates on March 21.

Under an austerity program launched in September 1988, the government of Premier Li Peng tightened money to cool growth in industrial production of 20.7 percent and inflation of 18.5 percent in 1988.

In the first quarter of this year, inflation was down to 3.3 percent and growth in industrial production was at a standstill.

A State Statistical Bureau report blamed the slump on increased inventories of finished goods and predicted that sluggish demand and a lack of working capital would continue to hamper economic growth.

#90106d1030 04/16/1990 ~French/German News Agency

Islamabad (APRIL 16) - Pakistan's agrarian economy rests on its female work force and would collapse without women, according to the country's top agricultural expert, C. M. Anwar Khan.

Khan, chairman of the Pakistan Agriculture Research Council, told a seminar that 12 million rural women engaged in agricultural activities went

unreported by the statisticians.

''Despite their enormous contribution to the national economy,'' he said, ''the rural woman continues to be disadvantaged.'' Less than 10 percent of them have access to education, hygienic sanitation and potable water.

Two-thirds of the 105 million Pakistanis are engaged in agriculture, almost 45 percent of them below age 15.

''Ironically, the leadership of rural women rests with their urban sisters, who have yet to develop effective communication channels with the rural-based women,'' said Khan, calling for a national census of the peasant women.

#90106d1410 04/16/1990 ~French/German News Agency

SEOUL (APRIL 16) - South Korea's stock market fell Monday to its lowest level in 17 months and fears of a crash gathered steam as the finance ministry let it be known it would not come up with any rescue measures.

The Composite Price Index fell to 783.13 points, after plunging through the psychological barrier of 800 points on Saturday.

Dealers immediately said there were signs that the market was heading towards a crash, but appealed to investors not to dump their shares hurriedly.

The finance ministry officials discounted fears of a crash, but added that the government would no longer intervene in the market as it had on December 11, when the index plummeted to its 1989 low of 844.75 points.

At that time, the government ordered the central Bank of Korea to release about three trillion won (about four billion dollars) to buy sagging shares and prop up the market.

But the action was effective only briefly.

#90106d1420 04/16/1990 ~French/German News Agency

TOKYO (APRIL 16) - Yamaichi Securities Co. said Monday that some seven billion yen (44 million dollars) it paid to purchase stocks at the request of an investor has been irrecoverable.

The securities company bought three million shares of Nippon Seisen Co. for about seven billion yen in late February on the order of a restaurant operating firm, a Yamaichi official said without specifying the investor's

name.

But Yamaichi, one of Japan's four major stockbroking firms, found later that the investor had failed to take the stocks and pay the money by the settlement date or within four days from the purchase.

The Tokyo-based restaurant operator, capitalized at 20 million yen (125,800 dollars), reportedly went bankrupt in March, incurring a debt of some three billion yen (19 million dollars).

Yamaichi said that it was considering a lawsuit against the owner of the restaurant operating firm.

Stock prices of Nippon Seisen, a stainless steel maker listed in the second section of the Tokyo Stock Exchange, dropped sharply from the 2,300 yen (14.5 dollars) level in February to 1,100 yen (6.9 dollars) a share last Friday.

#90106d1700 04/16/1990 ~French/German News Agency

PARIS (APRIL 16) - French Defence Minister Jean-Pierre Chevenement begins a five-day trip to Japan on Tuesday, the first by a French defence minister since World War II.

Mr. Chevenement is expected to discuss the new East-West relationship and resulting changes in Asia when he meets Prime Minister Toshiki Kaifu and other Japanese leaders.

Defence ministry officials here said Paris wants to "pursue the dialogue and strengthen relations with the world's second economic power".

"A dialogue already exists between the United States and Japan, and between the United States and Europe," the officials said, calling for a strengthening of the "third side of the triangle, the Europe-Japan relationship".

Mr. Chevenement will also discuss possibilities for cooperation on high-technology projects with Japanese business leaders, and will visit an advanced electronics firm in the Tokyo area.

The minister, who visited Japan twice in 1981 and 1981 while research and development minister, will discuss military strategy and security with his Japanese counterpart Yozo Ishikawa.

#90106d2540 04/16/1990 ~French/German News Agency

KATHMANDU (APRIL 16) - An angry mob Monday set fire to furniture and reels of film at a cinema here after it showed a film starring a policeman the crowd said had taken part in the recent shooting of demonstrators in Lalitpur.

Witnesses said students and local residents had warned the owners of the cinema not to screen the film "Anyaya" (injustice), but when the owners went ahead they stormed the cinema, dragged out the furniture and other items and set fire to them.

"We did not want to set fire on the cinema hall situated in the center of Kathmandu city, because the fire could spread to other parts of the city," one of the students said.

Students lay down in the street to prevent a fire engine getting to the scene, witnesses said, adding that the mob also stopped a truckload of

police from intervening.

Lalitpur, a suburb of Kathmandu, was the scene of several clashes between police and demonstrators during a nationwide seven-week pro-democracy campaign organized by the opposition which left between 400 and 500 people dead, according to opposition sources.

-30- 1283

#90106d2610 04/16/1990 ~French/German News Agency

MOSCOW (APRIL 16) - The Soviet Communist Party newspaper Pravda called Monday for the ruling party to ''clean'' radical reformers from its ranks for threatening the organization's unity.

In a lead editorial, Pravda denied backing a ''purge''. It defended a Central Committee demand, published in an open letter, that opposition Communists be expelled for trying to establish a reform faction within the party.

''The party must defend itself because it is threatened by division,'' Pravda wrote. ''Separation from extremist persons is therefore unavoidable.''

''The main aim of the Central Committee's open letter is the consolidation of the party's healthy forces before the party conference (in July) so that the Cpsu can take this important step in its life unified, strong and united,'' Pravda wrote.

Communist reformers blasted the Central Committee and Pravda recently for ''persecuting dissidents'' within the party and carrying out a ''witch hunt''.

In a letter published by the weekly Argumenty i Fakty, the largest-circulation Soviet newspaper, the reformers pointed to party expulsions of dissidents in Byelorussia and the Ukraine and noted the Central Committee's open letter call for disciplinary steps against oppositionists.

#90106d2640 04/16/1990 ~French/German News Agency

NEW DELHI (APRIL 16) - Dozens of firetrucks on Monday battled a fire that swept through the Indian capital's show-piece conference hall, witnesses and officials said.

Police said about 15 employees were hospitalized for injuries after jumping off the deluxe three-storey complex known as Vigyan Bhawan, which serves as an international conference center.

Senior police and intelligence agents had just adjourned a meeting for afternoon tea and another meeting of information officers was under way when the fire alarm went off, officials said.

Police said the fire appeared to have started on the second floor of the high-security building where prime ministers and visiting heads of state usually address press conferences and conventions.

Armed police and anti-riot squads ringed the building and kept away thousands of onlookers, mostly employees, as firemen battled the flames, hampered by low water pressure which left many hoses with nothing but trickles.

The cause of the fire was not known, but the Press Trust of India (PTI) said there appeared to have been a short circuit in the central air conditioning system.

Firefighters, who had resorted to syphoning water from fountains in the complex, broke glass windows to spray water as flames which spread through air conditioning ducts quickly engulfed the building.

PTI quoted a senior official of the Delhi Municipal Corp. as saying that the building, though ultra-modern in appearance, lacked fire fighting equipment.

#90106d2670 04/16/1990 ~French/German News Agency

TEHERAN (APRIL 16) - Iranian police on Sunday arrested 65 people in northern Teheran who were shouting political slogans and disturbing the peace, press reports said here Monday.

The arrests were carried out by government police squads known as the Committees after "hooligans" had "troubled public order" in the crowded Mellat Park on Sunday, newspapers reported.

They did not disclose the nature of the political slogans but said those detained had also raised their voices against "moral order and decency."

In a separate development, newspapers reported the arrest of "hooligans" in the Djavadieh district of southern Teheran who were marking the funeral of a notorious "outlaw," Aref Valizadeh, killed April 9 by police who had come to arrest him.

He had been sought since 1980 for several murders. But for people in his district he had a reputation as a protector of the disadvantaged.

His friends last week built 70 small funereal arches on which they had hung electric lightbulbs and flowers.

Members of the Committees and municipal police officers also raided some 700 huts or booths in Kianshahr, a poor district also in southern Teheran, according to press reports.

The facilities, police said, had been used as "centers of vice, illegal activity and for exchanges of contraband goods."

#90106d2810 04/16/1990 ~French/German News Agency

NAIROBI (APRIL 16) - Ethiopian rebels claimed Monday they had killed more than 800 government troops in fighting northeast of Addis Ababa last week.

The rebel Voice of the Tigray Revolution said forces of the Ethiopian People's Revolutionary Democratic Front (Eprdf) destroyed a commando brigade and two commando battalions on the road between the capital and Dese, 500 kilometers away.

The broadcast, monitored in Nairobi, said the clashes took place in Ataye and Kara Kore in the district of Yifat na Timuga in the north of Shewa region.

The radio said Eprdf forces inflicted ''heavy human and material losses'' in the fighting, killing 721 government soldiers, wounding 410 and capturing 351.

This was the first time the Eprdf had carried out ''a devastating offensive'' in the Yifat na Timuga district, the radio said.

In another battle, Eprdf forces destroyed two battalions of an Ethiopian army brigade at Degaga, also in northern Shewa, the radio said. One hundred and fifty one government soldiers were killed and 223 wounded, the report said.

#90106d2840 04/16/1990 ~French/German News Agency

BEIRUT (APRIL 16) - Prime Minister Selim al-Hoss acknowledged Monday that his government did not have the military strength to halt new heavy artillery duels between rival forces in Lebanon's Christian areas.

Mr. Hoss, reacting to appeals that his government intervene in clashes between army troops under General Michel Aoun and Lebanese Forces (LF) militiamen, said his administration had "received no assistance to date to develop an independent military capability that would allow it to defend such initiatives."

He was referring to proposals published here Sunday quoting U.S. charge d'affaires for Lebanon David Sutherfield as saying that "Lebanese legal authorities should not hesitate to take control of the (Christian) eastern regions."

Mr. Sutherfield is currently in Damascus, as the United States has withdrawn its American diplomatic staff from Lebanon.

Mr. Hoss' press statement Monday coincided with a visit of Arab League special envoy Lakhdar Ibrahimi, who said Friday that Saudi Arabia, Algeria and Morocco -- members of a triumvirate seeking a solution to the Lebanese crisis -- would soon supply the Lebanese army with military materiel.

Mr. Ibrahimi represents the League's three-nation committee on Lebanon that drafted the Taif peace accord, which Lebanese MPs endorsed last October.

But Gen. Aoun rejected the plan for failing to secure the withdrawal of Syrian troops from Lebanon and has refused to recognize the authority of President Elias Hrawi, who was elected in November under the terms of the accord.

Government forces under Mr. Hrawi are thought to number about 15,000 but are ill-equipped, while Gen. Aoun commands at least as many troops who are better equipped and trained.

Troops loyal to Gen. Aoun meanwhile fought LF militiamen north of here for two hours Monday, sources from both camps said. Each side blamed the other for the latest round of artillery duels, which followed a relative lull on Easter Sunday.

"We would not be revealing a secret by saying that legal authorities do not have enough autonomous military forces" to intervene effectively in the inter-Christian clashes, Mr. Hoss stated.

He said his government was reacting cautiously to a request from LF leader Samir Geagea that army troops loyal to President Hrawi extend their authority in Christian areas.

Mr. Geagea earlier this month called on Mr. Hrawi to take over barracks and public institutions in militia-held territory. The president welcomed the request and sent a senior officer on an "inspection" tour of those areas.

Mr. Geagea's initiative was also welcomed by the Arab triumvirate and the United States, but several of Mr. Hoss' ministers said it was a ploy.

Gen. Aoun's troops and the LF have fought bitterly since January 31 for control of Christian east Beirut and territory east and north of here. The confrontations have left at least 933 people dead and 2,543 wounded, according to unofficial estimates.

Elsewhere, Syrian Defense Minister Mustafa Tlass arrived in Moslem west Beirut for an inspection tour of Syrian troops deployed in Lebanon, informed sources said.

Gen. Tlass, whose visit had not been previously announced, arrived at Beirut's international airport in Syrian-controlled territory. He last visited his troops here on March 10.

PARIS (APRIL 16) - The office of the French journalist in charge of the project to send a dissident radio ship to China was broken into at the weekend, staff at his Magazine Actuel said on Monday.

They said Christophe Nick's office had been "carefully searched". "His computer has been stolen and all the diskettes containing nine months of work on China and the boat were taken."

Sealed envelopes containing cheques of support from readers had been opened but not destroyed.

Two other offices in the building had also been searched. Material had been stolen from the office of the director of publication and the editorial office had been "ransacked".

Actuel has been helping the "Boat for China" foundation organize broadcasts of music and news for the radio ship "Goddess of Democracy",

which set sail from the French port of La Rochelle last month. Eighteen other press groups in several countries, and the Federation for Democracy in China, are involved in the project.

The foundation said Monday that it was worried about mounting pressure from Beijing to prevent the ship fulfilling its mission.

It accused the Chinese Government of putting pressure on other governments to make things difficult for the ship.

The vessel was able to leave the Red Sea port of Djibouti, on the Horn of Africa, on Friday after being held up for several days for "technical, administrative reasons".

"The Goddess of Democracy is now entering sensitive waters where pressure from the Chinese authorities is expected to increase significantly," the foundation said.

It stressed that the ship's activities will be "totally peaceful and (it) has no other protection than that which international public opinion will grant it."

Beijing asked France to stop the vessel setting sail and has condemned the project as "subversive".

DAR ES SALAAM (APRIL 16) - Tanzanian President Ali Hassan Mwinyi has ordered striking students of the University of Dar es Saalam to resume classes Tuesday while authorities consider their grievances.

The students have been boycotting classes since April 8 over long-standing grievances, including declining budgetary allocations for universities and low salaries for teachers.

President Mwinyi, in his capacity as university chancellor, told student representatives from Dar es Salaam and the Morogoro-based Sokoine University of Agriculture he would look into the problems after his two-week tour of Nordic countries starting Wednesday.

He met them and heard their grievances at state house here on Sunday.

A presidential statement, released Monday, said Mr. Mwinyi also promised to meet the students at the two campuses between May 8 and 12.

He told them the government sympathized with their complaints, but stressed that the poor economy was the main factor behind the problems which also

face the rest of Tanzanians in every sector.

"As Tanzanians, the students are free to contribute ideas towards solutions to our economic problems in order to ease hardships facing the population", Mr. Mwinyi said.

Meanwhile a class boycott by medical interns seeking better working conditions at the Dar es Salaam-based Muhimbili Medical Centre entered a fifth day.

The strike has spread to northern Tanzania's Kilimanjaro Christian Medical Centre in Moshi and to Bugando Hospital in Lake Victoria shore-town of Mwanza.

Trainee doctors, including the post-graduates, have complained of long working hours without over-time pay, poor accommodations, and lack of transport after working hours. They alleged their superiors refused to look into the complaints.

The boycott has paralyzed medical services at the country's three referral hospitals, now being performed by consultants.

LONDON (APRIL 16) - The Round the World Yacht Race is to undergo a thorough safety review after the event's first death for 16 years.

Sponsors Whitbread and race organizers from the Royal Naval Sailing Association will spend the next two weeks in Fort Lauderdale, Florida, discussing the subject with many of the skippers.

Whitbread, who announced on Monday that they would again sponsor the race in 1993-4 at a cost of about 10 million pounds, have brought safety to the top of the agenda after the death of British crewman Tony Phillips.

He was swept overboard when the yacht Creighton's Naturally was caught in storms in the icy South Atlantic last November.

A spokeswoman for the brewery company said: "There is certainly a need for a safety review because so many lives are at risk.

"A life was lost in this last race so we are very keen to ensure research continues and equipment is modified.

"Some existing equipment has not always functioned effectively and evolving technology can help to improve safety.

"Skippers from the boats involved will be having a lot of discussions over the next two weeks, although no details have yet been set down.''

Crews will also be asked to back plans to restrict the race to just one class of yacht up to a maximum of 60 feet in a bid to stop the large 80-foot vessels from dominating the event.

This would ensure a balance between exciting racing and safety, Whitbread said.

After their current stopover at Fort Lauderdale, the competing yachts will begin the final leg across the Atlantic on May 5. They are expected to arrive in Southampton around May 19.

JEDDAH, SAUDI ARABIA (APRIL 16) - Pakistani Prime Minister Benazir Bhutto arrived here Monday for a three-day visit including a pilgrimage to the holiest Moslem shrines of Mecca and Medina, the official SPA news agency reported.

Accompanied by several ministers and senior army officials, the Pakistani leader is also expected to meet King Fahd, officials in Islamabad had said.

The situation in Indian-held Kashmir, where Islamabad is accused by New Delhi of aiding opponents of Indian rule, and in Afghanistan could figure prominently during their discussions on international issues, they said.

#90106d3070 04/16/1990 ~French/German News Agency

Dubai (APRIL 16) - Oil industry officials and traders here say they are not too worried about the recent sharp fall in oil prices and believe Opec will once again tackle the problem which has become a familiar trend in the history of the 13-member cartel.

They warned however, that should prices continue to drop rapidly, there would be room for alarm.

Some officials defended the United Arab Emirates' failure - like several other Opec producers - to keep to its agreed quota of 1.095 million barrels a day, insisting that the ceiling does not measure with its production capacity.

Opec's March output level was two million barrels a day higher than the group's production ceiling of 22.086 million agreed last November. The average price of 18 dollars a barrel declined 1.35 dollars during the same

month compared to February.

''It's like giving you a small chair and telling you to sit on it,'' explained a U.A.E oil official. ''There is a limit to your patience, especially when it goes on for too long. So we had to go it alone and make our own production level.''

But the official, who like all those interviewed asked not to be named, said he was optimistic that prices would stabilise soon after the May 25 meeting of Opec - the Organisation of Petroleum Exporting Countries.

''We're not desperate. It's normal movement and it was expected. When you expect something, you don't panic,'' he said.

HARARE (APRIL 16) - Malawian President Kamuzu Banda arrived in Harare Monday at the head of a 60-strong delegation for a week-long state visit coinciding with Zimbabwe's 10th independence anniversary celebrations.

He was met at the airport by President Robert Mugabe, and was later due to be presented with the freedom of the city of Harare.

Mr. Banda, 83, was imprisoned for a year in 1959 in this former British colony of Rhodesia for his political activities against colonial rule in neighboring Nyasaland, as Malawi was then known.

Since then he has visited Zimbabwe for just a single day in 1980, and his agenda this week includes a trip to the prison where he was held, in the town of Gweru, some 300 kilometers west of the capital.

At least four other African heads of state are due to attend the independence celebrations on Wednesday. They are presidents Kenneth Kaunda of Zambia, Daniel arap Moi of Kenya, Quett Masire of Botswana, and Sam Nujoma of the newly independent Namibia.

MONROVIA (APRIL 16) - A leader of the opposition Liberia Action (LAP) has charged that he and members of his family are constantly being harassed by plain-clothes security men, the independent daily Observer reported Monday.

John Sahn, who is also a coordinator of LAP for Nimba county, where government troops are fighting rebels, expressed fears that certain security men were after his life.

Mr. Sahn said that two-plain clothes security officers and a soldier last week visited his home in Monrovia's Gardnersville suburb and held him and his family at gun-point.

He said when the securitymen came they told him that he was wanted at the state house. But while they argued, the security officers left because a crowd rushed to the scene.

BEIJING (APRIL 16) - Lauro Ortega, advisor to Mexico's president Carlos Salinas, arrived here Monday to meet Chinese officials ahead of a planned visit to Latin America by President Yang Shangkun.

Within hours of his arrival, Mr. Ortega met Vice Foreign Minister Liu Huaqiu to exchange views on "international issues of common interest," the official New China News Agency reported.

President Yang is to tour Mexico, Brazil, Uruguay, Argentina and Chile from mid-May, the Chinese Foreign Ministry announced last week.

#90106d3400 04/16/1990 ~French/German News Agency

ANKARA (APRIL 16) - Two imprisoned leaders of the outlawed United Communist Party of Turkey (Tbkp) were ''weak but determined'' at the 11th day of a ''death fast'' in support of their quest for the party's legalization, one of their lawyers said Monday.

Haydar Kutlu, 46 and Nihat Sargin, 64, in jail since November 1987 after returning from West Germany, had lost considerable weight but were not in immediate danger, Nezahat Guendogmus said.

She said they had not given up their determination to fast until their release or ''serious signs for preparations for the legalisation of the Tbkp or removal of legal restrictions on communist parties''.

The Turkish government is working on a draft to eliminate the ban on communist and religious parties in the framework of a cautious policy of liberalization.

Left-wing intellectuals, artists and writers are currently taking turns at two-day symbolic hunger strikes in solidarity with the imprisoned communist leaders.

#90106d3410 04/16/1990 ~French/German News Agency

WASHINGTON (APRIL 16) - U.S. officials Monday discounted repeated allegations by India that Pakistan is fomenting separatist violence in the divided region of Kashmir -- interference New Delhi suggests could justify a military assault on the neighboring state.

At least twice in the past five weeks, India has sent the State Department detailed accounts of Pakistan's alleged role in arming, training and financing Moslem nationalists in the disputed northern Indian state of Jammu and Kashmir, department officials said.

Assistant Secretary of State John Kelly told a congressional panel last month that experts examing the first batch of Indian documents had concluded "that there is not convincing and clear proof of involvement of the Pakistani Government in terrorism in Kashmir."

A department official Monday said a second package of Indian allegations had also failed to convince U.S. analysts that Pakistan is behind the turmoil in Kashmir. "We have no reason to change our characterization," he said.

He declined to say if New Delhi was continuing to provide evidence of Pakistani intereference in Kashmir to the U.S. Government. Other U.S. officials have indicated Washington does believe individuals in the Pakistani Government and military are providing armed support to Kashmiri separatists.

Indian leaders in recent days have suggested that the separatist insurrection and alleged Pakistani interference could justify an offensive strike against Pakistan.

The two have already fought two wars over Kashmir, which is divided between the two states.

Pakistani Prime Minister Benazir Bhutto has denied giving military support to the Moslem militants in Jammu and Kashmir, although her government strongly backs self-determination for the territory.

#90106d3520 04/16/1990 ~French/German News Agency

MOSCOW (APRIL 16) - A leader of the Soviet Parliament's liberal caucus looked set to win election as mayor of Moscow as the Soviet capital's newly-elected city council opened its inaugural session here Monday.

Gavril Popov, co-chairman of parliament's Inter-Regional Group of deputies, has emerged as a leading candidate after Valeri Saikin, mayor for the past three years, decided not to run.

Mr. Saikin, whose hardline administration had come under increasing criticism, withdrew after reformists captured 60 per cent of the city council's seats in last month's elections which saw liberals surge nationwide.

At the weekend he was appointed vice premier of the Russian Republic, headed by Vitali Vorotnikov, one of the leading hardliners in the politburo.

The liberal Mr. Popov's chief rival is Alexei Briashikin, candidate of the conservative Moscow Group.

Several of the 429 deputies attending the council's opening session said voting was unlikely to take place before Wednesday. The new body was locked in lengthy procedural discussions Monday.

Deputies said another leading reformer, Sergei Stankievitch, had a good chance of being elected deputy mayor of the city of nine million.

If Mr. Popov becomes mayor, it will be the first time Moscow has fallen into the hands of reformers since President Mikhail Gorbachev began his perestroika campaign of national reform.

When outgoing Mayor Saikin took over in January 1986, it was from Victor Grishin, a Brezhnev man who had run the city for 19 years.

Among criticisms levelled at city hall by Moscow liberals in recent years were local authorities' repeated attempts to block the holding of demonstrations and public rallies.

However hardliners seized advantage of their final weeks in power to rush through a series of conservative measures. They turned over many municipal buildings to the communist party, sources close to the party revealed.

Moskovskaya Pravda, a daily that was organ of the city hall and Moscow Communist Party, became the property of the party alone.

DAMASCUS (APRIL 16) - Soviet President Mikhail Gorbachev cabled President Hafez Assad Monday, expressing his desire to boost relations with Syria.

''The Soviet people is in solidarity with the Syrian people in its keeness to defend its sovereignty, independence and the national rights of the Arabs,'' he said in a message marking Syria's independence day Tuesday.

Gorbachev said the joint efforts of the two countries for solving the Arab-Israeli conflict was an important condition to entrench a just solution for all in the Middle East.

We, in the USSR, are proud of the continuous friendship and multi-aspect cooperation with Syria, and we aspire to promoting that and deepening it'', he said.

#90106d3780 04/16/1990 ~French/German News Agency

AMMAN (APRIL 16) - Jordan, one year after being rocked by violent anti-government demonstrations, has embarked on far-reaching political reform and democratization but remains saddled with crippling economic problems.

Jordanian voters went to the polls for the first time in 22 years last November to elect a lower house of parliament. Martial law regulations, in effect since 1967, have been frozen and are to be officially abolished in June.

The demonstrations, which erupted April 18 in the southern Jordanian community of Ma'an, were also aimed at governmental mismanagement and misuse of funds.

Parliament in response recently referred nine corruption cases, implicating 27 politicians and businessmen, to courts here.

Twelve people were killed and 112 were injured in confrontations with security forces that soon spread from Ma'an to 13 other cities and towns in the south and west of the country.

The disturbances were sparked by price hikes imposed on basic commodities but quickly assumed a political character, with calls for an end to corruption and the restoration of civil liberties.

King Hussein, to whom demonstrators remained loyal, subsequently accepted the resignation of Prime Minister Zeid Rifai and replaced him with Moudar Badran.

While Jordanian authorities implemented political reform and liberalization, they have been less successful in grappling with a foreign debt totalling 8.3 billion dollars, a task complicated by insufficient economic assistance from fellow Arab states.

An Arab summit in 1978 pledged 12 billion dollars to Jordan over the next decade. But officials here say the country received only half the promised amount.

In 1989, they said, oil-producing Gulf states contributed only 380 million dollars and officials here are still awaiting Gulf commitments for this year.

Nonetheless the government since last December has managed to stabilize the dinar, the local currency, against the dollar. In the previous 12 months the dinar had lost 75 percent of its value against the U.S. currency.

"The government is trying to strike a balance between the hopes that democracy has raised among the public and its economic limitations," said a senior Jordanian official.

He added that Jordanian authorities were also anxious about conditions imposed by the International Monetary Fund, notably a call for the abolition of subsidies on food products amounting to some 100 million dollars.

Removing the price supports, he warned, could provoke widespread public disenchantment.

Prime Minister Badran is currently reported to be weighing options that would maintain subsidies on certain critical items for the most impoverished sector of society while abolishing others.

Leith Shubailat, an MP from Amman, said the government was trying to cope with rising levels of poverty and unemployment with "minimal" resources.

But Dheeb Merji, another deputy, stressed that the demonstrations had "unmasked the reality of Jordanian society and placed the country on the road to a more solid foundation."

An MP from Ma'an, Youssef al-Adem, stressed that his constituents did not take to the streets last year "to destroy their country but to call attention to poverty and injustice."

The people of Ma'an today, he added, "have the feeling that the government is listening to them and is responding to their needs in a climate of cooperation and responsibility."

Mr. Badran's government has approved the creation of a university branch in the Ma'an region as well as the sale of nearly 200 apartments to residents, with interest-free payments stretched over 30 years.

In addition, the government has allocated 2.5 million dinars (3.7 million dollars) to the needs of southern Jordan.

#90106d3870 04/16/1990 ~French/German News Agency
CHAMKANI, PAKISTAN (APRIL 16) - An Afghan resistance leader said Monday that mujahedin rebels cannot be coerced into negotiating peace with the Soviet-backed regime of President Najibullah.

''Our friends may continue, cut or reduce their (arms) assistance to us but cannot force us into negotiating a political settlement with the Kabul regime,'' mujahedin defense minister Mohammad Nabi Mohammadi told reporters at his headquarters near the Pakistani border town of Peshawar.

Mohammadi said foreign supporters, particularly the United States, had already ''considerably reduced'' their supplies to the mujahedin while Moscow had increased deliveries of arms to its ally in Kabul.

''We will never negotiate with the Kabul regime because it is neither representative nor has the power to take decisions,'' he said.

Denying that the rebels did not want peace, Mohammadi called for ''direct talks between the mujahedin and the Soviet Union'' to bring about a government in Kabul in which Najibullah and the ruling people's Democratic Party of Afghanistan (Pdpa) would have no place.

He rejected a claim by Pakistan's fundamentalist Jamaat Islami party that the mujahedin and Moscow were already in contact.

Major Gul Zarak Zadran, an aide of the defense minister, briefing the reporters on the military situation inside Afghanistan, said Kabul forces, in general, had been ''limited to the cities'' with the roads and countryside in the hands of the resistance.

''Afghan troops and officers are defecting (to mujahedin ranks) all over Afghanistan and the enemy has been deprived of outside help and popular support,'' he added.

#90106d3880 04/16/1990 ~French/German News Agency
LIMA (APRIL 16) - Mario Vargas Llosa has decided to stay in Peru's presidential race, aides said Monday, ending speculation that the acclaimed novelist would bow out due to his disappointing performance in first-round voting.

Mr. Vargas Llosa, once favored to win the presidency handily, will change his campaign strategy in the home stretch toward a run-off election against Alberto Fujimori, the aides said.

A formal announcement was expected later in the day.

Mr. Fujimori, a son of Japanese immigrants and political independent without a defined ideology, shot from relative obscurity to political celebrity as the campaign for the April 8 first round wound down, finishing in a virtual dead heat with Mr. Vargas Llosa.

Run-off voting is tentatively scheduled for June 3, and many analysts say Mr. Fujimori will probably win.

The aides to the 54-year-old Mr. Vargas Llosa said he would tone down his talk of economic "shock" treatment he says the Peruvian economy needs to curb runaway inflation and other economic ills.

His plans to cut the government payroll and sell off money-losing state enterprises were seen as unpopular among Peruvians already living in precarious economic conditions.

Mr. Vargas Llosa is also considering distancing himself somewhat from parties comprising his conservative Democratic Front coalition, the aides said.

Mr. Fujimori's surprisingly strong showing has been attributed in part to voter discontent with traditional Peruvian parties and politicians, with the 51-year-old academic viewed as an honest, hardworking newcomer.

Aides to Mr. Fujimori said he was preparing to keep a recent pledge to provide details on how he would tackle Peru's economic and social problems if elected.

COPENHAGEN (APRIL 16) - Popular support for the monarchy in Denmark has grown during Queen Margrethe's 18-year reign, according to an opinion poll marking her 50th birthday Monday which showed that 64 percent of Danes favor the system.

Tens of thousands of people gathered in the rain outside the royal Amalienborg palace to sing Happy Birthday to the queen, who later drove through Copenhagen in a coach to a civic reception at the town hall.

The queen's consort, Prince Henrik, told Agence France-Presse that he was "deeply moved to feel so much warmth from a people."

A Gallup poll published Saturday by the conservative daily Berlingske Tidende showed that the proportion of Danes in favour of the monarchy had grown from 42 percent when Margrethe came to the throne in 1972, to 64 percent today, while the number of republicans had declined from 42 to 22

percent.

NEW YORK (APRIL 16) - Little was known about the life of Greta Garbo, the elusive movie goddess whose penchant for privacy became legendary, and no details have been released about the cause of her death Sunday, at age 84.

A tantalizing hint may be read into a statement made by Andrew Banoff, a spokesman for New York Hospital where the actress died. In place of flowers, the actress had requested donations be sent to a kidney dialysis center, he said.

The spokesman refused to say whether the actress had suffered from kidney failure but one of her neighbors, Ben Buttenweiser, said she had been undergoing dialysis treatments.

Services will be private in respect of the family's wishes, Mr. Banoff said. The identities of the actress' intimates who will attend the services are unknown. A niece reportedly was at Ms. Garbo's apartment Sunday night.

Known as the "Swedish sphinx" for her avoidance of reporters and insistence on privacy, Ms. Garbo at age 36 retired from a blazing 19-year Hollywood movie career as "the screen's first lady."

For five decades she lived in seclusion, wearing dark glasses and concealing hats for her long walks in Manhattan.

In 1962, she suffered her only reported illness: arthritis. She was said to have undergone cataract surgery in a Barcelona clinic in 1973.

One of her friends, Raymond Daum, director of the film archives at the University of Texas, said the actress did not like to talk about herself. Yet she enjoyed hearing gossip, such as whether one of her former screen rivals had had her face lifted, he said.

In her death, as in much of her life, Ms. Garbo's cherished privacy builds on the show business axiom: Leave them wanting more.

#90106d4170 04/16/1990 ~French/German News Agency
NEW DELHI (APRIL 16) - Prime Minister Vishwanath Pratap Singh met here Monday with senior army, air force and naval officers and called for utmost vigilance on India's borders, officials quoted by the Press Trust of India (PTI) said.

Mr. V.P. Singh, who has repeatedly spoken of the danger of a third war between India and Pakistan over Kashmir, reportedly asked the three branches of the armed forces, including their chiefs, to ensure that India's integrity was protected "at all costs."

The prime minister, who also holds the charge of defense, spent more than two hours at the opening session of a three-day military commanders' biannual conference, addressing and conferring with them, PTI said.

Chief of the army staff General V.N. Sharma assured Mr. V.P. Singh that the Indian army was prepared to "effectively" meet any threat to India's security, the officials quoted by PTI said.

Mr. V.P. Singh has accused Islamabad of aiding Moslem militants fighting to end Indian rule in Kashmir and recently warned Pakistan that it would have to pay a heavy price for "any misadventure" in the disputed northern region.

MOSCOW (APRIL 16) - The bank of Estonia has signed a secret contract with a foreign company to print banknotes for a new currency which it could introduce late this year, the Soviet government newspaper Izvestia reported Monday.

It said that the contract, worth 2.5 million dollars, was authorized by the Estonian Supreme Soviet, or parliament, which voted on March 30 for a phased transition to independence from the Soviet Union.

The notes, bearing the name of the Eesti Kroon -- the Estonian crown, used until 1940, when the independent Baltic states were annexed by the Soviet Union -- would be printed by a foreign firm, "whose name, country and origin have been kept secret", Izvestia said. They should be ready for use around December 24.

Izvestia, quoting the director of the bank, Rein Ostasson, said that as from next year salaries in Estonia would be paid in crowns.

The first issue would consist of notes worth one, two, five, 10, 25 and 100 crowns, he said.

#90106d4450 04/16/1990 ~French/German News Agency

WASHINGTON (APRIL 16) - President George Bush is considering meeting with leaders of other NATO countries in early June after his summit with Soviet

President Mikhail Gorbachev, U.S. officials said Monday.

Such a NATO meeting would give Mr. Bush a chance to brief the Atlantic alliance on the outcome of the superpower summit, to be held May 30 to June 3, probably in Washington, a U.S. official said.

Presidential spokesman Marlin Fitzwater said the future of the North Atlantic Treaty Organization (NATO), modernization of nuclear weapons in Europe, German unification, and the crisis in Lithuania would be on the agenda of such a post-summit NATO meeting.

But he added that so far, there were no firm plans for such a gathering.

Mr. Fitzwater confirmed that Mr. Bush and British Prime Minister Margaret Thatcher had discussed the prospect of a NATO meeting when they met Friday on the island of Bermuda.

"There is a feeling on both sides that there needs to be some kind of consultations," Mr. Fitzwater said.

Mr. Bush said Friday that the question of modernizing nuclear forces in Europe should be decided by the alliance.

Mrs. Thatcher, meanwhile, reiterated her support for such a modernization, including short-range missiles based in West Germany. Bonn now sees those weapons as unnecessary.

A U.S. official speaking on condition of anonymity said Saturday that while the official U.S. position was in favor of modernization, the Bush administration might be willing to reconsider its stance.

#90106d4460 04/16/1990 ~French/German News Agency

LONDON (APRIL 16) - The African National Congress would oppose a visit to South Africa by British Prime Minister Margaret Thatcher until the organization has reached an accord with Pretoria, Nelson Mandela said here Monday.

"We would regret it if Mrs. Thatcher decided to come to South Africa because that would give the wrong signals and we would oppose it," Mr. Mandela said.

Speaking to reporters on the sidelines of a pop concert in his honor here, the 71-year-old deputy president of the anti-apartheid movement said the British government's decision to lift sanctions against Pretoria posed problems for the movement.

"We have serious differences with Mrs. Thatcher as far as sanctions are concerned. We don't agree that sanctions should be relaxed," he said.

In an interview Saturday, Mr. Mandela described Mrs. Thatcher's decision to lift a voluntary ban on new investment in South Africa as "absolutely disastrous."

"It doesn't help and it doesn't contribute to any solution in South Africa and it hardens the attitude of our people against the British government," he said.

Mr. Mandela, who pointedly snubbed an invitation to meet with Mrs. Thatcher during his current two-day stay in Britain, said however that he would like to meet her eventually.

He did not confirm reports that he would return to Britain in May at the start of a tour of world capitals.

#90106d4470 04/16/1990 ~French/German News Agency

WASHINGTON (APRIL 16) - Singapore's Prime Minister designate Goh Chok Tong received a renewed pledge from President George Bush here Monday that lessening East-West tensions would not lead to a U.S. pullback from the Western Pacific.

"The president assures me that the United States has every intention of continuing its presence in the Western Pacific, and we support that," said Mr. Goh, the first deputy prime minister who is due later this year to replace the long-ruling Prime Minister Lee Kuan Yew.

"Events in Europe and the United States budget deficit notwithstanding, the United States is a world power and ... should continue to maintain its global position," he said after his half-hour meeting with the president.

"The United States has invested many years in the area ... don't give up your influence," he said.

Mr. Goh arrived here Sunday and was due to meet Tuesday with Vice President Dan Quayle, Commerce Secretary Robert Mosbacher and Defense Secretary Dick Cheney.

He will also meet with various congressional leaders before leaving for London late Wednesday.

Some in Congress have begun arguing for deep cuts in the U.S. forces in Asia in response to a recent drawdown in the Soviet air and naval presence in the region, but the Bush administration strongly opposes such

reductions.

Singapore Embassy officials said the talks with Mr. Cheney would concern plans for U.S. air and naval forces to begin using base facilities in Singapore as well as the situation in the Philippines and Cambodian peace efforts.

Mr. Goh said he also discussed the Cambodia problem with Mr. Bush.

"We think we are entering the end game of the Cambodian problem," he said. "The question is, do we now become suddenly exhausted and hand the game to the Vietnamese-backed Hun Sen government or to the Khmer Rouges, or do we try and stay in the game to ensure that the non-communist resistance has a chance to win in a fair election," he said.

LONDON (APRIL 17) - Retail sales continued to grow in Britain in March but at a slower pace than during the two previous months, the Confederation of British Industry (CBI) said Tuesday, quoting its monthly survey of member firms.

Sales of foodstuffs were buoyant, but those of consumer durables such as furniture and cars were down, as were sales of books, the report said.

Retailers and wholesalers surveyed by the organization said that they were optimistic about sales during the current month, with 51 percent expecting further growth and only nine percent predicting a slowdown.

#90106d5490 04/16/1990 ~French/German News Agency

MANILA (APRIL 17) - The Philippines' gross international reserves stood at 1.751 billion U.S. dollars in March, up from the previous month but still below desired levels, the Central Bank said here Tuesday.

The reserves rose after the Central Bank intervened at a higher than normal level in the local foreign exchange market last month to bolster the peso against speculation and international pressures, business dailies here said.

The March amount was equivalent to two months of imports, one month below the country's ideal reserve levels.

Gross international reserves, which include gold, special drawing rights, foreign investments and foreign exchange holdings of the Central Bank - stood at 1.621 billion dollars last February and 1.799 billion dollars in

March 1989.

Analysts say that despite the relatively low Central Bank reserve levels, Manila is buffered by the high reserves held by private banks, currently estimated at 3.7 billion dollars.

The Philippine economy is weighed down by a 27 billion dollar foreign debt but has grown by an average of six percent in the past three years. Growth is expected to slow down to about five percent this year.

#90106e0016 04/16/1990 ~Latin America New Agency

LA PAZ (APRIL 16) EFE - Bolivian teachers began an indefinite strike Monday in demand of a 23 percent pay rise and a dlrs 100 bonus payment.

The present monthly salary for teachers in Bolivian cities is 138 bolivianos (dlrs 50).

Only teachers in the cities went on strike Monday, with rural educators due to walk out Thursday.

Education Ministry spokesman Renato Rodriguez declared the strike illegal, adding that the teachers had stopped working without having exhausted talks with the government.

The government has offered a 15 percent pay rise and a bonus payment of dlrs 50.

The teachers are pursuing a claim which dates back to November when popular support for a hunger strike by the teachers led to President Jaime Paz Zamora declaring a state of seige and imposing curfews on Bolivia's major cities.

Rodriguez ruled out the possibility of a repetition of last November's violence, declaring that, "In November the teachers' objective wasn't simply a pay rise but to bring down the 'fascist government'. This time it is different and we will all be looking for a compromise."

#90106p2632 04/16/1990 ~PR Newswire

ATLANTA (APRIL 16) PR NEWSWIRE - American Express Vacations will maintain its policy of guaranteeing land rates against foreign currency exchange rate fluctuations on its European vacations, despite the fact that major tour operators to Europe have added currency surcharges and made across-the-board package rate increases.

"We made a commitment at the beginning of the year to guarantee our land prices against rate increases through March 1991, regardless of the value of the dollar in Europe," said Arthur A. Kienle, vice president, travel products management, American Express Vacations. "Not only are we guaranteeing prices, but most of our prices for 1990 are the same as they were for 1989.

"Many wholesalers have been adding surcharges or raising their rates, some by as much as 7 percent. There are no hidden costs in an American Express Vacation," said Kienle.

All 1990 land prices for American Express Vacations -- not just to Europe -- are unconditionally guaranteed against frequent changes in the value of foreign currency against the U.S. dollar. However, the guaranteed prices in Europe provide a greater consumer protection, since foreign currency exchange rates throughout Europe are subject to greater fluctuation.

American Express Vacations offers more than 90 independent and escorted itineraries to Europe. This includes a series of flexible, "Go-Any-Day" departures on Great City packages to 27 of the continent's most popular urban centers. Land prices range from $129 to $2,689 per person, based on double occupancy.. Airfare is additional.

For more information and reservations, contact a local travel agent. American Express Vacations is a unit of American Express Travel Related Services Company, Inc., a family of travel, financial, insurance and communications businesses, and a wholly owned subsidiary of the American Express Company.

CONTACT: Janet Algers of American Express Vacations, 404-368-5139, or Claire Mangers of M. Silver Associates, 212-704-2020, for American Express Vacations.

#90106p2662 04/16/1990 ~PR Newswire

CLEVELAND (APRIL 16) PR NEWSWIRE - First National Supermarkets, Inc. today announced their "Nearest Recycling Location" program. Consumers may call First National Supermarket's Consumer Center for the location of the nearest neighborhood recycling center. Resource guides are also available at the customer service desk of Pick-N-Pay and Finast supermarkets. Head cashiers and office personnel help customers look up individual recycling locations by using a guide published by the Cuyahoga County Planning Commission.

Every customer who requests information on their Nearest Recycling Center is given an Earth Day Pledge sheet and a free car litter bag. More than 10,000 litter bags have been donated by the Cuyahoga County Planning Commission. Car litter bags will also be given to Finast and Pick-N-Pay customers at checkout stands starting April 18.

Noted William C. Holsworth, president of the Ohio division of First National Supermarkets, "We are finding that many of our supermarkets are located within a mile or two of neighborhood recycling centers. The recycling centers are springing up so quickly that people don't know about them. With the help of the Cuyahoga County Planning Commission, we have put together an information program that will truly help the recycling movement. We are committed to advertising volunteer and municipally based recycling programs via our newspaper ads, posters and PA announcements as long as there is a need."

In 1989, First National Supermarkets recycled thousands of wooden pallets, 40 million pounds of cardboard boxes and thousands of pounds of trimmings from store meat departments. Computer paper and aluminum are also

recycled at First National Supermarkets' headquarters.

Noted Holsworth in other comments, "We started a comprehensive energy conservation and management program at the beginning of this year as part of our commitment to saving energy, our second highest cost of doing business."

First National Supermarkets has advertised Earth Day activities and events via their weekly newspaper ad, store posters and PA announcements twice per hour in all Finast and Pick-N-Pay supermarkets during the month of April.

First National Supermarkets operates 30 Finast, 16 Pick-N-Pay and one Edwards supermarket in northeastern Ohio.

SAN FRANCISCO (APRIL 16) PR NEWSWIRE - Rakesh K. Kaul has been promoted to senior vice president, corporate strategy and finance for Shaklee Corp. This position consolidates the chief financial officer function with the planning function. Reporting to Kaul will be Corporate Accounting, Treasury, Tax and the Corporate Development and Planning functions.

Kaul joined Shaklee in July 1987 as vice president, corporate development and planning. In 1987 he was promoted to senior vice president, corporate development and planning. He played a leading role in Shaklee's successful acquisition of Armstrong Roses and significant stock interest in Smith & Hawken.

Previously, Kaul worked for Beatrice/Hunt-Wesson Inc. for 11 years. From 1986-1987 he was their director of corporate development.

Kaul holds a MBA from the University of Chicago and a MS degree from Brown University. He is presently a member of the board of directors for Smith & Hawken, chairs the Long Range Planning Committee for the Direct Selling Association and is executive vice-chairman of the Bay Area United Way 1990 Campaign.

COSTA MESA, CA (APRIL 16) PR NEWSWIRE - Parker Automotive has appointed

Summa Engineering Construction Company Ltd. (Summa) exclusive distributor of CarbonClean products in Nigeria and in all other economic countries of West Africa. Summa, headquartered in Lagos, Nigeria, is the overseas agent for General Pacific Industries Inc. of Los Angeles.

During the term of this five-year agreement, Summa will market Parker's CarbonClean products to their fleet vehicle and dealer service customers. Anticipated annual minimum purchases of the CarbonClean products by the distributor are approximately (U.S.) $1,000,000. The agreement is renewable, assuming quotas are met.

CarbonClean is a patented system that cleans harmful pollutants from the fuel systems of internal combustion engines. In addition to greatly reducing emissions, the cleaning process improves fuel economy (gasoline or diesel), and restores engine performance. Also, purging the contaminants from the fuel system with CarbonClean has proven to prolong the life of sensitive engine components.

Kanu C. Obioha, chief executive officer for Summa, said, "We view CarbonClean as a way to reduce the cost of repair and replacement parts in the Nigerian automotive and trucking industries, because it extends the engine life of both passenger and fleet vehicles." Obioha continued, "The other benefits of the CarbonClean system, such as emissions reduction, are also very important. The Nigerian government is now in the initial stages of addressing the commonly shared problem of air pollution, and distribution of the CarbonClean product will undoubtedly be recognized as affirmative action by our company."

Parker Automotive Corp. has recently announced a number of similar agreements for international distribution of CarbonClean Products. Michael E. Parker, president and chief executive officer of Parker Automotive, commented, "To this point, virtually all of the foreign interest in CarbonClean has surrounded its proficiency in improving exhaust emissions. Domestically, and now in West Africa, the product's other utilities, such as restoration of fuel economy and performance are gaining notoriety."

CarbonClean is currently distributed in some 53 countries. Domestically, CarbonClean products are approved, and in some cases marketed by Exxon, Chevron, ARCO, Gulf, Snap-on Tools, Nissan, Toyota, Hyundai and numerous other prominent firms. Parker Automotive is headquartered in Costa Mesa. Manufacturing facilities are in Fountain Valley, Calif., and regional sales offices are maintained worldwide.

#90106p2667 04/16/1990 ~PR Newswire

COSTA MESA, CA (APRIL 16) PR NEWSWIRE - Parker Automotive Corp. (OTC) today announced that management has signed an agreement to acquire certain assets of Intertech Inc. of Houston.

Among other things, Parker Automotive will purchase the inventory, machinery, plans and formulas, customer lists, distribution contracts and trademarks from Intertech by May 11, 1990.

Parker Automotive is a leader in the flushing technology used to clean fuel systems and other components in all types of internal combustion engines. Parker's products, trademarked CarbonClean, are currently distributed in 53 countries around the world.

Intertech manufactures a competing line of products called CarbonZapp, and distributes them in two European countries, one Asian country and in the United States.

Michael E. Parker, president and chief executive officer of Parker Automotive Corp., said, "All of Intertech's distributors will have the opportunity to become involved in the distribution of CarbonClean, and Intertech users will be presented with the opportunity of trading up to the CarbonClean System." Parker went on to say that he expects the Intertech product line to be phased out over the next year, but certain Intertech employees may remain with Parker Automotive.

Discussions concerning the acquisition began after Parker Automotive notified Intertech officials of their belief that the sale of CarbonZapp products was an infringement on patents held by Parker. Negotiations were concluded in short order, without the necessity of any further action by Parker. The payment terms of the agreement were not disclosed.

In closing, Parker noted, "We are happy to have resolved these issues amicably, and are delighted to acquire the customers and cooperation of Intertech. Our strategy is to be the world leader in flushing systems for internal combustion engines, and resolution of these issues with Intertech avoids distracting and expensive litigation, allowing us to focus on that goal."

Parker Automotive Corp. is headquartered in Costa Mesa. Manufacturing facilities are in Fountain Valley, Calif., and regional sales offices are maintained throughout the world.

#90106p2669 04/16/1990 ~PR Newswire

ARMONK, NY (APRIL 16) PR NEWSWIRE - IBM (NYSE: IBM) today reported

worldwide financial results for the first quarter of 1990. For the quarter, IBM shipments, revenue and earnings exceeded those of a year ago.

For the first quarter of 1990, worldwide revenue was $14.2 billion, up 11.4 percent from the prior year's $12.7 billion. Earnings-per-share were $1.81 in 1990 compared with $1.61 in 1989, a 12.4 percent increase. Worldwide net earnings for the three months were $1.0 billion in 1990 compared with $.95 billion in 1989. The after-tax margin was 7.3 percent compared with 7.5 percent in 1989. The average number of shares outstanding for the period was 574.2 million in 1990 and 588.4 million in 1989.

Examples of first-quarter additions to IBM's product offerings include:

-- RISC System/6000, a series of nine high-performance workstations and servers that offer power and solutions to scientists, engineers, designers and other professionals;

-- Three entry-level models of the AS/400, providing small and medium-sized businesses with low-cost systems that feature improved performance and storage capacity;

-- The ImagePlus High-Performance Transaction Processing System, designed to help financial institutions deal with growing volumes of checks.

IBM also continues to maintain its technology leadership through a combination of internal investments and selected partnerships with other companies. First-quarter examples include:

-- Fabrication of the world's first 16 million bit memory chip on an existing manufacturing line at IBM's facility in Essex Junction, Vt.;

-- An agreement with Siemens AG to jointly develop 64 million bit memory chips;

-- Investment in a former Perkin-Elmer division, now ETEC, Inc., that produces electron-beam lithography equipment for the semiconductor industry;

-- An alliance with Motorola that will offer the nation's first commercial service for communicating with computers via radio waves.

#90106p2681 04/16/1990 ~PR Newswire

SANTA ANA, CA (APRIL 16) PR NEWSWIRE - Ingram Micro D announced the formation of a new Windows and Presentation Manager Division (WPM D),

effective April 16, to address the growth in the Windows and Presentation Manager operating environments.

Windows and Presentation Manager Division will take its place alongside Ingram Micro D's other established operating divisions: General Distribution; International/Export; Technical Products Division (TPD); and the Macintosh Division (MAC D). The new division is being launched using the same sucessful formula that has proved itself effective in the creation of the other divisions.

The division's charter is to assume responsibility for the aggressive sales and marketing of applications operating under both Windows and Presentation Manager OS/2. Resellers will be able to look to Ingram Micro D as the comprehensive, single-source supplier of applications for these operating environments. Developers will see a broadening of channel opportunities, which will open the door a little wider for their products. As the impact of Windows 3.0 as an operating environment accelerates, creating strong currents in the channel for both Windows and PM OS/2, Ingram Micro D will increase its manpower and resource commitments to the new division to keep pace.

The establishment of the new division is being built around a nucleus of four key people who, as the division's initial core staff, will assume the role of a Windows/Presentation Manager OS/2 product focus group. In this role, the division staff will immediately begin concentrating elements of Ingram Micro D's formidable resources and market presence to support the growth of the Windows 3.0 and Presentation Manager OS/2 operating environments.

The staff for the Windows and Presentation Manager Division has been carefully selected from existing departments within the company. Heading WPM D as its general manager is Susan Salay, presently the Ingram Micro D director of marketing management. Salay has been with Ingram Micro D four years and altogether has 12 years of experience in the microcomputer industry.

Ingram Micro D Inc. is one of the world's largest distributors of microcomputer products, marketing and distributing more than 6,000 products from over 500 of the world's top hardware manufacturers and software developers. It serves as a wholesale distributor to over 40,000 reseller customers in the United States, Canada and Europe. Ingram Micro D Inc. operates two international subsidiaries, Ingram Micro D Ltd. of Canada and Ingram Softeurop of Belgium. The company is headquartered in Santa Ana, Calif., and achieved sales in excess of $1 billion in 1989.

CONTACT: David R. Dukes, Bruce Fredrickson or Susan Salay, all of Ingram Micro D, 714-540-4781.

#90106p2685 04/16/1990 ~PR Newswire
CARMEL, CA (APRIL 16) PR NEWSWIRE - Landmark Land Company, Inc. (Landmark) (AMEX: LML), of Carmel, announced today that its subsidiary Oak Tree Savings Bank, S.S.B. (Oak Tree) has entered into an agreement for the sale of a substantial portion of its golf, tennis and large tract development divisions to Barry G. Hon, a major southern California real estate developer, for a total sales price of approximately $967 million. As hereinafter described, the transaction consists of two phases. The closing of the first phase, if consummated, would generate a pre-tax gross profit of approximately $270 million during the second quarter of 1990 (which includes the previously announced $28 million profit on Carmel Valley Ranch). The second closing, if consummated, would generate a pre-tax gross profit of approximately $200 million on or before the second quarter of 1991. These sales are part of the ongoing efforts by Landmark and Oak Tree to comply with the recently enacted requirements of the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA). These sales, on consummation, would increase Oak Tree's net worth by approximately $400 million, which should, Landmark believes, satisfy all FIRREA capital requirements for the foreseeable future.

Specifically, the agreement provides that Hon shall purchase, during the second quarter of 1990, Landmark's Oak Valley, Oak Summit, Greenspot and

Moreno Valley Ranch developments, together with the Carmel Valley Ranch golf and tennis resort (which is currently subject to a previously announced sales agreement) for a sales price of approximately $497 million of which Landmark will finance approximately 79 percent. The agreement further provides the Hon shall have the right to purchase a substantial portion of Landmark's remaining golf and resort divisions, together with other miscellaneous properties, at any time prior to the end of the second quarter of 1991. These divisions operate properties at Kiawah Island, S.C.; West Palm Beach, Fla.; and Riverside and Placer Counties, Calif. The sales price for these assets will be approximately $470 million, of which Landmark will finance approximately 76 percent.

The closing of each of the sales is subject to certain regulatory approvals and a number of other conditions. Accordingly, there can be no assurance that either or both of the sales will be consummated. Some of these conditions include Hon's due diligence review of, and satisfaction with regard to the financial return on, the assets involved, as well as the finalization of a number of schedules ancillary to the closings.

#90106p2686 04/16/1990 ~PR Newswire

BIRMINGHAM, AL (APRIL 16) PR NEWSWIRE - Torchmark Corporation (NYSE: TMK) reported today that it has commenced soliciting proxies for a slate of five independent nominees at American General Corporation's annual meeting scheduled for May 2, 1990.

The solicitation for directors was approved by a three judge panel of the Fifth Circuit Court of Appeals, which, on April 12, stayed a preliminary injunction prohibiting Torchmark from soliciting proxies for the independent nominees.

Torchmark said that it mailed supplemental proxy materials to American General shareholders over the weekend. Proxy materials had initially been sent to American General shareholders soliciting their support for a non-binding resolution that calls on American General's board of directors to promptly seek a sale or merger of American General.

The independent nominees, when elected, will be committed to independently assessing whether or not a merger or sale of American General would be in the shareholders' best interests. If the board determines to pursue a sale or business combination, the independent nominees are committed to seeking the most advantageous transaction for American General shareholders, and to fairly and impartially evaluating all acquisition

proposals, whether or not they are made by Torchmark.

The nominees on the slate proposed by Torchmark are Robert H. Allen, age 62, of Houston, chairman of the board and chief executive officer of Realm Resources, Inc. and former chairman and chief executive officer of Gulf Resources & Chemical Corporation; David A. Finley, 67, of Bedford Hills, N.Y., former president of IBM Credit Corporation and former treasurer of International Business Machines Corporation; C. Roderick O'Neil, 69, of Hartford, Conn., former chief investment officer of Travelers Insurance Company and former chairman of Travelers' Finance Committee; Clive Runnells, 64, of Houston, private investor; and John H. Young, 46, of Houston, president of John H. Young, Inc., and president of Jefferson Pipeline Company. None of the nominees is affiliated in any way with Torchmark.

Torchmark said that the non-binding resolution calls on American General's board of directors to promptly seek a sale or merger of American General by hiring an investment banking firm to solicit offers to acquire the company and appointing a committee of independent directors to evaluate all acquisition proposals.

CONTACT: William T. Graves of Torchmark Corporation, 205-325-4251, or Andrew R. Baer or Mary T. Conway of Kekst and Company, 212-593-2655, for Torchmark.

WOBURN, MA (APRIL 16) PR NEWSWIRE - Thermo Cardiosystems Inc. (ASE: TCA) today announced that its board of directors has declared a 5-for-4 stock split in the form of a 25 percent stock dividend, payable on May 7, 1990, to shareholders of record as of April 26, 1990. Results for all prior periods will be restated to reflect the stock dividend, which will increase the number of Thermo Cardiosystems shares outstanding to

approximately 8.6 million.

Thermo Cardiosystems Inc. is a leader in research and development of implantable ventricular-assist devices. These devices are designed to perform substantially all or part of the pumping function of the left ventricle of the natural heart for patients suffering from cardiovascular disease. Thermo Cardiosystems is a public subsidiary of Thermedics Inc. (AMEX: TMD) and Thermo Electron Corporation (NYSE: TMO).

KALAMAZOO, MI (APRIL 16) PR NEWSWIRE - The Upjohn Company (NYSE: UPJ) today reported that 1990 first-quarter earnings from continuing operations of $114 million increased 10 percent over first- quarter 1989 levels on sales of $773 million, which rose 4 percent.

Primary earnings per share of 61 cents were 9 percent higher than the 56 cents per share earned in first-quarter 1989. Net earnings grew more than primary earnings per share as a net result of the implementation of an Employee Stock Ownership Plan, which was partially offset by the repurchase of common stock.

Operating income of $173 million was up 14 percent from the first quarter of 1989 and amounted to 22 percent of sales, compared to $152 million, or 20 percent of sales, a year ago. Marketing and administrative costs declined to 36 percent of sales compared to 37 percent in 1989. As a percent of sales, cost of products and services sold remained at 29 percent, and research and development expense declined slightly.

Earnings before tax of $171 million were 11 percent greater than the $155 million earned in first-quarter 1989.

The growth in operating income exceeded that of earnings before tax because of foreign exchange. Pretax foreign exchange losses in first-quarter 1990 were $1.6 million, compared with a gain of $6.8 million in 1989.

The Upjohn Company is a worldwide, research-based provider of human health care products and services, animal health products, agronomic and vegetable seeds and specialty chemicals. Headquartered in Kalamazoo, the company has been dedicated to improving health and nutrition for more than a century.

CHICAGO (APRIL 16) PR NEWSWIRE - VMS Mortgage Investment Fund (NYSE: VMG) today reported a net loss for the year ended Dec. 31, 1989 of $(109,242,375), or $(2.75) per share, including the effects of an establishment of a provision for loan losses, of $151,170,807, compared with net income of $9,550,292 or $.73 per share for the year ended Dec. 31 1988.

For the fourth quarter ended Dec. 31, 1989, net loss, including a provision for loan losses, was $(140,342,474), or $(3.53) per share, vs. net income of $6,243,749, or $.30 per share, for the quarter ended Dec. 31 1988.

The book value at Dec. 31, 1989 was $4.67 per share after giving affect to the reserve for loan losses.

Leonard G. Levine, president of the fund, said, "The reserve for loan losses was established in conjunction with the regular year-end audit and is independent of the ongoing study being undertaken by Coopers & Lybrand on the independent directors' behalf. The reserve for loan losses, calculated in accordance with generally accepted accounting principles, does not reflect any value which may be derived from guarantees provided by VMS Realty Partners.

"The reserves established to date are based on estimates, and ultimate losses may vary (either increase or decrease) from current estimates. Nonetheless, the independent board of directors, consistent with its Principal Recovery Plan, will continue to seek to realize the maximum amount possible in connection with its mortgage loans, including any value relating to guarantees provided by VMS and its affiliates under various mortgage loan guarantees."

"The Coopers & Lybrand study is proceeding on schedule," Levine continued. "The board of directors will report on a distribution policy for the fund as soon as it receives and reviews the data generated by the study and makes its decision."

CHICAGO (APRIL 16) PR NEWSWIRE - VMS Short Term Income Trust (AMEX: VST) today reported a net loss for the year ended Dec. 31, 1989, of $(2,731,076) or $(.39) per share, including the effects of an

establishment of a provision for loan losses of $9,377,139, compared with net income of $7,896,005 or $1.14 per share for the year ended Dec. 31, 1988.

For the fourth quarter ended Dec. 31, 1989, net loss, including a provision for loan losses, was $(7,569,505) or $(1.09) per share, vs. net income of $2,018,724 or $.29 per share for the quarter ended Dec. 31, 1988.

The book value at Dec. 31, 1989, was $7.56 per share after giving effect to the reserve for loan losses.

Leonard G. Levine, president of the Fund, said, "The reserve for loan losses was established in conjunction with the regular year-end audit and is independent of the ongoing study being undertaken by Coopers & Lybrand on the independent directors' behalf. The reserve for loan losses, calculated in accordance with generally accepted accounting principles, does not reflect any value which may be derived from guarantees provided by VMS Realty Partners.

The reserves established to date are based on estimates, and ultimate losses may vary (either increase or decrease) from current estimates. Nonetheless, the independent board of directors, consistent with its Principal Recovery Plan, will continue to seek to realize the maximum amount possible in connection with its mortgage loans, including any value relating to guarantees provided by VMS and its affiliates under various mortgage loan guarantees.

"The Coopers & Lybrand study is proceeding on schedule," Levine continued. "The board of directors will report on a distribution policy for the Fund as soon as it receives and reviews the data generated by the study and makes its decision."

DALLAS (APRIL 16) PR NEWSWIRE - BSN Corp. (AMEX: BSN) today announced that it expects to file a registration statement with the Securities and Exchange Commission later this month for an underwritten common stock offering for Sport Supply Group, Inc., its Sports Catalog division for an estimated $25-$30 million.

The underwriting will be managed by a nationally recognized investment banking firm. BSN would retain voting control over Sport Supply Group subsequent to the offering.

The company stated that "it anticipates the offering taking place in June. The proceeds from the offering will be used to reduce BSN's outstanding bank debt and expand the working capital of Sport Supply Group."

Michael J. Blumenfeld, BSN's president stated that "BSN would entertain additional public offerings for other business segments as soon as practical after the consummation of this initial offering with the final goal being the elimination of most of all of BSN's senior bank debt, the expansion of the working capital structure of each segment and the funding of a series of cash dividends to BSN shareholders."

MILWAUKEE (APRIL 16) PR NEWSWIRE - Universal Foods Corporation (NYSE: UFC) today announced increased revenues, earnings and earnings per share for the second quarter of fiscal 1990 ended March 31.

Revenues of $219,729,000 were up 9 percent from the $201,617,000 reported a year ago.

Net earnings, at $10,015,000, reflected a 19 percent increase over net earnings of $8,392,000 for the second quarter of fiscal 1989. Earnings per share were up 18 percent to 40 cents from 34 cents in the prior year.

For the six months ended March 31, revenues were $444,055,000 compared with $389,307,000 for the first half of 1989. Net earnings increased 22 percent to $23,369,000 from the $19,240,000 reported a year ago. Earnings per share of 93 cents were up 19 percent from the 78 cents posted for the same period last year.

Guy A. Osborn, president and chief executive officer, commented, "The very fine financial results Universal Foods continues to generate are attributable to the on-going strong demand for our value-added products and our emphasis on positioning the company's divisions in high growth, high return businesses.

"In particular, our frozen potato and dehydrated products plants are operating essentially at capacity. The other parts of our business are also performing well, with most divisions recording market share improvements. We are confident that our shareholders will see a strong increase in earnings during fiscal 1990."

Universal Foods is an international manufacturer and marketer of value-added food products. These include food flavors, food colors, the world's most diversified lines of frozen potato and yeast products, and

dehydrated vegetables.

#90106p2733 04/16/1990 ~PR Newswire

COLUMBUS, OH (APRIL 16) PR NEWSWIRE - Banc One Corporation (NYSE: ONE) reported record first quarter earnings of $101.8 million or $.70 per share. Earnings per share grew 16.7 percent over 1989 first quarter earnings of $.60.

Banc One's net income was 10 percent above the previous record high of $92.6 million in the fourth quarter of 1989. Banc One's results now include its share of the net income of Bank One, Texas. Per share data for last year has been restated to reflect the 10 percent stock dividend paid to shareholders on March 2, 1990.

Bank One, Texas contributed $10.7 million to the corporation's net income. This reflects first quarter operations of the former Deposit Insurance Bridge Bank of Dallas. Banc One's initial equity investment in Bank One, Texas was effective Jan. 1, 1990.

Bank One, Texas' results also include operations of the former Bright Banc Savings Association, Dallas, Texas, from Feb. 2, 1990, when certain of its assets and liabilities were acquired from the Resolution Trust Corporation. The earnings of Bank One, Texas are net of allocations to the Federal Deposit Insurance Corporation for its ownership of the Class B and C shares, and deferred taxes on imputed dividends to Banc One.

Banc One currently has a total equity investment of $247 million in Bank One, Texas which reported total assets as of March 31, 1990 of $14 billion including $2.4 billion of assets in the special collection pool.

John B. McCoy, chairman and chief executive officer of Banc One, said, "We are pleased with first quarter results, especially the earnings contribution from Bank One, Texas."

McCoy noted that continued strong retail loan demand and core deposit growth favorably impacted the corporation's net interest margin. Banc One reported a net interest margin of 5.43 percent in the first quarter, up from 4.94 percent from the previous quarter.

At the end of the first quarter, Banc One's non-performing assets were 1.50 percent of total loans or $277 million. This represents an increase of 7.3 percent over year-end non-performing loans totaling $259 million. Other credit quality measures showed little change from the prior quarter. Loans delinquent more than 90 days were .43 percent of loans, compared to .45 percent at year end. Annualized net charge- offs were 1.05 percent of average loans compared to 1.07 percent in the fourth quarter of 1989.

During the first quarter, Metropolitan Bancorp, Inc. of Lima, Ohio officially joined Banc One Corporation through a merger of its two banks with Bank One, Lima, which now has assets of $412 million.

Banc One Corporation has assets of $27.2 billion, not including Bank One, Texas, and common equity of $2.34 billion as of March 31, 1990. Banc One Corporation now operates banking organizations in Indiana, Kentucky, Michigan, Ohio, Wisconsin and Texas with 670 offices.

HOUSTON (APRIL 16) PR NEWSWIRE - Pride Petroleum Services, Inc.'s (NASDAQ: PRDE) Chief Financial Officer, Eugene C. Fowler, said that the company holds $7.7 million in Mortgage & Realty Trust (MRT) commercial paper, which was rated A-2 at the time of purchase. MRT on Thursday, April 12 filed for reorganization under Chapter XI of the U.S. bankruptcy code.

In a public announcement on Thursday, MRT stated that the trust continues to produce income and that the trustees believe there will be sufficient income and assets to properly satisfy all creditors.

Fowler said, "We are hopeful that MRT's liquidity will be quickly restored so that the commercial paper will be paid. Pride will closely monitor the situation and take whatever action is required, if any, to protect the interests of its shareholders."

Fowler added, "Pride has a strong balance sheet which, at the end of the first quarter on March 31, 1990, included cash and cash equivalents (including the MRT commercial paper) of approximately $18 million and less than $120,000 in long term debt."

GREENWICH, CT (APRIL 16) PR NEWSWIRE - Under a cooperative arrangement with the Alaska International Airport System (A.I.A.S.), United Parcel Service (UPS), the world's largest package delivery company, will lease undeveloped land at Anchorage International Airport to build a cargo handling facility, it was announced today.

Anchorage currently is the UPS distribution hub for all service to Alaska, as well as for UPS international service to Hong Kong, Seoul and the

Pacific Rim. UPS is the only carrier providing door-to-door service to every address in Alaska.

The $3.5 million expansion will include a new 30,000-square-foot building on a 6.3-acre site. In addition to housing cargo operations, the facility will support ground handling, aircraft maintenance and flight operations.

According to Richard Oehme, vice president for UPS air operations, the construction was necessary to meet the needs of growing cargo and package volume and aircraft operations, and to support the company's commitment to Alaskan service.

"The new facility will have the design flexibility to adapt to future growth as a package center and also will enable UPS to accommodate increased growth from a proposed Japan all-cargo route expansion," Oehme said.

In addition to annual lease payments of $16,000 for the currently unused land, the Anchorage airport will receive added revenues from increased landing fees. If UPS receives the Japan route authority, revenue to the airport is projected to increase by more than $350,000 per year.

Bids are currently being solicited from Alaskan contractors for the project, with construction expected to be completed in October.

In another agreement, UPS is providing engineering and design support to A.I.A.S. for a $9 million project currently underway that will increase aircraft parking space and extend the airport's fuel system.

The new apron area will be able to accommodate six aircraft pads, including positions large enough to park Boeing 747 and other aircraft. To meet its sort and delivery timetable, UPS will lease four spaces, with the remaining two pads available for common use among all carriers at the airport.

UPS, based in Greenwich, Conn., is a worldwide company serving all 50 states and more than 180 countries and territories. With a volume of 2.8 billion packages and documents in 1989, and revenue of more than $12 billion, UPS is the largest package delivery company in the world.

SAVANNAH, GA (APRIL 16) PR NEWSWIRE - Helen L. Newman has been appointed

vice president-government relations, Gulfstream Aerospace Corp. by the company's Chairman and CEO, Allen E. Paulson.

Newman returns to Gulfstream after a four-year leave of absence during which she lived in the Federal Republic of Germany. Her husband served as the U.S. Army's Assistant Commander of the Third Armored Division and Commander-Giessen Military Community.

As Gulfstream's director, Washington operations, from 1981 through 1986, Newman established the company's first office in the capital city.

"Helen Newman established our Congressional Relations Program," Paulson said. "Her work was a key ingredient in our first sales of Gulfstream IIIs (USAF C-20 series) to the U.S. Air Force. We're pleased and fortunate to have her rejoin Gulfstream as part of our company's management."

Prior to Newman's return to Gulfstream, she served, in 1989, as a consultant on German-American relations for the Embassy of the Federal Republic of Germany, Washington, D.C.

Gulfstream Aerospace Corporation is the world's leading producer of large, twin engine aircraft for business and government operations. There are, currently, over 120 Gulfstream aircraft operating for 32 governments of the world. Certified as the world's fastest civil jet, the Gulfstream IV holds international speed records for its record flights west- and east-bound around the world.

ROWAYTON, CT (APRIL 16) PR NEWSWIRE - Baldwin Technology Company, Inc. (AMEX: BLD), today announced that it had entered into an agreement with the Dyson-Kissner-Moran Corporation to purchase all of the outstanding capital stock of Misomex of North America, Inc., and Misomex AB (Sweden) for a cash purchase price of $44,000,000. DKM will be entitled to receive certain distributions prior to the closing and will retain certain assets. The consummation of the transaction is subject to the satisfaction of various conditions, including approval of governmental authorities in Sweden and compliance, if necessary, with the Hart-Scott-Rodino Antitrust Improvements Act.

Misomex is a manufacturer of image imposition, step and repeat, automatic mask cutting and other pre-press equipment for the printing industries. During its fiscal year ended Dec. 31, 1989 (Jan. 31, 1990, in the case of Misomex N.A.), Misomex had net sales in excess of $40 million and net

income in excess of $4 million. Baldwin stated that this acquisition will expand its current product lines to include "pre-press" equipment, a market area not previously covered by the company.

Baldwin Technology Company, Inc., is a leading multi-national manufacturer of materials handling, accessory and control equipment for the printing industry. For the six months ended Dec. 31, 1989, Baldwin had net sales of $83.4 million and net income of $5.3 million.

OAKLAND, CA (APRIL 16) PR NEWSWIRE - ECI Environmental, Inc. (AMEX: ECI) today reported results for the six months and quarter ended Feb. 28, 1990.

Revenues for the six months ended Feb. 28, 1990, were $12,504,000, an increase of 56 percent over the $8,001,000 reported for the comparable six-month period of the prior year. Net income for the period was $514,000 or 13 cents per share, in comparison to the $255,000 or 7 cents per share reported for the first six months of fiscal 1989.

For the three months ended Feb. 28, revenues were $5,974,000, a 43 percent increase over the $4,176,000 reported for the first three months of the prior year. Net income for the quarter was $108,000 or 2 cents per share compared to $247,000 or 7 cents per share earned in the same period of fiscal 1989.

In discussing the results, Kurt Zimmerman, president and CEO, said, "The second quarter is traditionally our weakest period, due to the impact of the holiday season on gross profit margins throughout the construction industry. At the same time, we face a difficult comparison to last year, as during that period we commenced work on the largest job in our history, resulting in the highest gross profit margins ever recorded for the second quarter. A third factor is the addition of 1.1 million shares, a result of our initial public offering completed on Nov. 21, 1989."

He continued, "Currently, our backlog positions are in line with expectations, and both the northern and southern California facilities are maintaining revenue goals. In addition, we recently strengthened our senior management team through a number of key personnel additions, and we look for these individuals to contribute significantly to both marketing efforts and operational controls."

ECI Environmental is one of the largest asbestos abatement specialists in the western United States. The company primarily serves the California commercial market through offices in Oakland and Burbank.

#90106p2761 04/16/1990 ~PR Newswire

BALTIMORE (APRIL 16) PR NEWSWIRE - T. Rowe Price Associates, Inc. (NASDAQ: TROW) announced today that it currently holds $64.6 million of commercial paper and medium-term notes issued by Mortgage and Realty Trust (NYSE: MRT).

MRT, a real estate investment trust which invests primarily in mortgages secured by commercial real estate, filed a petition for reorganization under Chapter 11 of the Federal Bankruptcy Code on April 12, 1990, in California.

The bankruptcy filing was unexpected since MRT announced on March 30, 1990 that it had reached a preliminary understanding with a group of institutional lenders, including T. Rowe Price, for a new $425 million credit facility to enable MRT to pay outstanding principal and accrued interest on debt that had matured or would mature. (The credit facility was being arranged following an unanticipated downgrading of MRT's commercial paper rating on March 12 and the subsequent withdrawal of a back-up line of credit.)

In the April 12 announcement, MRT said its trustees decided to file for bankruptcy reorganization to protect the interests of the trust's equity holders and that the trustees believe there will be sufficient income and assets to properly satisfy all creditors. MRT's bankruptcy petition reflected that it had substantial net worth at Dec. 31, 1989, with total assets of $594 million and total liabilities of $403 million.

Commenting on these developments, George J. Collins, president and chief executive officer of T. Rowe Price, said: "Based on the information publicly disclosed by MRT, it appears that MRT is in a position to pay its creditors in full, including interest. However, the circumstances, including the uncertainties inherent in reorganization proceedings, indicate the likelihood that T. Rowe Price will reduce the carrying value of its MRT securities from the original purchase price. An estimate of any reduction will be made shortly, and it is expected any such charge would have a material impact on the firm's earnings. T. Rowe Price will meet with other MRT creditors this week to determine its initial course of action in response to the reorganization filing.

"T. Rowe Price is extremely disappointed in the action taken by the MRT trustees to file for bankruptcy reorganization," Collins added, "since the latest reported information indicates MRT has a substantial net worth and

since MRT has reached a preliminary understanding regarding the new credit facility."

The MRT debt obligations were acquired by T. Rowe Price during the last month from various portfolios managed by the firm. "As a result of these actions, all T. Rowe Price accounts which held MRT obligations received full payment of principal and interest," Collins said. "These actions were determined to be in the long-term interests of T. Rowe Price Associates, its clients, and its stockholders."

T. Rowe Price Associates serves as investment adviser to 30 T. Rowe Price sponsored no-load mutual funds and to institutional and individual clients. As of Feb. 28, 1990, the firm managed more than $28 billion for over 1.5 million investor accounts.

NEW YORK (APRIL 16) PR NEWSWIRE - The First Australia Prime Income Fund, Inc. (AMEX: FAX) a closed-end bond fund, today declared a regular monthly dividend of 9 cents per share, payable on May 18, 1990 to all shareholders of record on May 7, 1990.

This dividend is consistent with the policy adopted by the fund's board of directors on Oct. 24, 1988 of declaring a regular monthly dividend of 9 cents per share, which commenced in February 1989. Qualifying U.S. taxpayers are additionally entitled to a foreign withholding tax credit on this dividend, and will be informed as to the amount at a later date.

At the time of its offering in April 1986, the First Australia Prime Income Fund was the largest-ever initial public offering on the American Stock Exchange. The fund has net assets in excess of $1 billion. The fund's policy is to invest at least 65 percent of its portfolio in Australian issuers or debt securities rated AA or better. The First Australia Prime Income Fund trades on the American and the Pacific Stock Exchanges. The fund is advised by EquitiLink Australia Limited, the largest independent mutual fund manager in Australia. Devoting itself only to the business of fund management, the EquitiLink Group manages over $1.8 billion on behalf of over 240,000 investors worldwide.

SUNRISE, FL (APRIL 16) PR NEWSWIRE - Jan Bell Marketing, Inc. (AMEX: JBM) announced that its agreement with Sears, Roebuck & Co. to enhance the marketing of fine jewelry for Sears' outlet stores division will be expanded by an additional 38 stores to a total of 79 outlets.

Jan Bell began, last fall, to implement its fine jewelry and watch program in 41 Sears outlet stores, under an initial three-year agreement. "Because of the success in those units, 38 more Sears outlet stores will be added to the program starting in this second quarter," said Rosemary B. Trudeau, vice president finance of Jan Bell.

Jan Bell is a leading provider of fine jewelry to the value- conscious consumer through power-format, turnkey marketing programs to distribution channels that emphasize quality, credibility and consistent value.

PHILADELPHIA (APRIL 16) PR NEWSWIRE - Sun Refining and Marketing Co. will renew its contract with Shadow Traffic Network for three years as sponsor of the Sunoco Traffic Update.

The Sunoco Traffic Update broadcasts traffic reports on 24 radio stations throughout the Delaware Valley. The principal reporter is Walt MacDonald who broadcasts live from the Sunoco Traffic Update helicopter.

The contract signing will take place Tuesday at Sun's facilities in Radnor Pa., at a dinner attended by representatives of the stations that carry Sunoco Traffic Update, representatives of Sun, and the new owners, investors, and board members of Shadow Traffic.

Sunoco has sponsored the traffic reports for the past five years.

In announcing the contract renewal, David E. Knoll, president of Sun Refining and Marketing, said, "We have been delighted with our relationship with Shadow and feel they offer the best services to the Delaware Valley motorists and the best arrangement for a sponsor. We are very pleased to be renewing for another three years."

MacDonald, who in addition to being the principal reporter for Sunoco Traffic Update is a board member and executive vice president of Shadow Traffic, said, "The re-signing of Sunoco Traffic Update is yet another plus for both Shadow Traffic and more importantly to the continuation of Sunoco's commitment to provide the motoring public with the very latest in traffic news."

A. Richard Marks, president and chief executive officer of the Shadow Traffic Network, said, "Renewal of our contract with Sunoco is a happy occasion for us. The coupling of Shadow Traffic with the Sunoco Traffic Update has been a positive force that has been assisting area motorists in contending with traffic problems, and we look forward to a continuation of these valuable services."

The amount of the contract was not disclosed. Sunoco's first branded service station opened in Ardmore, Pa. in 1920. From that single operation has grown a network of nearly 6,000 stations in 27 states.

Bulk Sunoco gasoline became well-known in the 1930s as a high quality, economically-priced product. In the 1950s, Sunoco pioneered the development of the custom blend pump, which precisely blends high- and low-octane gasolines to form a variety of intermediate-octane fuels. At one time, Sunoco sold as many as eight different octane gasolines through the blend pump.

Today consumers can choose from five different unleaded grades, 86-octane Economy; 87-octane Regular; 89-octane Plus; 92-octane Super and 94-octane Ultra, the highest octane fuel available from any major refiner.

Sunoco is a unit of the Sun Refining and Marketing Co., headquartered in Philadelphia, which is a subsidiary of Sun Co. (NYSE: SUN), Inc., of Radnor. Sun, the nation's 11th largest energy company, was founded in 1886.

FINDLAY, OH (APRIL 16) PR NEWSWIRE - Cooper Tire & Rubber Company (NYSE: CTB) reported net sales for the first quarter, ended March 31, increased to $208.6 million versus $195.5 million in the first quarter of 1989. Earnings in the quarter advanced to $13.7 million compared with earnings of $10.3 million a year earlier. On a per share basis net income amounted to 67 cents versus 50 cents per share in the 1989 period.

In announcing the first quarter results, Ivan W. Gorr, board chairman and chief executive officer, stated, "Shipments of our tire products continued at excellent levels during the first quarter. Production from our expanded facilities kept pace with the increased demand. We were able to provide more satisfactory levels of service to our customers.

"Shipments of industrial rubber products slowed reflecting lower original equipment automotive production in North America. By controlling costs, we avoided a negative impact on our earnings. We expect that our shipments of industrial rubber products will be stronger during the balance of the year as new vehicle production picks up.

"With our excellent team performance in this first quarter, we are off to a good start on setting higher levels of sales and earnings for the current year. We are continuing programs to incrementally increase capacity at our plants. Barring any serious economic problems on the national scale, we expect that 1990 will be another year of solid performance by the company."

DALLAS (APRIL 16) PR NEWSWIRE - E-Systems (NYSE: ESY) sales and earnings continued an upward trend, as record highs were set for the first quarter.

Sales at the close of the quarter were $457.8 million vs. 1989 first-quarter sales of $394.9 million.

Net income for the first quarter rose to $21.9 million, or 70 cents a share, compared to net income of $19.1 million, or 61 cents a share, for the same quarter last year.

Bookings of new orders during the first quarter amounted to $325.6 million compared to first-quarter 1989 bookings of $385.2 million. Backlog of unfilled orders at the end of March was $2.373 billion vs. 1989 first quarter ending backlog of $2.235 billion.

"We are pleased with these results which are in accordance with our expectations," said E. Gene Keiffer, chairman and chief executive officer of E-Systems.

E-Systems is a major worldwide developer and producer of defense electronic systems and products in the areas of intelligence, reconnaissance and surveillance systems, command and control, electronic warfare, specialized aircraft maintenance and modification, guidance, navigation and control, communications and data systems.

HOLLYWOOD, FL (APRIL 16) PR NEWSWIRE - Members of Best Western's Gold Crown Club now are entitled to substantial savings and benefits at General Rent-A-Car's 100 corporately owned rental locations nationwide.

Throughout 1990, Gold Crown Club Members can earn valuable Gold Crown Points whenever they rent cars from General. Twenty percent of General's basic rental charges (excluding taxes, fuel and optional travel

protection) will be converted to Gold Crown points at the rate of one point per dollar when the member stays at Best Western. Ten percent will be converted to Gold Crown Points when the member rents from General and is not staying at a Best Western. Gold Crown Points can now be used to pay for car rentals at General.

Gold Crown Club Members are entitled to all the benefits of General's Executive Express Club, including low rates and the use of special Executive Express lanes for faster service upon check-in and return. With a Gold Crown Club Card, there is no charge for additional drivers or for drivers 21-24. Plus, now through April 30, 1990, Gold Crown Club members will receive one car class upgrade at no extra charge upon presentation of a Gold Crown Club card.

General, America's fastest-growing car rental company, has more than tripled its locations since May 1989. The company features low daily and weekly rates and free unlimited mileage.

SIMI VALLEY, CA (APRIL 16) PR NEWSWIRE - Micom Communications Corp.'s Caribe, Puerto Rico manufacturing facility has been chosen as the recipient of the Phillip Crosby Beacon Award for Quality, it was announced by Gil Cabral, president and chief executive officer of the communications systems vendor.

The Beacon Award is the highest honor for participants in the Quality Improvement Process, an internationally recognized quality education series created by Phillip B. Crosby, chairperson of Phillip Crosby and Associates. Micom's Caribe facility became the first company in Puerto Rico to be selected for the award and only the second company in the Spanish Americas Region ever to be so honored.

Commenting on Micom's achievement, Crosby said, "Micom management has made a personal commitment to achieve quality and it shows in their ability to maintain customer satisfaction."

"At Micom, 'quality' is more than just a word, it's a mind-set," said Cabral. "It's the technique of putting the quality process to work in every aspect of the company, from manufacturing to administration. We gratefully accept this award with the knowledge that the quest for quality is a continuing goal. This award shows we're on our way."

Phillip Crosby recently presented the award at a special commemorative

event in Puerto Rico. Crosby noted that the Beacon award goes only to those companies that have shown outstanding achievements in the implementation of quality in the workplace. Past Crosby award recipients include Electronic Data Systems (EDS), Southwestern Bell Co., and General Motors Corp.

Micom Communications Corp., with headquarters in Simi Valley, Calif., is an international supplier of local area network (LAN) and wide area network (WAN) products including twisted-pair based systems, multiplexors, protocol convertors, modems, data/voice integration devices, and fully integrated X.25 networking systems that include a variety of PAD, packet switch, and network management products.

ROCKVILLE, MD (APRIL 16) PR NEWSWIRE - GE Information Services (GEIS) and AT&T (NYSE: T) today announced they have interconnected their electronic messaging services, enabling customers on both networks to exchange electronic messages for the first time.

GEIS' QUIK-COMM System and AT&T Mail have been interconnected using the international X.400 standard for connecting dissimilar messaging systems. This X.400 interconnection is important not only to GEIS and AT&T, but also for the entire electronic messaging industry as it continues to grow. With this X.400 interconnection, large public and private communities of E-Mail users on both networks will now be able to communicate with each other.

X.400 is a set of guidelines for the format, delivery and receipt of electronic messages recommended by the international standards organization, the International Telephone and Telegraph Consultative Committee (CCITT).

AT&T Mail is both a public and private messaging service. It offers a variety of delivery options, including delivery facsimile, telex, U.S. Postal Service or courier.

In February GEIS announced an X.400 interconnection between its QUIK-COMM System and the Western Union EasyLink service. Six other X.400 interconnections to public mail services are currently in operation under pilot conditions with a view to future commercialization.

In addition to the QUIK-COMM X.400 Access Service, GEIS offers a range of interconnections to various other private mail systems, including: IBM

PROFS, IBM DISOSS, DEC ALL-In-1, VMSMail, Wang OFFICE, IBM AS/400, System/3X, 3COM 3+Mail LAN Mail, and Novell CC:Mail Lan Mail.

For further information on QUIK-COMM X.400 Access Service, please call GE Information Services at 1-800-433-3683 or contact your local GEIS sales office.

GE Information Services, a division of General Electric Company, USA (NYSE: GE), is headquartered in Rockville, Md. GEIS is a leading provider of private electronic messaging, EDI (electronic data interchange), and business communications and processing systems via its worldwide teleprocessing network.

SAN ANTONIO, TX (APRIL 16) PR NEWSWIRE - Image Data Corporation today announced that it has filed a registration statement with the Securities and Exchange Commission covering the initial public offering of 1.4 million shares of common stock of the company.

Of the shares of common stock offered, one million shares are being sold by the company and 400,000 by selling shareholders. The company will not receive any net proceeds from the sale of shares being sold by the selling shareholders. The company has also granted the underwriters an option to purchase up to 210,000 shares solely to cover over- allotments.

Ladenburg, Thalmann & Co. Inc. is the lead underwriter of the offering. It is currently estimated that the initial public offering price will be between $5 and $6 per share.

Image Data Corporation develops, integrates and markets still-video image

communications systems used in medical, industrial and governmental applications. Image Data's systems include the Photophone, a video communications system for capturing, transmitting over standard telephone lines and displaying high quality color or gray-scale, still- video images of objects, text or photographs, and the ImageTerminal, an imaging workstation for displaying high-quality images and text retrieved from host databases.

Image Data Corporation intends to use a portion of the net proceeds for retirement of bank debt, to finance potential acquisitions, for working capital and for general corporate purposes.

A registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities law of any such state.

#90106p2829 04/16/1990 ~PR Newswire

BOISE, ID (APRIL 16) PR NEWSWIRE - Boise Cascade Corp. (NYSE: BCC) today reported a significant decline in net income for the first quarter of 1990 compared with record results for the same period a year ago.

Net income for the first quarter of 1990 was $33.6 million, compared with $78.2 million for the same quarter in 1989. Fully diluted earnings per share were 73 cents in the first quarter of 1990, compared with $1.68 for the same quarter a year ago. Sales for the first quarter of 1990 were $1.1 billion, which is essentially flat compared with sales for the first quarter of 1989.

John B. Fery, chairman of the board and chief executive officer, said that the decline in first-quarter income was the result of continuing adverse market conditions for the company's paper business. Fery also said that delivered-log costs for the company's building products segment were higher than those of the same period in 1989, particularly in the Pacific Northwest. Despite the overall decline in net income, Fery noted that the company's office products segment reported record sales and operating income for the first quarter of 1990.

Operating income for the company's paper and paper products segment declined markedly, compared with that of the same period in 1989. The decline was largely due to substantially lower prices and sluggish demand for most of the paper grades manufactured by the company, downtime related to capital projects, and higher costs for wood chips in the Pacific Northwest. The decrease in this segment's operating income from the fourth quarter of 1989 to the first quarter of 1990 was more moderate, as prices declined at a slower rate.

The company's office products business reported record sales and operating income in the first quarter. Compared with the same quarter in 1989, sales increased 12 percent, and operating income increased 16 percent. The results reflect seasonally robust demand for office products, combined with this segment's increased emphasis on operating efficiencies.

Operating income for the company's building products segment was down, compared with that of the first quarter a year ago. While demand remained comparable to that of the first quarter in 1989, delivered-log costs increased moderately. In addition, lumber prices were generally below first quarter 1989 levels. Plywood prices were above year-ago levels but were below the exceptionally high levels that contributed to the strong performance of this segment in the fourth quarter of 1989.

Boise Cascade Corp. is an integrated forest products company headquartered in Boise, Idaho, with operations located primarily in the United States and Canada. The company manufactures and distributes paper and paper products, office products, and building products and owns and manages timberland to support these operations.

#90106p2832 04/16/1990 ~PR Newswire

DIBOLL, TX (APRIL 16) PR NEWSWIRE - Temple-Inland Inc. (NYSE: TIN) today reported that earnings per share for the first quarter of 1990 were $1.12, up over 14 percent from the $.98 per share earned in the first quarter of 1989. Although combined operating earnings were down by $4.4 million to $88.7 million, net income increased by 14 percent to $62.2 million because of a lower tax rate.

Total revenues increased to $591.2 million from $473.5 million in last year's first quarter. The financial results of Guaranty Federal Savings Bank have been consolidated for the first time beginning with this quarter. The company has agreed to sell Great American Reserve Insurance Company, its remaining life insurance business, and the results of these operations are presented as discontinued operations.

The container and containerboard group had operating earnings of $42 million, down from $56.6 million in the first quarter of 1989. Box shipments improved moderately from the same period in 1989, while average selling prices have deteriorated from a year ago. The price deterioration, coupled with increasing costs, caused margins to erode.

Temple-Inland's bleached paperboard group earned a record $31.7 million in the quarter, up from $31.1 million a year ago. Production records were established in each month of the quarter, as production volume averaged more than 1,700 tons per day for the quarter.

The company's building products group earned $3.7 million in the quarter, down from $4.6 million in the first quarter of last year. A continued softness in building activity, as well as unusually wet weather in a number of the company's primary marketing areas, resulted in the decline. Activity in plywood and lumber markets at the end of the quarter indicated some strengthening in these products. Industrial particleboard remained a strong profit contributor.

Temple-Inland Financial Services continued its profit improvement, earning $12.1 million, up from $800,000 in the first quarter of 1989. Guaranty Federal Savings Bank, acquired in 1988, was consolidated for the first time in this quarter and earned $9.2 million of the total for this group.

Clifford Grum, Temple-Inland president and chief executive officer, said, "Markets for all our paper products remain mixed and we will probably experience margin erosion in the remainder of the year. Building products markets appear to be strengthening and we are very encouraged with the turnaround of the financial services group, including the results of Guaranty Federal Savings Bank. We remain optimistic that we can continue to report improved net earnings as the year progresses."

LOS ANGELES (APRIL 16) PR NEWSWIRE - Frederick's of Hollywood Inc. (AMEX: FHO) today announced that its board of directors has declared a three-for-two stock distribution (split-up effected in the form of a stock dividend), payable June 15, 1990, to stockholders of record May 15, 1990. This is the third three-for-two stock distribution since April 1989.

The board also declared a semi-annual cash dividend of $.035 per share on the increased number of shares outstanding, representing a 5 percent increase from the previous semi-annual cash dividend. The cash dividend is payable June 15, 1990, to shareholders of record May 15, 1990.

As a result of the split, each shareholder of record will receive one additional share for every two shares outstanding. This action will increase the total number of shares outstanding to approximately 5,641,000.

George W. Townson, chairman and chief executive officer, stated that the distribution will effect a unit reduction in the per share market price, thereby obtaining wider distribution and greater marketability of the shares.

Currently, the company operates 166 specialty intimate apparel stores in 34 states and a mail-order division serving customers in all 50 states.

CONTACT: George W. Townson or John B. Hatfield of Frederick's of Hollywood Inc., 213-466-5151; or Roger S. Pondel of Rifkind Pondel & Parsons, 213-207-9300, for Frederick's of Hollywood Inc.

#90106p2846 04/16/1990 ~PR Newswire
PITTSBURGH (APRIL 16) PR NEWSWIRE - Alcoa (NYSE: AA) earned $148.6 million, or $1.69 a common share, for the first quarter of 1990.

First quarter 1989 earnings were $276.0 million, or $3.12 a common share.

Sales were $2.6 billion in both the 1990 and 1989 first quarters. Aluminum shipments increased 4 percent to 634,000 metric tons from 611,000 metric tons for the year-ago quarter.

"The deterioration in the economy that began in the third quarter of last year seems to have stopped in the first two months of 1990. Alcoa's order rates in March were better than in recent months," said Paul H. O'Neill, chairman. "Given the softness in the economy, we are pleased by the level of first quarter earnings.

"Our share of earnings from our Brazilian affiliate, Alcoa Aluminio, was at break-even for the 1990 first quarter compared with $36 million in the 1989 first quarter," said O'Neill. "It is our expectation that earnings from Brazil will be negatively affected throughout the year. But we believe the strong measures that are being taken to curb rampant inflation in that country are in the long-term interest of Brazil and our company. The degree of impact is uncertain at this time because there is no precedent for the actions that have been taken."

Alcoa's first quarter 1990 earnings were lower than 1989 first quarter earnings because of the impact of Brazil, a lower level of activity for fabricated products, a shift in product mix to more ingot sales, and lower prices for ingot and some fabricated aluminum products.

Earnings for the 1990 first quarter included unfavorable translation and exchange adjustments of $4.1 million, or five cents a common share, compared with favorable adjustments of $1.2 million, or one cent a common share, in the year-ago quarter.

Alcoa is the world's largest aluminum producer. The company has 152 operating and sales locations in 20 countries, employing 61,000 people.

#90106p2859 04/16/1990 ~PR Newswire
NEW YORK (APRIL 16) PR NEWSWIRE - Mortgage and Realty Trust (MRT) filed for Chapter 11 bankruptcy Thursday after negotiations for new financing fell through.

These negotiations had been ongoing since earlier in 1990, but the trust's management believed the proposed package was overly onerous in light of the trust's current financial profile.

MRT defaulted on medium-term notes in mid-March when it was unable to draw on its bank lines or access the commercial paper market to refinance the notes.

Fitch downgrades MRT's commercial paper to 'D' from 'F-2'. The CP remains on FitchAlert, where it was placed on March 15, with evolving implications. MRT has a strong stated equity position (30 percent of assets) and is only moderately leveraged (2.25:1).

Despite recent deterioration, asset quality remains acceptable, especially when viewed as a percent of equity. Non-performing loans and non-earning repossessed assets represent about 6 percent of invested assets. The trust is facing an extreme liquidity problem, however, as the maturity dates on some loans have been extended and loan prepayments have slowed considerably, resulting in a lack of cash.

MRT has been unable to pay off maturing commercial paper and medium-term notes as a result of the cash shortfall. There is $167 million in commercial paper and $35 million in medium-term notes outstanding. All of the medium-term notes and $110 million of the commercial paper are now past due. The remainder of the commercial paper is due by May 14, 1990.

WASHINGTON (APRIL 16) PR NEWSWIRE - Transportation Secretary Samuel K. Skinner today congratulated the McDonnell Douglas Corporation (NYSE: MD) for the successful launch of a commercial rocket.

The three-stage commercial Delta 6925-8 rocket lifted off Friday evening from Cape Canaveral Air Force Station in Florida. The rocket carried an Indonesian communications satellite, Palapa B2-R. The satellite will provide improved television and telephone signals to the Asian nation and its island neighbors.

"As the U.S. industry enters its second year of commercial launch operations, the Department of Transportation is continuing to develop strategies to ensure long-term growth and vitality in a competitive world commercial launch market," said Skinner.

Stephanie Lee-Miller, director of the Office of Commercial Space

Transportation, noted that the office expects to oversee 10 more commercial launches this year.

On Aug. 27, 1989, McDonnell Douglas launched a communications satellite owned by the British Satellite Broadcasting Company. On Feb. 14, 1990, the company launched a Department of Defense payload.

BETHESDA, MD (APRIL 16) PR NEWSWIRE - Martin Marietta Corporation (NYSE: ML) has received a $20.2 million contract to manufacture 63 advanced mortar systems and 83,000 rounds of ammunition for the U.S. Army Armament, Munitions, and Chemical Command of Rock Island, Ill.

The 120mm mortar system is a smoothbore system with a range of up to 7,200 meters, or about 4 miles. It is designed to replace the U.S. Army's 107mm mortar, a rifled system that has been in service more than 40 years.

In April 1988, Martin Marietta received a $4.4 million contract from the Army to provide mortars and ammunition for follow-on operational test and evaluation. Martin Marietta has delivered 28 mortar systems, half towed and half designed for installation on a vehicle, as well as 8,000 rounds of ammunition.

In August 1988, Martin Marietta received a $7.2 million Army contract to develop enhanced rounds for the system, to be delivered by May 1990.

Martin Marietta Ordnance Systems operates the U.S. Army's largest

ammunition production facility, located in Milan, Tenn.

#90106p2873 04/16/1990 ~PR Newswire

NEW YORK (APRIL 16) PR NEWSWIRE - On Sept. 8, 1990, Scotch brand transparent tape, the top selling tape of any kind in the world, turns 60 years old.

In 1930, bakers, grocers and meat packers were looking for an attractive, moisture proof way to seal cellophane food wrap.

A young 3M engineer named Richard Drew solved the sellers' problem by inventing the first waterproof, see-through tape.

Improved repeatedly over the last 60 years and now known as Scotch brand Magic tape, the product once intended for limited commercial use is found in virtually every office and American home.

It is also one of the top-selling office products in the United States (along with file folders, copy paper and Post-it brand notes).

When 3M hired Drew in 1923, it was a struggling sandpaper manufacturer seeking to diversify. Drew's ingenuity gave it the opportunity. In 1925, he invented the first masking tape, created to help auto painters apply the two-tone paint finishes that were then all the rage.

Thus finding itself in the adhesive business, 3M soon turned its attention to another customer complaint: the request by sellers of perishable food for an easy, moisture proof, good-looking way to seal the newly invented cellophane wrap.

As he had in developing masking tape, Drew plunged himself into months of arduous experimentation, this time trying to figure out how to coat cellophane strips with adhesive.

On Sept. 8, 1930, 3M sent a trial shipment of Drew's new "Scotch" Cellulose Tape to Shellmar Products Corporation, a Chicago firm specializing in the fancy printing of cellophane used to wrap bakery goods. Two weeks later, the delighted company wrote back: "Put this product on the market!"

Ironically, however, not long after the product's introduction, another company invented a procedure for heat-sealing cellophane. Drew's tape promptly became obsolete in the market for which it was designed.

Nonetheless, transparent tape flourished. Americans during the Depression were forced to be thrifty. They discovered that the new tape could prolong the usefulness of things. Homemakers used it to mend torn pages of books, broken toys and ripped clothing. Banks used it to repair torn currency; insurance companies, torn contracts.

In 1932, using Scotch cellulose tape became far easier when John A. Borden a 3M sales manager, designed the first heavy-duty tape dispenser.

By World War II, the product had become such a ubiquitous part of American life, 3M felt compelled to run advertisements apologizing to homemakers for the scarcity of the tape in stores across the country; available supplies of the product had been diverted to the front for the war effort. 3M promised "when victory comes, 'Scotch' cellulose tape will be back again in your home and office...."

In 1961, 3M engineers perfected the tape so that it would never yellow or ooze adhesive. Appearing frosty on the roll but invisible on the page, the improved tape was given the name it has today: Scotch Magic transparent tape.

The uses discovered for young Drew's tape over the past 60 years cover the vast span of human activity itself.

There are the ordinary uses: affixing schoolbook covers, securing gift wrap, sealing bottles of expensive cooking wines. There are the exotic: Scotch transparent tape has sealed bottles of wine and served as an anti-corrosive shield on the Goodyear Blimp! And then there are uses that are simply ingenious: covering cracks in the soft shells of fertilized pigeon eggs -- which hatched!

Just as amazing, like the descendants of Abraham, more than 900 kinds of tapes have sprung from Drew's inventions. 3M was able to develop an entirely new business. As unlikely as it sounds, without Drew, maybe -- just maybe -- 3M might have remained just another sandpaper manufacturer.

#90106p2875 04/16/1990 ~PR Newswire

NEW YORK (APRIL 16) PR NEWSWIRE - Manufacturers Hanover Corporation (NYSE: MHC) today reported first-quarter net income of $96 million, compared with $103 million in the first quarter a year ago.

Net income per common share in the first quarter was $1.21, vs. $1.84 in the same period a year ago. The current quarter results reflect the

issuance of more than 18 million shares of new common stock during 1989.

"Although earnings were down, they were nevertheless achieved in a difficult environment, including a slowdown in corporate finance activities. Significantly, we saw a reduction in domestic net loan charge-offs, expenses remained under tight control and capital ratios continued to build on the strong levels we achieved in 1989," said John F. McGillicuddy, chairman and chief executive officer. "However, net income from non-performing loans to major refinancing countries was $18 million less than the previous year's quarter, masking earnings improvements in other areas of our business."

Developments in the quarter included:

-- An 18 percent reduction in net charge-offs, aside from those to refinancing countries, to $73 million, down from $89 million a year ago. Non-LDC non-performing loans at March 31 were $831 million, down from $851 million a year ago, and up $34 million from Dec. 31, 1989.

-- Non-interest expense of $473 million, up 4 percent from a year ago and down 4 percent from the fourth quarter of 1989.

-- A significant increase in total shareholders' equity to 5.7 percent of total assets, from 4.7 percent a year ago, reflecting the substantial build-up in equity during 1989. Common shareholders' equity increased to 4.9 percent of total assets at March 31, up from 4.2 percent a year ago and from 4.8 percent at Dec. 31, 1989.

-- A reduction of $731 million in the quarter and $1 billion over the last six months in the corporation's long-term debt. This reduction resulted from the reinvestment of a portion of the cash proceeds from the sale in 1989 of a majority interest in the CIT Group. The contribution to net income from CIT, including earnings on the reinvestment of the sale proceeds, amounted to $28 million in the first quarter, unchanged from the same period a year ago, when CIT was a wholly owned subsidiary.

-- The exchange of approximately $1.3 billion of Mexican medium- and long-term loans for bonds collateralized by U.S. Treasury zero coupon obligations under the recently completed Mexican financing plan. The corporation elected to exchange its medium- and long-term loans for principal-reduction bonds and interest-reduction bonds in equal proportions. This exchange resulted in a $219 million charge against the reserve for refinancing countries. Excluding the collateralized Mexican obligations, the corporation's medium- and long-term outstandings to all refinancing countries were $4.9 billion at March 31, down from $7 billion a year ago, while the refinancing country reserve at March 31 was $2 billion, or 40 percent of such outstandings.

SIOUX CITY, IA (APRIL 16) PR NEWSWIRE - Midwest Energy Co. has announced that its annual meeting of shareholders will be held at 10:00 a.m., Wednesday, May 23, at the Sioux City Convention Center. The meeting was postponed earlier after Midwest Energy and Iowa Resources Inc. (NYSE: IOR) announced an agreement to merge the two utility holding companies into Midwest Resources Inc., a new holding company. The annual meeting for shareholders of Iowa Resources will be held in Des Moines, also on May 23.

Shareholders of record April 17, 1990, will be asked to approve the merger agreement between the two holding companies. Proxy statements are expected to be mailed to shareholders of each company by the end of April.

Midwest Energy's principal subsidiary is Iowa Public Service Co., which serves 156,000 electric and 347,000 natural gas customers in Iowa, Minnesota, South Dakota and Nebraska. Midwest Energy has additional investments in diversified, non-utility businesses.

The principal subsidiary of Iowa Resources is Iowa Power, a Des Moines based electric utility serving 250,000 customers in central and southwest Iowa. The company also has non-utility holdings in transportation, real estate, telecommunications, computer software and other investments.

#90106p2898 04/16/1990 ~PR Newswire

HOUSTON (APRIL 16) PR NEWSWIRE - Freeport-McMoRan Oil and Gas Royalty Trust (NYSE: FMR) announced today that an agreement has been reached settling a natural gas contract dispute between the working interest owner of the trust properties, Freeport-McMoRan Oil & Gas Company (NYSE: FMP), and the purchaser under the contract which relates to one of the trust properties.

Under this settlement, the trust's share of the cash payment received by FMP from the purchaser is approximately $6.9 million, from which FMP will withhold approximately $1.4 million as the accrual for potential recapture of intangible drilling costs. All existing reserves attributable to the property in question have been depleted; however, FMP is currently drilling a deep well on a portion of the lease which has not heretofore been explored. FMP estimates that the costs of this deep well that will be charged to the trust's interest for the month of April will be

approximately $.5 million.

Accordingly, the trust expects its net profits royalty interest payment to its unit holders scheduled for July 1990, the regular quarterly payment date, to be increased by approximately $5.5 million as a result of the settlement before reduction for the costs of the well incurred during April 1990 (or approximately 33 cents per unit). Trust unit holders of record on May 31, 1990, will be entitled to receive this payment.

It is anticipated that amounts ranging in the aggregate from $.7 million to $1 million will be charged to the trust's interest for costs incurred for the well during the months of May through July, when the well is expected to be completed. If the well that is currently being drilled is successful, FMP contemplates the drilling of one or more additional wells, a portion of the cost of which would also be chargeable to the trust's interest. These future drilling costs would therefore reduce future distributions of the trust for the period of time during which the expenditures are incurred to the extent that such costs are not offset by revenues that result from new production from the lease.

As part of this settlement, FMP has agreed to replace the prior contract which had provided for gas purchased at prices significantly above today's market prices with a new contract providing for market pricing.

LOS ANGELES (APRIL 16) PR NEWSWIRE - Fries Entertainment, Inc. (AMEX: FE) independent producer and distributor of television programming, theatrical features and home video, today reported results for the third quarter and nine months ended Feb. 28, 1990.

Revenue for the third quarter totalled $6,183,000 versus $6,135,000 for the same three months of last year. The company recorded a net loss of $3,053,000, or 63 cents per share, in the current quarter as compared to a net loss of $2,961,000, or 60 cents per share, in the third quarter a year ago. The company posted losses in both periods primarily due to the absence of network or cable television deliveries.

For the nine months ended Feb. 28, 1990, revenues totalled $36,834,000 versus $24,420,000 in the nine month period of fiscal 1989. A net loss of $2,972,000, or 62 cents per share, was recorded against a net loss of

$3,769,000, or 77 cents per share for the first nine months of last year.

NEW YORK (APRIL 16) PR NEWSWIRE - Pan American World Airways today announced that it is extending its offer of double and triple mileage for members of WorldPass, Pan Am's frequent traveler program.

The program, which was originally scheduled to end on April 15, will now be in effect through May 31, 1990. In addition, Central and South America are now included in the double mileage offer for the extended period.

"This is an effort to continue a marketing promotion that is beneficial to our most valued frequent travelers," said John Bloodworth, Vice President-Advertising and Marketing Programs at Pan Am. "We certainly anticipate continued growth in both enrollment and traffic due to this promotion."

Triple mileage will continue to be offered to WorldPass members who fly on Pan Am and Pan Am Express flights within the U.S., (including Hawaii), within the Caribbean, as well as between the U.S. and the Caribbean, Bermuda or Mexico. WorldPass members traveling on all other flights throughout Pan Am and Pan Am Express' vast international route network will earn double mileage.

Instant WorldPass enrollment is available by calling 1- 800-348-8000. Passengers must be enrolled in WorldPass prior to travel in order to qualify for the double or triple miles.

Pan Am Shuttle flights are not included in this offer.

OREM, UT (APRIL 16) PR NEWSWIRE - Wicat Systems Inc. (NASDAQ: WCAT) announced today that it has entered into a formal agreement with IBM to jointly market integrated learning systems to kindergarten through twelfth-grade schools in the U.S.

This formalizes the cooperative marketing arrangement that Wicat and IBM have engaged in during the past 12 months that has resulted in the installation of more than 2,000 IBM PS/2 student workstations to deliver Wicat courseware, learning management, and testing products.

School districts using PS/2 workstations for their Wicat learning centers include Boston, New York, Phoenix Elementary, Ariz., Arlington, Texas, Clovis, Calif., St. Lucie, Fla., and Ogden, Utah, to name a few.

Under the agreement, Wicat is an IBM Business Partner -- Industry Remarketer and Certified Education Specialist. Additionally, in keeping with its commitment to customer satisfaction, Wicat has elected to act as a fully qualified IBM Service Partner, providing a single-vendor source to Wicat customers for service and maintenance issues.

"We chose to take this important step with IBM primarily because of the increasing number of requests by our customers for the PS/2 student workstation," stated Dr. Marvin Higbee, Sr. vice president of Wicat's Education Division. He added that this agreement reinforces Wicat's commitment to deliver its integrated learning solutions on the major industry-standard workstations.

Wicat Systems is a world leader in technology-based training and education solutions, providing products and services to help clients achieve 30 to 50 percent learning improvement in schools, industry and government. Wicat's stock is traded in the NASDAQ market under the symbol WCAT.

NEW YORK (APRIL 16) PR NEWSWIRE - The Home Insurance Company, a subsidiary of AmBase Corporation (AMEX: ABC), today announced that Peter C. O'Connor, previously the general manager and director of UNAT, AIG's

EEC company, has joined The Home as vice president-international to lead its re-entry into the worldwide insurance market.

"Peter O'Connor is well known throughout the international insurance industry," said James J. Meenaghan, chairman, president and CEO of The Home. His addition to our staff is an extension of our strategy for serving our commercial and personal lines customers on a worldwide basis."

O'Connor will report to William Munson, executive vice president, commercial lines, at The Home. Munson said that O'Connor's first priority will be to develop the facilities necessary for The Home to underwrite international exposures for its U.S.-based customers. The Home will also underwrite U.S. exposures for foreign clients.

O'Connor has spent his entire career on the international side of the property/casualty industry. He joined the American Foreign Insurance Association (AFIA) in 1963 after graduating from Johns Hopkins University. He subsequently served as manager of AFIA offices in Milan, The Hague, Rome and Brussels, before returning to the United States in 1982 as senior vice president AFIA/CIGNA for the Middle East-Africa- Brazil division.

In 1984, he joined American International Underwriters in New York, the overseas property/casualty arm of American International Group, Inc., as president of its Middle East-Africa division. In 1986, he went to Paris as general manager of AIU's operations in France.

The Home Insurance Company currently writes a full line of property and casualty coverages throughout the United States.

BOISE, ID (APRIL 16) PR NEWSWIRE - William M. Agee, chairman and chief executive officer of Morrison Knudsen Corp. (MK) (NYSE: MRN), today announced formation of a wholly owned subsidiary to conduct all of the corporation's operations in gold and other precious metals mining activities.

Agee also announced that this new unit, MK Gold Co., has entered into a joint venture with Chevron Resources Co. to explore and develop an 18-square-mile property in southeastern Oregon that has significant potential for gold.

Chevron has conducted exploration of the property and confirmed the presence of the gold-bearing system. MK Gold Co. will participate in detailed exploration activities to earn a 40-percent interest in the

property. The joint venture team will complete exploration and move toward development after MK completes a mine feasibility study.

"This joint venture with Chevron Resources combines the strengths of each organization and builds on a long-standing, productive relationship between the two companies," Agee said.

Agee added that the formation of MK Gold Co. will "centralize MK's precious metals activities and increase our focus and flexibility in this area."

Robert Tinstman,president of MK's Mining Group, will also serve as president of MK Gold Co. The new subsidiary will take over MK's existing precious metals operations, including operation and half ownership of the American Girl gold mine in California, contract mining at Cyprus Copperstone Gold Corp.'s Copperstone Gold Project, which is Arizona's largest gold mine, and exploration with Newmont Exploration Ltd., on a property in Nevada.

MK Gold Co. also owns a large property in Montana that will be explored for precious metals.

CHICAGO (APRIL 16) PR NEWSWIRE - Some of the largest and most prestigious freight forwarding firms in the United States have urged the U.S. Department of Transportation (DOT) to grant new air service between Chicago and Tokyo to United Airlines.

The firms have lined up behind United's bid in statements of support to the administrative law judge at DOT assigned to hear the 1990 U.S.- Japan Gateways Proceeding. The case was instituted to determine new commercial aviation gateways and to select carriers between the United States and Japan.

''We are heartened by the strong support being demonstrated for United by the leaders of the freight forwarding industry. Their support is of great value as we pursue the single most important commercial air route opportunity available,'' said Stephen M. Wolf, chairman and president of United.

United has its primary U.S. hub at Chicago and is the largest carrier at O'Hare International Airport. United also has its primary Asian hub at Tokyo with flights fanning out from that point throughout Asia. United has the unique ability to connect these two hubs, allowing air travelers

and shippers to receive enormous benefits from an enhanced level of service.

The freight forwarding firms endorsing United's bid and their executives are Guenter Rohrmann, president of Air Express International; John Whalen, chief executive officer of Danzas-Northern; Patrick Foley, the chairman, president and chief executive officer of DHL;

Also, Larry Rodberg, president and chief executive officer of Eden Air Freight; Harry Leonard, senior vice president of Pilot Air Freight; Dennis Bakal, president and chief executive officer of Profit Freight Systems; and Ryoji Nakamura, president of Kintetsu World Express.

United will operate the new Boeing 747-400 aircraft with spacious cargo capacity of 6,085 cubic feet on the new Chicago-Tokyo route. United also said it will originate and terminate its flights at Dulles International Airport serving Washington, D.C.

United Airlines generated more than $500 million in cargo revenue in 1989, more than any other passenger/cargo airline in the United States. During 1989 United carried 1,139,091,000 cargo ton miles, an increase of 6.7 percent from the year before.

SUMMIT, NJ (APRIL 16) PR NEWSWIRE - Marsam Pharmaceuticals Inc. (NASDAQ: MSAM) and Geneva Generics, a subsidiary of CIBA-GEIGY Corporation, announced today an agreement in principle to develop, manufacture and distribute generic pharmaceutical products to hospitals and other health care institutions.

Under the terms of the agreement, Marsam Pharmaceuticals will be responsible for the development and production of generic injectable products, while Geneva Generics will be responsible for the development and production of the unit dose form of oral solid dose generic drugs, and for the marketing and distribution of both types of products. The agreement in principle is subject to the negotiation and execution of a definitive agreement.

Geneva Generics and Marsam Pharmaceuticals will share the profits of products sold under the Geneva/Marsam name. Additionally, CIBA-GEIGY will acquire approximately a 10 percent equity position in the stock of Marsam Pharmaceuticals for $10 million.

The agreement, which extends for 10 years, will replace an earlier agreement between Marsam Pharmaceuticals and E.R. Squibb & Sons, Inc. Marsam has notified Bristol-Myers Squibb that it is terminating their agreement.

Marvin Samson, president of Marsam Pharmaceuticals, said, "The association between Marsam and Geneva Generics represents the joining of two companies with similar values and philosophies. By combining our two product lines -- injectables and unit dose solids -- we are providing hospital pharmacists with a single source for a broad range of generic drug products. We are also pleased that our venture has received the support and endorsement of CIBA-GEIGY, Geneva Generics' parent company."

Added John H. Brown, senior vice president of CIBA-GEIGY Corporation's pharmaceutical division, "This association allows us to work together with Marvin Samson, perhaps the most respected individual in the generic injectables market. We are very enthusiastic about this arrangement, which takes advantage of both of our strengths, and is further affirmation of CIBA-GEIGY's commitment to be a major factor in the U.S. generics business."

Geneva Generics is a leading developer, manufacturer and distributor of quality generic pharmaceutical products. Its parent company, CIBA- GEIGY, is a diversified chemical and pharmaceuticals company engaged principally

in the research, development and marketing of a wide variety of special-purpose chemicals and pharmaceutical products throughout the world.

Marsam Pharmaceuticals Inc. is an emerging leader in the development and manufacture of injectable drugs for the hospital and institutional marketplace.

CLEVELAND (APRIL 16) PR NEWSWIRE - Society Corporation (NASDAQ: SOCI), a $15.4 billion asset Ohio-based financial services company, today reported earnings of $1.16 per share for the first quarter.

This represents a 22.1 percent increase over $.95 per share for the first quarter of 1989.

Net income for the quarter was $40.3 million, compared with $34.5 million for the first quarter of 1989. These comparisons reflect the Jan. 5, 1990 merger of Trustcorp, Inc. into Society, which was accounted for as a pooling of interests. Society originally reported net income per share of $1.15 for the first quarter of 1989.

Robert W. Gillespie, chairman and chief executive officer, stated, "As expected, our plans to redirect some lending activities of the Trustcorp banks and to eliminate some of their unprofitable investment positions resulted in consolidated average loans and earning assets in the first quarter declining 0.5 percent and 1.6 percent, respectively, from restated fourth quarter levels.

"At the same time key spreads between interest-earning assets and interest-bearing liabilities narrowed. Nevertheless, our efforts to improve the net interest margins of the acquired banks produced a consolidated margin improvement of 4 basis points, from 4.45 percent in

the fourth quarter to 4.49 percent in the first quarter.

"These contending forces are expected to continue for much of this year, restraining growth of net interest income. However, our plans to capture productivity gains through expense reductions and revenue synergies arising from the Trustcorp merger are ahead of schedule. These activities will benefit earnings in the second half of 1990 and throughout 1991."

Earnings for the quarter were enhanced by tax benefits not recognized by Trustcorp prior to the merger, Society's adoption of SFAS 96 (relating to accounting for taxes) and $4.0 million of pretax gains from security transactions.

Nonperforming loans at March 31, 1990, were $184.3 million, representing 1.77 percent of total loans. This compares with $173.7 million and 1.66 percent, respectively, at year-end 1989. At March 31, the allowance for loan losses was $166.0 million, or 90.1 percent of nonperforming loans.

Society had 33,500,181 common shares outstanding at March 31, 1990. The company previously announced that it had agreed to purchase from Marine Midland Banks, Inc. all outstanding shares of Society's adjustable rate preferred stock and a warrant to acquire Society common shares held by Marine.

This transaction was completed as of Feb. 28, 1990. Also on Feb. 28, the company announced a 500,000 share repurchase program. Today, Society announced that this program, which expires Dec. 31, 1990, has been expanded to 750,000 shares. The shares will be purchased in the open market and through negotiated transactions.

The timing and amount of the share purchases will depend on market conditions.

The shares purchased will be available for issue on the exercise of stock options and for other corporate purposes. At March 31, the company had acquired 253,200 shares under this program.

STAMFORD, CT (APRIL 16) PR NEWSWIRE - General Signal Corporation's (NYSE: GSX) earnings per share for the first quarter rose to $1.06 from $1.04 in

the year-ago period, it was announced today by Edmund M. Carpenter, chairman and chief executive officer. Net income of $20.3 million was 2.2 percent higher, while sales of $470.4 million were slightly below year-earlier levels.

Operating earnings of $19.3 million for the process controls sector, while up from fourth-quarter levels, were 12 percent below last year's first quarter. Sales were off 3 percent due to current softness in operations serving the steel, utilities and chemical industries. Orders for the sector during the quarter rose 4 percent to $191 million, or $17 million more than sales.

The technology industries sector's sales declined 8 percent to $97.1 million. The sector recorded a small loss as profits from telecommunications equipment operations could not offset semiconductor equipment losses, which were the result of soft second-half 1989 orders. For the first three months of 1990, orders for the sector rose 22 percent to $121 million; orders for semiconductor equipment operations were up 19 percent and telecom equipment operations were up 30 percent.

The electrical controls sector's earnings rose 11 percent to $13.8 million on a 13 percent gain in sales to $124.6 million. Results were aided somewhat by acquisitions. All business areas, particularly the non-residential construction and computer-related operations, showed improvement. Orders for this sector rose 7 percent to $123.9 million.

The transportation controls sector's sales and earnings recorded gains of more than 3 percent to $75.1 million and $6.5 million, respectively. Most of the profit contribution came from the sector's non-rail-related activities.

General Signal Corporation, with 1989 sales of $1.92 billion, is a leading manufacturer of equipment and systems for the process control, electrical, semiconductor and transportation industries.

ROCKY MOUNT, NC (APRIL 16) PR NEWSWIRE - Peoples Bancorporation (AMEX: PBK) today reported first quarter earnings of $3.113 million or $.43 per fully diluted share compared to $.42 per fully diluted share during the same period in 1989. Return on equity for the first quarter was 14.95 percent.

Robert R. Mauldin, Chairman and Chief Executive Officer said, "The increase in first quarter earnings resulted primarily from an increase in net interest income, and an increase in noninterest income which offset the growth of noninterest expense." Book value per share on March 31, 1990, was $12.38 compared to $11.15 on the same date in 1989, an increase of 11.0 percent. Maudlin said, "This increase is evidence of our commitment to building the equity base of the corporation by the internal generation of capital."

"Noninterest expenses were up 7.6 percent in the first quarter of 1990, following a year in which expenses were down in absolute dollars. Since noninterest expense includes some expenses relating to our proposed merger with The Planters Corporation (NASDAQ-NMS: PNBT), we are delighted that we were able to post a gain for the first quarter. We are pleased with the progress towards merging the two institutions and are confident that cost savings will be realized from numerous overlapping operational and administrative functions," added Mauldin.

At March 31, 1990, assets totaled $1.442 billion, an increase of 12.5 percent over the first quarter of 1989. The primary reason for this growth was the acquisition on February 28, 1990, of Watauga Savings and Loan Association headquartered in Boone, North Carolina. Peoples operates 78 offices in 48 communities in North Carolina.

ROCKVILLE, MD (APRIL 16) PR NEWSWIRE - The GEnie online information service from GE Information Services now offers a free front-end applications software package for use on IBM PC and IBM PC-compatibles.

The GEnie PC Aladdin software is designed to enable such microcomputers to automatically initiate access to selected GEnie service online offerings such as GE Mail, RoundTable Bulletin Boards, and software libraries at scheduled times or upon demand. It also allows a GEnie service subscriber to prepare messages "off line" prior to GEnie service connect charges.

The software enables subscribers to instruct their PCs to automatically access the GEnie service and execute specified tasks, such as sending a GE Mail message or reading a RoundTable Bulletin Board. Since these online tasks are done as quickly as possible, the GEnie PC Aladdin software saves GEnie service subscribers a considerable amount of time and money in the form of reduced online access charges.

The full-featured GEnie PC Aladdin software package can be downloaded by GEnie service subscribers at no cost, except for connect time, from either the IBM PC RoundTable or the Aladdin RoundTable on the GEnie service.

For further information on the GEnie service and the GEnie PC Aladdin software, please call 1-800-638-9636. GE Information Services, a division of General Electric Company, USA (NYSE: GE), is headquartered in Rockville.

#90106p2995 04/16/1990 ~PR Newswire

ATLANTA (APRIL 16) PR NEWSWIRE - The Nuclear Regulatory Commission staff has reduced a $50,000 civil penalty against Duke Power Co., proposed on Dec. 19, 1989, at the Catawba nuclear power plant, by 25 percent and ordered the utility to pay $37,500 within the next 30 days.

On Dec. 19, 1989, the NRC staff proposed the $50,000 fine against Duke at Catawba because of the utility's alleged failure to take adequate corrective action following problems encountered during a pump operability test on July 31, 1989. The NRC said that during a surveillance test on the turbine-driven auxiliary feedwater pump, the turbine ran too fast and casued an automatic shutdown three consecutive times. The agency said corrosion on the stem of a governor valve caused it to stick. Plant operators temporarily freed the valve stem by manipulating the valve and its associated linkages but failed to identify the ongoing corrosion problem.

In its response to the proposed NRC fine, Duke admitted the violation but requested full mitigation of the proposed fine based upon corrective actions.

In an order dated April 12, imposing the fine, the NRC said full mitigation of the proposed fine for the corrective action taken was not deemed warranted because the company returned equipment to service after multiple test failures without determining the root cause of those failures. NRC officials said the equipment did perform properly on the fourth try, leading station personnel to believe that the problem had corrected itself and the components were now functioning properly but that repeated tests of a component or system until it passes a surveillance test, absent other known indications to the contrary, is not satisfactory.

MINNEAPOLIS (APRIL 16) PR NEWSWIRE - Control Data Corp. (NYSE: CDA) announced today that Robert M. Price, chairman of its board of directors, has decided not to stand for re-election to the board at the company's May 2 Annual Meeting.

Commenting on his decision, Price said: "Control Data has been through a tumultuous period. For the past decade, the computer industry has undergone fundamental and irreversible change. For many enterprises, that has been fatal. For Control Data, the task of reshaping the company so that it has the potential for future profitability and growth has been long, difficult and painful. It is clear that, under current circumstances, my decision to withdraw from active management at this time is best for the company.

"I have had the privilege of helping build an enterprise which is a source of pride to our community, to the state of Minnesota and all of us who have been a part of it," Price added. "What I most deeply wish is that this may be true for current and future employees as well."

"Bob Price has served Control Data with commitment and loyalty for almost 30 years," said Lawrence Perlman, president and chief executive officer. "He has many contributions yet to make to the community in the areas of quality and of educational and technology policy."

Price will not be replaced on the company's board, and the size of the board will be reduced at the annual meeting to 10 directors. Proxies will not be voted for Price since he will no longer be a board nominee. No new chairman will be named at this time. Shareholders of record will be notified of this change.

Control Data is a provider of data solutions that integrate hardware, software and services to meet customers' complex data collection, processing and communications needs.

#90106p3004 04/16/1990 ~PR Newswire

ATLANTA (APRIL 16) PR NEWSWIRE - The president of the nation's largest research consortium warned today that disparate forces have combined to threaten the ability of the U.S. telecommunications industry to meet the future needs of its customers.

Rocco J. Marano, president of Bellcore, the Livingston, N.J.-based research and engineering arm of Bell operating companies, cautioned that isolationist views accompanied by archaic regulations, short-term management thinking, and a cumbersome standards process, are endangering the effectiveness of the country's telecommunications networks.

The U.S. position is eroded by antitrust laws written to ensure fair competition in an isolated, independent economy, one that no longer exists Marano asserted. If U.S. companies are to compete effectively in world markets, there must be greater cooperation well in advance of the marketplace, he said.

Their expectations and their relentless search for greater electronic efficiency are beginning to confront an archaic regulatory framework and a largely unprepared, unintegrated infrastructure.

In addition to problems brought on by inadequate policies, the U.S. telecommunications industry is also hampered by short-term management thinking.

Short-sighted managers, obsessed with quarterly profits, concentrate on

what a company already has, rather than on what it can create, he said.

Such management ultimately shortchanges company shareholders, customers and the country itself with its "focus" on present markets, not future markets, and managing money instead of goods.

READING, PA (APRIL 16) PR NEWSWIRE - Trial proceedings commenced today in a lawsuit brought by affiliates of First City Financial Corporation Ltd. against the board of directors of Armstrong World Industries, Inc. (NYSE: ACK), it was announced by First City.

The trial, which is before U.S. Judge E. Mac Trautman of the Eastern District of Pennsylvania, will decide, among other things, whether the board of directors breached its fiduciary duty in not placing five proposed amendments to Armstrong's Articles of Incorporation to restore and enhance shareholders' collective rights on the agenda for the shareholders' annual meeting, scheduled for April 30, 1990.

The proposed amendments appear on white proxy cards being circulated by the Shareholder Committee for Responsible Corporate Governance of Armstrong World Industries, Inc. The committee urges Armstrong World shareholders to vote in favor of them.

TAMPA, FL (APRIL 16) PR NEWSWIRE - FLS Holdings, Inc. (NASDAQ-NMS: FLSHP) parent company of Florida Steel Corporation, reported consolidated net sales for the six-month period ended March 31, 1990, of $255.9 million and net income of $4.9 million compared with net sales of $252.7 million and net income of $4.7 million for the six-month period ended March 31, 1989.

Consolidated net sales for the quarter ended March 31, 1990, were $132.3 million and net income for the same period was $3.4 million. Net sales for the quarter ended March 31, 1989, were $130.5 million and net income for the same quarter was $3.2 million.

Net sales for both the six-month period and the quarter ended March 31, 1990, were higher vs. a year ago principally as a result of increased tons shipped. The impact of this increase, however, was somewhat offset by

lower average selling prices. In addition, the six-month period of fiscal 1990 was impacted by start-up costs in the first quarter associated with the recently completed modernization and expansion of the Charlotte Steel Mill melting facility. That facility reached projected production levels in the quarter ended March 31, 1990. The six-month period ended March 31, 1990 included approximately $.6 million of amortization of deferred financing costs vs. approximately $5.6 million for the six-month period ended March 31, 1989.

#90106p3015 04/16/1990 ~PR Newswire

REDMOND, WA (APRIL 16) PR NEWSWIRE - Nintendo of America Inc. announced today an international campaign directed against video rental outlets and other retailers, distributors and importers who are renting or selling

counterfeit Nintendo video game cartridges for play on the Nintendo Entertainment System ("NES").

Nintendo said that lawsuits for copyright infringement have already been filed in U.S. District Courts in Los Angeles, Calif.; Minneapolis, Minn.; and Florida to halt the sale of counterfeit Nintendo software. A lawsuit has also been commenced in Federal Court in Ottawa, Canada against defendants located in Quebec, Ontario and British Columbia, and an order authorizing the seizure of counterfeit Nintendo cartridges has been issued by that Court. Additional copyright infringement suits will be filed in other areas of the United States and Canada in the next two weeks.

The lawsuits charge the defendants with willful infringement of Nintendo's copyrights by the importation, rental and sale of "multiple game cartridges" which contain up to 40 counterfeits of Nintendo and Nintendo licensed video games in a cartridge. In addition, some defendants are also charged with the sale of counterfeit "Super Mario 3" game cartridges.

Howard Lincoln, senior vice president of Nintendo said, "What's happening here is an outrageous theft of Nintendo's valuable intellectual property rights.

Crooks in the Far East have made verbatim copies of legitimate Nintendo video games and have packaged these counterfeits in multiple game cartridges. We intend to protect the enormous investment made by this company and its authorized developers in creating popular Nintendo video games.

We also want to protect our players for whom the word Nintendo means quality and value. To that end, we plan to sue video rental outlets, retailers, distributors and importers who deal in counterfeit Nintendo software. We will sue counterfeiters and their customers wherever they are located. We have committed and the necessary resources to do so."

Lincoln said that the most common type of counterfeit Nintendo cartridges can readily be identified. "The cartridges are approximately half the size of legitimate Nintendo cartridges and require an adapter for play on the NES," he said.

Lincoln indicated that Nintendo does not market "multiple game cartridges" containing 8-in-1, 10-in-1, 20-in-1, or 40-in-1, etc. video games. "If a video rental outlet or retailer is renting or selling a multiple game cartridge with an adapter, that cartridge is a counterfeit product," said Lincoln.

According to Lincoln, the counterfeit Nintendo cartridges and adapters are being manufactured in Taiwan. "Nintendo is working closely with U.S. Customers inspectors at ports of entry around the country to ban the

importation of these counterfeit cartridges and to seize and destroy any incoming shipments. We greatly appreciate the assistance and close cooperation Nintendo has received from U.S. Customs," he said.

Nintendo indicated that multiple game cartridges and other counterfeit cartridges have not been found in authorized Nintendo dealer locations and "World of Nintendo" outlets. "So far, our investigators have only found the counterfeit cartridges in video rental outlets and non-authorized Nintendo retail stores," he said. "We have asked our authorized dealers and distributors to be on the lookout for counterfeit cartridges," he added.

The lawsuits ask that the defendants be enjoined from distributing, advertising, promoting or selling counterfeit Nintendo cartridges. In addition, Nintendo said it will insist on a recovery of monetary damages from each defendant found liable for renting or selling counterfeit games.

Nintendo is no stranger to nationwide campaigns to eliminate counterfeits of its products. In the early 1980's, Nintendo was confronted with massive counterfeiting of its immensely popular "Donkey Kong" arcade game. Nintendo successfully instituted over 30 lawsuits around the country. The problem was eliminated.

Nintendo of America Inc. sells personal, home and arcade video games in the United States. The Redmond, Wash.-based company is the headquarters for the company's marketing operations in North America, and is a subsidiary of the world's largest manufacturer and marketer of video games Nintendo Co. Ltd.

CONTACT: Bonnie Powell or Lynne Gray of Hill & Knowlton Inc., 213-937-7460, for Nintendo.

#90106p3018 04/16/1990 ~PR Newswire

WHITE PLAINS, NY (APRIL 16) PR NEWSWIRE - KD German Rhine Line today announced it is offering fare reductions of $100 per couple to passengers on Lufthansa's new non-stop flights between New York (Newark airport) or Washington (Dulles airport) and the German cathedral city of Cologne.

The reduction applies to any KD cabin ship cruise during the 1990 season, which runs to mid-October, and is available to round-trip Lufthansa passengers who use the new Cologne service at least one way. The new Lufthansa flights, which begin May 1, operate in both directions between Newark and Cologne on Tuesdays, Thursdays and Saturdays and between Dulles and Cologne on Mondays, Wednesdays, Fridays and Sundays. Single passengers get a $50 reduction on a KD cruise.

KD German Rhine Line, the oldest and largest passenger shipping company on the Rhine, has been cruising the river for 164 years. All cruises calling at Cologne include the romantic Rhine Gorge: hills crowned with ancient castles and fortresses, wine villages nestled at the shore, and the legendary Lorelei.

KD's five-day "Castles and Wine" cruise starts in Cologne every Sunday and calls at a picturesque castle town, Linz; the wine village of Rudesheim; the cathedral city of Mainz; and Strasbourg, capital of the French province of Alsace, on the way to the Swiss port of Basel, where the cruise ends on Thursday afternoons. Fares range from $535 to $865.

The three-day "Fleur de Lis" cruise, at fares from $250 to $415, begins in Strasbourg every Friday and ends in Cologne on Sunday afternoon, stopping at Rudesheim en route. Three-day "Rhineland Explorer" cruises between Cologne and Frankfurt, which is on the Main River, traverse the romantic Rhine Gorge. Departures are on Fridays and Wednesdays and fares range from $225 to $365.

Three-river cruises combine the Rhine, the Main and the Moselle, a narrow, winding tributary of the Rhine. Four-day cruises, at fares from $425 to $540, operate in both directions between Frankfurt and Cologne via Cochem, whose setting, in the midst of vineyards, is the loveliest in the Moselle valley. A six-day three-river cruise, at $635 to $815, is round trip: Cologne-Cochem-Frankfurt-Cologne. "Moselle Explorer" cruises between Koblenz, where the Rhine and the Moselle meet, and the 2,000-year-old city of Trier, have fares of $215 to $335 for three days and $340 to $440 for four.

Passengers can embark or disembark in Cologne or neighboring Dusseldorf on four- and five-day cruises that follow the Rhine for all or most of its 600-mile length between Switzerland and Holland.

KD's gleaming white ships accommodate about 200 passengers in neatly fitted, immaculately maintained, two-berth outside cabins with shower and toilet, telephone and air-conditioning. Each has a large sundeck, a convivial bar, glass-walled dining room and observation lounge, comfortable reading room and shop, and most have heated outdoor swimming pools.

Lufthansa reservations may be obtained from the airline by phoning 800-645-3880. KD cruises may be booked through the Rhine Cruise Agency, phone 914-948-3600 or 800-346-6525.

CONTACT: Carol Zaiser, 212-724-2116, or Jan Myers, 212-724-5232, both for KD German Rhine Line

NEW YORK (APRIL 16) PR NEWSWIRE - The Centaur Partners Group announced today that it had obtained the consents from holders of 11,759,512 shares of common stock of National Intergroup, Inc. (NYSE: NII), representing more than 54 percent of the outstanding shares, to amend NII's by-laws to expand the NII board from 12 to 15, which, if effective, will result in stockholders electing a majority of directors at this year's annual meeting.

In a letter sent today to the directors of NII, Centaur stated that a majority of NII stockholders have issued an "overwhelming mandate regarding the future of NII."

The full text of the letter follows: "We are delivering to you the consents from holders of 11,759,512 shares, representing more than 54 percent of the outstanding shares of the common stock, to amend NII's by-laws to expand the size of the board from 12 to 15 members. We believe that the consents we are delivering are sufficient to effect the by-law amendment to expand the board on our belief that the Delaware Supreme Court will confirm that only a majority vote is required for this amendment and reverse the earlier Chancery Court interpretation that an 80 percent vote is required for this purpose.

"Nevertheless, a majority of NII stockholders have issued an overwhelming mandate regarding the future of NII. We are particularly encouraged by the size of this response because we think that many stockholders who would have voted for us did not vote at all because they thought that an 80 percent vote was unattainable.

"We understand that it has been your position that an 80 percent shareholder vote is required to expand the size of the board. You have previously stated that the basis for your position was that the classified board was approved by stockholders in 1984.

"Since 1984, however, much has changed at NII: -- The company has lost hundreds of millions of dollars from continuing operations.

-- The company has implemented additional anti-takeover devices, without shareholder consent, which we believe have further entrenched management.

-- The stockholder base has changed considerably, and we believe that the results of our solicitation demonstrate that the current stockholders do not want to be bound by the staggered board supermajority provisions implemented in 1984.

"Therefore, we hereby request that you, as fiduciaries, listen to and respect the clear mandate of more than a majority of your stockholders,

and allow stockholders to choose between the Centaur program and your program for NII at the annual meeting,. We ask that you remove all barriers to a free and open election of a majority of directors by adding three director seats to the board so that eight may be elected in July. The 54 percent of consents voted in our favor shows that a majority of stockholders want the opportunity to elect a majority of directors this July. We hope that you will heed their voice.

"We are disappointed that on the eve of the scheduled termination to our consent solicitation you chose to respond to this stockholder mandate with a frivolous lawsuit against Centaur in an attempt to thwart shareholder democracy, rather than to begin the process of addressing your stockholders' clear statement.

"Finally, we believe that the consents we are delivering are sufficient to effect the by-law amendment to reduce to 45 days the advance notice to NII of the nominees for director. In the next few days, however, we will be forwarding to you a written notice containing the names and information regarding our eight nominees for election at the 1990 annual meeting."

PHILADELPHIA (APRIL 16) PR NEWSWIRE - Republic Bank, which opened its doors on Sept. 6, 1988, with offices at 1515 Market St. in downtown Philadelphia, today announced its first quarter profits.

Rolf A. Stensrud, president of Republic Bank, stated that for the quarter ending March 31, 1990, the bank showed a net profit of $18,429 with assets growing to $40,678,000.

"We're running ahead of our projections for profit and growth and look forward to continued success during the remainder of the year," Stensrud noted.

Republic Bank specializes in commercial and consumer banking services for small businessmen and individual depositors. In addition to checking and savings accounts, Republic offers consumer and commercial lending services. State chartered under the laws of the Commonwealth of Pennsylvania, the bank is FDIC insured and is a member of the Federal Reserve. It also is a member of the MAC network. Additional details at 215-563-3600.

#90106p3026 04/16/1990 ~PR Newswire

DALLAS (APRIL 16) PR NEWSWIRE - Elcor Corp. (NYSE: ELK) today reported lower sales and a substantially smaller loss for its third quarter ending March 31, 1990, than incurred in the same quarter last year. Nine-month results reflected higher sales and sharply higher net income than the year-ago period, and the company continues to expect a strong fourth-quarter performance this year.

Roy E. Campbell, president, said, "Third quarter results were held back by lower shipments of concrete roof tile in Florida caused by a slow down in new housing construction, and by lower shipments of industrial products. However, demand for our premium laminated fiberglass asphalt roofing shingles was at a record level for a third quarter and prices were about 4.3 percent higher than last year."

Better prices and higher shipments of Elk Prestique(R) premium laminated fiberglass asphalt shingles were the primary factors that favorably influenced results in the company's seasonally slow third quarter. The company believes a strong seasonal increase in demand for its premium asphalt shingles combined with a significant increase in shipments of its solid waste baling and recycling equipment should result in sharply higher sales and improved profitability in the fourth quarter ending June 30, 1990.

Third quarter loss before extraordinary item of $573,000, or 8 cents per share, and net loss of $868,000, or 12 cents per share, compared favorably to a net loss of $1,523,000 or 22 cents per share last year. This year's net loss includes a $295,000, or 4 cents per share, reversal of a tax loss carryforward extraordinary item. Sales of $31,113,000 compared to $33,796,000 last year, reflecting lower shipments of concrete roof tile and industrial products.

For the nine months ending March 31, 1990, net income before extraordinary item of $2,372,000, or 34 cents per share, and net income of $3,593,000, or 51 cents per share, compared favorably to net income of $369,000, or 5 cents per share, in the same period last year. Net income this year includes a $1,221,000, or 17 cents per share, tax loss carryforward extraordinary item.

Elcor manufactures roofing products and industrial products.

WEST PALM BEACH, FL (APRIL 16) PR NEWSWIRE - Cenvill Investors, Inc. (NYSE: CVI), a real estate investment trust, today reported results for the year and fourth quarter ended Dec. 31, 1989.

Net income for the year declined to $7,368,000 or $1.07 per share on revenues of $30,800,000 from net income of $12,620,000 or $1.83 per share on revenues of $27,859,000 for 1988.

During the fourth quarter, the company experienced a net loss of $226,000 or 3 cents per share on revenues of $12,179,000 versus net income of $1,036,000 or 15 cents per share on revenues of $6,140,000 for the same period of the prior year.

The $5.3 million decline in earnings for the 1989 year was primarily attributable to a $5.5 million increase in the provision for losses and a $3.6 million decrease in net interest income, partially offset by a $4.6 million increase in gains on sales of real estate. Before the provision for losses, and the real estate gain, earnings were $9,642,000 or $1.40 per share for the 1989 year, and $2,048,000 or 30 cents per share for the quarter.

Alvin Wilensky, president, noted that the 1989 provision for losses of $8.3 million recorded during the fourth quarter, versus $2.7 million in 1988, "resulted from the company's detailed review of its mortgage loan portfolio, including an evaluation of the residential and commercial real estate markets, principally in southeast Florida, and general economic conditions."

He added that the decrease in net interest income was principally attributable to an increase in non-accrual loans. "At Dec. 31, 1989, non-accrual loans amounted to $25 million, net of allowance for losses, compared to $16.8 million at the end of 1988," Wilensky said.

The increased gain on sales of real estate reflects a $6 million gain in the 1989 fourth quarter on the sale of the Century Plaza Shopping Center at Deerfield Beach, Fla. The 1988 gain from the sale of commercial land was $1.4 million.

"We remain financially strong and operationally conservative," Wilensky said. "Notwithstanding the earnings decline, we continue to be optimistic about Cenvill's long-term prospects," he concluded.

NEW YORK (APRIL 16) PR NEWSWIRE - The Manhattan Savings Bank announced that eligible account holders at a special meeting held today have overwhelmingly approved Manhattan's plan of conversion whereby Manhattan would convert from mutual to stock form and simultaneously merge into the Williamsburgh Savings Bank, a wholly owned subsidiary of Republic New York Corporation (NYSE: RNB).

Of the 9,174,193 votes cast either in person or by proxy at the special meeting, 7,910,455 or 86.23 percent were cast in favor of the plan of conversion.

John A. Pancetti, chairman and chief executive officer of Manhattan, said, "We are extremely gratified with the strong vote of confidence and support of Manhattan's depositors for this transaction. Today's vote is the final approval necessary for the completion of this exciting merger.

"The combined institution will be one of the best capitalized savings banks in New York State as well as one of the largest. We are confident that this transaction will increase significantly the value of the Manhattan Savings Bank to our customers, employees and the communities we serve."

The conversion merger will result in an institution, with the name The Manhattan Savings Bank, with more than $6 billion in assets, approximately $500 million in capital and 29 offices in Manhattan, Brooklyn, Queens and Nassau, Suffolk and Westchester counties.

The Manhattan Savings Bank, as of Dec. 31, 1989, had assets of $3.1 billion and deposits of $2.8 billion. Williamsburgh had year-end assets of $3.7 billion and deposits of $2.6 billion.

Republic New York Corporation, which is also the parent company of Republic National Bank of New York, had total assets of $25.5 billion at the end of 1989.

SASKATOON, SASKATHEWAN (APRIL 16) PR NEWSWIRE - Develcon Electronics Ltd. today announced its unaudited results for the six months ended Feb. 28, 1990 as follows (Canadian Funds):

DEVELCON ELECTRONICS LTD.

Six Months Ended Feb. 28:	1990	1989
Sales	$ 4,612,000	$ 6,507,000

Loss before income taxes and extraordinary item	957,000	1,711,000
Extraordinary item	--	142,000
Net loss	957,000	1,569,000
Loss per share:		
Before extraordinary item	.27	.46
Loss per share:		
After extraordinary item	.27	.42

No income tax recovery on the loss for the six months ended Feb. 28, 1990, or the comparable period a year earlier, has been recorded. These losses will be available for offset against any future taxable income.

The weighted average number of shares outstanding was 3,708,170 during the six and three months ended Feb. 28, 1990 and 3,698,170 during the six and three months ended Feb. 29, 1989.

Subsequent to the end of the second quarter, the company completed a financial restructuring which resulted in the conversion of $4.5 million in long-term debt into 3 million common shares, as well as the conversion of all outstanding Series B preferred shares into 969,338 common shares. As part of the transaction, Develcon will reacquire all 4.5 million outstanding Series A preferred shares for nominal consideration. As a result, there will a balance of $2.5 million owed by the company bearing interest at a rate of 12-1/2 percent per annum, repayable over a period of eight years. Shareholders' equity in the company has been increased to approximately $5.5 million.

In addition, SEDCO has guaranteed a bank operating credit for up to $1 million.

Although the company is still operating in a loss position, we expect to see improved levels of revenue in the next two quarters and resulting improvements in financial performance. The company continues to pursue the identification of a strategic partner who would provide financial strength to the organization.

GLEN ROCK, NJ (APRIL 16) PR NEWSWIRE - Citizens First Bancorp, Inc. (AMEX: CFB) announced today that it has increased its provision for loan losses for the first quarter of 1990 to $5,000,000.00, an increase of $3,350,000.00 from the provision made in each quarter of 1989, and intends to make a similar provision for the second quarter of 1990.

Chairman Richard G. Kelley stated that Citizens has been continuously reviewing its loan portfolio in view of the existing economic and regulatory environment. Citizens feels that this action is appropriate, given the continued softness in the New Jersey real estate market and the more stringent examination guidelines of the regulatory agencies.

Kelley stated that the institution intends to continuously review its loan portfolio in light of the economic and regulatory conditions prevailing from time to time and to make further adjustments from time to time, if required.

Citizens expects to maintain its current dividend policy and does not believe that these actions will affect its dividend.

Kelley announced that net income for the first quarter of 1990 totaled $6,530,000, a decrease of 29.7 percent from the $9,283,000 reported for the same period in 1989. Fully diluted net income per share was $.29 compared with $.41 for the comparable period last year.

As of Mar. 31, 1990, total assets amounted to $2,974,029,000 and total deposits were $2,653,827,000. These amounts were 10.4 percent and 11.3 percent over the respective figures for 1989.

Citizens First Bancorp is a one-bank holding company for Citizens First National Bank of New Jersey. As of Mar. 31, 1990, the bank had 51 branch locations located in Bergen, Passaic, Morris, Hudson and Ocean Counties.

PASADENA, CA (APRIL 16) PR NEWSWIRE - Conversion Industries Inc. (AMEX: CVD) today reported results for the first quarter ended Feb. 28, 1990.

Revenue for the period was $1,407,512, up dramatically from $373,604

recorded during the same period one year ago. Income before income taxes increased more than 90 percent to $218,412 versus $113,742 during the first quarter of fiscal 1989. Net income was $87,059, or 4 cents per share, as compared to $113,682, or 5 cents per share.

McGrain noted that during the first quarter the company announced its intention to acquire Coast Machinery Movers, a privately held company that generated approximately $10 million in revenue and $700,000 in net cash flow during 1989. This transaction was effective March 30, subject to shareholder approval.

Conversion Industries Inc. is a fully integrated independent power producer. The company holds a 52 percent equity position in Calgary, Alberta-based Colin Energy Corp. (TORONTO: CN.), an oil and gas producer.

NORWOOD, MA (APRIL 16) PR NEWSWIRE - Analog Devices, Inc. (NYSE: ADI) today announced that it has reached a preliminary agreement in principle to purchase Precision Monolithics, Inc. (PMI) for $80 million in cash plus warrants to purchase one million shares of Analog Devices common stock at $12 per share. The purchase is subject to a number of conditions, including due diligence, regulatory approval and negotiation and approval of a definitive stock purchase agreement acceptable to both the board of directors of Analog and the owners of PMI.

PMI, which is headquartered in Santa Clara, Calif., had annual sales for

calendar 1989 of approximately $88 million and about 900 employees. The company is engaged in the development, manufacture and marketing of precision linear and mixed-signal integrated circuits. PMI is a privately held company jointly owned by Bourns, Inc. and members of the Bourns family.

With sales for fiscal 1989 of $453 million, Analog Devices is a leading manufacturer of precision high-performance integrated circuits used in analog and digital signal processing applications. The company also manufactures board-level products used in computerized data acquisition and measurement and control applications. The company employs approximately 5,000 people worldwide, and has manufacturing facilities in Massachusetts, North Carolina, the United Kingdom, The Philippines and Japan.

CHICAGO (APRIL 16) PR NEWSWIRE - Axa Midi Assurances and Hoylake Investments, Ltd. today asked for a continuance of no more than 60 days in deliberations now under way in six states on its bid for California- based

Farmers Insurance Group so that "modifications" can be made to the proposed transaction.

"This brief hold will allow us to adjust our transaction to answer the concerns expressed by U.S. regulators," said Claude Bebear, chairman and chief executive officer of Axa. "We are dedicated to relentlessly pursuing our bid for Farmers within the regulatory process in the U.S. This step is a positive development which will ultimately be in the best interest of Farmers and its policyholders."

The California Department of Insurance last week objected to the proposed plan for the Farmers acquisition, but according to Bebear, "After closer inspection of the California decision, we feel confident Axa can find solutions to the regulators' objections on the financing plan."

"California's ruling found that we are qualified to own Farmers; this is a major positive step in the right direction. The negative portion of the decision was based on the structure of our financial package; we are now addressing those concerns. We are confident that we are on course for a favorable conclusion," Bebear said.

Bebear continued, "When the modifications to the transaction are complete, we will submit them to the U.S. regulators for their consideration and ultimate approval. We are very confident that this is the most efficient and expeditious way for Axa and the regulators to proceed with the best interest of the policyholders in mind.

"We have contended since the launch of our bid that Farmers and its policyholders would find greater benefit in being part of an international insurance group than in continued ownership by a tobacco conglomerate," Bebear said. "We are simply asking for time to structure the transaction in a way that will meet regulatory approval."

Hoylake Investments, Ltd. said today that the group is continuing to study the options available to it and plans to aggressively pursue its efforts in the United States.

Motions for continuance have been filed in Illinois and Idaho today. Illinois has conducted the most lengthy and extensive review of the planned acquisition, holding approximately 40 days of hearings and compiling more than 10,000 pages of testimony and depositions.

Similar applications for continuances will be filed in Oregon, Washington and California, where hearings have been held. A hearing is currently underway in Texas, and Axa will ask that the proceedings there also be continued. The applications for continuances will ask that the records of the proceedings remain open until Axa and Hoylake submit their modifications for consideration.

Axa, France's third largest insurance company with more than $8 billion in premium revenues, operates insurance and reinsurance companies in the United States and Europe, including Great Britain, West Germany, Belgium, Italy and Spain. In the United States, Axa operates Axa Re, a reinsurance company based in New York.

#90106p3085 04/16/1990 ~PR Newswire

LANSING, MI (APRIL 16) PR NEWSWIRE - The Michigan Department of State announced today that more than 161,000 owners of certain GM vehicles manufactured between 1984 and 1989 must now comply with the federal auto exhaust testing (AET) program.

Since 1986, these select vehicles were exempt from the annual AET requirement because they were incompatible with equipment used in the testing process. Last year, 161,663 incompatible vehicles in the tri-county area were granted waivers.

However, effective May 1, 1990, all AET stations will have up-to- date equipment capable of sampling most of the previously waived vehicles. Owners of these vehicles should be aware that they will probably need an AET certificate before they will be allowed to renew their vehicle registration in 1990.

Only about 11,200 vehicles will be waived from AET requirements after May 1.

Vehicle owners who have had the AET waived in the past should open their computer-prepared registration form as soon as it arrives from the secretary of state, about eight weeks before the tabs expire (owner's birthday).

If an AET is required, the application will say: "AET TEST MAY BE NEEDED." If a waiver is granted for the coming year, the message will read: "AET TEST WAIVER - EXPIRES ON 5/1/91."

Cars previously waived which are now required to get an AET include certain 1984 or newer model GM vehicles, including those with the Quad 4 engine.

A very small percentage of 1983 Buicks, Chevrolets, Oldsmobiles, Pontiacs, 1984 Bronco II, and 1984 and 1985 Honda Preludes are still incompatible with AET sampling equipment and will be granted an AET waiver for 1990.

Motorists with questions about the waiver may call the Bureau of Automotive Regulation AET information line, 313-569-5080, Monday through Friday, from 8 a.m. to 5 p.m.

The Department of State's Bureau of Automotive Regulation has administered the AET program for the U.S. Environmental Protection Agency (EPA) since 1985. Michigan's AET program affects only motorists in Wayne, Oakland and Macomb counties.

#90106p3096 04/16/1990 ~PR Newswire

WASHINGTON (APRIL 17) PRNEWSWIRE - The Association of Professional Flight Attendants (APFA) announced today that it has asked the U.S. Department of Transportation (DOT) to withhold final approval of Eastern Air Lines' proposed Latin American route transfer to American until DOT can assess the labor issues arising from this transaction. APFA represents the 17,000 flight attendants at American Airlines.

The APFA submission to DOT cites specific concerns over American's plan to hire some 230 foreign nationals currently employed as flight attendants on Eastern's Latin American routes in alleged violation of APFA's contract with American. The submission also accuses American of withholding important labor-related information required by the department.

American has rejected APFA attempts to jointly resolve the issue with the company. Among its proposals, APFA offered to withhold its objection to the 230 flight attendants staying on the job until their status is resolved in future legal proceedings.

APFA President Cheryle Leon stated: "Beyond the issue of our contract with American and the loss of our members' jobs, we are concerned American's action is aimed at undercutting the safety, training, wage and benefit standards the APFA has won over the years for its members and the flying public."

APFA cited American Airlines Chairman R.L. Crandall's own words to support the claim that further DOT review of the proposed route transfer is necessary. Commenting to the FAA in January 1988 about problems which result from the transfer of safety-sensitive work abroad, Crandall stated that domestic crew member training suffers as work shifts overseas to foreign personnel.

According to Leon, "American's action is part of the company's general drive to force out more highly paid veteran flight crew members and fill their jobs with lower-paid new employees or, in this case, foreign

nationals working at sub-standard wages. In fact," said Leon, "in a letter to APFA, American brazenly asserts its right to increase the number of non-APFA foreign national flight attendant crews flying on American Airlines at lower pay than American's U.S. flight attendants.

"APFA will not stand for discrimination in any form," said Leon. "Last week, the EEOC filed a lawsuit against American for using weight standards as an excuse to fire older flight attendants. APFA will continue such actions to defend its own members and our professional co- workers -- including those from foreign countries."

REGINA, SASKATCHEWAN (APRIL 16) PR NEWSWIRE - Westbridge sold a portion of its data entry business to one of its managers, creating a small, specialized technology company in Regina, Grant Gayton, Westbridge's Vice President, Saskatchewan Region announced today.

Donna Brown, former Manager of Operations Support, has purchased the hardware, data entry systems, and customer base from Westbridge. The branch's 24 existing full and part-time employees will work for the new company.

As a result of the sale, Westbridge will no longer provide data entry services unless the service is part of an existing or new Facilities Management or a security sensitive contract.

The data entry business involves the preparation of information for computer processing. Donna Brown expects to expand the business to include consulting for customers to determine the most economical and efficient input and output methodologies for customers' computer applications.

Westbridge is one of Canada's leading single-source suppliers of corporate computer solutions, with offices in nine Canadian markets and two U.S. markets.

MIAMI (APRIL 16) PR NEWSWIRE - Florida Power & Light Company's board of

directors today approved the establishment of a separate nuclear division of the utility and appointed two veteran executives to lead it.

The board authorized the new division to better focus the company's resources on nuclear activities. Jerome H. Goldberg, executive vice president of the nuclear energy department, was appointed president of the nuclear division. Kenneth N. Harris, site vice president of FPL's Turkey Point nuclear plant, was appointed senior vice president-nuclear operations.

Goldberg, who has 34 years of nuclear industry experience, will continue to report to FPL President and Chief Operating Officer Robert E. Tallon. Goldberg also remains an executive vice president of the utility. Harris, a 20-year FPL nuclear power veteran, continues to report to Goldberg in the new organization.

Others reporting to Goldberg are James E. Geiger, vice president-nuclear assurance; Robert J. Acosta, acting vice president-nuclear engineering and licensing and C. Ash Pell, director-nuclear administrative services. In addition to his new duties, Harris will continue his responsibilities as Turkey Point site vice president.

FPL is one of the nation's largest investor-owned utilities and is the principal subsidiary of FPL Group, Inc. (NYSE: FPL).

#90106p3113 04/16/1990 ~PR Newswire

LOS ANGELES (APRIL 16) PR NEWSWIRE - At a meeting held today at the request of Giancarlo Parretti, president, and Yoram Globus, co- president, Pathe Communications Corp. (NYSE: PCC), with Chaim Mizrahi, chairman of the Jewish Defense League and Jewish Peace Corps and all its affiliates and chapters, Parretti and Globus expressed their dismay with respect to the article which appeared in the Los Angles Times, Business Section, on April 13, 1990, (as well as the article that appeared in Business Week, April 23, 1990) misquoting Parretti as an alleged anti- Semitic as well as other misrepresentations. The meeting was also attended by Alan Ladd Jr. co-chairman, Pathe Communications Corp., and chairman, Pathe Entertainment Inc., and Jay Kanter, president, Pathe Entertainment Inc.

Following the meeting, Mizrahi stated, "I believe the allegations contained in the newspaper and magazine to be 100 percent false. I have nothing but the highest respect towards Mr. Parretti."

Parretti stated, "I am not an anti-Semitic. At no time in my life have I

expressed any views or opinions against the Jews. During the 1940s, my grandfather was a member of the National Socialist Party in Italy which was the number one party against anti-Semitism. I later joined the party. During the Nazi occupation in Italy, Jews stayed at our home. We have always been very proud of our association. Many of the company's employees in the United States and Europe are Jewish. I enjoy working with all the employees of the company, regardless of race, religion or creed, and it is my intention that together we shall all build a leading entertainment company throughout the world. It is my hope that everyone shall live in peace and harmony."

Globus, co-president, Pathe Communications Corp., reiterated that he himself is Israeli-born and Jewish. His family suffered a great deal as a result of the Nazi terror during World War II. He served Israel as an officer in the Army and is very proud of his country as well as the United States where he has also obtained citizenship. Globus stated, "I have been associated with Mr. Parretti as a partner and friend for over five years. I spend between 10-15 hours a day working with the man and at no time has he displayed anti-Semitic or racial behavior toward myself or anyone else. His behavior is quite the opposite. On three occasions, Giancarlo joined me on my visits to Israel. He loves and supports the country. We are currently shooting a picture entitled "Not Without My Daughter" starring Sally Field in Israel and have future plans to shoot more motion pictures in Israel. He is also responsible for financing the motion picture "Bernadette," a Catholic story, as well as "Hanna's War" and "The Rosegarden," both of which are Jewish stories. I would also like to point out that he served on the Tribute Committee last September at a dinner held by the B'Nai B'rith at which I was honored. Additionally, he has contributed extensively to many Jewish organizations."

Globus further stated, "Mr. Parretti believes in people. He respects every religion and believes in peace. His goal is to help the entertainment industry, which is not an easy industry, by building an important, successful entertainment company in the United States and European community. We are very close to achieving this goal. This is why we feel such resentment toward those persons who attempt to disturb us from making this happen."

#90106p3116 04/16/1990 ~PR Newswire

PITTSBURGH (APRIL 16) PR NEWSWIRE - National Intergroup Inc. (NII), (NYSE: NII) today announced that it believes the Centaur Group consent solicitation to amend NII's by-laws in order to give Centaur an opportunity to pack the NII board at the next annual meeting has failed to receive the necessary support of NII's shareholders.

According to an announcement by Centaur, the dissidents received the votes of only 29 percent of NII's 21.8 million outstanding shares, excluding the 25 percent owned by the Centaur Group and Walker Street (another dissident shareholder who appears to be acting in concert with Centaur).

These numbers are before giving any effect to the revocations of consent already received by NII. These numbers indicate that the dissidents received the support of substantially less than a majority of the independent shareholders and far less than the 80 percent vote which the Delaware chancery court has held is required to effect the amendment. Centaur is appealing that court case.

Howard M. Love, NII's chairman and chief executive officer, said that "while the results are not yet official, we are confident that the final outcome will confirm our victory. We continue to learn a lot in our discussions with many of our shareholders.

"It is clear they want a greater voice in shaping the policies of their company and now that the consent solicitation is behind us, we intend to be responsive to the concerns we've heard. Many shareholders have also told us that they support our program to enhance shareholder value by emphasizing NII's distribution businesses while continuing to divest, at favorable prices, our non-core assets.

"We thank all shareholders who participated in the voting for their keen interest in the future of NII. We are determined to continue to represent

the interests of all shareholders and to pursue policies intended to maximize the value of their investment in the company," Mr. Love concluded.

#90106p3124 04/16/1990 ~PR Newswire

WASHINGTON (APRIL 16) PR NEWSWIRE - To commemorate Earth Day, April 22, Giant Food Inc. (AMEX: GFS.A) has developed a number of new environmental projects.

Giant's initiatives will focus on the placement of plastic bag recycling bins at many of the company's 150 stores; the testing of recycling centers on four Giant parking lots for the collection of plastic beverage containers and metal cans; testing fleet vehicles running on compressed natural gas; initiating an office white paper recycling program at the company's administrative headquarters buildings in Landover, Md., and producing a new, consumer brochure entitled "Plastic or Paper? ... There are no Easy Answers."

"There are no easy solutions to many of the environmental problems we face as retailers. However, we feel that there are many small steps that we can take that will have a positive impact upon preserving and protecting our environment. As we learn more, we hope to expand many of the programs we are now publicly announcing," commented David Richman, vice president of quality assurance and chairman of Giant's Environmental Task Force.

Following is an explanation of Giant's new initiatives plus a review of other existing Giant environmental programs.

-- Plastic Bag Recycling -- The company will soon place recycling bins to collect used, clean and empty plastic grocery bags at 30 store sites throughout Virginia, Maryland and the District of Columbia. Giant will collect used plastic shopping bags, bale them, and forward the plastic bales for recycling. (The store locations are below.)

-- Store Recycling Centers -- Giant will place special recycling receptacles at four test store sites for the collection and recycling of plastic soft drink, bottled water and milk containers as well as metal, aluminum and steel cans. Giant has purchased special fiberglass recycling containers and will place them at the following store sites so that consumers may voluntarily drop off plastic containers and metal cans for recycling:

Montgomery County, Md.: -- 12051 Rockville Pike, Rockville -- In cooperation with B.F. Saul Company.

-- 8750 Arliss St., Silver Spring Prince George's County, Md.: -- 13600 Laurel - Bowie Road, Laurel -- 6451 Marlboro Pike, District Heights -- In cooperation with the B.F. Saul Company.

-- Compressed Natural Gas Van -- Giant has purchased a short-haul van and has converted it to operate with natural gas. Giant will be testing this vehicle and several other corporate fleet vehicles using natural gas as a fuel. Natural gas is less expensive than gasoline and is reported to produce less environmental contaminants.

-- Office White Paper Recycling -- At Giant's corporate headquarters in Landover, the company's 1,500 administrative staffers will soon begin to recycle white office paper. Throughout the company's three Landover office buildings, Giant will provide special receptacles on desks and encourage associates to recycle white paper. The company will also shortly begin to use recycled corporate stationery and print Giant's bi-monthly newspaper on recycled paper.

-- "Plastic or Paper?" Consumer Brochure -- In order to address many questions that the company has been receiving from customers and to explain some of the complexities involving environmental issues, the company has published a new brochure entitled "Plastic or Paper? ... There are no easy answers."

#90106p3134 04/16/1990 ~PR Newswire

DETROIT (APRIL 16) PR NEWSWIRE - FirstFed Michigan Corporation (NASDAQ-NMS: FFOM), the holding company of First Federal of Michigan, today reported net earnings of $6.7 million for the quarter ended March 31 1990, a 45-percent increase from $4.6 million for the comparable period last year. On a per-share basis, net earnings this quarter were $.60 ($.57 fully diluted), vs. $.42 ($.41 fully diluted) in 1989.

First-quarter earnings brought FirstFed's stockholders' equity to $442.4 million, up from $437.4 million at year-end 1989. Book value per share increased $.45 in the period to $39.99.

FirstFed's wholly owned subsidiary, First Federal of Michigan, meets all current regulatory capital requirements, with a tangible ratio of 2.90 percent, a leverage ratio of 3.42 percent, and a risk-based ratio of 10.07 percent.

Net yield on interest-earning assets improved to .92 percent at March 31, 1990, from .75 percent at year-end 1989. Net interest-earning assets exceeded interest-bearing liabilities by $480 million at March 31, 1990, compared with $438 million at Dec. 31, 1989.

As a result of this continued improvement in net yield, net interest income increased 73 percent from the year-ago quarter to $25.5 million.

General and administrative expenses were $26.0 million, compared with $23.7 million for the first quarter of 1989. This year's expenses include the accelerated amortization of $1.9 million in goodwill related to the company's office in Kenner, La., which will be phased out during the second quarter. On an annualized basis, operating costs for the first quarter including the accelerated amortization of goodwill were only .91 percent of average assets.

Results for the first quarter of 1990 included $7.5 million in fees on standby mortgage-backed security commitments, vs. $2.5 million in such fees a year ago. Gains on sales of loans and securities declined to $1.5 million from $12.5 million in the 1989 quarter. Last year's gains were primarily from FirstFed's sale of its Federal Home Loan Mortgage Corporation preferred stock.

Assets at March 31, 1990, were $11.5 billion, virtually unchanged from the end of last year.

FirstFed's portfolio of loans and mortgage-backed securities totaled $8.8 billion at March 31, 1990, vs. $9.0 billion at the end of last year. It was divided nearly equally among adjustable rates, fixed rates with terms of 15 years or less, and fixed rates with terms of 20 to 30 years. Non-performing assets at the end of the first quarter were .22 percent of

total assets, far below the industry average.

The company originated mortgage loans totaling $141 million during the first quarter of 1990, compared with $138 million in the same period last year.

FirstFed Michigan Corporation will pay a first-quarter dividend of $.15 per share on May 16 to common stockholders of record on April 11. The company has declared consecutive quarterly dividends since the first quarter of 1986.

#90106p3152 04/16/1990 ~PR Newswire

BIRMINGHAM, AL (APRIL 16) PR NEWSWIRE - Torchmark Corp. (NYSE: TMK) reported today that net income per share, excluding realized investment gains, for the first quarter of 1990 was $1.07, up 16 percent from $0.92 for the same period in 1989.

Realized investment gains for the first quarter of 1990 were $0. 04 per share, compared to $0.01 per share for the first quarter of 1989.

R.K. Richey, chairman and CEO, stated that net income for the first quarter increased 17 percent from $51.6 million in 1989 to $60.4 million in 1990. Net income, excluding realized gains, for the first quarter grew 13 percent from $51.1 million in 1989 to $57.9 million in 1990.

Total revenue for the first quarter increased 9 percent to $437.4 million over the same period last year. Individual health premiums rose to $183.5 million, representing a 6 percent increase over the first quarter of 1989. Individual life premiums grew 10 percent to $91 million. Net investment income increased 16 percent to $83.8 million. Financial services revenue reached $28.2 million, a 7 percent increase from the first quarter of 1989.

#90106p3161 04/16/1990 ~PR Newswire

BIRMINGHAM, AL (APRIL 16) PR NEWSWIRE - United Investors Management Co. (NYSE: UTD) reported today that net income per share for the first quarter of 1990 was $0.40, up 25 percent from $0.32 for the same period in 1989.

R.K. Richey, chairman, stated that net income for the first quarter

increased from $12.2 million in 1989 to $15.3 million in 1990. Net income excluding realized gains and losses, for the first quarter rose 23 percent from $12.3 million in 1989 to $15.1 million in 1990.

Financial services revenue in the first quarter of 1990 grew to $28.5 million, a 7 percent increase over the same period in 1989. This increase was led by a 12 percent growth in investment product sales. Oil and gas revenue reached $8.3 million, up from $3.8 million in the first quarter of 1989. Premium income increased 2 percent from $11.6 million in the first quarter of 1989 to $11.8 million in 1990. Net investment income grew by 23 percent to $12.5 million in the first quarter of 1990 over the same period in 1989, due primarily to a larger amount of annuity funds available for investment.

At Mar. 31, United Investors Management Co.'s total assets were $934 million, total shareholders' equity was $347 million, and life insurance in force was $14.1 billion.

#90106p3175 04/16/1990 ~PR Newswire

CHICAGO (APRIL 16) PR NEWSWIRE - Morton International (NYSE: MII) today reported net income for the quarter ended March 31, 1990, of $39.1 million ($.82 per share) compared to $9.7 million ($.20 per share) in last year's third quarter. The prior year's quarter included $25.0 million ($.52 per share) of after tax unusual charges. Before unusual charges, net income per share was $.72 for the quarter ended March 31, 1989. The unusual charges related to the separation of Morton International from Thiokol

Corp. as well as provisions for the phase-out of a chemical operation and certain environmental costs. Morton International became a separate company on July 1, 1989.

Net sales for the quarter were $447.1 million, up 12 percent over last year's $400.1 million.

Nine months net income was $98.5 million ($2.05 per share), approximately equal to last year's income of $98.8 million ($2.06 per share) before unusual charges. Net sales for the first nine months were $1.21 billion, 13 percent ahead of last year's $1.07 billion.

Morton's Chairman and Chief Executive Officer Charles S. Locke said, "Our third quarter results reflect the continued strong performances of our salt and airbag businesses and improvement from our specialty chemicals business. Although still negatively affected by weakness in the electronic and automotive industries, overall specialty chemical results improved compared to the first two quarters."

Specialty chemicals group sales for the quarter increased 6 percent to $255.9 million. Profits were $36.3 million compared to $30.8 million in the prior year's third quarter after a $6.0 million charge for the phase-out of a chemical operation. Before the charge, profits declined 2 percent.

Several product groups recorded higher sales and earnings for the quarter. Packaging adhesives sales rose on the strength of volume increases, particularly in the graphic arts and adhesives product lines. The thermoplastic polyurethane business continued to perform well with the addition of Sandoz-Quinn's TPU business acquired in last year's fourth quarter. Reducing agents also performed exceptionally well as a result of new business in the United States and increased sales in Europe. PVC additives and biocides also posted sales gains for the quarter.

However, continued weaknesses in the electronic chemicals and liquid coatings product areas caused profits to decline for these two product groups. New product introduction costs also contributed to the shortfall in electronic chemicals.

Lower raw material prices continued to benefit margins of certain product lines in the third quarter such as water-based and liquid polysulfide polymers.

Salt group sales increased 3 percent to $150.6 million in the quarter while earnings of $30.2 million, up 30 percent, were a record for the third quarter. Improved pricing on all salt products contributed to the excellent results. Ice control sales accounted for most of the quarter's sales increase although sales of non-ice control products also rose, led

by System Saver water conditioning products.

Inflatable Restraint Systems, or airbags, more than tripled quarterly sales to $40.6 million on increased shipments. Most of the sales increase was in the module line, the units which contain the inflator, airbag and cover for the center of the steering wheel, compared to sales of the inflator only. This business segment reported $3.6 million of income for the quarter compared to the prior year's third quarter loss of $1.0 million.

Morton International is a Chicago-based manufacturer and marketer of specialty chemicals, salt and automotive inflatable restraint systems.

NEW YORK (APRIL 16) PR NEWSWIRE - Jennifer Hillings Epstein has been named communications director of Time Magazine, it was announced today by Louis A. (Chip) Weil III, publisher of Time Magazine U.S. and senior vice president of the Time Inc. Magazine Company.

In this newly created position, Epstein will be responsible for the full range of Time Magazine's communications efforts, including public relations and public affairs activities. She will report to Chip Weil.

In making the announcement, Weil said, "We're delighted to have a professional of Jennifer's talent, energy and experience join TIME. Her role will be key as we move into the 1990's and continue to communicate how valuable Time Magazine is to its many audiences."

Epstein comes to Time from American Express where she had been vice president of public affairs in travel related services. In that post, she had been responsible for public affairs, public relations and communications within the direct marketing and travelers cheque division. Her assignment at American Express included working with the company's publishing, merchandise services and insurance areas.

Prior to joining American Express, Epstein was manager of public affairs with the New York Stock Exchange. Her earlier career included a number of senior press relations posts in politics. She's been a press secretary for the California State Senate, the California Reagan for President Campaign in 1980 in Los Angeles, and for the Republican National Committee in Washington, D.C.

WATERBURY, CT (APRIL 16) PR NEWSWIRE - Webster Financial Corporation (NASDAQ: WBST), holding company for First Federal Savings and Loan Association of Waterbury, reported net income of $608,000 or 17 cents per share for the quarter ended March 31, 1990, compared to earnings of $1,208,000 or 34 cents per share for the same period last year.

The board of directors voted a regular quarterly cash dividend of 13 cents per share payable on June 15, 1990 to shareholders of record on May 18, 1990. Webster also announced that its annual meeting will be held on May 31, 1990 at 4 p.m. at the Elton Ballroom in Waterbury. Shareholders of record as of April 20, 1990 will be entitled to vote at the meeting.

The lower earnings are primarily due to an $800,000 increase in the allowance for loan losses and $450,000 charged to noninterest expense relating to costs associated with the proposed merger with Eagle Financial Corp. (AMEX: EAG), which was terminated by mutual agreement on April 6, 1990. These charges were partially offset by a $672,000 gain on sale of securities.

The allowance for loan losses at March 31, 1990, was $3.8 million and equalled 29 percent of nonperforming assets. As previously announced, nonperforming assets increased to $13.0 million at March 31, 1990, from $8.0 million at Dec. 31, 1989. The ratio of nonperforming asset to total assets was 1.86 percent at March 31, compared to 1.13 percent at year end.

The $13.0 million of nonperforming assets consists of $11.5 million of commercial real estate loans and $1.5 million of residential mortgage loans, consumer loans and real estate owned. The nonperforming commercial loans consist of two subdivision land loans totaling $6.3 million and a commercial construction loan in the amount of $5.2 million. Reserves have been provided for the three commercial properties based on independent appraisals obtained in the first quarter of 1990.

At March 31, 1990, Webster reported total assets of $699 million and shareholders' equity of $69 million or $19.58 per share based on 3,525,559 outstanding shares.

#90106p3192 04/16/1990 ~PR Newswire
ST. PAUL, MN (APRIL 16) PR NEWSWIRE - The U.S. Equal Employment Opportunity Commission (EEOC) today filed a motion in U.S. District Court to join an age discrimination lawsuit against IDS Financial Services Inc.,

a subsidiary of American Express Co.

The EEOC joins 32 other plaintiffs in a class-action age discrimination lawsuit seeking more than $100 million in damages from IDS.

"The plaintiffs are very pleased with the decision by the EEOC to join the class-action suit. The EEOC action indicates the strength of the plaintiffs' case," said Stephen Snyder, a partner with the St. Paul law firm of Winthrop & Weinstine representing the 32 plaintiffs.

Snyder added that this lawsuit, which seeks in excess of $100 million in damages, is one the largest age discrimination class actions in the country. In its suit, the EEOC alleges that after the American Express acquisition in 1984, IDS engaged in a willful pattern and practice of age discrimination against its older division sales managers.

According to the original age discrimination complaint filed January, 1989 in U.S. District Court, the plaintiffs are among more than 80 division sales managers who were either terminated, demoted or forced to retire. Most of the plaintiffs had spent more than 20 years with IDS.

#90106p3199 04/16/1990 ~PR Newswire

CHATTANOOGA, TN (APRIL 16) PR NEWSWIRE - Constar International Inc. (NYSE: CTR) today reported net income of $4.3 million, up 22 percent from a year earlier. Fully diluted earnings per share for the three-month period were $.58, equal to that of the comparable prior year period. Sales for the quarter of $124 million were 9 percent behind a year ago.

Charles F. Casey, Constar's chairman and chief executive officer, said that while management was pleased that net income reached a record level versus any prior year's first quarter, they were disappointed that soft drink unit sales in certain sizes were behind last year's first- quarter levels. Despite the substantial rise in net income, earnings per share were equal to last year because of an increase from 6.2 million in 1989 to 7.5 million in the average number of common shares used in calculating EPS in this year's first quarter.

Casey said that lower sales resulted mainly from a decline in sales prices reflecting a pass-through to customers of the drop in resin costs experienced throughout 1989. Also contributing to the lower sales was the

decline in certain unit sales to soft drink bottlers. As a result of the lower sales, operating profit was slightly behind that of a year ago. This was more than offset by lower corporate and interest expense and a $.03 per share contribution to earnings from Constar's foreign joint venture, Wellstar.

ANCHORAGE, AK (APRIL 16) PR NEWSWIRE -- As Exxon prepares to resume cleanup operations in Prince William Sound and the Gulf of Alaska, shoreline surveys of areas affected by last year's oil spill show that recovery "is coming along much faster than any of the experts have predicted."

This was the message provided today by Otto Harrison, general manager of Exxon Alaska Operations, before the Anchorage Chamber of Commerce.

Harrison noted that wildlife surveys have provided promising evidence of healthy bird, fish and mammal populations in the Sound. In late January and February, Alaska Biological Research of Fairbanks Inc. counted more than 6,000 birds from 45 species, including more than 225 bald eagles which were sighted in previously oiled areas. More than 360 mammals representing 10 different species were also observed in the same areas. Also, the Prince William Sound herring fishing season got off to a good start with 6,900 tons caught within sight of Bligh Reef.

"In short, the biology message is good," Harrison said. "You can go to the shores of Prince William Sound, and along the Kenai, and in Kodiak, and you'll see abundant wildlife and a most encouraging growth of barnacles, clams, and snails."

A joint shoreline survey with state and federal governments found that only seven miles of shorelines have wide oiling -- greater than six yards -- down 75 percent from September. Harrison noted that even this oil is so thin and weathered that it will not hurt birds, otters, or seals. Shorelines with medium and narrow oil banding are down by nearly 40 percent, while shorelines with no oil have increased by more than 50 percent.

The surveys have shown that Exxon's clean-up efforts last year have been beneficial.

"In fact, the two worst places in Prince William Sound are two sites that we were not allowed to clean last year," the Exxon manager said. "While

these two sites have improved, they are not enjoying the dramatic improvement we are seeing in the rest of the shoreline."

Exxon continues preparations for this year's work program, and expects to begin deployment of small, highly mobile squads of workers around May 1. It is expected that work in Prince William Sound and the Gulf will require only a fraction of the number of people and boats used in last year's massive effort which involved nearly 12,000 workers and 1,400 vessels.

Harrison said, "Exxon has been here all winter, and we are here now to do what needs to be done that provides a net environmental benefit."

DENVER (APRIL 16) PR NEWSWIRE - AMDURA Corp. (NYSE: ADU) announced that it will solicit offers to purchase its hardlines businesses, CoastAmerica Corp., and its related subsidiaries, and the AMDURA National Distribution Co. (ANDCO). Any sales, if made, would be subject to approval of the Bankruptcy Court.

AMDURA filed for protection under Chapter 11 of the U.S. Bankruptcy Code on April 2, 1990 after it was unable to obtain additional credit from its bank group.

NEW YORK (APRIL 16) PR NEWSWIRE - The Bank of New York Company, Inc. (BNYCo.) (NYSE: BK) announced today that it had filed an application with the Federal Reserve Bank of New York for the acquisition of Northeast Bancorp, Inc. BNYCo. stated, however, that there is no assurance that a transaction with Northeast can be consummated because there has been no agreement on the book value or form of consideration. BNYCo. used a book value of $12.31 as of Dec. 31, 1989. The Bank's assessment of Northeast's book value was based on a thorough review of its loans, applying the methods BNYCo. uses for its own portfolio. Northeast's press release today raises concerns over further deterioration of its loan portfolio in the interim.

BNYCo. further stated that it had reiterated its advice to Northeast that, in view of these circumstances, Northeast should seek other bidders.

#90106p3227 04/16/1990 ~PR Newswire

BOCA RATON, FL (APRIL 16) PR NEWSWIRE - Finalco Group, Inc. (Finalco) directed under its new management team, which took over operational control on Apr. 8, 1988, is pleased to announce audited financial results for June 30, 1989, and current period results as of Dec. 31, 1989. For the period ending June 30, 1989, on revenues of $23,705,000, the company had pre-tax earnings of $144,000 or $0.024 per share as compared to revenues of $19,529,000 with a pre-tax loss of $11,915,000 from the previous year operations under prior management.

A concurrent 24 percent increase in revenues and decreases in expenses account for the company's first profitable year of operations since 1984. The profitable trend continues with the Dec. 31, 1989 operating results for the first six months of the current fiscal year yielding $227,000 of pre-tax earnings or $.037 per share on revenues of $8,794,000 on an unaudited basis.

Finalco sold its wholly owned subsidiary, Gemini Equities, Inc. (GEI) to Gemini Equities Limited Partnership, a Michigan limited partnership (the partnership) on Mar. 27, 1990 for a net purchase price of approximately $10,000,000. The general partners of the partnership consist of three members of the management team of Finalco. All shareholders of Finalco of record on the sale date are being offered an interest as limited partners in the partnership equal to their interest in Finalco at no cost to them.

The sale by Finalco to the partnership included the rights to manage the Gemini Income Funds held by Finalco and GEI as general partners, as well as related assets and future corporate opportunities.

The sale was designed to improve Finalco's balance sheet while concurrently separating the effects of Finalco's past losses from the future business of the Funds and avoiding corporate income taxes on partnership earnings, while at the same time providing for potential distributions from the Gemini operations.

#90106p3241 04/16/1990 ~PR Newswire

SANTA BARBARA, CA (APRIL 16) PR NEWSWIRE - Financial Corporation of Santa Barbara (NYSE: FSB), parent company of Santa Barbara Savings and Loan Association, announced that it realized a net loss of $60.3 million or

$10.01 per common share, for the year ended December 31, 1989, compared to a loss of $7.1 million, or $1.18 per common share, for the prior year. For the quarter ended December 31, 1989, the company realized a loss of $37.9 million, or $6.28 per common share, compared to a loss of $9.5 million, or $1.57 per common share for the same quarter in 1988.

Although the first quarter results of 1990 are not yet available, they will reflect the extraordinary gain of approximately $36 million, net of transaction costs and taxes, and the increase in tangible capital of approximately $50 million, resulting from the equity-for-debt exchange completed on January 8, 1990.

The company's loss for the year resulted from a combination of write-offs and reserves, balance sheet restructuring, and core operating losses.

The company had a write-off of preferred stock of a troubled financial institution in the amount of $12.1 million. The association owns the entire issue of these securities that were acquired in 1982 in connection with branch restructuring activities. The write-off was deemed necessary as a result of continued deterioration in the financial condition of that institution during the fourth quarter of 1989 . Goodwill of $10.1 million related to unprofitable financial centers was written off as part of a continuing effort to return the retail financial center network to profitability. The association recorded reserves of $12.3 million related to the write-down of corporate bonds attributable to the accounting treatment required as a result of the new FIRREA regulations.

Financial Corporation of Santa Barbara, with assets of $4.7 billion, is a financial services company. The company's principal subsidiary, Santa Barbara Savings and Loan Association, is Central California's oldest and largest savings institution, established in 1887; its deposits are insured by the Federal Deposit Insurance Corporation (FDIC).

#90106u0013 04/16/1990 ~United Press International

(APRIL 16) UPI - Len Dykstra made his second Opening Day just as productive as his first one on Sunday.

Dykstra, ignoring the pain from a strained muscle in his right side, went 4-for-4 and scored three runs to spark the Philadelphia Phillies to a 4-0 victory over the St. Louis Cardinals.

''It was tough,'' said Dykstra, who recorded the seventh four-hit game of his career. ''Even when my kids are playing, I can't just watch. I've got

to go out and play with them.''

Dykstra hurt himself in spring training, but was in the lineup last Monday night when the Phillies opened the season at Chicago, hitting a two-run homer before the game was wiped out by rain.

He also aggravated the injury, keeping him out of the next five contests.

''I had a good Opening Day in Chicago, but it didn't count,'' Dykstra said. ''I just hope my side can handle the pain. I felt it out there. It's very painful. I hope it doesn't get worse. If it stays like this, I can handle it,'' said the man they call ''Nails.''

Dykstra's offensive performance made things easier for Phillies starter Dennis Cook.

Cook, 1-0, scattered seven hits over 8 2-3 innings, striking out two and walking one as he moved from the bullpen into the rotation. Roger McDowell got the final out to earn his second save. Bryn Smith, 1-1, sustained the loss.

In other National League games Sunday, Pittsburgh edged Chicago 4-3 in 10 innings, Cincinnati pounded Atlanta 13-6, Los Angeles defeated Houston 5-4 in 10 innings, San Diego beat San Francisco 4-3 and Montreal knocked off New York 3-1.

In the American League, it was: Detroit 6, Baltimore 4; Toronto 5, Kansas City 4; New York 3, Texas 1; Oakland 3, Seattle 0; California 4, Minnesota 1; and Chicago 4, Cleveland 1. Milwaukee at Boston was wiped out by rain.

-- AROUND THE NL --

PIRATES 4, CUBS 3 (10 INNINGS)

At Pittsburgh, Sid Bream singled home Andy Van Slyke from second base with one out in the 10th inning for the Pirates. Bream's hit made a winner of Bob Patterson, 1-0, the fourth Pirates pitcher. Loser Les Lancaster, 1-1, allowed one run and two hits, walked one and struck out three in 1 1-3 innings.

REDS 13, BRAVES 6

At Atlanta, Eric Davis and Chris Sabo ripped three-run homers, keeping the Reds unbeaten in five games this season. Tim Birtsas, 1-0, the second of six Reds pitchers, picked up the win with 1 2-3 hitless innings. Braves starter Tom Glavine, 0-1, gave up nine hits over 6 2-3 innings, striking out four.

DODGERS 5, ASTROS 4 (10 INNINGS)

At Houston, Juan Samuel scored on Charley Kerfeld's wild pitch with one out in the 10th inning to lift the Dodgers. Jay Howell, 1-0, picked up the victory with two innings of relief, giving up two walks and striking out one. Kerfeld's record fell to 0-2.

PADRES 4, GIANTS 3

At San Francisco, Benito Santiago's two-out homer in the ninth inning extended the Padres' winning streak to five. With San Francisco leading 3-2, Joe Carter opened the inning with a double off reliever Steve Bedrosian, 0-1, and Santiago homered on an 0-2 pitch to make a winner of Greg Harris, 2-0. Bedrosian made his first appearance of the season after leaving the club last week to be with his 2-year-old son Cody, who was diagnosed with leukemia.

EXPOS 3, METS 1

At Montreal, Zane Smith and Tim Burke combined on a six-hitter and Nelson Santovenia clubbed his first home run of the season for the Expos. Smith, 1-1, went eight innings, giving up five hits and no earned runs, walking one and striking out seven. Burke pitched the ninth for his second save. Mets starter Ron Darling, 0-1, gave up seven hits and two earned runs over six innings.

(APRIL 16) UPI - Christian Americans celebrated Easter Sunday with traditional church services and family get-togethers. In New York, activists held an ecumenical service for the homeless. And in Wichita Falls, Texas, the Salvation Army conducted a ''drive-thru'' roof-top service for nearby motorists in parking lots.

Lithuanian Roman Catholics flocked to Easter masses Sunday and braced for a possible economic blockade by Moscow. The Baltic republic is 82 percent Catholic and one official said Soviet President Gorbachev's ultimatum would NOT be discussed on such an important day as Easter.

A hospital spokesman in New York says funeral services for actress Greta Garbo will be private. The 84-year-old actress died Sunday of an UNdisclosed illness at New York-Cornell Medical Center. A large crowd of reporters and fans are reported to be gathered in front of Garbo's East Side apartment building.

Anti-apartheid leader Nelson Mandela says he woN'T meet with British Prime Minister Thatcher during his visit to Britain. Mandela arrived in London Sunday for a rock concert in his honor at Wembley Stadium. Scheduled performers included Peter Gabriel, Tracey Chapman and Hugh Masakela.

(APRIL 16) UPI - 28 anti-nuclear protesters were cited for trespassing Sunday at the Nevada Test Site, the nation's testing center for nuclear weapons. About 75 demonstrators gathered near the test site entrance early in the morning for a religious service before beginning a peaceful march toward the gate. The 28 who were cited were held briefly in an outdoor compound and released.

Hundreds of family and friends gathered in a church in Englewood, New Jersey, Easter Sunday for the wake of a black teen-ager, slain last week by a white police officer. Phillip Pannell was killed Tuesday night by an officer who says the youth was armed and refused to surrender. A gun was found on the dead youth. The officer has been suspended pending an investigation.

(APRIL 16) UPI - Three years ago, the Washington Capitals suffered the worst loss in franchise history on Easter, losing in the fourth overtime period to the New York Islanders after blowing a three-games-to-one series lead.

The Capitals created a new Easter anniversary for themselves Sunday by completing their upset of the New Jersey Devils in the preliminary round of their Stanley Cup Championship series.

Goaltender Don Beaupre was the difference in a 3-2 Capitals victory that enabled Washington to eliminate the Devils in six games. The New York Rangers won their series 4-1 and will face the Capitals in the Patrick Division finals beginning Thursday at Madison Square Garden.

The game was one of three played in the Wales Conference Sunday. In the Adams Division, Montreal eliminated Buffalo with a 5-2 victory, and Hartford staved off elimination with a 3-2 overtime triumph over Boston. Montreal will play the winner of that series in a best-of-seven series beginning Thursday.

The Campbell Conference resumes play Monday night with Winnipeg at Edmonton and Minnesota at Chicago. Both of those series are tied 3-3 and will be decided by Monday's Game 7.

St. Louis will play the winner of the Minnesota-Chicago series, and Los Angeles will play the winner of the Winnipeg-Edmonton series, beginning Wednesday.

-- AROUND THE NHL --

PATRICK DIVISION

CAPITALS 3, DEVILS 2

At Landover, Md., Beaupre stymied the Devils early and kept Washington in the game, stopping 32 shots, including several point-blank blasts in the wide-open first period.

Steve Leach gave Washington a 1-0 lead with 11 seconds left in the period after a giveaway by Devils defenseman Viacheslav Fetisov, and Geoff Courtnall and John Druce scored second-period goals for the Devils.

''We had the chances, but we didn't score on (Beaupre),'' New Jersey Coach John Cunniff said. ''He came through for them. It wasn't meant to be for us.''

Beaupre came up big again at the end of the game when the Devils pressed furiously for the tying goal but were denied repeatedly, including on a 66-second power play in the last three minutes.

''The intensity level and hard work that both teams put into that game tonight was incredible,'' Murray said. ''The last seven or eight minutes of the game, that's something that we're going to look back on and just break it down as a highlight tape. It was such a good job. I'm really proud of the players.''

Cunniff also praised his players after the game.

''This team had quite a year for themselves. They (his players) broke all kinds of franchise records. I only see better things ahead for them. We have a terrific nucleus of guys.''

ADAMS DIVISION

CANADIENS 5, SABRES 2

At Montreal, Russ Courtnall scored a pair of goals and rookie Mathieu Schneider scored a goal and assisted on another to lead the Canadiens.

Schneider gave Montreal a 1-0 lead at 9:00 of the first period with a power-play goal, and Courtnall put in the final two goals for the Canadiens.

Brent Gilchrist and Claude Lemieux also scored for the Canadiens, while Rick Vaive and Dave Andreychuk tallied for the Sabres.

''Before the game I told the players that we needed scoring from players other than Stephane Richer, who had scored most of our goals,'' Montreal Coach Pat Burns said. ''They shadowed Richer pretty well tonight, but four other guys scored for us. Courtnall helped us win this game with his sheer speed, especially when he put the game away with our fourth goal.''

The Canadiens announced before the game that defenseman Chris Chelios, out 26 games with damaged knee ligaments, has resumed skating and could return for the next series.

WHALERS 3, BRUINS 2, OT

At Hartford, Conn., Kevin Dineen scored at 12:30 of overtime to keep the Whalers alive in the first Stanley Cup playoff series between the two New England teams.

The deciding game of the best-of-seven Adams Division semifinal will be played Tuesday night in Boston.

The two teams plodded through a sluggish overtime session before Dean Evason gloved Brian Propp's clearing pass, dropped the puck to ice and sent a sweeping backhand pass to Dineen in the slot. Dineen redirected the pass between the legs of Andy Moog for his third playoff goal.

Scott Young and Ron Francis also scored for the Whalers, who had dropped two straight one-goal games to the Bruins to reach the brink of elimination.

''We feel we can win this,'' Dineen said. ''It doesn't bother us going to Boston because we play well on the road. We know we'll need a great effort.''

Boston's Randy Burridge forced the overtime when he scored an unassisted goal 1:05 into the third period. The left wing hustled after a loose puck behind the net, used Bob Sweeney as a screen and banked a low shot that deflected of defenseman Brad Shaw's skate and past goaltender Peter Sidorkiewicz.

#90106u0190 04/16/1990 ~United Press International

(APRIL 16) UPI - New England winters continue to be harsh on the New York Knicks.

Reggie Lewis scored 12 of his season-high 34 points in the fourth quarter

Sunday, helping the Boston Celtics rally from a six-point deficit to take a 101-94 victory over the Knicks.

The loss was New York's 25th straight against the Celtics in New England, having dropped their last 24 in a row at the Boston Garden and one at the Hartford Civic Center. The Knicks' last victory at the Boston Garden came on Feb. 29, 1984.

''You have to feel good about the fact that we're finding ways to win basketball games,'' Boston's Kevin McHale said. ''We weren't doing that earlier in the season. If we were down four or five, we seemed to lose by four or five. We never seemed to find a way to stop the other team and make a surge.''

New York and Boston likely will meet in the first round of the playoffs, leaving the Knicks still searching for the secret to a win in New England.

''It looks like the playoffs have already started,'' Boston Coach Jimmy Rodgers said. ''That was playoff atmosphere out there. If it's any indication of what's to come, it should be interesting.''

By winning, the Celtics clinched the homecourt advantage for the first round of the playoffs. Boston can finish no worse than fourth in the Eastern Conference and still has a chance to win the Atlantic Division title should the Philadelphia 76ers falter down the stretch.

The Celtics, 49-29, trail Philadelphia, 51-28, by 1 1/2 games. The two teams meet in the April 22 season finale in Philadelphia.

Lewis hit 12 of 18 field-goal attempts and snapped a 91-91 tie with 2:06 left in the game by hitting a 20-foot jumper. Lewis added four free throws in the next minute, pushing Boston's lead to 97-93.

''He's one of the most underrated players in the league,'' New York Coach Stu Jackson said of Lewis. ''He does what you're supposed to do - put the ball in the basket.

''He's a quiet player. Sometimes you forget about him and he makes you pay for it.''

Larry Bird recorded his 10th triple-double of the season for Boston with 17 points, 17 rebounds, and 13 assists, but hit only 5 of 22 shots from the floor. Robert Parish had 25 points and 14 rebounds for Boston and Kevin McHale added 17 points.

Patrick Ewing led New York with 25 points and 12 rebounds, followed by Maurice Cheeks with 20 points and Johnny Newman with 15 off the bench. Newman scored 11 of his points in the final five minutes of the third

quarter as the Knicks rallied to take the lead.

-- AROUND THE NBA --

Elsewhere in the NBA on Sunday, Utah ripped Minnesota 103-90 and Los Angeles stopped Houston 113-102.

Jazz 103, Timberwolves 90

At Minneapolis, Karl Malone scored 32 points, eclipsing 10,000-points mark along the way, to lead the Jazz. Malone and Thurl Bailey paced a 17-4 Utah run early in the third quarter to put the game away. Malone finished the game with 10,001 points over his five-year career. Tony Campbell led the Timberwolves with 33 points and Pooh Richardson added 19.

Lakers 113, Rockets 102

At Inglewood, Calif., Magic Johnson scored 25 points, pulled down 11 rebounds and dished off 11 assists and Los Angeles clinched its ninth consecutive Pacific Division title. Houston, which trailed by as many as 23 points in the fourth quarter, got 25 apiece from Otis Thorpe and Vernon Maxwell. The loss snapped a four-game winning streak and tied the Rockets with Seattle in the battle for the final playoff spot in the Western Conference.

#90106u0216 04/16/1990 ~United Press International
NEW YORK (APRIL 16) UPI - All you need to know about current Broadway attractions, theaters, leading players and ticket situations (opening dates in brackets):

Credit card holders can order tickets by telephone as indicated. Orchestra seats for musicals run $45, $47.50 and $50 and for plays $37.50 to $40. Tele-Charge and Ticketron add a booking fee, and Ticketmaster adds a service charge. There are no additional fees for theater charge phones. Tele-Charge: 212-239-6200; Ticketron: regional offices or 212-399-4444; Ticketmaster: 212-307-7171.

''Aspects of Love'' - Broadhurst; Andrew Lloyd Webber's intimate, opera-like musical about an Anglo-French romance in the 1950s; available (4-8-90) (Telecharge).

''Black and Blue'' - Minskoff; an all star cast pays tribute to jazz and blues in a dazzling new musical by the creators of ''Tango Argentino''; available (1-26-89) (Teletron).

''Cats'' - Winter Garden; one of the most fantastically staged shows in Broadway history, a knockout musical based on a T.S. Eliot fable with Andrew Lloyd-Webber music; near capacity (10-7-82) (Tele-Charge).

''A Chorus Line'' - Shubert; longest-running show in Broadway history, an absorbing musical about Broadway chorus ''gypsies''; available (7-25-75) (Tele-Charge).

''The Circle'' - Ambassador; Rex Harrison, Glynis Johns and Stewart Granger make this fluffy 1921 Somerset Maugham drawing room comedy sparkle again; available (11-14-89) (Tele-Charge).

''City of Angels'' - Virginia; a new smash hit musical thriller by Larry Gelbart with music by Cy Coleman about a detective-novel writer in Hollywood; near capacity (12-7-89) (Ticketron).

''A Few Good Men'' - Music Box; Tom Hulce and Roxanne Hart score in a stunning new play about a military court martial that pits duty against conscience; available (11-15-89) (Ticketron).

''Grand Hotel'' - Martin Beck; Tommy Tune's eye-filling new musical is a generally effective adaptation of Vicky Baum's novel about 1920s Berlin; available (11-12-89) (Ticketron).

''Gypsy'' - St. James; Tyne Daly is a searingly obsessive Mamma Rose in this effective 30th anniversary revival of the Styne-Sondheim musical; near capacity(11-16-89) (Ticketron).

''The Heidi Chronicles'' - Plymouth; Brooke Adams gives a fine performance as a woman comes of age in the feminist era in this new, Pulitzer and Tony award-winning Wendy Wasserstein comedy; near capacity (3-8-89) (Tele-Charge).

''Jerome Robbins' Broadway'' - Imperial; an electric Tony Award-winning musical smash with emphasis on dancing wrought from the hit shows choreographed by Robbins; near capacity (2-26-89) (Tele-Charge).

''Lend Me a Tenor'' - Royale; Philip Bosco heads the cast in this lunatic new comedy set in the 1930s that pokes fun at operatic egos; available (2-2-89) (Tele-Charge).

''Les Miserables'' - Broadway; the spectacularly staged Tony Award-winning pop opera from London based on Victor Hugo's novel, directed by Trevor Nunn; near capacity (3-12-87) (Tele-Charge).

''Meet Me in St. Louis'' - Gershwin; a lavishly staged musical version of the 1944 MGM film with 10 new songs and a powerhouse cast; available (11-2-88) (Ticketron).

''Phantom of the Opera'' - Majestic; Andrew Lloyd-Weber's enchanting, excitingly staged operatic treatment of the beauty and the beast story set at the Paris Opera; capacity (1-26-88) (Tele-Charge).

''The Piano Lesson'' - Walter Kerr; August Wilson's continues his 20th century survey of black America with this searing drama of a family divided; available (4-16-90) (Ticketron).

''Tru'' - Booth; Robert Morse recreates Truman Capote in a shallow but mesmerizing one-man play set in 1975; available (12-14-89) (Tele-Charge).

''Truly Blessed'' - Longacre; Queen Esther Marrow stars in her own musical biography of gospel singing star Mahalia Jackson; available (4-22-90) (Tele-Charge).

Opening: ''Accomplice,'' Richard Rodgers (4-26); ''A Change in Heir,'' Edison (4-29).

Closed: Nil.

BY SHAUNA STAFFORD - UPI

(APRIL 16) UPI - Romania observed a national holiday Monday in celebration of Easter, following unhindered Easter services in Bulgaria and Romania, Soviet television broadcasts of church rites and Pope John Paul II's praise of reborn religious freedom in Eastern Europe.

Addressing thousands of worshipers Sunday, Romanian Orthodox Church Patriarch Teoctist recalled the lack of religious freedom under executed dictator Nicolae Ceausescu and said the nation was celebrating its first free Easter.

The national holiday celebration Monday announced by the new non-communist government marked a huge step in Romania, where church worship had been tolerated but public observance of religious holidays was forbidden. Several government officials attended services Sunday at Bucharest Cathedral.

Exiled former King Michael also was to have attended the service, but the government canceled his visa last week, saying his presence in the country during the election campaign could provoke unrest.

At the Vatican, the pontiff celebrated the new freedom in the communist bloc and around the world in his message to 200,000 pilgrims and tourists who thronged in St. Peter's Square.

''After the horrors of two world wars and all the wars which, in these last 50 years - often in the name of godless ideologies - have reaped a harvest of victims and sown hatred in so many nations, after the years of dictatorships which have deprived men and women of their basic freedoms, the true dimensions of the spirit have been discovered anew,'' John Paul said.

''Today, as well, the reawakening of many democracies is leading to dialogue and trust between peoples,'' he said.

Russian Christians filled churches across the Soviet Union, and Soviet television showed Easter masses under the new religious freedom of the perestroika era.

The Russian Orthodox Christian observances began Saturday night with believers carrying candles and marching in processions around the gold-domed churches.

''Christ has risen from the dead,'' people sang during the processions.

Hundreds of churches have been reopened under the reforms of Soviet President Mikhail Gorbachev, who has told the press that he himself was

baptized and thinks it quite normal.

Soviet dictator Josef Stalin had closed all but a handful of churches, using the shuttered places of worship as storehouses and offices.

In Roman Catholic Lithuania, the faithful also filled churches where they were enjoined to be calm in the face of a threatened economic boycott by Moscow over the Baltic republic's drive for independence.

Soviet television also broadcast parts of the pope's Easter mass at St. Peter's Basilica, but did not carry his remarks about Lithuania. In brief Easter greetings in 54 languages, John Paul urged Lithuanians to follow the path of ''respectful and comprehensive dialogue'' in pursuing their ''aspirations.''

In Bulgaria, tens of thousands gathered at midnight at Sofia's central city square. Part of the Easter service at St. Alexander Nevsky Memorial Cathedral was broadcast on national television and authorities declared a public holiday.

Bulgarian President Peter Mladenov sent greetings to worshipers and the ruling Bulgarian Socialist Party - the revamped Communist Party - encouraged its members and supporters to observe the religious holiday. Opposition groups used the occasion to remind the government of its anti-religious history.

In Berlin, several thousand East and West Germans took part in an Easter peace march, passing through the Heinrich Heine crossing in the Berlin Wall on a rainy day.

Authorities relaxed border traffic controls during the four-day Easter holiday weekend, waving most travelers through without checks after they flashed passports or identity cards.

-30- 4057

#90106u0261 04/16/1990 ~United Press International

(APRIL 16) UPI - Greta Garbo died Sunday as she lived- in a very private manner. A spokesman at New York-Cornell Medical Center announced Garbo's death, but did NOT give any other details at the request of her family. The screen star's fame only was rivaled by her passion for privacy. The Swedish-born Garbo was known for her roles in such films as ''The Temptress,'' ''Flesh and the Devil,'' and ''Grand Hotel.''

President Bush... spending the holiday weekend in Camp David... has been keeping close tabs on events in Lithuania while reserving his options on what he would do if the situation worsens. Congressional leaders appear to be doing the same. Quoting Senate Majority Leader George Mitchell of

Maine- ''We should NOT announce in advance what we're going to do when we doN'T know for sure what they're going to do.''

Scientists in Alaska predicted Redoubt Volcano would blow its peak Sunday, and it did. The 10-thousand-foot volcano exploded without the usual tell-tale earthquakes beforehand. Geologist Tom Miller says it was a comparably moderate eruption with ash and steam shooting 35-thousand feet into the air. Redoubt is located 110 miles southwest of Anchorage.

A red-haired Norwegian student-model was crowned Miss Universe in Los Angeles Sunday night at the 39th annual pageant. 19-year-old Mona Grudt competed against 70 other contestants from 70 nations and Puerto Rico. She says she wants to be a nurse and work in Africa so she can- quote- ''help all of the poor children.'' Miss U-S-A, 20-year-old Carole Gist, was first runner-up.

#90106u0264 04/16/1990 ~United Press International

(APRIL 16) UPI - A California condor chick hatched at the Los Angeles Zoo Sunday morning, the 10th of the rare birds to be born in captivity. Zoo officials say the five-point-seven-ounce chick was named Tumusai, an Indian word for ''spirit'' or ''shadow.'' The baby bird is part of a wildlife recovery project to help the endangered condor.

A discount coffin shop in Sarastoa, Florida, is drawing complaints from funeral directors who long have dominated the profitable casket trade. The recently opened NO-frills Classic Casket Galleries is one of about half-a-dozen such businesses in Florida. Funeral home and cemetery mark-ups often run as much as 10 times the wholesale price to cover their high overhead costs. That allows stores like Classic Casket to undercut them and still make a profit of up to 200 percent.

#90106u0406 04/16/1990 ~United Press International

(APRIL 16) UPI - Around the world... around the clock... the latest news from U-P-I.

Hollywood has lost one of its most enduring legends. Greta Garbo died yesterday at New York Hospital. A hospital spokesman refused to disclose further details surrounding the 84-year-old Swedish-born actress's death. Garbo won the hearts of American audiences through her haunting beauty and her mysterious off-screen persona.

Senate Democratic leader George Mitchell says President Bush's ''wait-and-see'' attitude toward the situation in Lithuania is exactly the approach needed. Mitchell applauded Bush's low-key style yesterday, saying

a clear-cut U-S response must be based on actual events NOT hypothetical ones.

Soviet President Gorbachev has threatened to initiate an economic embargo of Lithuania if the Baltic republic's leaders refused to back down from last month's declaration of independence. Although Lithuania's nationalist parliament did NOT respond to Moscow's ultimatum by yesterday's deadline, Gorbachev has NOT yet backed up his threat with action.

Post offices across the country are bracing for tonight's expected crush of last-minute income tax-filers. Despite an extra 24 hours to file tax returns this year because the normal deadline fell on Easter Sunday, Internal Revenue Service employees say many citizens wait until the last day to file NO matter what.

There are now 37 rare California condors in existence following yesterday's hatching of a five-point-seven-ounce chick at the Los Angeles Zoo. The chick is the 10th conceived as part of the California Condor Recovery Project. The entire California condor population has been in captivity after scientists determined the birds could NOT survive in the wild three years ago.

BANGKOK, THAILAND (APRIL 16) UPI - A large-scale U.S.-Thai military exercise involving 16,000 troops is scheduled to begin next month, a Thai military official said Monday.

Gen. Pisit Salikupta, Armed Forces chief of staff, said the Cobra Gold 90 exercise is set to begin May 14 and will include U.S. troops from Japan, South Korea, Hawaii and the Philippines.

''We want to improve coordination and inter-operability between the two forces,'' Pisit said. ''We don't aim to threaten any countries. This is a general army activity.''

He said the month-long exercise, the ninth in an annual series of Cobra Gold military training programs, will take place in three Thai east coast provinces and will involve about 16,000 troops.

(APRIL 16) UPI - Opposition protesters appear to have posted a significant victory in their bid to reform Nepal's political system. Nepalese King Birendra bowed to protesters' demands and ordered Parliament dissolved today. The move follows a month-and-a-half of street protests

calling for a multi-party nation.

South African anti-apartheid leader Nelson Mandela is scheduled to speak at a giant rock and roll concert today in London. More than 70-thousand people are expected to attend the show held in Mandela's honor. Although British Prime Minister Thatcher has expressed interest in meeting Mandela, Mandela says he will NOT see her.

The head of the Irish Republican Army's political wing commemorated the 74th anniversary of the bloody Easter Sunday anti-British uprising by saying Irish republicans will outlast the British presence in Northern Ireland. British security forces in Northern Ireland were on full alert yesterday.

Idaho officials are bracing themselves for the onslaught of young white supremacist skinheads who plan to return to the state Friday to honor Adolf Hitler. The event is the second annual ''Aryan Youth Action Conference.'' Last week, Idaho legislators enacted a bill honoring the birthdate of Martin Luther King Junior.

A 19-year-old Norwegian woman was selected this year's Miss Universe. An estimated T-V audience of one-BILLION people watched as Mona Grudt walked off with top honors at last night's pageant in Los Angeles. America's participant, Carole Gist of Detroit, was first runnerup.

#90106u0423 04/16/1990 ~United Press International

BEIRUT, LEBANON (APRIL 16) UPI - Gunmen shot dead a member of the pro-Syrian Shiite Moslem Amal militia in Moslem west Beirut Monday, sparking tension between Amal and a rival Moslem group, the pro-Iranian Hezbollah, police said.

Police said attackers in a speeding car opened fire and hit Ali Abol Hassan in the densely populated area of Zkak Al Blat. Hassan, in his 20s, was taken to hospital where he died of critical wounds, police said.

Witnesses said the incident triggered high tension between Amal gunmen and Hezbollah extremists. The witnesses said intense shooting rang out across west Beirut later, panicking motorists and students heading to schools.

An Amal spokesman accused Hezbollah of killing the militiaman.

''The fatal gunshots originated from a car belonging to Hezbollah,'' the spokesman said. ''It's a deliberate killing.''

Hezbollah sources declined comment.

The rival Moslem groups have been engaged in a three-year bloody conflict for the control of Lebanon's 1.5 million Shiites.

The slaying and gunfire came a day after rival Christian forces continued fighting for control of Christian east Beirut Easter Sunday.

Troops loyal to Christian military leader Gen. Michel Aoun and his rival Samir Geagea sporadically exchanged automatic gunfire Sunday morning after fiercer overnight violence, police said.

Police said one person was killed and four others were wounded in mortar and rocket attacks Saturday night and early Sunday, raising the official toll of the 2 1/2 month conflict to at least 921 dead and more than 3,010 wounded.

#90106u0428 04/16/1990 ~United Press International

JOHANNESBURG, South Africa (APRIL 16) UPI - Intense fighting between rival black movements raged over the weekend in strife-torn Natal province, leaving at least 31 people dead despite the deployment of additional security forces, police said Monday.

Police reported 10 killed, including a soldier, and 11 wounded Sunday in incidents in Zulu tribal areas across the province. State-run radio said a policemen was shot and killed late Sunday near the inland town of Greytown.

In the worst incident Sunday, police said a group of blacks armed with rifles and shotguns attacked a cluster of tribal huts in Kolokola, about 12 miles inland from the Indian Ocean coastal town of Port Shepstone. Two men and a woman were killed and nine others wounded.

Police also confirmed the death of a member of the South African Defense Forces - a soldier of mixed race from the Cape Province.

It was the first reported death of a solider in Natal since April 2, when de Klerk ordered additional troops deployed in Natal's Zulu areas in a bid to halt the fighting between movements linked to the African National Congress and the rival Inkatha Zulu tribal movement of Mangosuthu Buthelezi.

Police said three blacks had been arrested in connection with his killing, which occurred during an ambush on a military patrol in the black township of Mpumalanga, midway between the provincial capital of Pietermaritzburg and the Indian Ocean coastal city of Durban.

The patrol exchanged shots with the attackers, but no other injuries were reported.

Radio South Africa reported Monday a police constable identified as British immigrant Ben McDade, 21, was shot in the neck and killed by an unidentified gunman near Greytown on his return from investigating a complaint at a nearby farm.

Also Sunday, police found the bodies of four black men all killed in gunfire in the area of Msimini, near Port Shepstone. In another incident in the same area, a group of blacks set fire to a house, killing a 43-year-old man.

ANC leader Nelson Mandela gave tacit approval to de Klerk's deployment of extra army troops, which he said were regarded by the people of Natal as more neutral than police. Groups supporting the ANC have accused police of backing Inkatha in the conflict.

Some 3,000 people have died in the conflict since 1987 despite repeated efforts by local political leaders to negotiate a settlement to the conflict. An attempt to bring Mandela and Buthelezi together last month failed and Mandela has since stated the ''climate'' is not acceptable for peace talks.

#90106u0443 04/16/1990 ~United Press International

UPLAND, Calif. (APRIL 16) UPI - Two mild earthquakes rocked the Upland area within a three-minute period early Monday, and seismologists said both were aftershocks to a temblor that hit the area in February.

The first of the aftershocks measured 3.4 on the Richter scale and hit at 1:21 a.m., Caltech Seismology Laboratory spokesman Hall Daily said.

The second aftershock hit three minutes later at 1:24 a.m. and measured 2.2 on the Richter scale.

The epicenter of both quakes was pinpointed 5 miles northwest of Upland in the same area as the Feb. 28 quake that measured 5.5 on the Richter scale, he said.

No damage or injuries were reported.

The Feb. 28 quake was centered where two major faults meet in the San Gabriel Mountains about 40 miles east of downtown Los Angeles. The February temblor was the strongest quake in Southern California since the October 1987 Whittier shaker.

LOS ANGELES (APRIL 16) UPI - ''The beauty queen from Hell,'' Mona Grudt of Hell, Norway, was crowned Miss Universe at the 39th annual pageant.

Mona Grudt, a red-headed student-model who wants to be a nurse in Africa, was chosen Sunday night over 70 other women.

The first black American contestant, Carole Gist, 20, of Detroit, was first runner-up in a contest dominated but not won by Latin American aspirants. Miss Colombia, Liseth Mahecha, was second runner-up among the 71 contestants from 70 nations and Puerto Rico.

Rounding out the six semi-finalists were the contestants from Bolivia, Mexico, and Chile.

''I want to be a nurse and work in Africa. In my own country there are so many nurses, but if I could go to Africa I could help all of the poor children,'' said Grudt, 19, whose fellow contestants took to calling her ''the beauty queen from Hell'' because of her hometown.

This year's pageant was marked by a more political tone and included the first Soviet contestant, Evia Stalbovska, 18, a doctor's assistant from Riga, Latvia, who was not among the final 10.

''The changes in the world, the new openness, are what brought me here, and I'm very proud to be a small part of it. If not for Mikhail Gorbachev's glasnost, I would not be here,'' Stalbovska said in an interview before the show.

During the week preceeding the show, Stalbovska, who speaks little English became friends with Miss Israel, Yvonna Krugliak, who translated for her. The two women were born five days apart in the same Latvian hospital. Krugliak's parents later emigrated to Israel.

Mahecha, 18, discussed her country's cocaine wars, saying, ''This problem, although ours, is not only ours. It's something that concerns everyone and if nations work together we can solve the problem and stop drugs.''

The winner, who receives a prize package worth nearly $250,000, is 5-foot-6 with green eyes and listed Rock Hudson as her favorite movie star.

The pageant was telecast live on CBS nationwide and across the globe to an estimated audience of 500 million people.

Hosted by Dick Clark and Leeza Gibbons, the annual contest was held at the Shubert Theater. Last year's winner, Angela Visser of Holland, was on hand to crown her successor.

Gist, a student from Detroit who qualified for the Miss U.S.A. pageant as Miss Michigan, once worked three jobs concurrently while taking 22 college credit hours. She has also been active in community and youth organizations.

Judges for the Miss Universe pageant included entertainer Steve Allen, Latin American pop singer Chayanne and Spanish Princess Maria of Bourbon. The 71 contestants went through preliminary bathing suit, evening gown and personal interview portions of the competition last week.

''All the girls become friends during the week,'' said organizer Scott Taylor. ''They were extremely excited to be in the United States and in Los Angeles, the entertainment capital of the world.''

Taylor said the contestants ate hamburgers and pizza, went to Disneyland and toured Hollywood.

''The whole American experience, and they've been loving it,'' he said.

#90106u0597 04/16/1990 ~United Press International

(APRIL 16) UPI - Senate Republican leader Robert Dole minced NO words at the end of his fact-finding tour of the Middle East... saying that countries in the region should NO longer count on generous economic support from the United States.

Dole and four Senate colleagues visited Jordan, Egypt, Syria and Iraq during their Middle East tour. Israel and Egypt are the largest recipients of U-S foreign aid. Dole said that the United States is ''broke''... and that substantial increases in the foreign aid budget are unlikely.

Said Dole... ''We have all these new members of the family at the table''... referring to Eastern European and Latin American requests for U-S foreign aid.

In Jerusalem yesterday, Dole said he was proud of the U-S record on aid to Israel, some 40-BILLION dollars in recent years. But he said some officials will question certain economic aid, such as a 400-Million-dollar supplemental aid package for housing guarantees to Israel.

Dole cited three-Million homeless in America and added- quoting here- ''We don't have a program for them.''

King Birendra of Nepal has bowed to opposition demands for a multi-party democracy and today dissolved Parliament... accepting the resignation of the prime minister.

The king announced the moves in a broadcast over state-run Radio Nepal. His statement follows nearly a month of political agitation and street protests that rocked the Himalayan kingdom, claiming at least 52 lives.

The concessions were demanded by the once-banned Nepali Congress Party and a coalition of seven leftist parties.

They threatened to resume street protests if the 44-year-old king did NOT abandon the partyless system and institute a multi-party democracy.

The king's announcement followed a marathon negotiating session that began yesterday at the Royal Nepal Academy in an attempt to end the political crisis that has virtually paralyzed the nation. At least 52 people were killed in clashes with security forces during the movement, which began February 18th. Hundreds were wounded in the unrest and thousands were arrested.

#90106u0601 04/16/1990 ~United Press International

(APRIL 16) UPI - Opening statements are scheduled today in New York in the case of a pair of white men charged with the murder last August of a black youth in Brooklyn.

The trial of accused triggerman Joseph Fama and Keith Mondello for the murder of 16-year-old Yusuf Hawkins comes amid deteriorating race relations in the nation's largest city.

It also is slated to get under way as the prosecution team tries to prove its case despite a number of recent setbacks, including the resignation of a black attorney who said he was being treated by his peers as a token.

Another significant blow to the prosecution case is that a key witness to the attack dropped out of a drug rehabilitation program last week. The action by Gina Feliciano could open her up to a relentless cross-examination by defense attorneys.

But what may be the most difficult hurdle for prosecutors to overcome is the loss of an eyewitness to the attack. John Vento, a member of the mob that chased down Hawkins, backed out of an agreement that would have dropped charges against him in exchange for testimony.

Officials in Tampa, Florida, are trying to figure out what sparked a blast yesterday at a Port of Tampa petroleum refinery.

The explosion killed an oil company worker and caused Citgo Petroleum to shut down its loading operations.

Firefighters doused the blaze with foam about one hour after it started.

The blast occurred in a vapor recovery unit, a device designed to prevent petroleum fumes from leaking while barges and tankers unload petroleum at the port.

The dead employee was trying to repair the vapor recovery unit near a gasoline storage unit at the time of the explosion. A Tampa fire department spokesman says the unit apparently was leaking vapors which accumulated and were ignited by an unidentified source.

A Citgo spokesman says the blast does NOT pose an environmental threat.

#90106u0689 04/16/1990 ~United Press International

(APRIL 16) UPI - Stock prices on the Tokyo Stock Exchange plummeted Monday in extremely light trading, reflecting investors' worries over the yen's weakness on foreign exchange markets and bond prices.

The blue-chip Nikkei Average of 225 selected issues, which fell 409.28 points Friday, plunged 750.74 points, or 2.57 percent, to 28,463.18.

The broader-based Tokyo Stock Exchange Index of all listed major shares lost 36.12 points to 2,129.77.

An estimated 230 million shares changed hands, compared with 330 million shares Friday.

Declines outpaced advances 871 to 110, with 98 issues unchanged.

Elsewhere in Asia, prices closed slightly higher in light trading on the Singapore Stock Exchange despite the plunge in Tokyo.

The key Straits Times Industrial Index, which added 2.71 points Thursday, gained 5.75 points to 1,530.97. The narrower All Singapore Index rose 0.35 point to 419.80.

Turnover amounted to a thin 25.41 million shares, compared with 57.2 million shares Thursday.

Markets in Singapore were closed Friday for the Easter holiday.

Markets in Hong Kong and Australia were closed for an extended Easter break. Trading will resume Tuesday.

#90106u0745 04/16/1990 ~United Press International
(APRIL 16) UPI - Lithuania's Council of Ministers is scheduled to meet today and the Baltic republic's Parliament is slated to convene tomorrow to discuss the latest ultimatum from Moscow. The republic's nationalist President Lansbergis says despite continuing pressure by Soviet President Gorbachev, Lithuania will stay its course toward independence.

Washington has expressed concern with Gorbachev's stern response to Lithuania's bid for freedom. The Bush administration has adopted a decidedly low-key approach toward the situation. But congressional leaders and administration officials alike agree that a crackdown by Moscow in the Baltic republic would likely cost Gorbachev a U-S-Soviet trade pact.

Nepalese King Birendra has ushered in dramatic reforms in his kingdom. Birendra today heeded warnings by opposition groups that threatened to start up a new round of street protests unless he dissolved the Asian kingdom's parliament. In a nationally broadcast announcement, Birendra dissolved the legislative body and commented that he's confident the newly allowed political parties will act in the national interest.

Doctors in the Indian state of Kashmir are awaiting a response to their demand that New Delhi lift a shoot-to-kill curfew today. The physicians have threatened to walk off their jobs if their demand is NOT met. Tensions are running high in Kashmir where Moslem separatists are pushing for secession from India. India has responded by sending thousands of troops to the area.

#90106u0764 04/16/1990 ~United Press International
(APRIL 16) UPI - The head of the National Center for Children in Poverty at Columbia University in New York says the United States has to develop programs aimed at preventing poverty rather than responding to the problem after the fact. Judith Jones' comment came in the introduction of a report issued by the Center yesterday. It reveals that about five-Million children under the age of six live in families below the poverty line.

Silver screen legend Greta Garbo has died of an undisclosed ailment in New York. Garbo- who was 84- spent much of her life abiding by her most famous comment- ''I vant to be alone.'' Garbo came to the United States in the mid-1920's. She made movies for 16 years, amassing a fortune as the American public clamored for movies starring the mysterious foreign beauty.

Boston police say they have NO significant clues regarding the theft of an 18th-century portait of Benjamin Franklin from the city's public library. The 27-byinch portrait of Benjamin when he was U-S ambassador to France apparently was taken sometime Friday. City authorities have refused to speculate on the value of the painting, but art critics have called it one

of the finest likenesses of Franklin.

The official Soviet news agency Tass says Communist Party member and critic Boris Yeltsin is among nine candidates nominated by the Democratic Russia bloc for the republic's presidential post. The republic's one-thousandmember Congress of People's Deputies will select a leader when it convenes in Moscow next month. Yeltsin has been an outspoken critic of Soviet President Gorbachev.

#90106u0781 04/16/1990 ~United Press International

OKLAHOMA CITY (APRIL 16) UPI - Scores of Oklahoma schools closed Monday in response to a call for a weeklong teachers walkout to protest the Legislature's apparent rejection of a $230 million tax and education bill.

Oklahoma Education Association President Kyle Dahlem said more than 3,000 teachers had committed to withhold services.

Many of the teachers said they would demonstrate Monday at the state Capitol, where legislators were to resume efforts to reach a compromise, and others planned demonstrations in their home districts.

School officials canceled classes for one to five days in about 90 districts, including Tulsa, the state's largest, while others said schools will remain open whether teachers show up or not.

The walkout was not endorsed by the American Federation of Teachers, AFL-CIO, the bargaining agent for Oklahoma City teachers. Superintendent Arthur Steller said Oklahoma City schools will remain open, although an estimated 900 teachers also are members of the OEA, and teachers who do not report for work will be temporarily replaced.

The OEA asked its members to withhold services for a week after the state Senate refused Wednesday to approve the measure's emergency clause. Senate President Pro Tempore Bob Cullison said he would not send the bill to Gov. Henry Bellmon without the emergency clause.

Cullison said the bill would be meaningless without the emergency clause - making it effective immediately after being signed by the governor instead of 90 days after the session ends - because no money could be budgeted for the next fiscal year.

The Senate kept chances for a compromise alive by voting Thursday to reject the original measure it approved Feb. 13. The bill had been kept on the Senate calendar on a motion to reconsider. Cullison said he called for the new vote Thursday in an attempt to work out differences and make the proposal and its emergency clause acceptable to both houses.

Cullison said the Legislature must get on with its work of writing a budget for the next fiscal year, beginning July 1, and it would be futile to pursue the education bill later than this week.

Bellmon called the Legislature into special session last August to solve an education funding crisis. The special session recessed in November and has been resumed from time to time during the Legislature's regular session that began in early February and ends May 25.

The House and Senate both approved the bill earlier this year, but only the House passed the emergency clause. Senate leaders delayed a vote on that question last week in an unsuccessful attempt to round up enough votes for passage.

-30- 2849

#90106u0789 04/16/1990 ~United Press International

(APRIL 16) UPI - Diminutive Texas trumpeter Roy Hargrove was yanked from high school math class one day and ordered to the principal's office. With that kind of summons, he was in trouble for sure.

Or so he thought.

James Gray, principal of Dallas Arts Magnet High School, pointed to a chair. Hargrove sat.

The administrator, a trumpet player who sat in sometimes with the high school band, then switched on a couple of Clifford Brown's ballad recordings.

It was Hargrove's introduction to the sweet, lyrical sound of Brown, whose rising career was snuffed out by a 1956 car crash. For a kid who grew up on pop, rap, and rhythm and blues, the moment was a musical turning point.

''That really turned me on,'' Hargrove says. ''It made me want to go find the right music to listen to.''

Brown's recordings led him to trumpeter Freddie Hubbard, the early balladry of saxophonist John Coltrane, the muted, middle-range horn work of Miles Davis.

''I learned early how to listen to music without trying to copy a particular artist. I tried to figure out the reason WHY he played something, not just figure out what he played,'' Hargrove says. ''I draw from the feeling and develop my own conception. That has always been my approach.''

At 20, just finishing his second year of college-level music studies, Hargrove plays with a maturity far beyond his age.

He is fronting his own New York-based band. His quintet headlined the Village Vanguard this month, and he is just out with his first recording as a leader, ''Diamond in the Rough,'' on the Novus-RCA label.

A couple of years ago, Wynton Marsalis was the ink-grabbing wunderkind of jazz. Secure in his playing and quite outspoken, Marsalis firmed up the jazz mainstream in a time of musical ambivalence.

In his relatively tender years, Marsalis also became a role model for younger musicians. He showed them the career possibilities in the music they loved.

Hargrove belongs to that emerging post-Marsalis generation of up-and-comers. Like many others, he received personal encouragement from Marsalis, now an old man of 28.

When Marsalis visited Hargrove's performing arts high school in 1987 and heard the band, he invited Roy to sit in that week at his gig at Caravan of Dreams in Fort Worth, then arranged for more lessons with a tutor.

''Wynton has a way of making people understand the concept, the history. That's one thing I really like about him,'' Hargrove says. ''For young people he brought the acoustic sound back into music.''

Hargrove's debut recording is a small group session with two different rhythm sections. He is backed by tenor saxophonist Ralph Moore, Antonio Hart on alto sax, Geoff Keezer or John Hicks on piano, Charles Fambrough or Scott Colley on bass, and Al Foster or Ralph Peterson Jr. on drums.

It is a mix of originals written by Hargrove, Keezer a 19-year-old piano phenom and Fambrough, and jazz classics by Benny Golson, Thelonious Monk, Denzil Best, and Rodgers and Hammerstein.

''For my record date, I wrote most of the stuff right before we went into the studio. Writing helps you grow and helps you know yourself. I did a lot of it while I was in high school,'' Hargrove says.

''It was strange, because we had arranging classes, composition classes, but I didn't take any of them. I just learned how to write down what I could hear.''

Hargrove was born Oct. 16, 1969, in Waco, Texas, and raised in a nearby small town. His family moved to Dallas when he entered the third grade. He was drawn to the school band, and his father bought him a second-hand cornet. His junior high band leader put a lot of emphasis on spontaneous

composition.

''At an early age, I found out that if I could sing something or hear it on the radio, I would be able to play it,'' Hargrove says. ''When I got to high school, it was very easy for me to grasp harmony and chord changes. I had that rhythm and blues background. I couldn't always analyze what I was playing, but I could tell if it was good or not.''

After graduating from high school in 1988, he toured the European jazz festival circuit with Clifford Jordan, Jack McDuff, Idris Muhammed and Jerome Richardson. Along came stints with the sextet Generations and the young bop-oriented band Super-Blue.

''I love to play the blues the most,'' Hargrove says. ''That's the roots of it all, blues and gospel. When I was a little kid, that's what I listened to.''

#90106u0847 04/16/1990 ~United Press International
BY JAN A. ZVERINA

DETROIT (APRIL 16) UPI - Japanese carmaker Suzuki, known better here for its motorcycles and small trucks than cars, is breaking into the U.S. sedan market this year with a four-door version of its Swift subcompact.

Also offered in a three-door hatchback, these are essentially the same cars Suzuki will start manufacturing at a Hungarian plant in 1992 to satisfy demand from Eastern European motorists.

Astute observers will notice that the Swift looks a lot like the Geo Metro Chevrolet's front-drive minicar, which now is the nation's reigning fuel economy champion, thanks to its miserly 1.0 liter three-cylinder engine.

That's because the Metro also is made by Suzuki, but badged as a Geo for Chevrolet's new small car division.

Suzuki also sells the three-door model under its own name, but the Swift sedan is an exclusive for U.S. buyers who still prefer four doors and a traditional trunk.

All Swifts get an extra piston under their sloped hoods with a 1.3 liter four-cylinder engine that musters 70 horsepower at 6,000 rpm. A 5-speed manual transaxle is standard, with a 3-speed automatic offered for $600 more.

The Swift sedan competes with the Honda Civic, Hyundai Excel, Mazda Protege and Ford Escort as well as the Metro. It is offered in three separate models with different levels of standard equipment or amenities for 1990.

The Swift GA starts at $7,399 and has a split folding rear seat, rear window defogger and power front disc brakes as standard. An upgraded interior is offered in the GS model for $500 more.

The Swift GS starts at $8,599 and adds electric mirrors, tachometer and fancier exterior.

Evaluated for this review was the base Swift GA sedan. But it cost $8,809 as tested after a $260 destination fee and $1,150 worth of options were tacked on, the biggest one being air conditioning for $665 extra.

Also swelling its sticker price was a cheap sounding AM-FM stereo cassette ($430) and floor mats ($55). One may do better by adding those items afterwards.

Turning the key in the Swift's door makes a hollow sound, causing this writer to brace for another loud and lumpy small car test drive.

But this car was a pleasant surprise because of its generous interior spaceand a smooth, relatively quiet ride that lays to rest the notion that ''basic transportation'' means cramped, noisy and uncomfortable.

The Swift's cloth-trimmed seats offer good comfort except in the thigh area, where long-legged drivers need more support. Head and leg room is generous for four adults, in fact, better than in some larger sedans.

Its trunk measures 11.5 cubic feet with the rear seats upright and has a low liftover height to facilitate loading.

Its rounded, low dashboard is a simple but stylish design, with a large speedometer flanked by the fuel and temperature gauges. But there is no tachometer in the base model, and the ventilation controls have stick-on labels and a notchy, cheap feel.

The Swift's three-point automatic front seat belts are extremely awkward if left fastened as intended and a poor choice, indeed, to meet the passive restraint law. Still, those smart enough to buckle up each time will have no problem using them.

The Swift sedan has a smooth ride for a car weighing only 1,848 pounds and riding a 93.1-inch wheelbase. But its skimpy, P155/70 tires on 13-inch rims make themselves known once a full load of passengers are aboard and curvy roads are encountered.

Its 1.3 liter engine was found to be both peppy and economical, complemented by a manual transaxle with good gear spacing and a smooth shifter. EPA mileage ratings are 40 city-44 mpg highway, meaning one can travel over 400 miles before replenishing its 10.6 gallon tank.

Do-it-yourselfers will appreciate the Swift's underhood access, although the oil filter is close to the exhaust manifold.

Each Swift is covered by a 24 month/24,000 mile comprehensive warranty, which is shorter than most competitors.

Suzuki will most likely sell about 6,000 Swifts this year through its 293 U.S. dealers, catering to the low end of the market where import competition is severe.

While those numbers may not seem large, this review can be used as a guide for the more popular Chevrolet Geo Metro tested earlier.

(For each car written about in his weekly Roadtalk column, UPI Auto Writer Jan Zverina evaluates the vehicle for one week, driving it between 250 miles and 500 miles on city and rural roads.)

#90106u0858 04/16/1990 ~United Press International

(APRIL 16) UPI - Thunderstorms shook the southern Plains Monday, driving streams beyond their banks and washing out roads around Dallas, while heavy rain pounded the South and dense fog hampered the morning commute in the Midwest and New England.

Dozens of families in the Dallas suburb of Garland, Texas, were forced from their homes early Monday by the storm-swollen waters of the Duck Creek. An empty pickup truck was washed 2 miles downstream, battering bridges along the way and causing enough damage to close one of the spans, police said.

The evacuees began returning to their swamped homes as the floodwaters subsided later Monday morning, but not before the high water played havoc with the rush hour, especially along Garland Road, a major artery into Dallas.

No injuries were reported, Garland police said.

The thunderstorms, which spawned a tornado and baseball-size hail Sunday in north and central Texas, lost much of their punch as they drifted through eastern Texas and into Arkansas and Louisiana, the National Weather Servicesaid.

The rest of Texas and Oklahoma reported fair to partly cloudy conditions Monday. Some high clouds moved eastward across New Mexico, but the state was mostly fair.

A cold front passing through the South produced scattered but sometimes heavy showers across parts of the Carolinas, Tennessee and Florida, where hail was reported. The front left cloudy skies as it moved out of Georgia, Mississippi, Alabama and Tennessee.

Dense fog made for difficult morning driving in much of the Midwest, cutting visibility to 500 yards or less in parts of Indiana, Missouri, Illinois, Kentucky.

Fog also shrouded parts of New England. Visibility in parts of Massachusetts and Vermont was close to zero as Sunday's rain was replaced by humidity.

A cold front swept through Massachusetts the night before the 94th annual Boston Marathon, but temperatures were warming back up to 50 to 55 degrees in advance of the noon start in Hopkinton. Skies were partly to mostly sunny with a west wind - a helpful tailwind for the runners - of 10 to 15 mph.

In the Midwest, clear skies and cool morning temperatures prevailed across most of the region. Scattered rain fell in sections of central Wisconsin.

In the West, clouds spread along the California coast ahead of a slow-moving Pacific weather system.

In Oregon, widely scattered thunderstorms rattled east of the Cascades. Washington was fair and warm.

(APRIL 16) UPI - Police in Patna, India, say a ferocious fire consumed two cars of a passenger train today, killing at least 95 people and injuring about 100 others. The flames roared through two packed cars of the train serving the suburbs and inner city areas of Patna, 530 miles southeast of New Delhil.

Indian authorities say the cause of the blaze is under investigation. One possibility is that the fire resulted from an explosion of a leaking natural gas cylinder when a passenger lit a cigarette. Most passengers were believed to be office workers going to work.

Soviet President Gorbachev's deadline for Lithuania to end its drive for

independence has passed. Ministry officials in Moscow are awaiting orders to impose the threatened economic embargo on the Baltic republic.

In Vilnius, Lithuanian President Landsbergis says the republic's full Council of Ministers would meet today... but he insists there will be NO retreat from the path of independence from the Soviet Union.

Greta Garbo is dead. The Swedish-born actress died yesterday at New York Hospital at the age of 84. Officials say funeral services will be private. Garbo reportedly had been undergoing kidney dialysis at the hospital.

The I-R-S and post offices nationwide are preparing for today's onslaught of last-minute income tax filings. Said one I-R-S official- ''I think there's a group of people who simply get a kick out of filing on the last day.''

#90106u0911 04/16/1990 ~United Press International

TOKYO (APRIL 16) UPI - Influential Japanese think tanks predict Japan's economy will continue sustained but somewhat slower growth in fiscal 1990 despite the recent slump in the stock market and rising interest rates.

Research institutes of the Big Four brokerage houses said, however, they were forced to revise downward their projections because of the dramatic change for the worse in Japan's economic environment, which they said would trim Japan's net economic growth by 0.1 percent to 0.3 percent.

The government, anticipating robust personal consumption and capital investment by corporations, has projected a net 4.0 percent growth for Japan's economy in fiscal 1990, which began April 1.

The research institutes of Nomura, Daiwa, Nikko and Yamaichi securities companies said Japan's economy is certain to continue its expansion, extending beyond the second longest span of continuous growth after World War II.

The revised economic growth rates projected by the four companies ranged from 3.9 percent to 4.4 percent.

The government said Japan's economy which entered the 41st consecutive month of expansion in April is certain to exceed the second postwar record of 42 months of expansion recorded from June 1958 to December 1961.

The research institutes said personal consumption would remain steady despite the recent tumble on the Tokyo Stock Exchange because of substantial wage hikes earned by organized workers this spring.

Japanese workers earned wage increases of slightly less than 6.0 percent this year or the highest in several years because of good corporate earnings, the Federation of Employers' Associations reported.

The research institutes said the recent stock market slump and rising interest rates were responsible for downward revision of their projections.

The Bank of Japan, moving to forestall inflationary pressure and stem the yen's fall against the dollar, raised its official discount rate by 1.0 point to 5.25 percent in March.

The central bank action led to higher interest rates on commercial loans, resulting in slower corporate capital investment and housing investment.

The recent stock price tumble forced many enterprises to postpone their plans to raise funds on the market through issurance of new shares and bonds.

The total market value of the Tokyo Stock Exchange slumped 24.0 percent to $2.89 trillion from a high of $3.8 trillion Dec. 29.

The blue chip Nikkei Average of 225 selected issues has fallen 25.0 percent to 29,213.92 points since the beginning of this year.

The Long-Term Credit Bank said its survey conducted earlier this year showed that plant and equipment investment expenditures by Japanese corporations in fiscal 1990 will remain brisk at $144 billion, up 9.0 percent over last year.

The Nomura Research Institute said slow economic growth will cause favorable impact, easing inflationary pressure and stabilizing domestic prices.

The central bank said, however, that Japan's wholesale prices in fiscal 1989 rose 3.5 percent, the first rise in five years, largely because of a weak yen and higher crude oil prices.

The stronger yen makes Japanese products more competitive on overseas markets but makes imported goods more expensive.

The yen's value has declined 13.22 yen or 9.0 percent to 158.42 yen per dollar from 145.20 at the beginning of this year.

The national daily Mainichi Shimbun said major Japanese corporations have grown cautious about the domestic economy and 40 percent of them predicted the Japanese economic expansion will peak in the first half of fiscal 1990.

The daily said the report was based on a survey of 50 major enterprises, covering both manufacturing and non-manufacturing sectors.

The survey showed that 34 companies anticipated a slowdown in the Japanese

economy later this year, the paper said.

Most companies forecast the Nikkei Average will recover to reach a 32,000-36,000 point range at the end of this year but none predicted it will hit a new high, the daily said.

It said 33 percent of the companies surveyed said the dollar will stay on the 150-yen level at the end of this year.

#90106u0976 04/16/1990 ~United Press International

LONDON (APRIL 16) UPI - Food poisoning prompted three inmates to surrender from Strangeways prison Monday and authorities advised seven remaining convicts to call off their siege amid the signs of deteriorating conditions within the wrecked jail.

However, the diehard inmates remained defiant on the 16th day of occupation and responded to intimidation tactics from guards by setting ablaze ruined furniture inside one wing of the prison in Manchester, 200 miles northwest of London.

The fire in mountains of debris cast onto an anti-suicide net suspended between two floors was the most ferocious since the uprising erupted on April 1. Firemen doused the blaze.

Authorities have been using loud music, sirens, swooping helicopters and water canons to try to break the resolve of the inmates, who hold a central rotunda from which they could control access to the jail's five main wings.

Barricades in gateways and stairwells are reported to have been soaked in cooking oil to ignite a conflagration should guards try and advance. The holdouts are also reported to be armed with knives and spears.

Early Monday, three prisoners left the occupied area, one aboard a stretcher carried by his two colleagues.

Officials said the three were suffering from food poisoning, and the incapacitated prisoner was reported to be unconscious in a nearby hospital.

Rebellious inmates have been able to press on with their occupation - the longest jail siege in British history - because they stockpiled food from stores and a kitchen when the uprising began.

Prisoners lounging on the roof in the view of television cameras have eaten steak to show their ability to cook food without power and water supplies, which have been severed. But lack of refrigeration has

apparently caused food poisoning, and prompted prison governor Brendan O'Friel to advise the remaining seven inmates to also surrender.

''If any of you are feeling ill, I strongly advise you to come down and let us take you to a hospital,'' he said. ''We will undertake to do that immediately to any prisoner who comes down feeling ill. I do not want this siege to end as some sort of tragedy resulting from illness.''

He said the surrenders vindicated his policy of using gradual negotiation rather than force to end the siege. The rebellion began as a protest against overcrowding and poor conditions, and sparked disturbances in 10 other facilities housing members of Britain's 45,000-strong inmate population.

Scores of inmates and prisoners have been injured and one prisoner left dead in the outbursts, which have inspired public debate about the need to reform the nation's prisons. There have been numerous unverified reports of other deaths inside the occupied areas of Strangeways.

#90106u1053 04/16/1990 ~United Press International

WASHINGTON (APRIL 16) UPI - The Supreme Court let stand Monday a ruling that a public school in Purdy, Mo., could ban dancing.

The court refused to hear the case brought by a number of parents and students who argued that the ban was religiously motivated in violation of the First Amendment bar on entangling church and state.

The case comes to the court from the Purdy School District. The town of Purdy, in rural southwestern Missouri, has a population of slightly more than 900 and is about 70 miles southwest of Springfield. Many of the town's residents belong to Southern Baptist churches.

The Fundamentalist Christians oppose dancing and believe it is ''scripturally prohibited,'' ''sinful,'' and the music is ''satanic.''

The school district adopted a rule that states ''school dances are not authorized, and school premises shall not be used for purposes of conducting a dance.''

A student group in 1978 asked the school board for permission to hold a dance and was turned down on a 4-2 vote. One of the school board members was later defeated in a re-election bid and a faculty member, who supported the move, was fired because of complaints from the religious community.

In January 1986 a group of parents asked the school to change the rule complaining that students were driving long distances to attend ''unofficial'' school dances.

A number of school officials said the rule would not be changed because of the objections of the religious community.

The parents brought suit in federal court, claiming the rule was religiously motivated in violation of the Constitution that bans the entanglement of church and state.

U.S. District Judge Russell Clark in Springfield ruled the ban was unconstitutional in August 1988. The school board allowed two dances to be held at the high school while appealing the ruling.

The petition drive by the students to end the ban drew national attention

when the youths invited to town the stars of the movie ''Footloose,'' a movie about a Texas town without dancing. The stars, however, did not appear.

The lawyer for the school district, Ransom Ellis, said the situation in Purdy was different than that portrayed in the movie, in which dancing was not permitted in any part of the town.

''What happened in Purdy, those kids could dance all they wanted,'' Ellis said. ''In fact, they did dance one heck of a lot on their own. The big gripe from the parents was that they didn't want to be responsible for it anymore. They wanted the school to be responsible. They just wanted to have the dances on campus.''

Nonetheless, the 8th U.S. Circuit Court of Appeals reversed the ruling allowing the dances. The appeals court said the ban was neutral on its face.

Seeking high court review, the parents said the ruling ''extends to governmental bodies across the nation to actively promote the religious beliefs of the locally dominant sect as officially sanctioned governmental policy.''

The school district argued against review and said the policy dealt with the secular activity of dancing and was not religious and ''thereby cannot have the primary effect of advancing or endorsing religion.''

SAN ANTONIO (APRIL 16) UPI - Authorities searched Monday for three convicts - including a man suspected of heading a multi-million-dollar drug ring - who escaped from a privately run prison by pulling a gun on a guard.

Mario Salinas-Trevino and two cellmates escaped from the Central Texas Parole Violators facility in downtown San Antonio about 8:30 p.m. Sunday after forcing guards at gunpoint to let them out of the building, police said.

Salinas-Trevino, 37, of San Antonio is accused of heading a multi-million-dollar operation accused of smuggling tons of cocaine and marijuana into the United States from Mexico during a six-year period.

Indictments against Salinas-Trevino and 33 other defendants were issued in March 1989 following a massive federal investigation dubbed "Operation Jet Set," and Salinas-Trevino was ordered held without bond.

The other two escapees from the facility, which is operated by Wackenhut Corrections Corp., were identified as Juan Chapa-Garza, 44, and Charlie Edward Compton, 58.

Police said Compton allegedly called a detention officer to the cellblock to ask for aspirin and then pulled out a .25-caliber semi-automatic handgun and ordered the guard to open the cell door. Police said they did not know how Compton obtained the gun.

Police were told the three convicts ordered another guard and a trustee out of the prison elevator at gunpoint, then forced the two guards, trustee and a floor supervisor into a closet.

On the ground floor, another guard was confronted at gunpoint and tied up, and the three escaped after Compton reportedly went to the control panel and unlocked the outside doors, police said.

#90106u1149 04/16/1990 ~United Press International

WASHINGTON (APRIL 16) UPI - The Supreme Court refused Monday to become involved in a libel and slander suit filed against two men brought by former CIA official Max Hugel.

The court refused to hear the case brought by Thomas and Samuel McNell who face a default judgment of $900,000.

The case stems from a front-page article that appeared in The Washington Post on July 14, 1981, headlined ''CIA Spymaster is Accused of Improper Stock Practices.''

The article detailed allegations of insider trading that Hugel, who had recently been elevated to the position of deputy director of operations, had been engaged in as a businessman several years earlier.

The source of the information was Thomas McNell, who, along with his brother, had been associated with Hugel and the stock business he ran in the mid 1970s. However, according to court records, the relationship deteriorated with Samuel McNell owing Hugel some $375,000.

During that period Thomas secretly recorded telephone conversations he had with Hugel. Thomas eventually turned over the recordings and documents to The Washington Post. When the article was published, Hugel resigned from the CIA.

In November 1982, Hugel filed a libel and slander suit against the McNells in federal court in New Hampshire. Since the McNells had gone into hiding and were allegedly unaware of the suit, Hugel secured a default judgment against them in the amount of $931,000 in September 1984.

In 1987, the McNells, who were by then serving prison terms for conspiracy to defraud the federal government and interstate transportation of stolen goods, attempted to have the award set aside, but federal courts refused. They then appealed to the Supreme Court.

89-1270 Thomas R. McNell et al. vs. Max Hugel

#90106u1160 04/16/1990 ~United Press International

WASHINGTON (APRIL 16) UPI - The Supreme Court refused Monday to become involved with attempts by two international jewel thieves to serve prison sentences in the United States.

The court refused to hear the case brought by Jerome Scalise and Arthur Rachel, seeking review of a ruling by the 7th U.S. Circuit Court of Appeals.

The two U.S. citizens were convicted of a notorious jewelery store robbery in London in 1980. The theft netted jewels worth $3.6 million, including the famous Marlborough diamond. According to court records, the jewels were mailed to the United States and have not been recovered.

The two, however, were captured and convicted on theft and weapons charges after a trial in Old Bailey. They were sentenced to 15 years in prison to begin in August 1984. The two then requested, under international law, to serve their sentences in the United States. The U.S. government refused the request and federal courts eventually ruled against them.

89-1478 Jerome Scalise and Arthur Rachel vs. Richard Thornburgh et al.

#90106u1173 04/16/1990 ~United Press International

BY VERNON SCOTT

HOLLYWOOD (APRIL 16) UPI - There was a time when the movie capital offered domestic audiences exotic beauties from all over the world, adding spice

and romanticism to films.

A few imported actresses became great stars, among them Greta Garbo and Ingrid Bergman from Scandinavia, Luise Rainer and Marlene Dietrich from Austria and Germany, and Sophia Loren from Italy.

If the English by any stretch of the imagination could be called exotic, the list would be much longer.

The British notwithstanding, foreign actresses flavored the Hollywood scene on a regular basis. Often they came and went quickly, but they managed to give the impression the movie capital was at least a tad cosmopolitan.

There were Lupe Velez and Dolores Del Rio from south of the border and, of course, Carmen Miranda.

Maria Schell came from Austria, Lilli Palmer from Germany and Liv Ullmann from Norway.

France sent over Brigitte Bardot, Simone Simon, Leslie Caron and Catherine Deneuve.

Hollywood films were built around such Italian leading ladies as Loren, Anna Magnani, Claudia Cardinale and Virna Lisi.

Foreign actresses have graced American movie screens in starring roles going all the way back to the flickering silents.

So, where are these ''exotics'' now?

Today's foreign actress in Hollywood is told that her accent is too strong or her appearance too ethnic for American films. In the past, those characteristics were considered assets.

If Americans long to see foreign performers, there is always a cinema art house, or if they want to be charmed by French women, hop a jet to Paris.

Is it a matter of growing parochialism among the studios and producers?

More than likely, the reason fewer exotic women performers are seen in Hollywood is that the number of female roles has diminished. American films are dominated by macho male stories or buddy pictures.

When a female is needed she is usually seen as ''the girl,'' thankless roles that fall to American actresses.

A dynamic, exquisitely trained foreign actress would have no reason to

play such a part. Moreover, such casting would be inappropriate. As a result, many superb actresses from abroad must content themselves to working in their native lands.

One foreign actress currently trying to buck the odds is a Spanish beauty, Assumpta Serna, who is living for the time being in Southern California trying to establish herself.

Serna is a star in Spain and a highly respected, well-known actress in the rest of Europe, thanks to some 25 movies made there. Americans might know her from her 1988 performance in ''Matador'' and in eight episodes of the TV series ''Falcon Crest.''

Like many European actresses, she is as much at home on stage and in television as she is in movies.

She may now be seen in ''Wild Orchid,'' starring Mickey Rourke and Jacqueline Bisset.

The antithesis of the cliche Hollywood Latina with flashing eyes, coal-black hair, olive skin and pepper-pot disposition, Serna is a tall, serene beauty with fair hair and a soft feminine voice fluted by a blend of Spanish and her native Catalan.

Serna is a mature, polished actress whom critics both in the United States and abroad have praised lavishly.

Serna says she hoped to make a breakthrough in a significant role in a mainstream Hollywood film.

''Most of my work has been done in Spain, France and Italy,'' she said. ''Like other performers, I want to play for the largest possible audience. American films are the only ones that provide international audiences.

''I have an agency working for me here, a small agency in which I will not be lost. Perhaps if a film is going to be directed in Hollywood by a foreign director, my opportunity to work here would be better.

''In Europe, where many films are subsidized by governments, there is not such pressure to make big profits as in America. Films are made for artistic reasons and more chances are taken. Perhaps Hollywood feels casting foreign actresses is too big a gamble.

''Europeans are not as sensitive to language and accents. We are accustomed to hearing accents within our own countries. In Spain there are six or seven dialects that must be translated.

''English has become a second language to many Europeans. I speak English

well enough to understand the English of Germans, Frenchmen, Italians and Scandinavians. We all find it easier to speak some English than to learn a dozen different European tongues.

''For me in Hollywood it is a matter of finding the right part and then being here to talk to the producer and director. If I'm in Europe it would be a disadvantage.

''I can work often in Europe, but I choose to struggle here. Few people like to start from zero again, but I think it is very healthy and very humbling.

''Here I am able to observe people again. In Europe they look at me, and that is not good for an actress.''

#90106u1194 04/16/1990 ~United Press International

(APRIL 16) UPI - South African authorities announced today that weekend fighting between rival black movements in Natal province has left at least 31 dead, including a soldier and a policeman. Police say the worst incident came yesterday, when a group of blacks armed with rifles and shotguns attacked a cluster of tribal huts. Two men and a woman were killed and nine others wounded.

Flash flood warnings were posted this morning in a three-county area surrounding the Dallas suburb of Garland, as heavy rains swelled rivers and streams. Garland police said NO injuries were reported and damage was minimal... but forecasters say the threat of flooding is increasing as runoff from yesterday's heavy thunderstorms rushes into rivers, creeks and ditches.

Government troops in India are rounding up suspected Moslem separatists today as Prime Minister V-P Singh's government rejected calls to end a curfew in Moslem Kashmir. The curfew has confined Millions of Kashmiris indoors for 11 days without access to fresh food or medical care. Troops are hunting the Moslem separatist abductors of three hostages, who later killed them.

A nationwide poll says a fear of chemicals is turning America's backyard gardeners to organic gardening in record numbers. The poll says 57 percent of the nation's fruit and vegetable gardenders shunned pesticides, herbicides and chemical fertilizers in favor of organic methods in 1989. That's a five-percent increase over 1988.

#90106u1210 04/16/1990 ~United Press International
JERUSALEM (APRIL 16) UPI - The Israeli army imposed a curfew in the occupied Gaza Strip Monday, confining 720,000 Palestinians to their homes in an attempt to prevent demonstrations on the second anniversary of the assassination of PLO leader Abu Jihad.

Black flags of mourning flew above several homes in Gaza City and marches were held in several West Bank towns but no major disturbances were reported.

Khalil Wazir, who used the name Abu Jihad, was the No. 2 man in the Palestine Liberation Organization. He was gunned down April 16, 1988, in his Tunis home. The PLO charged Israel carried out the killing but Israel has never acknowledged a role in his death.

Abu Jihad's death prompted mass rioting throughout the occupied West Bank and Gaza Strip. Fourteen Palestinians were killed and dozens wounded in the bloodiest day of violence during the Palestinian uprising.

In Nablus Monday, four Palestinians were wounded, two by rubber bullets, in clashes with soldiers, Palestinian sources said. A soldier was slightly injured by a rock, Israel Radio reported.

In Arab East Jerusalem, youths smashed the windows of several cars and set a tire ablaze in Salah ed Din Street, the main commercial thoroughfare. Police used tear gas to disperse the protesters and arrested several people.

Clashes were reported in several West Bank towns and refugee camps. The curfew on the Gaza Strip marked the 15th time the army had confined residents to their homes since the start of the 28-month-old uprising against Israeli occupation.

PATNA, INDIA (APRIL 16) UPI - A ferocious fire apparently ignited by a gas cylinder explosion Monday roared through two overcrowded cars of a commuter train, trapping and killing at least 95 people and injuring about 100 others, police said.

The fire started about 10:15 a.m. shortly after the train departed the Gulzar Bagh station on the eastern end of Patna, the capital of northeastern Bihar state, 530 miles southeast of New Delhi, police said.

The 16-car train was bound for the city's main railway station.

Police said that based on survivors' reports, investigators believed the inferno was sparked by the explosion of a natural gas cylinder used for welding torches that was brought aboard one of the cars.

The nozzle of the cylinder, the shattered, blackened hulk of which was later recovered from the charred remains of the car, apparently came off, releasing the pressurized contents in a tremendous gush, police said.

Investigators speculated that the leaking gas was then ignited by a cigarette and the cylinder exploded in an intense fireball, police said. Flames spread rapidly backwards to the second coach by wind created by the forward movement of the train, they said.

At least 95 people were killed, most of them burned so badly that identification was impossible, said police officers at the scene.

It was believed that a few passengers may have died in a stampede to escape the flames, which started at the front of the first car, blocking an exit door, they said.

About 100 other people were injured in the tragedy and rushed to two nearby hospitals.

''After smelling something like gas, I felt suffocated and jumped out of the train,'' said Ram Narain Prasad, who sustained a head injury in his leap from the second car.

''We were playing cards. Suddenly a strong smell of gas engulfed the whole compartment and in a trice, a column of thick smoke and leaping flames enveloped the ill-fated bogey (car),'' Suresh Singh, a railway employee, told the Press Trust of India news agency.

Police said it appeared that there had been about 100 people in each car, a large number of them office workers on the way to their jobs. Most of those in the first car died, while the majority of the survivors came from the second car, they said.

Officers prevented hundreds of curious spectators and frantic relatives seeking family members from flooding into the grizzly scene, over which hung the gagging odor of charred human flesh. Several burned corpses hung from the sides of the two cars hours after the tragedy occurred.

A large number of bodies were found piled on top of each other at one end of the first car, indicating that passengers had huddled together in terror in a bid to escape the flames, police said.

The once-red paint of the cars was seared black and the wooden chairs inside were badly burned.

Federal Railway Minister George Fernandes gave Parliament a preliminary report on the tragedy and then flew to Patna to supervise the investigation.

Prime Minister V.P. Singh in his condolence message said he was deeply distressed to hear of the train tragedy.

''No words can express the grief and the loss suffered by the families of those killed. My heart-felt condolences to the bereaved families,'' said the message.

Bihar Chief Minister Lallu Prasad Yadav announced that he would demand from the Railway Ministry compensatory payments of $11,764 for the next-of-kin of each of the dead.

The New Delhi office of the commissioner of railway safety announced it would launch an investigation into the tragedy.

MOSCOW (APRIL 16) UPI - Computer problems have forced the Soviet Union to delay by two more months the already-postponed launching of the latest addition to the Mir space station, the Glavkosmos space agency said Monday.

It is the third delay of the newest Mir module, or space station building block. Originally set for March 30, the launch was put off until April 9, then until April 19. On Monday, Glavkosmos spokesman Nikolai Semenov told United Press International the launch is now set for June.

''The problem is connected with software on the Mir station,'' where the new module is intended to develop materials for industrial use, said Semenov, who works in Glavkosmos's international department.

''We thought we had better wait and get to the bottom of the problem,'' Semenov said. He agreed the latest delay was a rather long one, even given the Soviet space agency's chronic problems with meeting scheduled launch dates for additions to the Mir.

Docking problems have also plagued the Mir project, both in bringing cosmonauts to the space station and in attaching the modules, which are similar to the building blocks of a child's erector set.

In December, a 19-ton expansion module, Kvant-2, nearly failed to dock with the Mir, and could have become an expensive ghost ship because the module can exist apart from its mother ship only for a limited time. But space technicians corrected the problem and the linkup was made.

The Kvant-2 module doubled the size of the space station, relieving

overcrowding. The station already has a specialized Kvant-1 module used for astrophysical research.

The new module is called ''Chrystal'' and, when finally launched, will be used to carry out research in astrophysics, geophysics, biotechnology and to develop semiconductors for industry, expected to bring a profit of $40 billion.

The new emphasis on profits stems from the market-oriented economic reforms of Soviet President Mikhail Gorbachev, who wants the space program to support itself. Parliamentary critics of the space program, who charge it yields no practical benefits, have also accelerated the drive for profits.

The Mir, the jewel of the space program along with the Buran shuttle, was launched Feb. 20, 1986, less than a month after the Jan. 28, 1986, explosion of the U.S. shuttle Challenger that killed seven astronauts.

Mir has been almost constantly manned, except for a short time in its early history and for four months last year.

#90106u1278 04/16/1990 ~United Press International

SAN FRANCISCO (APRIL 16) UPI - Growing numbers of voters think Sen. Alan Cranston, D-Calif., should resign because of his involvement in the Lincoln Savings and Loan scandal, a poll said Monday.

Cranston, 75, continues to lose backing from the public, despite an aggressive campaign to blame the press and former chief thrift regulator Edwin Gray for his problems, California Poll director Mervin Field said. Cranston has vowed to seek re-election. But Field said, "Alan Cranston is not winning in the court of public opinion."

In a poll taken between March 26 and April 6, 47 percent of the respondents said Cranston should resign before his term ends in 1992; 32 percent said he should not resign and 21 percent had no opinion. Just two months ago, 62 percent said Cranston should finish his term while only 25 percent felt he should quit.

The latest California Poll also said Cranston would only get support for re-election from 15 percent of the voters as opposed to 66 percent against giving him another term in office.

Cranston's popularity has plummeted since disclosures about his involvement in the Lincoln Savings and Loan scandal began last year. Cranston solicited nearly $1 million for his campaigns and causes from the thrift's controversial chairman, Charles Keating Jr., while Cranston met

with federal regulators examining Lincoln. Cranston has denied any wrongdoing.

Pollsters conducted 847 interviews. The survey had a margin of erro of 3.5 percentage points.

#90106u1298 04/16/1990 ~United Press International

BY STEVE GERSTEL

WASHINGTON (APRIL 16) UPI - The Senate, in a moment of enlightment, has set a statute of limitations on the experimental use of drugs, including cocaine, and saved a generation of Americans for future public service.

The verdict came in the case of Timothy Ryan, nominated as the nation's top thrift regulator, who was confirmed 62-37 despite admitted use of marijuana and, on one evening, cocaine.

Ryan, now 44, partook of the illegal substances in the early 1970s at a time when the enjoyment of such pleasures was, if not pervasive, at least fairly common among men and women his age. It was also illegal.

As all nominees are required to do, Ryan complied with an exhaustive check by FBI in which he declared his drug experimentation. This information was then transmitted to the Senate Banking Committee, which handled the appointment.

Under normal circumstances, the chairman and the ranking members of the committee - in this case Sen. Don Riegle, D-Mich., and Sen. Jake Garn, R-Utah, - are privy to this information, which is a confidential communication from the president.

These two, Riegle and Garn, were at liberty to share this information with other members of the committee. Whether they did remains unclear but probable.

Although Ryan took a pounding at his confirmation hearing, mostly because the Democrats found him painfully inexperienced in the world of finance, the issue of drug use was never raised.

It was only after the information was leaked - it later prompted a request for an investigation by the ethics committee - that Ryan's long-ago experiment with drugs became public knowledge. He immediately admitted it and expressed his regrets.

Nor was this part of Ryan's past used by his opponents in the Senate debate, although Democrats had hopes, apparently based on nothing solid,

that they could defeat him.

Interestingly, it was two Republican conservatives, Senate Republican leader Robert Dole and Sen. John Warner, R-Va., who made mention of Ryan's drug use and both did so in his defense.

The most telling argument, made by both senators, is that denying a person public office on the basis of long-ago experimental drug use would deny the nation a ''generation'' of talented and committed individuals.

The Senate, in confirming Ryan, reached that very decision and thereby set a precedent for future nominees, although Warner stressed that each case will have to be judged on its own merits.

That such heavy-handed anti-drug senators as Sen. Jesse Helms, R-N.C., and Alfonse D'Amato, R-N.Y., joined in Ryan's approval seems to be the issue at rest.

What the Senate decided in the Ryan case is limited to appointments in the executive branch and may not be applicable to lifetime nominations to the federal courts. Only two years ago, David Ginsburg withdrew his nomination to the Supreme Court after it became known he had used marijuana.

The question is already moot with respect to elected officials. A growing number of those in office have openly admitted the same kind of enounter with drugs as Ryan and gone on to win another term.

As sound as the Senate's decision in the Ryan case is, it does raise some aspects of hypocricy. The same senators who are now willing to forget the transgressions of 20 years ago, have, and will again, vote for stiff prison penalties for the user of today.

#90106u1312 04/16/1990 ~United Press International

NEW YORK (APRIL 16) UPI - Goodwood Travel said Monday it will resume next month for one journey only the famous London to Istanbul railroad service aboard Europe's historic train, the Orient Express.

"For more than a hundred years the Orient Express has symbolized the ultimate in luxury train travel," said Goodwood Travel, a tour operator based in Canterbury, Britain. "It was made famous by its illustrious clientele, which included members of European royalty, diplomats, notorious spies, and femmes fatales, immortalized by the film industry."

The Orient Express, Europe's most famous railroad service started in the late 19th century, was discontinued after World War II, financially unable to withstand the competition from airlines and faster and cheaper trains.

Goodwood Travel said 100 fortunate and presumably wealthy travelers will be able to board the Orient Express' original Pullman cars at London's Victoria Station May 30 for an Istanbul-bound journey of four days and five nights.

The Pullman cars, which belonged to France's Compagnie des Wagons-Lits, were discarded after the service was discontinued. The cars were saved from destruction and restored by two investors, Albert Glatt and James Sherwood, and are now used for leisure trips on the Nostalgie Istanbul Orient-Express and the Venice Simplon Orient-Express lines.

The "Stamboul Train" will take the travelers across the English Channel to France, and continue through West Germany, Austria, Hungary, Yugoslavia, and Bulgaria to Istanbul.

"In keeping with the occasion, there will be welcome receptions, gala dinners and banquets in palaces, a private performance of the famous Vienna Boys' Choir, sightseeing and the ultimate VIP service throughout," the tour operator said.

Guests will spend three nights in the refurbished gold-and-blue luxury Wagon-Lits compartments and two nights in five-star hotels in Vienna and Istanbul. Stops are scheduled in Salzburg, Austria, the Hungarian capital of Budapest, and Sofia, Bulgaria.

Among the scheduled extravaganzas are a band and red-carpet farewell in London, fireworks along the road, a pianist playing famed tunes of the 1920s aboard the train, visits to historic places in horse-drawn carriages a cruise down the Danube river, as well as dancing and champagne in the Bar Salon, restored to its original panelled splendor.

There will be a special Roaring Twenties night where guests are expected to be "suitably attired," Goodwood said. The return trip will bring the travelers back to modern times for a short three-hour flight aboard the Concord supersonic jet plane. Goodwood Travel did not disclose the price of the trip.

(APRIL 16) UPI - Americans got a 24-hour reprieve in filing their 1989 income taxes this year because the traditional deadline, April 15th, fell on Easter Sunday. But just the same, the I-R-S is bracing for the last-minute avalanche. Workers in the I-R-S regional office in Philadelphia alone are expecting as many as two and one-half-Million 11th-hour returns. I-R-S Commissioner Fred Goldberg says his taxes, prepared by someone else, were filed last week.

Investigators today will return to the site of an oil refinery explosion which killed one worker in Tampa, Florida. The blast started a fire that caused Citgo Petroleum to shut down its loading operations. Police say the victim was repairing a vapor recovery unit when the vapor apparently ignited. Firefighters smothered the flames with foam, preventing a nearby gas storage tank from also exploding.

The Soviet Union's ultimatum against Lithuania has come and gone, and Lithuania isN'T budging from its stance for independence. In Moscow, ministry officials are awaiting word to cut off raw materials to the Baltic republic. The Soviets promised the embargo if Lithuania did NOT rescind independence-related laws by yesterday. Lithuania's full Council of Ministers is to meet today and Parliament is set to convene tomorrow.

Five former African National Congress members wrote an open letter today to black nationalist leader Nelson Mandela asking for help in bringing to justice the A-N-C officers who allegedly tortured them. The five men told a London newspaper they were tortured and accused of being South African agents after a mutiny in an Angolan A-N-C camp in 1984.

#90106u1367 04/16/1990 ~United Press International

HOLLYWOOD (APRIL 16) UPI - Film Roman, the animation studio that produces the ''Garfield'' projects and other TV series, will make the new Howie Mandel half-hour animated strip series ''Bobby's World.''

The show, ordered by Fox Broadcasting's Fox Children's Network, is being produced in conjunction with comedian Mandel, whose fictional 4-year-old Bobby character has been a standard in his stand-up comedy routine.

The network has ordered 13 half-hour episodes to begin broadcasting on Saturdays in mid-September. The show fill feature Mandel introducing his alter ego Bobby, his dog Roger and his stuffed toy spider Webbly.

BARKIN ABOARD

Ellen Barkin has been added to the cast of ''Switch,'' joining Jimmy Smits JoBeth Williams and Lorraine Bracco in the Blake Edwards comedy.

''Switch,'' to be directed by Edwards from his original story and screenplay, is a contemporary fantasy about a male chauvinist who dies and is reincarnated as a beautiful woman.

Barkin will be seen as the sexy and beautiful woman possessed with the mind of a macho male. She most recently co-starred in ''Sea of Love'' and ''The Big Easy.''

FILM AWARD

''The First Power,'' a fantasy starring Lou Diamond Phillips, has been given the Golden Scroll award of merit for outstanding achievement by the Academy of Science Fiction Fantasy and Horror Films.

In making the award, academy founder Donald Reed said, '''The First Power' represents a lost genre in supernatural thrillers that audiences thrive on.''

Past Golden Scroll award winners include ''The Exorcist,'' ''The Omen,'' ''Logan's Run'' and most recently, ''Teenage Mutant Ninja Turtles.''

THREE MEN AND A SEQUEL

''Three Men and a Little Lady'' is the title for the sequel to the 1987 box-office smash hit ''Three Men and a Baby,'' starring Tom Selleck, Steve Guttenberg and Ted Danson.

The trio of actors will reprise their original roles as the surrogate fathers to the now 5-year-old Mary, played by Robin Weisman, selected for the role after a nationwide talent search.

Leonard Nimoy, who directed the first picture, has been replaced behind the camera by Emile Ardolino, whose credits include ''Dirty Dancing.'' This time around the three bachelors try to keep the family together when the little girl's mother decides to marry.

MOVIE GAMBLE

NBC-TV is gambling that the old comic page character ''Archie'' will be a hit in a new two-hour live-action film titled ''Archie, To Riverdale and Back.''

Sheduled for broadcast May 6, the film marks the first live-action representation of the 49-year-old comic strip whose teenagers will be shown as young adults facing current social problems.

Starring in the film will be Christopher Rich in the title role, Laureen Holly as Betty, Karen Kopins as Veronica, Gary Kroeger as Reggie and Sam Whipple as Jughead. Co-starring are David Doyle and Fran Ryan.

#90106u1370 04/16/1990 ~United Press International

CHICAGO (APRIL 16) UPI - Sears, Roebuck and Co. announced Monday that it will open Brand Central appliance centers in 192 stores nationwide Wednesday.

The company said the openings will bring to 636 the number of Brand Centrals opened since the campaign began in August 1988. The program is ahead of schedule and is expected to be completed by mid-year with more than 850 stores involved.

Sears Vice President Marvin Stern said the centers will offer more than 80 appliance and home electronics brand names in addition to Sears own Kenmore brand.

Wednesday's openings include stores in 17 metropolitan areas: Atlanta, Baton Rouge and New Orleans, La.; Birmingham and Montgomery, Ala.; Minneapolis-St. Paul, Minn.; Bismarck, N.D.; Des Moines, Iowa; Honolulu; Lincoln and Omaha, Neb.; Pensacola, Fla.; Knoxville and Memphis, Tenn.; Pierre, S.D.; Little Rock, Ark.; and Jackson, Miss.

Overall, 21 states will be involved in the openings.

#90106u1392 04/16/1990 ~United Press International

(APRIL 16) UPI - Prosecutors in Brooklyn, New York, may face an uphill battle in opening arguments today in the trial of two whites charged in the racially-motivated killing of a black teen-ager. A black prosecutor recently resigned, saying he was being treated as a token. A key prosecution witness last week dropped out of a drug treatment program, opening herself up to damaging cross-examination. Joseph Fama and Keith Mondello are charged with murder in the shooting death of 16-year-old Yusef Hawkins last summer in Bensonhurst.

Police in Manchester, New Hampshire, are apologizing to a five-year-old girl because officers initially refused to believe a report of a stolen Easter bunny. A live rabbit named Cindy was apparently stolen from a cage outside the home of Kristy Tierney. But when the girl's mother called

police, an officer laughed. Police later realized the call was serious and went to the home to apologize. But so far, there's NO word on the missing bunny.

-30- 1143

#90106u1422 04/16/1990 ~United Press International

EAST BERLIN (APRIL 16) UPI - The Berlin Wall is in pieces. The once-solid Soviet bloc has fallen apart.

And now, in an even more direct affront to the man on whose ideology the communist world was based, the citizens of Karl Marx Stadt will hold a referendum to decide whether to bring back the city's former name, Chemnitz.

East Germany's former communist regime in 1953 renamed Chemnitz, the country's fourth-largest city, after Karl Marx, the German whose doctrines gave rise to the modern communist and socialist movements.

After the overthrow of the hard-line communist government of Erich Honecker late last year, thousands of city residents signed petitions demanding restoration of the centuries-old original name.

The result of the referendum, which begins Tuesday, will be announced April 23. Repudiation of the Marx-linked name is widely expected.

The balloting will be conducted by mail. Authorities have said they have sent ballots to 234,000 people 18 and over who have their permanent residence in the Saxony city.

-30- 1251

#90106u1432 04/16/1990 ~United Press International

NASHVILLE, TN (APRIL 17) UPI - Mac McAnally has a baby face, hiding behind a stubby red beard. His overalls and lumbering gait can fool one into thinking he may have come in with the last load of turnips.

One of his influences has been Nobel laureat William Faulkner, a fellow Mississippian.

McAnally is already an extremely successful songwriter, studio musician and publisher.

Now he's out with his first Warner Bros. country album, ''Simple Life,'' and the first single, ''Where I Come From,'' is a hit on country radio.

McAnally is not your ordinary songwriter. He still lives in Muscle Shoals, Ala., but he spends a lot of time in Nashville doing session work.

His philosophy about the business goes like this.

''I am probably not as ambitious as a lot of people who survive and thrive in the industry. I was not sombody who would go and beat my head against the wall saying, 'Listen to me sing or listen to me play.' It's just not in my personality. I'd say it has worked against me to a certain degree.''

He said it's in his nature to be ''humble.''

''I don't look good anyway but it definitely looks bad on me to be different than my nature. That has put more pressure on the songs that I write, but fortunately I've had a few pretty good songs along the way that took up a little slack.''

McAnally wrote ''Crime Of Passion,'' recorded by Ricky Van Shelton, ''Old Flame,'' recorded by Alabama and ''Two Dozen Roses,'' a recent hit by Shenendoah.

''I try to write the kind of music I hear in my head. I've always written it and then tried to figure out what to do with it. Some of it you literally throw into the trash can.''

He defines motivation in the industry.

''I'm not driven to succeed. I'm driven to make the music. If I was a fry cook at Burger King, I would be writing the same songs that I am now.

''The things that drive some people to say they want the world to know their name or who they are or to clap when they sing, those kind of things are not as prevalent in my personality as they probably need to be for somebody to end up a huge act,'' he said.

He said one of the dangers of the entertainment business is that some artists are led to believe they are better than other people.

''I've never seen that work to anybody's advantage. A lot of my friends on whose albums I've played over the years kinda get caught up in that kind of thinking: that if a crowd shows up every night and tells you you are better than they are you wind up thinking that sometimes. Fortunately I've worked with a lot of people who have figured out not to think like that.''

McAnally says he's basically a lazy person.

''Where I come from people take a pride in economy of motion. I've gone through periods of my life where I tried as hard as I could to write songs and I've gone through periods of my life where I almost tried as hard as I could not to. And I can't keep from it.''

McAnally describes his method of writing as ''backwards.''

He said most professional writers come in with a blank piece of paper and write something - many write a song a day.

''In my case I schedule my life like I wasn't a songwriter at all. And eventually songs fester up out of me, force their way out of me no matter what I'm doing - mowing the yard, driving up here to work sessions. The songs almost happen whether I help them or not.''

McAnally, who has been playing in country bands since he was 13, was an avid reader of Faulkner in his teens.

''I got on to him because he was writing about people I knew. He was over my head when I first started reading. But the people he wrote about I always understood. My father entertained himself by watching other people. Faulkner was that way,'' he said.

''Faulkner didn't assume there was a maximum or minimum amount of depth that a book would have. I think he said this is what I'm going to do even it it's different. He did it well enough that he got recognized. There is not a lot of reason for people to look at depth in a song but occasionally one comes along. I don't try to force that but I don't arbitrarily assume that it won't go in a song.

''I've always been a student of not knowing what I can't do. If you don't know you can't do it, sometimes you can do it. I don't mean that every song I write has to have a deep burning message. I just don't go into it assuming it can't have.''

McAnally said he feels like he is living a charmed life.

''I am very interested in making records, the phsycial making of records. I am a hard worker in that respect. I like to work in the studio. I play on a lot of records with Dolly Parton, Patty Loveless, Ricky Skaggs and Don Williams. I get to do that but I don't have to do it all the time. I get to write songs but I don't have to do that all the time. I get to produce and publish and play shows. But I don't have to do it every weekend.

''It helps you psychologically not to have to depend on any one of those things to make your living. Someone told me that songwriting is the best job in the world. Well, it is until some morning you wake up and say, 'I've got to make up something to pay the electric bill.' I feel like a guy with 10 hobbies and no job.''

#90106u1438 04/16/1990 ~United Press International

WASHINGTON (APRIL 16) UPI - Private banks warned Monday they are reluctant to lend to Central and Eastern European nations or write down their debt unless Western governments first ''take the lead'' in helping bring about economic reforms in the region.

The creditworthiness of the Central and Eastern European countries is ''limited and deteriorated'' from 1985 to 1990, Horst Schulmann, managing director of the Institute of International Finance, told a news conference.

The IIF, based in Washington, is the international banks' leading research and lobbying organization.

In particular, creditworthiness worsened ''as result of the disruptions caused by the 1989 political changes'' that toppled the region's communist regimes, Schulmann said in presenting an IIF report, ''Building Free Market Economies in Central and Eastern Europe.''

''We do not want any misunderstandings,'' he said. Clarification about what banks are willing to do in Central and Eastern Europe ''can prevent the mistakes made with Latin America in the '70s and '80s,'' he added.

Private banks loaned billions of dollars to Latin America in the 1970s, without much regard to nations' creditworthiness. In the 1980s, most Latin American countries were unable to repay the loans, compelling banks to declare heavy losses and in some cases to write down the value of their loans.

The IIF report said bank lending to Central and Eastern Europe at this point ''will have to be based on confidence that the reform process will be successful and that countries will again become more creditworthy.''

Bank confidence will therefore depend on Central and Eastern European governments' determination to carry out reforms and will be greater ''if Western governments take the lead and provide tangible support in the current climate of uncertainty.''

Schulmann contended that private banks want a reversal of the role that made them the principal source of funding for Central and Eastern Europe over the last five years, when organizations such as the International Monetary Fund and the World Bank were ''taking out'' money from the region year after year by disbursing less than they received in loan repayments.

A World Bank spokesman said this reflected Romania's prepayment of loans.

Schulmann also said the Western industrial powers forming the Paris Club of creditors became net lenders to Central and Eastern Europe ''only in

1988-89, not through new lending but by capitalizing'' the interest payments Poland was unable to make to club members.

''We want the multilateral institutions and the bilateral lenders to take the lead'' in financing the needs of Central and Eastern Europe, he said.

Schulmann rejected proposals that banks provide relief of the region's $117 billion foreign debt along the lines of debt and interest payment reductions given to Latin American countries such as Mexico.

The IIF director noted that unlike Latin American countries, those in Central and Eastern Europe owe most of their debt to official creditors.

In the case of Poland, $10 billion of $40 billion in debt is owed to private banks, so that ''even wiping out the bank debt would only solve one-fourth'' of the country's debt burden, Schulmann said.

The responsibility for reducing debt falls with the Paris Club, he said.

The report says that Western governments must contribute to financing structural reform in Central and Eastern Europe with bilateral and multilateral aid, export guarantees and loans from the IMF, the World Bank and the European Bank for Reconstruction and Development.

Western countries should open up to imports from Central and Eastern Europe, Schulmann said, adding that the West should open its labor markets to workers from the region as well.

Meanwhile, Schulmann warned, the number of banks involved in lending to the region may be smaller, and those than do elect to make loans may be more selective, than in the past.

NEW YORK (APRIL 16) UPI - Latest metal market prices as quoted Monday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 70.00-71.00 c-lb.

Antimony, domestic, refined in alloy, $1.25-$1.40 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 133.00 c-lb.

Lead, common, U.S. primary producers 50.00 c-lb.; U.S. non-primary

(secondary) producers 54.00-60.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $280.00-$290.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.25-$4.40 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $128.00-130.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $476.50-$480.00; dealer-approx., $475.00-$480.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $103.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $103.90 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 306.50 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 83.00-83.75 c-lb.

HOUSTON (APRIL 16) UPI - First City Bancorporation of Texas Monday reported net income of $90.1 million, or $4.46 a share, in the first quarter, compared with $26.2 million, or $1.09 a share, in the same period last year. Revenues were $492.5 million compared with $348.2 million for the first quarter of 1988.

The biggest boost to earnings stemmed from the March sale of First City's credit-card business to The Bank of New York Company. The transaction involved a pretax gain of $139.7 million, increasing First City's capital by more than $100 million.

"During the quarter, management elected to bolster reserves, strengthen the balance sheet and enhance earnings capacity for future periods," A. Robert Abboud, chairman and chief executive officer, said.

Other first-quarter pretax income included a gain of $118.1 million of net

interest income and $44.9 million of other income. First City deducted $35.5 million for net loan-loss expense, $134.2 million in non-interest expense and $42.9 million in income tax expense.

Total assets as of March 31 were $13.7 billion compared with $12.7 billion a year earlier. Deposits also increased to $10.6 billion compared with $10.3 billion for a year earlier.

Loans of $7.6 billion as of March 31 were up eight percent compared with the year-earlier level of $7.1 billion. Average commercial loans increased by 26 percent, with the bulk of the growth coming in loans to middle-market and large Texas-based businesses, including energy companies.

Average international loans, though still small, rose by 75 percent on a year-to-year basis while average real-estate loans declined by four percent.

On April 19, 1988, First City completed a federally assisted bailout. It was financed with $500 million of private capital, a $970 million note from the Federal Deposit Insurance Corp. and a $108 million loan from a group of banks. The FDIC in 1989 eliminated its entire interest in First City.

First City is an international bank-holding company having 20 banks operating in 75 locations throught Texas, branches in London, Singapore and Nassau and representative offices in Hong King, Tokyo, Los Angeles and Denver.

WASHINGTON (APRIL 16) UPI - Convertible currency foreign debt of Central and Eastern European nations in 1989, according to ''Building Free Market Economies in Central and Eastern Europe,'' an Institute of International Finance report published Monday. Figures are in billions of dollars.

Central and Eastern Europe	Total	Commercial banks
	116.8	56.1
Bulgaria	10.0	6.6
Czechoslovakia	7.2	5.0
East Germany	21.6	13.8
Hungary	19.7	15.1
Poland	40.4	8.8
Romania	0.2	0.1
Yugoslavia	17.6	6.6

#90106u1504 04/16/1990 ~United Press International
PHILADELPHIA (APRIL 16) UPI - The senior partner of the accounting firm of Laventhol & Horwath said Monday the grim picture of the company painted in a newspaper article is "overblown."

Robert Levine, scheduled to become the firm's executive partner June 1, rejected the Wall Street Journal's contention that layoffs will be heavy and the company's 425 partners are disgruntled about heavy litigation losses. He did confirm that partner payouts of profits were reduced because of the litigation.

But Levine said the report was "overblown and out of context and proportion." He rejected reported speculation that layoffs will be ten percent to 15 percent and said such figures "are totally out of line."

Laventhol had revenues of about $345 million last year, but its net income was down about nine percent with the earnings per partner about the same, because of the reduced number of partners. They remain profitable, Levine said, and "expect this year to be one of the best we've ever had."

The nation's seventh largest accounting firm is in its seasonal reduction of staff following the tax season, he said, with decisions on the amount of staff reductions being determined in each of the firm's 51 offices. A full count will not be known for about a month, he said.

"The industry as a whole has been shrinking its partnership base in order to get greater productivity," Levine said. "We are consistent with the industry."

The firm has 425 partners, down about 25 since a year ago, with 3,500 professional staff employees and 1,200 administrative employees. The firm hires staff in September, Levine said, and on a yearly average staffing levels have remained steady.

Two lawsuits in 1989 went against the firm to the tune of about $43.5 million, with insurance picking up about $24.4 million. But, Levine said, "We haven't lost any material business to speak of due to litigation."

Levine said they had recently signed two major clients, "either one of which could be our largest account for the coming year." He declined to name the clients, both of them private companies.

The litigation, because it affected profitability, affected partner payouts in April, he said, because their tax liabilities were less. However, he said, "litigation as a problem for the firm has peaked. It is still a problem and we have to work at it but it is less of a management problem than it was a year ago." "There's nothing on the horizon that is

particularly troublesome to us," Levine said.

#90106u1555 04/16/1990 ~United Press International
SRINAGAR, INDIA (APRIL 16) UPI - Authorities Monday closed three newspapers that had advocated Kashmir's secession from India and rejected calls to end a curfew that has confined millions indoors for 11 days without access to fresh food and medical care.

Thousands of government physicians, nurses, paramedics and other health workers were to decide Monday night on a mass resignation to protest the continuation of the curfew. But several doctors said an alternative plan to stage an indefinite hunger strike was also under consideration.

A committee formed by state medical personnel had given the government until Monday to end the curfew, expressing fear of possible disease outbreaks or premature deaths among residents unable to obtain medical care.

They said health workers would try to open their own independent clinics if the mass resignation took place.

Authorities relaxed the curfew for two hours in 13 localities of Srinagar, the summer capital of Jammu and Kashmir state, 400 miles north of New Delhi. But security personnel who were ordered to shoot violators on sight enforced it across a majority of neighborhoods and the rest of the Kashmir Valley, the Himalayan region's main population center.

Troops also cordoned off and searched homes in four Srinagar localities, two of which have been hotbeds of separatist activity, police said. They had no further details.

The government closed two leading Urdu language newspapers and the official newspaper of the Jamaati Islami, a pro-Pakistan fundamentalist party with links to the Jamaati Islami in Pakistan.

All three papers support the secessionist movement in Kashmir.

The Press Trust of India news agency quoted an official spokesman as saying that the newspapers were closed because they had ''published highly objectionable and subversive material with the aim of striking terror among the public.''

One of the newspapers advocated the execution of a senior government official while another published a warning that non- Muslims would be killed if they did not leave the Kashmir Valley within 48 hours, the news agency quoted the official as saying.

The curfew was slapped on the valley, home to most of overwhelmingly Moslem Kashmir's more than 4 million residents, on April 6 to help security forces track down three hostages and their Moslem separatist abductors.

The hostages were killed April 11 after the government rejected demands it release three members of an Islamic extremist group, one of several guiding a popular uprising that erupted in mid-January against Indian rule of Kashmir.

More than 250 people have died since the insurrection began with the killing of protesters demanding self-determination in the Moslem area, which has long alleged discrimination by the Hindu-dominated Indian government.

The hostage slayings ignited indignation across India and the government, bowing to increased political pressure to take a hard line, expanded the hunt for the kidnappers into a massive roundup of suspected militants.

A senior police source has put the number of detainees - including several prominent political, religious and social figures - at more than 800.

In New Delhi, members of the lower house of Parliament from the state's former ruling National Conference party demanded to know when the government would lift the curfew, citing fears of starvation and health problems.

Federal Home Minister Mufti Mohammad Sayeed, also of Kashmir, responded if the curfew was lifted, ''it would become easy for the militants to escape.''

He said the government would not intervene with the administration of the state, which has been in the hands of Gov. Jagmohan since a National Congerence coalition resigned in mid-January.

Sayeed defended the measure, saying ''many'' separatist hideouts had been found during round-the-clock, house-to-house searches by troops and some ''hardcore'' extremists had been arrested.

''The government is concerned with the difficulties being faced by the people in Kashmir,'' he said, but added there could be ''no laxity'' in dealing with the insurrection.

The National Conference legislators walked out the chamber, but the statement drew applause from members of the Bharatiya Janata Party, a Hindu group whose support is crucial to the survival of Singh's minority National Front government.

(APRIL 16) UPI - Lithuania's leaders are meeting today to talk about how to deal with short supplies under a threatened Soviet economic embargo... but NOT to discuss giving in to Moscow to rescind independence laws. A spokesman for Lithuania's government denies speculation the leadership will ask the Soviets for more time to meet their demands to reverse the republic's independence movement.

Police say a fire on two overcrowded train cars in India today killed 95 people and injured about 100. Investigators believe the nozzle of a natural gas cylinder came off, and the contents were ignited by a cigarette. The cylinder exploded and the rushing wind quickly spread the flames through two cars on the 16-car train.

Three inmates surrendered today at Strangeways Prison in Manchester, England, because of food poisoning. But seven defiant inmates continued their hold on the jail and set fire to furniture in one wing of the prison. The blaze was the most ferocious since the uprising erupted 16 days ago. Firefighters put out the flames.

A published report says the treasury plans to revamp the banking and thrift industries in the wake of a savings-and-loan crisis. The paper quotes industry and government sources as saying proposals include a change in deposit insurance and the possible elimination of a separate thrift industry.

#90106u1575 04/16/1990 ~United Press International
(APRIL 16) UPI - Today's People:

HART A HIT IN MOSCOW: Gary Hart apparently is well respected in the Soviet Union. The former Colorado senator was in Moscow Monday and had a meeting with Foreign Minister Eduard Shevardnadze - no modest accomplishment for someone without a government position.

The Soviet news agency Tass said Hart and Shevardnadze talked about Soviet-U.S. relations, world political problems and economic cooperation, such as a fiber optic communications link between Europe, the Soviet Union and Asia. The Tass report referred to Hart as "a prominent politician" and made no mention of the Donna Rice affair that drove him out of politics.

BONADUCE BACK ON THE AIR: Actor-turned-DJ Danny Bonaduce will have to undergo regular drug tests as a condition of his return to the air on WEGX-FM in Philadelphia. Bonaduce, once the freckled lad on "The Partridge Family," recently finished a rehabilitation program after being arrested

in March while allegedly buying crack in Florida.

"I will be fired the moment anything illegal turns up in my system," said Bonaduce, who was to resume his radio show Monday night. "But that's fine. I don't want any more breaks."

Bonaduce, whose record also includes a 1985 arrest for possession of 50 grams of cocaine in California, says he doesn't mind the required drug tests and claims he passed up some job offers that didn't include testing.

"I'm going to have to fight this on a daily basis," he said of his drug problem. "I take no pride in 33 days of sobriety. But for the first time I can say I didn't take the easy way out, which would have been to take one of those job offers where they didn't care. It's time one of my mistakes didn't get me a raise."

MUSICAL NOTES: There will be a familiar name with an unfamiliar face in the crowd when Janet Jackson gets her star on the Hollywood Walk of Fame Friday. Big brother Michael Jackson intends to attend the ceremony but doesn't want to upstage Janet so he will wear one of his many disguises, according to Jackson's spokesman.

Eric Clapton had help at his Sunday night performance in Auburn Hills, Mich. Blues guitarist Stevie Ray Vaughn came out in mid-show and joined Clapton on his hit "After Midnight" and "Tearing Us Apart" from his new album.

Susannah Hoffs, former lead singer of the Bangles, goes into studio this week to start work on her first solo album since the Bangles split up. Hoffs wrote or co-wrote all the songs on the record, which will be out in late summer.

2 LIVE MIA: The 2 Live Crew can now be infamous for something besides its lyrics. The rap group didn't show up for a concert Sunday night in Nashville, Tenn., reportedly because of a disagreement over transportation arrangements. "There were a lot of difficulties," said concert promoter Leon Jackson. "We're going to give a full refund."

The crew had appeared as scheduled earlier Sunday at an autograph session, where rapper Brother Marquis talked about the controversy over the group's dirty lyrics. "We can be nasty, we can be nice," he said. "Depends on the age group we're playing. I just know that I need to get up for the show."

GLIMPSES: Olympic sprint champion Florence Griffith-Joyner has dropped out of Saturday's Toyota pro-celebrity auto race in Torrance, Calif., because she's expecting a baby in November.

First lady Barbara Bush has another commencement speech on her agenda. Her

May 14 address will be part of the University of Pennsylvania's 250th anniversary celebration, which also will feature Ronald Reagan and Nobel Peace Prize winner Oscar Arias Sanchez, the president of Costa Rica.

Bush also is to speak June 1 at commencement at Wellesley College even though some students there claim she is not a good role model because she is famous only for being President Bush's wife.

#90106u1584 04/16/1990 ~United Press International

WASHINGTON (APRIL 16) UPI - President Bush raised his arms and blew a silver whistle Monday - starting one of the scores of races at the 112th annual White House Egg Roll, a rite of spring in Washington.

Under blue skies and across the South Lawn, thousands of children rolled hard-boiled eggs, hunted for wooden eggs, frolicked with clowns, petted docile farm animals and were read stories by Vice President Dan Quayle's wife, Marilyn.

''The best part - seeing a horsey,'' concluded Emily Hammack, 6, of Mt.

Airey, Md. ''And seeing the president.''

President and Barbara Bush made a brief appearance at the affair, ''A Family Easter at the White House,'' which saw parents and children lined up for hours for a chance to play on the sprawling grounds.

Bush started one of the heats in the Egg Roll with a shrill whistle that got Mike Angel, 7, of Fairfax, Va., off to a fast start. He finished far ahead of the pack.

One problem, though. Instead of rolling the egg with his spoon, as rules require, Mike picked up the egg with the spoon and raced unhampered. Regardless, he was not disqualified.

At the Egg Roll, all children are declared winners, and all get a souvenir wooden egg stamped with the signatures of the first couple.

Mike's step-brother, Jason Planakis, 10, also got to shake Bush's hand. ''It was the first time I ever shook a president's hand,'' he beamed.

''You got to shake his hand?'' Mike shrugged. ''I didn't.''

Dolly Madison began the egg roll in 1812. Initially it was held on the grounds of the U.S. Capitol, but the event got so big and messy that congressmen raised a stink. So it was moved to the White House in 1878.

In 1926, before gates were erected around the White House, the egg roll attracted an an all-day crowd of about 46,000, considered an egg roll record.

The event is still public, but the gates better allow the White House to clear the grounds by mid-afternoon. The gates open at 10 a.m., although children of VIPs or others with connections slip in early.

''If we had to wait, I don't think we would have come,'' said Jeff Dean of Harpers Ferry, W. Va., a camera slung over his shoulder. Dean's connection - relative Benny Dean, was one of the event's country singers.

Keeping with Mrs. Bush's literacy crusade, youngsters received a canvas book bag packed with reading material. And in line with Bush's environmental theme, 20,000 Virginia pine seedlings were distributed to the crowd.

According to the White House Visitors Office, White House cooks boiled and dyed about 10,000 eggs for the day. Another 23,000 wooden eggs were donated to the cause.

Mrs. Bush, in a note on the day's program, welcomed visitors to the White

House and said, ''You are now part of history.''

Mark and Karen Chad, school teachers from Hamburg, N.Y., were there, along with their son, Adam, 3, and daughter, Kate, 6. ''What a day!'' Chad said. ''A chance to romp on the White House lawn.''

#90106u1604 04/16/1990 ~United Press International

CHICAGO (APRIL 16) UPI - Long-term television viewing is one cause of violent or aggressive childhood behavior and substantially contributes to obesity, the American Academy of Pediatrics said Monday.

''In 1989 the average child in the United States still spent more time watching television than any other activity except sleeping,'' the academy's Committee on Communications said in a policy statement.

The statement cautions physicians and parents about the potential effects of television viewing in promoting aggressive behavior and obesity. It updated a 1984 policy statement, citing Nielsen data showing children ages 12-17 watch 23 hours a week. By the time a child today reaches age 70, he or she will have spent about seven years watching television, the academy said.

''Although the amount of commercial television viewed by children has declined since 1980, the most recent estimates of television viewing do not include VCR use,'' the academy said.

''Therefore, the amount of time that children in our country spend in front of the television set has probably not decreased significantly in the past eight years,'' it said.

The AAP warned that the messages carried by programs children watch are a cause for concern. The academy estimated teenagers see and hear 14,000 sexual references and innuendos a year on television - only 150 of which deal with abstinence, sexual responsibility or contraception.

''The many implicit and explicit messages on television that promote alcohol consumption and promiscuous or unprotected sexual behavior also are a cause for concern,'' the academy said.

The AAP recommends:

-Parents should limit children's television viewing to one or hours a day.

-The media should portray sexuality responsibly.

-Television stations should be required by law to broadcast at least one

hour a day of educational programming.

#90106u1637 04/16/1990 ~United Press International
WASHINGTON (APRIL 16) UPI - Millions of Americans raced the clock and filed their 1989 income tax returns Monday, leaving only hours - and in some cases minutes - to beat the annual deadline.

''We're expecting about 23 million returns to come in this week, probably most of those will be postmarked by midnight,'' said Wilson Fadley, a spokesman at Internal Revenue Service headquarters.

From Philadelphia to Fresno, the IRS's 10 service centers geared up for the last-minute crush of 1040 forms while the U.S. Postal Service processed the flood of returns.

''We do have those people who pride themselves on getting as close to the deadline as possible,'' said Bill Statemeir of H&R Block in Boston. ''We've added extra personnel to handle it.''

Vigilant mail carriers stood by from coast to coast, getting last-minute returns stamped by midnight. At New York's main post office, last-minute filers were soothed by the sounds of live jazz in the cavernous lobby.

Taxpayers in New England, who file through an IRS center in Massachusetts, got a one-day reprieve because of the Patriot's Day holiday in the state Monday.

At the IRS facility in Ogden, Utah, workers were ''way ahead of schedule'' because of an increase in electronic filings, officials said.

A total of 111 million taxpayers are expected to file 1989 tax returns, with about 6 million qualifying for automatic extensions that give them until Aug. 15 to report.

But Fadley added: ''That's an extension time to file by, not an extension to pay.'' Tardy taxpayers are expected to estimate what they owe and send the government that amount.

In Atlanta, 300 taxpayer helpers were handling a non-stop flow of toll-free telephone queries from residents of Georgia, Alabama, Mississippi and Louisiana.

''We've been inundated with phone calls and we're doing our best to accommodate all of the last minute-filers in assisting them with their questions,'' IRS spokeswoman Peg Palmer said. ''Most of the questions are about how to file for an extension.

''Others are about tax law, which post offices are going to be open late and where they can go for assistance today,'' Palmer said. ''Apparently, a lot of people are still filling out their returns.''

Appearing on NBC's ''Today'' program, IRS Commissioner Fred Goldberg, who filed his tax return last week, said his agency is working at 78 percent efficiency vs. 62 percent last year.

''In terms of levels of service, folks having trouble getting through, that really bothers me and that is a reflection of a really tight budget, hiring freezes, promotion freezes,'' Goldberg said.

But he assured taxpayers that the administration ''is committed to funding a much higher level of service next year and when Congress passes the budget, that's what we'll give the American public.''

Looking ahead, the non-proft Tax Foundation said it will take the average American until May 5 to reach ''Tax Freedom Day,'' when they earned enough to pay their 1990 federal, state and local taxes.

''Working a record 125 days until May 5 to pay off the tax collectors may come as a shock to many Americans,'' the group said.

On a bit of a positive note, the IRS said as of April 5 it paid out $38.6 billion in tax refunds, with the average refunding running $851 vs. $824 last year. An estimated two-thirds to three-fourths of taxpayers are expected to get refunds.

#90106u1645 04/16/1990 ~United Press International

ABU DHABI (APRIL 16) UPI - Oil ministers of the United Arab Emirates, Saudi Arabia, and Kuwait will meet in Jeddah, Saudi Arabia, Tuesday to discuss the recent sharp decline in world oil prices, the UAE's official WAM news agency said Monday.

The meeting was set after telephone conversations between the three ministers Sunday night as part of the consultations among members of the 13-nation Organization of Petroleum Exporting Countries on oil-market developments, the agency said. UAE minister of petroleum and mineral resources Mana Saeed al Otaiba will fly to Saudi Arabia Tuesday for the talks, WAM said.

The statement helped firm oil prices Monday. World crude oil prices had fallen nearly 14 percent over a six-day period ending last Wednesday as a result of too much crude on the market. But prices slipped again Thursday, the last day of trading before the long Easter weekend, which extended

through Monday in Europe.

While acknowledging that news of the meeting helped stabilize prices Monday, a London trader was skeptical that anything concrete would be accomplished.

"What can they do?" the trader asked. "The fundamentals remain the same. They have been saying for months that everyone should adhere to production quotas," he added.

OPEC, which pumps more than a third of the world's oil, set an overall output ceiling for the cartel of 22 million barrels a day for the first six months of 1990 in an effort to support higher crude prices.

Largely as a result on cheating by Kuwait and the UAE, output has been running at more than 24 million barrels daily. Saudi Arabia has been the chief enforcer of quotas as the cartel's largest producer and was recently reported as planning to raise its production.

#90106u1670 04/16/1990 ~United Press International

KATMANDU, NEPAL (APRIL 16) UPI - King Birendra, capitulating to mounting pressure for democratic rule, dismissed his government Monday and endorsed a leading opposition figure to lead Nepal's first government in 30 years not set up by the monarch.

The new prime minister-designate, Krishna Prasad Bhattarai, acting president of the opposition Nepali Congress Party, was expected to announce on Tuesday his nine-member Cabinet, including two representatives of the monarch.

''I do not know to what extent I can do (justice) to the people who have sacrificed their lives in the movement, but I will do my level best,'' Bhattarai, 65, told reporters after his appointment.

Bhattarai, who was speaker of the Parliament when it was dissolved in 1960 by the father of the present monarch, promised multi-party general elections ''within one year's time,'' electoral reforms, the lifting of draconian security laws and a new constitution.

He also said that the king, who has wielded absolute power, ''was very receptive and welcomed the idea of (becoming) a constitutional monarch.''

Birendra had earlier Monday accepted the resignation of Prime Minister Lokendra Bahadur Chand, dissolved Parliament and officially lifted a ban on political parties.

Chand had been appointed by the king amid a wave of pro-democracy protests that began Feb. 18, paralyzing the capital and leaving at least 53 people dead as troops and police tried to control crowds at times as large as 200,000 people.

The monarch had proposed another candidate, Ganesh Man Singh, 75, known as the supreme leader of the Congress Party, to be the new prime minister, but Singh declined on health grounds and proposed Bhattarai.

Both Birendra and the opposition coalition of the Nepali Congress Party and the United Left Front - an alliance of seven parties who allowed Singh to negotiate on their behalf - swiftly endorsed Bhattarai's candidacy.

About 300 jubilant supporters gathered and clapped as Singh returned home from the royal palace with the announcement.

After winning the endorsement, Bhattarai told reporters, "It's a big challenge for a person like me, who is not mentally prepared to shoulder the responsibility of this high post, but (I am) happy and thankful to all the friends within my party and the United Left Front who expressed their faith in me.''

The Congress Party was elected by an overwhelming majority in Nepal's first general elections in 1959, but King Mahendra, father of the present monarch, dismissed the legislature in December 1960 and introduced the partyless panchayat form of government dominated by the royal palace.

Bhattarai said that elections ''will be held within one year's time,'' but he did not pinpoint a date for Nepal's first balloting under a multi-party system since the 1959 elections.

He also pledged to work for lowering the voting age from 21 to 18 and to introduce a one-person, one-vote system.

In addition, Bhattarai said his government will repeal all draconian security laws, which allow the government to arrest persons for months without assigning any reason, and pledged to ''form the constitution drafting committee immediately'' and require a report within 90 days.

He vowed to work to end the broad economic blockade against Nepal instituted by India in March 1989, saying, ''The differences between Nepal and India need to be sorted out first, so that economic sufferings of the people could be lessened.''

Earlier Monday, through royal proclamation, King Birendra suspended sections of the Nepal Constitution banning political parties and the rules under which the panchayat system was organized.

''A new climate has come into being in the country with the functioning of political parties,'' said the Harvard-educated king, who can void any legislative act, remove members of Parliament, and amend the constitution by fiat.

The king also announced he was dissolving Parliament and would accept Chand's resignation. Birendra asked Chand to remain in office pending the appointment of a new administration.

The Nepali Congress Party and the United Left Front had threatened to resume street protests if the king failed to abandon the partyless panchayat system of council government and institute a multi-party democracy.

Birendra assumed the throne of Nepal when his father, King Mahendra, died in 1972. The Himalayan kingdom is home to eight of the world's highest peaks, including 29,028-foot Mount Everest.

NEW DELHI, India (APRIL 16) UPI - An engagement ceremony turned into a tragedy in northern Uttar Pradesh state when 87 guests died after eating food believed to have been contaminated, the Press Trust of India news agency said Monday.

It said more than 80 other people were hospitalized with suspected food poisoning.

The incident occurred Sunday night at an engagement ceremony in a village near Banda, about 400 miles southeast of New Delhi, the news agency said.

The guests fell sick after eating banquet fare and were rushed to hospitals in the nearby towns of Basti and Gorakhpur, but at least 87 died it said.

A medical team and senior state officials rushed to the village early Monday.

The news agency gave no further details.

ST. LOUIS (APRIL 16) UPI - A St. Louis mortgage company and the Federal National Mortgage Association (Fannie Mae) said Monday they will provide financing for $2 billion of new home mortgages nationwide during the next 12 months. Based on the average mortgage of $83,000, purchased last year by

Fannie Mae, $2 billion would provide mortgages for about 24,100 families.

Prudential Home Mortage will originate a variety of fixed and adjustable-rate mortgages to be sold to Fannie Mae for cash or exchanged for mortgage-backed securities issued by Fannie Mae.

Loans delivered to Fannie Mae under the agreement will include Fannie Mae's seven-year balloon mortgages, which offer home buyers lower monthly mortgage payments, said Robert W. Williams, managing director of Prudential Home Mortgage.

"With the spring home-buying season just under way, this agreement is excellent news for home buyers," said Judy Dedmon, senior vice president in charge of Fannie Mae's southwestern regional office in Dallas. "Working together, Prudential and Fannie Mae will measurably increase the nation's supply of affordable home mortgage financing."

The Prudential deal is one of three $2-billion financing agreements that Fannie Mae has announced this year, said a Fannie Mae spokesman in Washington.

"This agreement with Fannie Mae will assist Prudential's ongoing programs to provide mortgage loans to relocated employees of some of the nation's major corporations," Williams said.

Prudential, an affiliate of The Prudential Insurance Co. of America, provides mortgages in housing markets across the country. It originates loans principally through large corporations, banks, and mortgage brokers.

Fannie Mae is a congressionally-chartered, shareholder-owned company and the nation's largest investor in home mortgages. In 1989, it helped financed about $84 billion in home loans for more than one million individual home mortgages.

PARIS (APRIL 16) UPI - Romania's ambassador to France, Alexandru Paleologu, was recalled to Bucharest for consultations Monday after publicly criticizing his nation's prime minister.

Paleologu told French La Cinq television Thursday that Prime Minister Petre Roman was ''a little young'' and questioned whether the Romanian prime minister has ''sufficient political maturity to lead a complicated government in a confused period.''

The envoy also said he was ''stunned'' when Ion Iliescu, president of the Romanian Provisional Council of National Unity, said 80 percent of the

Romanian population is Communist or close to the Communist Party.

Critics of the provisional Romanian government have maintained that too many Communists have remained in office despite the popular revolution that resulted in the ouster and execution late last year of dictator Nicolae Ceaucescu.

Paleologu left for Bucharest Monday and said he thought he would be returning to Paris despite his remarks.

''This is a subjective impression and perhaps very optimistic,'' he said.

''Certain official attitudes rather damage the image'' of Romania, he said. ''I considered it my duty to correct them, to amend them or even to present them with an angle that would be receivable by French opinion.''

#90106u1690 04/16/1990 ~United Press International

MARSEILLE, France (APRIL 16) UPI - An animal activist organization claimed responsibility Monday for raiding a hospital and ''liberating'' 30 dogs and 23 rabbits from a research laboratory.

The Front for the Liberation of Animal Martyrs said it carried out the operation at the Salvatore Hospital in the southern port city of Marseille Saturday night. The animals ''were kept in deplorable hygienic conditions and immediate neighbors could not stand the cries of the beasts,'' the statement said.

''It is high time to admit and respect the rights of animals and to cease torturing them,'' the statement said. ''It is possible to obtain more reliable results thanks to alternative methods and intelligent research without violence.''

A doctor at the center, which specializes in research into the use of artificial limbs and transplants of heart and lungs, said ''the use of living animals is indispensable.''

The animal activists' commando unit stormed the laboratory while staff members were distracted by a soccer game broadcast.

#90106u1698 04/16/1990 ~United Press International

WASHINGTON (APRIL 16) UPI - The administration said Monday it is reviewing the nation's banking system to ensure that depositors and institutions are adequately protected in light of the savings and loan crisis.

The review could result in some of the most extensive changes in banking regulation since the Great Depression, The Washington Post quoted unidentified government and industry sources as saying.

White House press secretary Marlin Fitzwater said the Treasury Department is conducting a study as required by the bailout legislation passed by Congress last year. He also said the department decided to expand the review.

"Treasury is looking at the broad regulatory aspects of banking," Fitzwater said. "We don't have any conclusions at the moment ... But there is concern that we have adequate regulatory schemes to protect depositors and the safety of the institutions."

Projections have put the cost of the thrift bailout at a minimum of $325 billion over 30 years, but many officials fear the estimate could rise to $400 billion or $500 billion if the economy sours.

The Post said the Treasury's goal is to deregulate the financial services industry, for example, by allowing banks to sell insurance and stocks, while working to prevent abuses like those that caused the thrift crisis.

The department is also trying to promote and protect the industry from increasing foreign competition, the newspaper said. Among the proposals under consideration are:

- A change in federal deposit insurance, combining the thrift industry's deposit insurance fund with the fund that guarantees commercial bank deposits.

- The possible elimination of a separate savings and loan industry.

- A revamping of the jurisdictions of regulators that would eliminate the new Office of Thrift Supervision.

- Elimination of barriers between commercial banking and the securities industry, a plan that would rewrite banking laws dating to the Great Depression and its wave of bank failures.

Desiree Tucker-Sorini, a deputy assistant secretary of the Treasury, said: "There's no proposal to eliminate the thrift industry. The administration has opposed the merger (of the regulatory agencies.)"

But she noted, "The Treasury Department is ... studying changes to the federal deposit insurance system," as required by the Financial Institutions Reform, Recovery and Enforcement Act of 1989, which revamped the savings industry. "We have certainly asked for public coment," Tucker-Sorini added. "We have met with the regulatory bodies."

The Post said Treasury Secretary Nicholas Brady has decided to use the congressionally ordered study on insurance reform, which is due next Feb. 9, as a vehicle for the comprehensive package of revisions.

To accomplish the objectives, the Treasury has asked for recommendations from the Federal Reserve Board, the Federal Deposit Insurance Corp and the Securities and Exchange Commission, the Post said.

During recent discussions, officials of the powerful regulatory agencies were "95 percent" in agreement on the proposals, the newspaper said.

During the past week, Deputy Treasury Secretary John Robson and other Treasury officials have discussed the proposals in private with industry officials and members of Congress, the Post said.

Administration officials would like to air their proposals in the coming months, but that they will not propose legislation until after the fall elections, the newspaper said.

#90106u1709 04/16/1990 ~United Press International

BOGOTA, COLOMBIA (APRIL 16) UPI - Associates of Medellin drug kingpin Pablo Escobar issued a statement Monday condemning their leader for last week's deadly bomb attack, indicating a split in the powerful drug cartel.

The communique, sent to Bogota newspapers and signed by the cartel hit squad known as the Extraditables, claimed Escobar did not consult his drug trafficking allies before the bombing.

On Wednesday, cartel operatives blasted a police convoy south of Medellin with a car packed with 400 pounds of dynamite, killing 22 people and wounding almost 85.

The communique indicates a split in the Medellin cartel, jointly run by Escobar and the three Ochoa brothers, Jorge Luis, Fabio, and Juan David, with Escobar as chief.

Authorities have not verified the authenticity of the statement, which is the latest of many cartel communiques. Many of the others had Escobar's signature and his fingerprint.

Police said last week Escobar's violent binges, including a deadly purge among his bodyguards and lesser associates, had alienated his fellow kingpins.

''We, the Extraditables, are not in agreement with the terrorist acts that

Pablo Escobar is ordering indiscriminantly and in his own name,'' read the communique, sent to the media Sunday night.

Defense Minister Oscar Botero said he was aware of division within the Medellin cartel, but saw little evidence Escobar was acting alone.

''We have known that the drug traffickers have an internal problem, because undoubtedly there is a group that is not in agreement with this wave of indiscriminate violence,'' Botero told reporters.

''I'm not so sure he (Escobar) is alone,'' Botero said.

The drug lords also blamed Escobar for the kidnapping of a Liberal Party senator two weeks ago and the planting in Bogota of a 1,500-pound truck bomb, which was defused by police.

''The Extraditables asked Pablo Escobar to stop the bombings and the execution of innocent people, since these acts are not in accord with our purpose,'' the communique read.

The communique also attacked Escobar for forcing his allies to pay for ''his personal war.''

''The Extraditables publicly reject before the people of Colombia the conduct of Pablo Escobar,'' the document said.

Two weeks ago Escobar announced a new offensive on the government to counter police and military anti-drug operations and to force a halt to extraditions of suspected traffickers to the United States. A killing spree aimed at the Medellin police left more than 25 officers dead.

Escobar is wanted in the United States on drug charges, and leads the U.S Justice Department's list of the 12 most wanted Colombian traffickers.

Police said recently the kingpin had undergone plastic surgery and was planning to leave the country with a phony passport. A television news program showed what it said were photos of Escobar sporting a beard and vacationing in a speedboat in a lake somewhere in his native Antioquia state.

Police officials in the past have said Escobar, one of the richest men in the world, was the head of the Medellin cartel, which reportedly supplies 80 percent of the cocaine consumed in the United States.

Recent reports, however, indicate the rival Cali Cartel has increased its share of the U.S. drug market since the government launched an offensive on the Medellin syndicate last August.

The bombing last week followed three months of relative quiet after the drug lords offered to surrender if the government agreed not to extradite them.

The government rejected the offer, and the drug traffickers threatened to begin bombing again after the administration of President Virgilio Barco renewed extraditions in March after a two-month lull.

(APRIL 16) UPI - Lawmakers in Lithuania apparently are firm in their resolve NOT to yield to Soviet demands the Baltic republic rescind its declaration of independence. A Lithuanian government spokesman says leaders are discussing how the republic may cope with Moscow's threatened economic blockade. Lithuania looks to Moscow for oil, gas and other materials. A Lithuania government spokesman says that so far, there is NO indication of a cut-off of supplies.

The king of Nepal today for the first time granted his opposition the opportunity to form a provisional government. The socialist and communist coalition is to conduct the first general elections since 1959. The king made the concession after two months of bloody pro-democracy demonstrations. The king also accepted the resignation of his prime minister, dissolved parliament and officially lifted a ban on political parties.

The U-S Supreme Court today upheld a Missouri town's ban on dancing at public schools. The court refused to hear an appeal that the rule violated the constitutional separation of church and state. Many residents of the Purdy School District in Purdy, Missouri, are Southern Baptists, and believe dancing is ''sinful.'' The school district says students are free to dance on their own time outside school grounds.

Police are searching Texas for three convicts, including a suspected drug kingpin, who escaped last night from a privately run jail in San Antonio. Police say Mario Salinas-Trevino and two inmates forced guards at gunpoint to let them out of the building. Salinas-Trevino is a reputed leader of a multi-Million-dollar drug ring that allegedly smuggled tons of cocaine and marijuana into the United States during a six-year period.

#90106u1725 04/16/1990 ~United Press International

WASHINGTON (APRIL 16) UPI - The United States and the Soviet Union should coordinate the exploration of Mars but the two nations should continue to stage independent missions to investigate the planet, an expert panel said Monday.

In a report commissioned by the National Aeronautics and Space Administration, the National Academy of Sciences' National Research Council recommended against one joint U.S.-Soviet program to explore Earth's nearest planetary neighbor.

While the United States and the Soviet Union cooperated for a joint Apollo-Soyuz orbital rendezvous and linkup in 1975, ''The two countries have no prior experience with the degree of cooperation necessary to carry out a technical project of this complexity or magnitude,'' the report said.

Instead, the report recommended a ''highly coordinated'' program in which the United States and Soviet Union would discuss and agree upon scientific goals, set targets and plan overall strategies but ''conduct their own self-contained and independently designed missions.''

''The best approach at the beginning would be for the United States and Soviet Union to jointly plan and carry out an exploration but do it so in the beginning they are not trying to do it on the same spacecraft,'' said Eugene Levy of the University of Arizona, who chaired the committee that wrote the report.

The two countries have not had enough experience working together to mount an extensive cooperative effort, Levy said. He added, however, that limited cooperation now would lay the groundwork for more extensive future cooperation.

Mars, with a diamter of about 4,200 miles, is the fourth planet from the sun and Earth's closest planetary neighbor, taking 686 days to complete one orbit around the sun at an average distance of 142 million miles.

It has distinct seasons and an atmosphere that includes carbon dioxide. Scientists believe studying Mars may provide insights about the processes that shape Earth's environment.

''What we learn about Mars could greatly help us understand the origin and evolution of our own planet,'' said Levy. ''Intensive study of Mars' atmosphere and climate change could help us better understand what has happened and is happening on Earth.''

The United States has sent eight unmanned spacecraft to Mars, six of which were successful, in an exploration program highlighted by the touchdown of two Viking robot probes on the surface of the planet in 1976. The Soviets have launched 10 probes to Mars, all of them partial or complete failures.

NASA is planning to launch the Mars Observer probe in 1992 to orbit Mars for a year, mapping the planet's surface and gathering data on Mars' atmosphere, chemistry and magnetic field to lay the groundwork for future

flights.

The Soviet Union sent two space probes to explore the Martian moon Phobos last year but technical problems prevented both from completing their missions.

The Soviets plan to launch several advanced probes to Mars later this decade, highlighted by an unmanned mission to collect soil samples for return to Earth. Top Soviet space scientists have openly suggested a joint manned mission to the planet early in the next century.

While the report did not rule out the possibility of conducting joint missions to Mars in the future, the NRC committee recommended initially maintaining separate programs.

''A prudent approach would be to begin cooperating in activites that are especially resilient to unforseen technical and nontechnical problems, and to anticipate building closer kinds of future cooperation on the bases of accumulated sucess and experience,'' the report said.

The report also urged the United States to ''reestablish its leadership in some aspects of space science, including planetary exploration'' and pursue cooperation with other countries.

#90106u1733 04/16/1990 ~United Press International

ST. LOUIS (APRIL 16) UPI - A Trans World Airlines DC-9 with 95 passengers and five crew members aboard made a safe landing Monday at Lambert-St. Louis International Airport with a blown nose-wheel tire, airline officials said.

No injuries were reported in the incident, authorities said.

TWA Flight 27 from Atlanta to St. Louis blew the tire on the nose wheel while taking off from the airport in Atlanta, TWA spokesman Jim Faulkner said.

Emergency equipment was put on standby at the St. Louis airport as a precautionary measure, airport officials said. They said the plane landed routinely about 11:45 a.m. and was towed to the gate.

Some passengers said crew members had reported the blown tire and a hydraulic system failure in the landing gear, which apparently required the crew to lower the landing gear by hand.

TWA mechanics were inspecting the DC-9 to determine what damage it had suffered in the incident, Faulkner said.

''They're looking now as to whether there was a hydraulic problem,'' he said.

#90106u1737 04/16/1990 ~United Press International

WASHINGTON (APRIL 16) UPI - President Bush maintained a watch-and-wait approach to the standoff over Lithuanian independence Monday, still unsure of Soviet intentions in a crisis that is casting a shadow on the next superpower summit.

Bush withheld public comment on the tense situation after a weekend that saw Soviet President Mikhail Gorbachev's deadline for concessions from Lithuania's independence-minded leaders pass without serious incident.

''Continue to monitor the process'' was the phrase used over and over again to sum up the public policy of the administration. Behind the scenes officials held in reserve a limited set of responses to any escalation of the conflict.

''We obviously have been reviewing all of our options over the last several weeks,'' said White House press secretary Marlin Fitzwater, ''but we believe the best plan at the moment is not to speculate on what course of action we might take.''

After describing Gorbachev's threat Friday to punish Lithuania with an economic blockade as ''deeply disturbing,'' Fitzwater said Bush would stand by that characterization as long as ''the situation is still playing itself out.''

But in the absence of a sudden turn for the worse in the confrontation, Fitzwater said the administration would limit its public comments and not ''engage in hypotheticals'' about might happen.

At the State Department, spokeswoman Margaret Tutwiler was asked about the Gorbachev's latest pressure on Lithuania and said, ''We would welcome it if the Soviets took no action on the sanctions'' threatened Friday.

Congressional leaders and administration officials singled out a U.S.-Soviet trade pact as part of the price Gorbachev might have to pay for further moves against Lithuania, which voted March 11 to secede from the Soviet Union.

The agreement, which would clear the way for lowest-possible tariffs on Soviet exports to the United States on a Most-Favored-Nation basis, has been under negotiation and targeted for competion by next month's superpower summit.

With the tension over Lithuania threatening to cast a chill on the summit, Fitzwater saw reason for guarded optimism elsewhere on the U.S.-Soviet agenda in Gorbachev's comments late last week about prospects for a strategic arms reduction treaty.

After U.S. and Soviet officials concluded talks the previous week on a note of undisguised disappointment at encountering roadblocks, Gorbachev told a visiting Senate delegation Thursday that he planned to see an arms agreement initialed at the summit.

Gorbachev did not elaborate. Nor could U.S. officials explain the difference between his optimistic assessment and the earlier concerns about ''difficult and thorny'' issues by Soviet negotiators. ''We hope he intends to follow through on that commitment,'' Fitzwater said.

At their December meeting in Malta, Bush and Gorbachev charged their negotiators to wrap up the details of an agreement to slash the size of their strategic arsenals by the time the two met again for a full-fledged summit.

Some U.S. analysts believe that effort, fraught with complexities, has been at least indirectly complicated on the Soviet side by the political crisis over Lithuania.

Relative hardliners in the military, their influence strengthened by the civil strife in the Baltics, were blamed for the backsliding U.S. officials reported in some Soviet arms control positions after the recent visit to Washington by Soviet Foreign Minister Eduard Shevardnadze.

But in an interview released Monday by the Italian news agency IRNA, Shevardnadze said the Kremlin hopes not only to reach basic agreement on strategic arms cuts at the summit, but also to sign an accord on chemical weapons and ''give a serious impulse'' to reductions in conventional forces in Europe.

#90106u1766 04/16/1990 ~United Press International

LONDON (APRIL 16) UPI - More than 70,000 rock fans thronged to an anti-apartheid concert televised to a potential audience of 1 billion people Monday as a tribute to black nationalist leader Nelson Mandela and his campaign to end white minority rule in South Africa.

Mandela and his wife Winnie both smiled broadly and raised their right fists in a symbol of defiance as they entered London's Wembley Stadium and sat in a special section with other dignatories.

Mandela was later scheduled to deliver an address.

The audience crammed the arena to capacity, cheering, waving flags and releasing balloons as a succession of musicians performed on a vast stage adorned with the colors of the ANC and African art murals.

The first artist in the program, expected to last some four hours, was singer Patti Labelle. Others on the card were Tracy Chapman, Peter Gabriel Simple Minds, Lou Reed, Neil Young, Chrissie Hynde, Dave Stewart and Miriam Makeba.

''If anyone had trouble with the traffic getting here, there was one guy who took 27 years to get here,'' said British comedian Lenny Henry.

The British Broadcasting Corp. said 26 nations - a potential audience of 1 billion people - will receive live coverage, giving Mandela the largest platform to air his views since he was released after 27 years in jail on Feb. 11.

Organizers said there will be numerous collaborations and unlikely duets between musicians. The event is predicted to be of a similar magnitude as the 1985 Live Aid concert and a 1988 event staged to mark Mandela's birthday in captivity.

Mandela is in Britain for the first time in 28 years but has refused to meet Prime Minister Margaret Thatcher, who eased sanctions against Pretoria because it proceeded with reform plans, including releasing him and legalizing the ANC.

However, Mandela said in an interview with the Daily Mirror that he wished to meet Thatcher next month, when he plans to return to Britain during a whirlwind international tour he hopes will include meetings with President Bushand Soviet President Mikhail Gorbachev.

He told the newspaper Thatcher was ''a very powerful lady - one I would rather have as an ally than an enemy.''

Thatcher has said she wanted to meet him, but Mandela has denounced her easing of British economic sanctions against South Africa as ''absolutely disastrous.''

Mandela attended a dinner Sunday evening hosted by Commonwealth Secretary General Shridath Ramphal. He told The Independent newspaper that the backing of the British people had helped while was in prison.

''Throughout those 27 years they have kept our memory alive ... that has been a tremendous inspiration to me and my fellow prisoners,'' he said.

At an ANC fundraising concert Sunday evening in London's largely black district of Brixton, Mandela's wife, Winnie Mandela, praised the British people for their anti-apartheid efforts.

''You have shaken the pillars of apartheid in South Africa,'' she said. ''Mandela would never have been released from prison if Britain had not exerted pressure.''

The concert was attended by Jesse Jackson.

#90106u1767 04/16/1990 ~United Press International

HARTFORD, CT (APRIL 16) UPI - Former Republican Sen. Lowell Weicker took the first step Monday toward getting his name on the November ballot as an independent candidate for governor.

Weicker's campaign filed petitions with the secretary of the state's office creating "A Connecticut Party," the party name under which Weicker's name would appear on the ballot.

Weicker said the party name emphasized "what this campaign is going to be all about. It's not going to be about who gets the spoils, Republicans or Democrats, the positions, the contracts, it's going to be about

Connecticut."

With the party name designated, Weicker has until Aug. 8 to collect 9,937 voter signatures to get his name on the ballot. The number is the equivalent of one percent of the total vote cast in the last gubernatorial election.

Weicker said he chose "A Connecticut Party" with hopes of having his name appear below the two major party lines on voting machines. Minor party names are listed alphabetically below the major parties. Other suggested party names he rejected included Charter Oak Party, Constitution Party, Nutmeg Party and Freedom Party, Weicker added.

Weicker, who served three terms in the Senate as a Republican, said he planned to choose a candidate for lieutenant governor by June 15 - before the Republican and Democratic state conventions in July.

#90106u1776 04/16/1990 ~United Press International

ANKARA, Turkey (APRIL 16) UPI - A Turkish politician allegedly blackmailed a Foreign Ministry official with whom he was having an affair to obtain transcripts of a meeting between Presidents George Bush and Turgut Ozal, officials said Monday.

Hasan Celal Guzel, a legislator from the ruling conservative Motherland Party, could have his parliamentary immunity lifted to face charges in court.

Guzel is alleged to have passed the minutes of a Bush-Ozal meeting in January in Washington to reporter Uluc Gurkan, who published the minutes in the widely circulated newspaper Gunes last month.

An investigation led prosecutors to Guzel, a former education minister and a personal friend of Gurkan.

Officials at the prosecutor's office in the State Security Court found that Guzel obtained a transcript of the minutes from Hande Mumcu, a female official of the Turkish Foreign Ministry with whom he was having an affair.

Mumcu, in her late 20s, reportedly told the prosecutor at the State Security court that she and Guzel were having a love affair since 1987, but that she wanted to break the relationship last year.

Guzel, who is married, warned her that he was in a position to wreck her career in the Foreign Ministry, she reportedly said.

She told the prosecutor that Guzel blackmailed her into handing him the

minutes of the Bush-Ozal meeting, and she agreed to turn the document over after he agreed the move would be the last favor he would ask of her, officials said.

The State Security Court has now asked Parliament to lift Guzel's parliamentary immunity, officials said. If Parliament complied, Guzel, Gurkan and Mumcu would appear in court next month to face charges.

If convicted, Guzel and Gurkan face 15 years in prison for revealing state secrets, while Mumcu could be jailed for eight years for passing confidential state documents to an unauthorized person, officials said.

Guzel has denied the allegations, saying he was the victim of a conspiracy because of his bid to snatch the Motherland Party leadership from Prime Minister Yildirim Akbulut.

BOSTON (APRIL 16) UPI - Italy's Gelindo Bordin, capitalizing on the ''crazy'' pace of the early leaders, Monday won the 94th Boston Marathon with a time of 2:08:19.

Bordin, the 1988 Olympic marathon winner, becomes the first man to win the Olympic gold medal and the Boston Marathon.

Portugal's Rosa Mota completed a sweep by the Olympic champions. The women's marathon gold medalist at Seoul won her third Boston crown with a time of 2:25:24.

Bordin, the first Italian to win at Boston, ran conservatively in the early miles while the lead pack, headed by eventual runner-up Juma Ikangaa set out at a reckless record pace.

''They ran really crazy,'' said Bordin, who passed Ikangaa at the top of Heartbreak Hill, just before the 21-mile mark. ''I ran by myself to control my (physical) condition.''

Bordin, who prefers a come-from-behind strategy, was not challenged in the final 5 miles as Ikangaa weakened. The Tanzanian, the strong pre-race favorite, finished second for the third consecutive year, with a time of 2:08:52. Rolando Vera of Ecuador, competing in his first marathon, was third at 2:10:46.

New Zealand's John Campbell, 41, finished fourth. His time of 2:11:04 set a world mark in the masters division.

Ikangaa held or shared the lead throughout the 26.2-mile race. He took

sole possession of first in the 17th mile, where the hills begin. Ibrahim Hussein, the 1988 winner, dropped back and a burst by Ikangaa proved too much for Kenya's Kipkemboi Kimeli. By the 19-mile mark, Ikangaa held a 120-yard lead, then Bordin began his decisive surge.

Bordin earned $50,000 for his first-place finish at Boston. Second place was worth $24,000 and third place $16,000.

A slight tailwind aided the runners as they ran the 26.2-mile east-bound course from the suburban town of Hopkinton. Temperatures were in the low 60s.

Moussetapha Badid of France won the wheelchair competition with a world record 1:29:53. Badid and Campbell each earned $7,500 for their victories and an additional $10,000 for topping the world mark.

Ikangaa pushed the early pace. He was part of the pack that drew away from the field early. The first mile was covered in 4:26, seven seconds faster than in any previous Boston Marathon.

The pack trimmed itself to six runners by the 5-mile mark (23:05), 1:06 faster than Rob de Castella's 1986 course-record pace.

At the 10-mile mark, Ikangaa and Hussein led a pack of six runners who were timed at 46:53. That was 1:49 faster than de Castella's pace. Halfway through, the race, Ikangaa headed the lead pack of four and was timed at 1:02:01.

More than one million spectators watched the oldest annual marathon, which had a record field of 9,362 official entrants.

#90106u1790 04/16/1990 ~United Press International

CHICAGO (APRIL 16) UPI - Grain and soybean futures rallied to session highs late Monday and closed with moderate gains on the Chicago Board of Trade.

Sharp gains in nearby soybean oil carried across the floor, sparking rallies in soybeans and the grains. The lack of export sales had pressured oil early in the day, but prices turned higher on rumors that Pakistan would soon buy a large quantity of soyoil.

Soybeans followed the oil to higher levels, despite news the soybean harvest in Brazil is about 50 percent completed and South American exports are picking up.

Gains across the floor were limited by follow-through selling, liquidation

and widespread rain during the weekend.

Rainfall amounts Thursday through Sunday generally were less than one-half inch, although 1.33 inches was reported at one location in northern Missouri.

Country movement was light and basis levels were mixed.

The European and South American markets were closed for the Easter holiday.

At the close, corn was up 2 1/4 to 4, soybeans up 4 to 5 1/2, wheat up 3 1/2 to 4 3/4 and oats up 3 1/4 to 3 3/4.

#90106u1887 04/16/1990 ~United Press International

WASHINGTON (APRIL 16) UPI - Yields for 13-week and 26-week T-bills plunged Monday at the government's weekly auction.

The Treasury Department auctioned $8.2 billion of 13-week bills at an average discount of 7.71 percent, down from 7.80 percent at last week's auction and the lowest since Feb. 12, when the auction yielded 7.65 percent.

The government also sold $8.2 billion of 26-week bills at an average discount of 7.75 percent, down from 7.80 percent last week and the lowest rate since Feb. 26, when the rate stood at 7.70 percent. The discount rate understates the actual yield to investors.

The investment, or coupon-equivalent, rate was 7.97 percent on the 13-week bills at an average price of $9,805.10 per $10,000 face value. The investment rate on the 26-week bill was 8.18 percent at an average of $9,608.20 per $10,000.

#90106u1899 04/16/1990 ~United Press International

RIO DE JANEIRO, Brazil (APRIL 16) UPI - Brazil's 40-year-old President Fernando Collor de Mello has gotten off to a fast start with his Draconian ''shock plan'' to curb hyperinflation, which was one month old Monday, but the price is stiff.

Business activity and consumption have ground to a virtual halt.

Collor has gambled that he can do in 18 months what 21 years of military rule failed to achieve: economic stability and sustained growth.

On the day after he assumed office for a five-year presidential term, Collor on March 16 stunned friend and foe alike by announcing such stiff measures that in the space of one month he reduced inflation from an annual rate of 4,800 percent to near zero, according to the official estimate.

The most drastic step was the freeze on savings and checking account deposits, removing from circulation $115 billion of the $150 billion in the banking system.

Depositors will get back their money only in 18 months.

''No military government had the courage to do such a thing,'' said economist Mario Henrique Simonsen, who held posts of planning minister and treasury minister during the military regime that ruled from 1964 to 1985.

Simonsen calls Collor's plan ''extremely consistent, logical, and fantastically authoritarian.''

Brazil's military attempted through authoritiarian methods to achieve both stability and growth, and in the early and mid-1970s they had some success.

But after the oil crises of the 1970s, inflation returned and economic growth became more erratic.

Elected civilian officials after 1985 inherited gigantic fiscal problems, fueled by newly created state companies run with nearly uncontrollable bureaucracies.

Once Collor announced his harsh remedies, Brazilians fed up with hyperinflation flocked to the president's side.

Three respected polling organizations said the shock program caused Collor's popularity to soar, with 90 percent of those interviewed giving the president a favorable rating after his first three weeks in office compared to a 75 percent favorable rating at the begining of his term.

Congress, where Collor's small political party controls only a handful of votes directly, jumped on the bandwagon and approved most of the president's program within 30 days of its announcement as required by the constitution.

Yet the sacrifices required by the plan are clearly visible in Rio and other cities.

Restaurants, automobile dealerships, real estate offices, consumer goods shops, and airport lounges are nearly deserted or sparcely attended.

With all but $1,000 in their savings accounts and $500 in their checking accounts frozen, Brazilians simply don't have money to spend.

''Brazilian industry has received a mortal wound,'' said Pedro Eberhardt, president of an industrial association of manufacturers of automobile parts.

''Industries are going dangerously into debt to pay their short-term commitments.''

On the positive side, many merchants are lowering their prices and offering credit to keep their market during the crisis.

The government says that the anti-inflation plan, which also includes a mandatory price freeze, sale of state-owned companies and properties, reduction of tariff barriers, and termination of subsidies, is only the

first phase of a program whose aim is to bring about a sound pattern of economic growth and production at an unstated future time.

That will be real test of its success: economic growth without inflation.

For now, the program means only hardship for most Brazilians, who have shown a willingness to make the necessary sacrifices on the hope that by taming the inflationary monster, there will be a better future for all.

#90106u1908 04/16/1990 ~United Press International

WASHINGTON (APRIL 16) UPI - Few farmers are earning extra money by charging fees for hunting and fishing on Conservation Reserve land, although improved wildlife habitat is a goal of the program, a report showed Monday.

The Conservation Reserve was created in 1985 with the goal of taking up to 45 million acres of highly erodible cropland out of production for a decade. Congress must decide this year whether to renew the program. There are suggestions to refocus it on environmentally sensitive land.

''Nationwide, farmers earned less than 0.005 percent of their gross farm income from (Conservation Reserve) access fees in 1987 and 0.002 percent in 1988,'' an Agriculture Department magazine said.

The magazine, Agricultural Outlook, said only 2 percent or 3 percent of farmers with land enrolled in the reserve were charging access fees. Fees were most common in the Southeast, the Mississippi Delta, the Great Lake states and the Southern Plains, but even then they were rare.

Farmers collected about $5 million in 1987 and $2.7 million in 1988, the magazine said.

All of the figures were based on an analysis of the department's annual survey of farm costs and earnings.

By comparison to the revenue from access fees, net farm income in 1987 was $54.5 billion and topped $57 billion in 1988.

''Money generated from these access fees is currently the only source of income, besides the government's annual rental payments, from the land enrolled in the (reserve),'' the magazine said.

Under the Conservation Reserve, farmers are paid an annual rent in exchange for taking highly erodible land out of production and planting it with soil-saving grasses and trees. Rent payments are expected to total $2 billion this year.

The magazine speculated that farmers were unwilling to make the additional investment for establishing wildlife habitat, were unaware of the opportunity to use their land explicitly for wildlife purposes or were reluctant to ask for money from hunters and anglers. Farmers often simply granted permission to friends to use their land and did not charge them.

There may be other factors, the magazine said, such as worries about vandalism or the presence of nearby public land where no fees are charged.

One proposal pending in Congress would set up a land-retirement program such as the Conservation Reserve, but aimed at wetlands. Farmers would be allowed to make ''economic use'' of that land, which could include haying or charging fees to hunters. Other proposals would modify the Conservation Reserve in some instances to allow haying of land that is part of wetland restoration project.

#90106u1923 04/16/1990 ~United Press International

NEW YORK (APRIL 16) UPI - Safe-haven buying of dollars spurred by the faceoff between Moscow and independence-seeking Lithuania boosted the U.S. unit Monday against all the main world currencies in thin world trading.

Currency dealers said flight-to-quality dollar purchasing was strong in early global trading in Tokyo, and manifested itself as New York opened. But volume was minimal and the dollar later retraced somewhat.

"It was one quick move, it puttered out, and the dollar came lower," said Bank of New York foreign exchange manager Robert Ryan. The dollar moved up on a large morning order, he said, but there was no follow-up buying.

Ryan saw little rhyme or reason in a New York market lacking inspiration from European markets on holiday . But others cited Lithuanian events.

Lithuania's leadership was refusing to rescind a declaration of independence from the Soviet Union despite expiration of a deadline set by Soviet President Mikhail Gorbachev. The Soviet leader threatened to cut off essential supplies if the breakaway Baltic state did not fall into line.

The West German mark has strengthened since last year on hopes of an economic revival in Eastern Europe. But it remains vulnerable to signs of Soviet or East Bloc instability jeopardizing the hoped-for gains.

Foreign exchange adviser Terry Reid of Chicago-based Harris Trust & Savings Bank said talk of a much-reduced U.S. merchandise trade deficit - U.S. data is to be released Wednesday - also helped the dollar.

In thin New York trading the dollar was quoted at 1.6780 West German marks up from 1.6720 marks Friday. Against the Japanese unit the U.S. currency was changing hands at 159.35 yen, up from 158.65 yen.

But Manufacturers Hanover currency trader Ian Spence noted that the mark has not suffered unduly from the Soviet-Lithuanian dispute. "Somewhat surprisingly, the mark hasn't been as affected as it used to be," he said, while cautioning that "concrete developments" in the standoff between Moscow and Vilnius could pressure the German unit.

Other dollar rates: 1.4900 Swiss francs, up from 1.4830; 5.6365 French francs, up from 5.6165; and 1,232 Italian lire, up from 1,230. The British pound moved down to $1.6325 from $1.6375.

All European currency markets were closed for the extended Easter weekend and trading was to resume Tuesday.

At the end of last week in Frankfurt, Zurich, Paris, Brussels and Milan the dollar stood at 1.6725 deutsche marks, 1.4820 Swiss francs, 5.6295 French francs, 36.645 Belgian francs and 1,230.50 Italian lire.

In quiet Tokyo trading the dollar climbed against the yen on news of mounting tension between the Soviet Union and breakaway Lithuania. Safe-haven buying drove the U.S. unit to 159.42 yen, against 158.42 yen last week.

Republic National Bank in New York closed cash gold at $375.50 an ounce, off from $376 an ounce Friday. The New York Commodity Exchange settled gold at $375.20 an ounce, down from $375.90. In Zurich, gold stood at $375.10 an ounce, while in London the last closing price was $375.25 an ounce.

Republic closed cash silver at 5.08 an ounce, down from $5.12. Comex spot silver eased to $5.059 an ounce from $5.091. Silver in Zurich stood at $5.15 an ounce, while the latest price in London was $5.11 an ounce.

#90106u1945 04/16/1990 ~United Press International

MOSCOW (APRIL 16) UPI - Lithuania's government sent a message Monday to Soviet President Mikhail Gorbachev demanding a meeting and seeking clarification of his threat to cut off key supplies if independence laws are not repealed.

The Baltic republic's Council of Ministers sent a letter after a special meeting to discuss ways to replace oil, gas and other supplies if Moscow implemented the threatened boycott.

Although Gorbachev's Sunday night deadline passed with Lithuania saying it would not meet his demands, there was no sign Monday supplies were being cut off to the rebellious republic as threatened in the Kremlin ultimatum.

''There are some questions on which there is a possibility and necessity for agreement,'' Lithuanian Prime Minister Kazimiera Prunskiene said after the ministers' meeting Monday in the republic's capital, Vilnius.

Prunskiene did not specify what questions she felt could be resolved. A government spokesman said the council refused to consider rescinding independence laws as Moscow demanded.

''We also ask for an explanation of the specific measures of the economic blockade,'' Prunskiene said. ''Otherwise this is (only) a tough 'cold war' with the people of Lithuania.''

She pointed out that if Gorbachev cut off supplies to Lithuania, he also would be hurting the Russian-speaking minority in the republic. Moscow has repeatedly expressed concern about what would happen to Russians in the republic if it was allowed to secede.

Prunskiene, interviewed on the Soviet ''Vremya'' television news program, demanded that Soviet officials ''immediately receive'' a Lithuanian delegation to discuss the situation.

A spokesman for the Lithuanian government denied speculation the leadership would ask Gorbachev for more time to meet his demands, saying the only consideration at Monday's meeting was how to cope with Moscow's threats.

The meeting Monday included Prunskiene and top officials involved in the economy. The republic's Parliament was to meet Tuesday.

On Friday, Gorbachev gave Lithuania two days to rescind its March 11 declaration of independence and other laws that he said contradicted the

Soviet constitution or face a cutoff of Soviet raw materials. The republic depends on Soviet supplies of oil, gas and other materials.

The threat raised the stakes in Moscow's struggle to dictate the pace and manner in which Lithuania could leave the Soviet Union.

Lithuanian President Vytautas Landsbergis and other leaders have said repeatedly there is no chance the republic will retreat from its declaration of independence in the face of economic blackmail.

The republic has approached Scandinavian and other Western countries about oil and other goods, but there have been no definite agreements.

Prunskiene said Lithuania would continue to honor its agreements for delivery of food and other goods to the Soviet Union.

''We do not want to be violators of obligations, of economic links,'' she said. ''We want to influence the other side by our correctness, not to make a pretext for violating the agreements.''

In Washington, the White House said it was waiting to see if the threats were carried out.

''Of course, we would welcome it if the Soviets took no action on the sanctions,'' State Department spokeswoman Margaret Tutwiler said.

The official Soviet news agency Tass Monday attacked a proposal by Senate Republican leader Robert Dole for U.S. aid to Lithuania and other Soviet republics with strong nationalist movements.

''Today Lithuania (as well as Latvia, Estonia, Georgia and Azerbaijan) is an inalienable part of the Soviet Union,'' the Tass commentary said. ''In this context the proposal to issue credits to a constituent republic of a sovereign state, while ignoring the state, sounds strange.

''How would Washington react if another country would seek to influence Texas or Alaska economically for its selfish political aims,'' the commentary said.

Tass said Dole's proposal was intended to encourage secessionist and nationalist activities ''which are often unlawful and unconstitutional in nature.''

#90106u1984 04/16/1990 ~United Press International
(APRIL 16) UPI - The White House is playing a waiting game while observing events involving the Soviet Union and Lithuania. White House spokesman Marlin Fitzwater says President Bush remains ''deeply disturbed'' by Soviet leader Gorbachev's threat of an economic blockade against Lithuania unless it rescinds its bid to secede from the Soviet Union. Fitzwater says ''the best plan at the moment is NOT to speculate'' on what course of action the United States might take.

There are indications of a split in the Medellin drug cartel. Associates of Medellin drug kingpin Pablo Escobar issued a statement condeming their leader for a deadly bombing attack last week. The statement went to newspapers in Bogota, Colombia, and was signed by the hit squad called the Extraditables. The group says Escobar did NOT consult his drug trafficking allies on the attack that left 22 people dead and injured about 85 people.

African National Congress leader Nelson Mandela has a potential audience of one-BILLION people when he delivers his views on ending white minority rule in South Africa today. Workers are preparing for a massive anti-apartheid concert in London today, where Mandela is scheduled to deliver a speech. British officials say 26 nations, a potential audience of one-BILLION people, will receive live coverage.

The Israeli army imposed a curfew on the occupied Gaza Strip today. The move is an attempt to prevent demonstrations on the second anniversary of the assassination of Palestine Liberation Organization leader Abu Jihad. Black flags of mourning flew above some homes in Gaza City and marches were held in several West Bank towns. But NO major disturbances were reported. The P-L-O charges Israel carried out the killing.

(APRIL 16) UPI - The U-S Supreme Court today upheld a union's ability to collect fees from NON-union members without the highest level of auditing to verify the usage of the fees. The justices without comment rejected an appeal by non-union teachers in northern Ohio who sued the Ohio Education Association in 1987. Ohio permits agency shop, which lets unions collect fees from NON-members for use in collective bargaining issues.

Greta Garbo... the actress who made her last film in 1941 but remains a household word... will be buried with the same privacy with which she lived. The Swedish-born star died yesterday of kidney-related illness at age 84 in a New York hospital. NO details of her private funeral services are being made public. Actress Claire Trevor said- quote- ''We have lost a great star, but we lost her a long time a ago.''

UNITED NATIONS (APRIL 16) UPI - Nicaraguan rebels turned over their weapons Monday under the eyes of U.N. observers who were sent to Honduras to help demobilize the U.S.-backed force, a U.N. spokeswoman said.

A group of 260 soldiers of the rebels' Atlantic front handed their guns and artillery to about 30 unarmed U.N. observers at La Kiatara, in the Misquito region of Honduras, spokeswoman Nadia Younes said.

''The voluntary demobilization of the Nicaraguan resistance got under way today at 9 a.m.,'' she said.

Gen. Quesada Gomez, chief military officer for the U.N. observer team of more than 800 military personnel was on hand to receive the arms from the rebels, or Contras, she said.

U.N. officials said there are an estimated 10,000 Contras in Honduras and another 3,000 in Nicaragua.

The voluntary demobilization plan was agreed upon by the presidents of five Central American countries as part of their effort to help end the conflict in the region.

The Contras had received hundreds of millions of dollars in assistance from the United States from 1982 until Congress ended the aid program last year. After giving up their weapons, Contras can either return to Nicaragua under U.N. protection or seek residence in another country.

Younes said the U.N. team carried explosives, soldering torches and sledge hammers to destroy the weapons surrendered by the Contras.

She said Gomez and U.N. special representative Iqbal Riza have been holding talks with the outgoing government of Nicaraguan President Daniel Ortega and representatives for President-elect Violeta Chamorro on ways to repatriate or relocate Contra members.

#90106u2083 04/16/1990 ~United Press International

CINCINNATI (APRIL 16) UPI - A lawyer for an art gallery showing a controversial exhibit of photographs by the late Robert Mapplethorpe entered innocent pleas Monday for the gallery and its director to charges of pandering obscenity and child pornography.

A grand jury indicted the Contemporary Arts Center and Director Dennis Barrie April 7 when the Mapplethorpe exhibit opened. The indictment concerns seven of the 175 photos in the exhibit, five of them based on homosexual themes and two showing nude children.

After lawyer H. Louis Sirkin entered the written pleas in Hamilton County Municipal Court, the case was assigned to Judge David Albanese and a pretrial hearing was set for April 30.

At noon Monday, people were lined up to enter the gallery room where a display case holds the photographs prosecutors want removed. The five pictures are among 39 arranged in a glass-covered display case according to Mapplethorpe's instructions. The rest of the exhibit is arranged by the center's curator.

One of the darkly toned black-and-white photographs shows a man in leather pants and a studded collar urinating into the mouth of a kneeling man. Another shows a man's buttocks and his hand reaching around to a cylinder that is in his anus.

In another, a person's fist and lower arm is shown in another person's anus. In a torso photograph, a man is shown putting his little finger into the tip of his penis. The last picture shows a man on all fours in leather boots, with a bullwhip in his anus.

"The problem is when you describe them like this it takes them totally out of context and it reduces them to something they are not," said Amy Banister, director of communications for the gallery. Banister said the pictures reflect a subculture in New York City in the late 1970s that no longer exists.

Mapplethorpe, Banister explained, knew he was dying of AIDS when the exhibit was designed. She said it was an act of courage for him to show the lifestyle that killed not only him but others in the pictures. The photos do not glamorize or promote that lifestyle, but simply describe it. "They're very dark," Banister said. "They're really very sad."

One of the child photographs named by prosecutors, "Ada," is a silver print showing a black girl with a white cloth like a toga covering most of the front of her body, with one breast exposed.

The other named in the grand jury indictment, "Jesse McBride," shows a nude boy perched on the back of a dark velvet chair, a white refrigerator

off to the side.

The center continues to draw record crowds to see the Mapplethorpe exhibit. In the ninth day of a six-week run, the exhibit has been seen by 25,000 people, in contrast to a total attendance of about 12,000 people for a normal six-week exhibit. The gallery's largest crowd ever was 29,000 people for an exhibit in December 1987 about computers and art.

Visitors from across the country have recorded their thoughts in a notebook at the gallery. Most of them are positive and supportive, such as one reading "Good luck. Loved the show."

Some gallery visitors have signed a petition that urges the Cincinnati City Council to support the center's right to exhibit Mapplethorpe's work without government interference.

MANAGUA, NICARAGUA (APRIL 16) UPI - The Sandinista government accused the Contra rebels Monday of planning to launch an offensive the day before the April 25 transfer of power to President-elect Violeta Chamorro.

The accusation came hours before a delegation of U.S.-backed Contra leaders was scheduled to arrive in the capital for disarmament talks with both the Sandinista government of President Daniel Ortega and Chamorro's opposition coalition.

About two hours before the scheduled 2 p.m. arrival of the Contra delegation, a series of explosions was reported near the international airport. National Police Chief Rene Vivas said the explosions appeared to have been accidental. No injuries were reported.

As workers near the airport were burning weeds, high winds apparently carried embers to a nearby field and air force land, where they ignited explosives, he said.

Meanwhile, Agustin Lara, Sandinista delegate in eastern Chontales province was quoted in the official Sandinista newspaper Barricada as saying the rumored offensive was scheduled for April 24 in Juigalpa and surrounding areas, about 50 miles east of Managua.

The offensive could be the largest since October 1987 and could have a major effect on the transfer of power to the 14-party coalition National Opposition Union, or UNO, Lara said.

A Contra official reached by telephone in Honduras denied the rebels were plotting an offensive, saying a Contra delegation was on its way to Managua.

''We are not planning a military offensive. We are planning a political offensive,'' the Contra official said.

Adan Artola, a representative for some 2,000 Miskito Indian rebels on Nicaragua's Caribbean coast, said: ''We don't have either the personnel or the arms right now for a military offensive.''

He said the accusation was a public relations bid by the Sandinistas intended to improve their position in transition talks.

A Contra delegation was scheduled to arrive in Managua Monday afternoon from Tegucigalpa, the Honduran capital, to discuss a timetable for their demobilization and disarmament. Both Chamorro and Ortega have called on Contras to disarm themselves prior to her April 25 inauguration.

Artola, who arrived Saturday with a delegation of Miskito rebels from Honduras, said his delegation and the main Contra delegation would meet jointly with both UNO and Sandinista representatives Monday afternoon.

On Saturday, Artola said the Miskito rebels would lay down their arms prior to April 25 only if the government guaranteed they will not be persecuted or attacked and agreed to ease their transition to civilian life.

The main Contra group has not yet supplied a concrete list of conditions for its demobilization.

Chamorro was elected February 25 in a surprise victory over Ortega, who has promised a peaceful transition of power after more than a decade of Sandinista rule.

#90106u2139 04/16/1990 ~United Press International

WASHINGTON (APRIL 16) UPI - Makers of ibuprofen medicines Monday disputed conclusions of medical experts who claim a 12-patient study indicates over-the-counter doses of the painkiller may cause kidney failure in high-risk people.

In a study published in the Annals of Internal Medicine, doctors from Johns Hopkins University medical school in Baltimore looked at the effects of ibuprofen and two other types of non-steroidal, anti-inflammatory drugs in 12 women with chronic kidney problems, but no obvious symptoms. Three of the patients developed complications.

Food and Drug Administration spokeswoman Bonnie Aikman said Monday that consumers have no cause for alarm about taking over-the-counter ibuprofen,

as 0ong as they read the label telling them to contact a doctor if they experience any unusual symptoms. That advice will be highlighted on ibuprofen labels starting in June, Aikman added.

The patients in the study were given the prescription-level dose of ibuprofen, 2400 milligrams per day - two times the maximum daily dose recommended for over-the-counter versions of the drug.

Eight days into an 11-day course of treatment, three of the patients were judged to have severe enough kidney impairment that researchers stopped giving them the drug. When researchers later tried giving them lower doses of ibuprofen, 1,200 milligrams per day - or the top over-the-counter dose, two of the three patients again developed evidence of acute kidney failure.

In an editorial published in the medical journal, Michael Murray of Purdue University pharmacy school and Dr. Craig Brater of Indiana University medical school said they think the new study indicates ''over-the-counter doses of ibuprofen are sufficent to cause adverse effect'' in people at high risk of kidney failure.

Ibuprofen was recommended to patients by doctors nearly 50 million times in 1987, the National Disease and Therapeutic Index said. An estimated 100 million people have used the non-prescription drug since it was introduced in 1984.

T.R. Reid, a spokesman for The Upjohn Co. of Kalamazoo, Mich., maker of Motrin, a prescription ibuprofen medication, and Motrin IB, its over-the-counter counterpart, called Brater's and Murray's conclusions ''warped.''

Reid noted the study only looked at 12 patients, and all patients were predisposed to kidney failure. But his major objection was that Brater and Murray extended the findings about prescription ibuprofen to over-the-counter ibuprofen.

''It is almost like comparing apples to oranges,'' said Reid, noting the daily dose the 12 women received in the 11-day study was twice as high as the recommended upper limit for over-the-counter use.

Other common over-the-counter products containing ibuprofen are Nuprin, made by Bristol-Myers Squibb Co. of New York, and Advil, made by Whitehall Laboratories Inc. of New York.

''We do not believe the findings of this study apply to the safety of non-prescription ibuprofen in the general population,'' Whitehall said in a statement.

Reid said labels on prescription Motrin already inform doctors there is a

slim risk - 1 percent or less - of kidney complications from prolonged use of the drug.

In addition, the Upjohn said labels on non-prescription ibuprofen tell people with serious medical conditions, like poor kidney function, to consult with their doctors before starting any new over-the-counter medication.

As for consumers who think they may have problems related to ibuprofen use the Upjohn spokesman suggested they check with their physician.

In contrast to ibuprofen, the 12 women in the study developed no signs of kidney failure during 11-day courses of the two other painkillers, piroxicam, sold under the tradename Feldene, and sulindac, sold under the tradename Clinoril. Researchers emphasized that does not mean those drugs do not produce side effects, and it is conceivable the could cause kidney failure after longer use.

(APRIL 16) UPI - The Bush administration is still waiting to see if Soviet President Gorbachev takes further action against Lithuania. White House spokesman Marlin Fitzwater said today that the best plan is NOT to speculate on any U-S action as long as- in his words- ''the situation is still playing itself out.''

Nepal took another step toward democracy today when the king allowed a newly legalized coalition to form a provisional government. The acting head of the opposition Nepali Congress Party was then named the new prime minister. He'll head up the first government in 30 years NOT set up by the monarch of the Himalayan kingdom.

Teachers in Oklahoma AREN'T happy about the state Legislature's failure to pass a 230-Million-dollar tax and education reform bill. Thousands of teachers and hundreds of their students gathered at the state Capitol today in Oklahoma City to protest, leaving scores of schools closed across the state.

The Supreme Court today declined to rule on the issue of whether an employer can deny a job to an applicant because he has a foreign accent. The justices rejected an appeal from a Filipino immigrant who said the Honolulu Department of Motor Vehicles discriminated against him by hiring a less-qualified person with NO foreign accent.

Opening statements are being presented in New York in the trial of two white youths accused in the killing of a black teen-ager last year in

Brooklyn. Prosecutors said today that the alleged ringleader, Keith Mondello, boasted he was going to kill any black who attended a party in the neighborhood the night of the killing. Mondello is accused in the August slaying of Yusuf Hawkins.

#90106u2233 04/16/1990 ~United Press International
(APRIL 16) UPI - Despite a wave of profit taking at day's end, crude oil prices rose Monday in light trading after news of a meeting in Saudi Arabia to discuss curbing OPEC cartel overproduction.

On the New York Mercantile Exchange, the benchmark West Texas Intermediate for May delivery edged up 7 cents to $17.85 a barrel.

Volume was a light 65,253 estimated contracts with many traders not having yet returned from the long Easter weekend. London's International Petroleum Exchange was closed.

On the U.S. Gulf Coast cash market, WTI for prompt delivery gained 5 cents to $17.85 a barrel.

Unleaded gasoline for May delivery gained 1.66 cents on the Merc to 60.21 cents a gallon, while May home heating oil climbed 0.89 cent to 54.72 cents a gallon.

On the New York Harbor cash market, prompt delivery unleaded gasoline jumped 1.65 cents to 60 cents a gallon, while heating oil rose 1.75 cents to 62.60 cents a gallon.

''It was kind of a mild day compared to the craziness of last week. The market seems to be still searching for itself,'' said Tom Bentz, director of trading services at United Energy Inc. in New York.

Last week saw the end of a six-day decline, during which crude prices lost about 14 percent of their value as a result of excess crude on the market.

''News of the Saudi meeting combined with strength of the products in low volume trading'' drove crude prices up, Bentz said.

The oil ministers of Saudi Arabia, Kuwait and the United Arab Emirates called a meeting for Tuesday in Jeddah, Saudi Arabia, to discuss the price decline.

The 13-nation Organization of Petroleum Exporting Countries, which pumps more than a third of the world's crude oil, in November set a daily output ceiling of 22 million barrels for the first six months of this year.

Largely because of the failure of Kuwait and the UAE to adhere to their quotas, cartel production has been averaging nearly 24 million barrels a day recently. Saudi Arabia is OPEC's largest producer.

Bentz said gasoline prices rose in response to traders' anticipating that the weekly survey of the American Petroleum Institute, to be released Tuesday,would show inventories last week dropped substantially.

He said heating oil prices have risen recently as a result of defaults on some Venezuelan cargoes.

On the European spot market, Britain's widely traded North Sea Brent gained 20 cents to $16.20 a barrel.

The United Arab Emirates' Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - climbed 15 cents to $13.65 a barrel.

#90106u2237 04/16/1990 ~United Press International

NEW YORK (APRIL 16) UPI - The stock market closed mixed Monday in light trading as an early rally sparked by a surprisingly strong earnings report from International Business Machines Corp. failed to hold.

The Dow Jones industrial average, which rose 22.07 Thursday, closed up 11.26 to 2763.06 after being up more than 30 points in earlier trading.

Among broader market gauges, the New York Stock Exchange composite index rose 0.14 to 188.94 and Standard & Poor's 500-stock index rose 0.40 to 344.74. The price of an average share gained three cents.

Declines led advances 778-710 among the 1,996 issues crossing the NYSE tape. Big Board volume was 142,810,000 shares, compared with 142,274,670 shares traded Thursday. The market was closed for the Good Friday holiday.

Analysts said one strong earnings report, even from market bellwether IBM, was not enough to sustain the early rally. "IBM's earnings were better than expected and even better than the adjusted estimates, but there's no sustaining quality to that. It doesn't signal you're on a sustained rally " said Monte Gordon, research director of Dreyfus Corp.

"It's still early in the earnings period and you still could get negative earnings. I'm not surprised at the pullback, I was more surprised the market ran up 25 to 30 points," he said.

Gordon emphasized that the rally, while it lasted, was very narrow, strongest in the blue chips. Exacerbating the late retreat were computerized sell programs, used to profit on price spreads between stocks

and stock-index futures. "You don't come down 20 points in 10 minutes without them," said Gordon.

While the rest of the market could not hold its sharp gains, IBM moved up more than $3 a share on the day. Big Blue reported improved first-quarter earnings of $1.04 billion, or $1.81 a share, up about 9.5 percent from $950 million, or $1.61 a share, a year ago.

The performance exceeded many analysts' expectations. Earlier this year, many analysts estimated IBM's first-quarter earnings would be flat or off slightly.

On the trading floor, IBM was the most active issue, surging 3 3/4 to 110 7/8. Philip Morris followed, up 3/8 to 42 3/8. Eli Lilly was third, tumbling 1 1/4 to 67 1/4, as earnings per share fell short of most analysts' projections.

Among the other blue chips, AT&T was unchanged at 41 7/8, General Electric rose 3/4 to 66 3/4 and American Express added 3/8 to 28 5/8.

Elsewhere, Interlake, which makes materials for the auto and aerospace industries, extended its rally, up 1 5/8 to 13 5/8. The company declined comment on the sharp rise.

Lands' End plummeted 3 3/8 to 15 1/4 after saying it expects a drop in quarterly earnings. And Public Service of New Mexico dropped one to 11 1/8. Analysts were said to have lowered their earnings estimates after state regulators ordered the utility to cut rates.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 173,641,160 shares, compared with 173,506,660 shares traded in the previous session.

Prices closed lower in moderately active trading on the American Stock Exchange. The Amex Market Value index fell 0.90 to close at 356.98. Declines led advances 301-258 among the 838 issues traded. The price of an average share lost three cents. Composite volume totaled 16,223,700 shares, compared with 14,669,310 shares traded Thursday.

Dataproducts led the Amex issues, surging 3 1/4 to 9 5/8 after agreeing to be acquired for $10 a share by Hitachi Koki Co. and Nissei Sangyo Co., members of Japan's largest manufacturing group, the Hitachi Group. The deal is said to be worth about $160 million.

The National Association of Securities Dealers composite index rose 0.39 to 436.70.

#90106u2288 04/16/1990 ~United Press International
BALTIMORE (APRIL 16) UPI - City police Monday fatally shot an 80-year-old elderly woman who threatened officers with an unloaded handgun, authorities said.

Police said Annie White, of Baltimore, died at 8:30 a.m. at Sinai Hospital of gunshot wounds to the left arm and left pelvis.

Officers responding to a report of an armed person were met outside White's home by her sister, Alverta Walker, 82.

The sister told police that White was in the house with a gun, had chased her outside and locked the front door during an argument over medical problems.

Police spokesman Dennis Hill said two officers entered the home through a back door and saw White armed with a .38-caliber handgun that she pointed at them.

The officers left the house and took cover behind a wooden box in the back yard, Hill said.

The spokesman said White walked out on the back porch and waved the gun at the officers.

The officers - one armed with a .38-caliber service revolver, the other with a shotgun - fired at White simultaneously when she refused several demands to drop the gun, Hill said.

The officers wrested the gun from White's hand after she was shot when she tried to get up again.

Hill said investigators learned after the shooting that White's gun was not loaded, but three other revolvers - one loaded - were found in the house.

''Unfortunately for everyone, her gun turned out not to be loaded. But there was no way we could know that,'' Hill said. ''Everybody is devastated by it.''

Officers Sean Harrison, 22 and on the force for 18 months, and Byron Carter, 29 and an 11-year veteran of the force, were assigned to administrative duties until an investigation by the city state's attorney's office and the internal affairs unit is complete.

Hill said White apparently had medical problems. Walker told police she thought White wanted to shoot her, then commit suicide so ''they would not

be a burden.''

#90106u2300 04/16/1990 ~United Press International
WASHINGTON (APRIL 17) UPI - The U.S. proposal to phase out agricultural quotas and trade barriers over a 10-year period should help get the world moving toward freer farm trade, Agriculture Secretary Clayton Yeutter said Monday.

In remarks prepared for delivery to an Indianapolis seminar, Yeutter said agricultural trade barriers and subsidies cost developed nations $135 billion a year and deprive farmers around the world of billions of dollars in sales.

Yeutter's call for trade reform followed a round of European criticism of U.S. proposals at world trade talks, which face a December deadline for completion. Disagreement over agriculture nearly derailed the talks in late 1988. It remains one of the most contentious issues in the talks, which cover 13 topics.

Yeutter said the U.S. proposal to convert trade barriers into tariffs and to reduce tariff levels over a 10-year period ''just makes good sense.'' It would mean a 10-year transition period for farmers to adjust to world competition.

''We need to get off dead center in the agricultural trade arena and this is the way to start,'' he said.

The European Community has argued that U.S. proposals are impractical and negotiators should focus on finding a way to reduce government support to agriculture. The United States wants to eliminate export subsidies, wipe out trade-distorting trade barriers and subsidies, and write a uniform set of health and sanitary rules.

U.S. farmers lose $11 billion in income each year because of foreign trade barriers and subsidies, Yeutter said. Farmers in developing nations, which vitally need export sales, lose $16 billion to $26 billion, he said.

In his text, Yeutter said agricultural trade reform offered the greatest opportunity for U.S. farmers because it would mean access to rapidly-growing world market.

#90106u2302 04/16/1990 ~United Press International
ANALYSIS BY JOAN HANAUER

NEW YORK (APRIL 16) UPI - NBC has a new odd couple - the Hackett brothers who work in uneasy tandem to run a small airline out of Tom Nevers Airport on Nantuckett island.

The show is ''Wings,'' a sitcom from some of the same writers and producers that brought you ''Cheers,'' and it will debut following Ted Danson and gang on Thursday, Apr. 19, 9:30-10 p.m.

In the opening episode, Joe Hackett (Timothy Daly), a compulsively super-organized guy, is the overworked owner of Sandpiper Air - a one-airplane commuter service. Along comes his freewheeling brother, Brian (Steven Weber), a Princeton and NASA dropout.

By the end of the episode they are running the airline together and competing for the attention of Helen (Crystal Bernard), who runs the airport lunch counter and moonlights as a cello teacher.

Daly, who starred in the classy but unsuccessful ''Almost Grown'' on CBS last season and is the brother of Tyne Daly, looks back ruefully at his old show but likes his new one.

''The basic comic conflict is the difference between the two brothers,'' Daly said in an interview. ''Brian is an irresponsible ne'er-do-well, while Joe is very responsible and heroic and always tries to do the right thing. That's what's wonderful about him, although he will sometimes do the right thing to his own detriment.

''There's also a kind of triangle involving Helen, who runs the lunch counter.

''The show is not vanguard television, not groundbreaking in any way. What's unique about it is that it is one of the rare sitcoms on television that is actually funny. The humor comes out of the truth of the characters and situations rather than a lot of jokes pasted onto the story.''

Asked if he were like the character he plays, Daly said:

''That implies that I know who I am, and I don't. I can't afford a psychiatrist. Yes, in that all characters are somethwat like me. We both have passions, his for airplanes, mine for acting. In terms of behavior, we're not similar at all. In terms of the way we pursue our passion, we're not similar.

''Running a business and flying an airplane requires a lot of organization and technical know-how and all that kind of thing. Acting requires spontaneity, creativity, daydreaming, night dreaming and observation of human behavior.''

Being an actor means rejection, as Daly - the son of actors James and Hope Daly - pointed out.

''A lot of people think actors live in penthouses and drive around in limousines. They don't see the struggle and all the people unemployed and what people go through to get their success. The overriding experience of being an actor is rejection.

''My parents had an actor friend, call him Bob. This guy had a producer or director friend call him about a play on Broadway in the late '50s. He met them, they had a nice time, and then they told him, 'Thank you, we really love you, you're fantastic, but we don't want to waste your time. We really want someone bald for this part.'

''He said, 'Give me five minutes,' then ran into the men's room, took off his toupee, came out and said, 'How about it?' The guy said, 'Bob, not that bald.'''

The first and least important of Spy magazine's rules of how to become and stay famous is - have talent.

That sums up the irreverent attitude that makes ''Spy Magazine Presents How To Be Famous'' a smart and sophisticated special. It airs on NBC Wednesday, Apr. 18, 10-11 p.m. Eastern time, with Jerry Seinfeld as main host and Harry Shearer and Victoria Jackson as contributors.

Also on hand will be Dick Cavett, Ricardo Montalban, the Smothers Brothers and Joe Namath.

The show includes all sorts of oddball elements, including one that shows how long it takes to get a return call if you say you are Sylvester Stallone, compared to saying you are Joey Bishop.

How did Spy come to put on a prime time satire about celebrities?

''We approached NBC last June with an idea for a fringe-time show,'' Thomas L. Phillips, publisher of Spy and co-executive producer of the TV show, said in an interview.

''It was to be a roundtable show, our generation's answer to David Brinkley and 'Meet the Press.' It wouldn't be mostly old boys, old political hacks talking about politics and world events. No inner-Beltway types. This would be a show about pop culture, entertainment, TV, rock, whatever else, as well as the politics. It would be a little bit pre-produced but mostly ad lib.

''We got an audience with (NBC Entertainment President) Brandon Tartikoff last June, Kurt Anderson (another co-exeuctive producer) and I. He

listened and said politely that he was not really intersted in that show, not on Sunday morning. He said he would like to put us on a prime time special.

''So we came up with a show we thought would work in prime time. We talked a lot about what would work from Spy, and what we would like to do independent of the magazine. We were looking at a range of topics that had mass appeal. You can't really talk about Abe Rosenthal (former executive editor of and now a columnist with the New York Times). You'll do much better talking about Sly Stallone. So we decided on a satirical treatment of celebrities.''

KANSAS CITY, MO (APRIL 16) UPI - Maintenance workers at a Greyhound depot discovered a bullet lodged in the radiator of a bus Monday, and federal agents probed the latest apparent shooting in the 6-week-old strike by company employees, authorities said.

The bullet was found shortly after the No. 1322 bus from St. Louis arrived in Kansas City at 1:30 p.m., said Ann Wheat, a spokeswoman for the bus company.

The Bureau of Alcohol, Tobacco and Firearms was investigating the report, said Dave True, an ATF regional spokesman.

Wheat said the bus left St. Louis at 7:30 a.m. Monday and arrived in Kansas City about 5 1/2 hours later. The shooting apparently occurred en route, she said.

The driver of the bus did not report hearing any gunfire, Wheat said.

Maintenance workers servicing the bus in Kansas City found the bus had been shot once in the radiator, located in the rear of the bus. The bullet appeared to be lodged, Wheat said.

No injuries were reported. Wheat said the company believed the shot was fired somewhere in Missouri on Monday because maintenance workers looked

the vehicle over in St. Louis and did not report seeing the hole.

The apparent shooting was the fourth reported in Missouri since 6,300 unionized drivers and 3,000 other union employees struck Greyhound on March 2 in a contract dispute, Wheat said. She said it was the 30th shooting incident nationwide since the strike began.

Two striking drivers charged last Wednesday with firing at a bus in Illinois on March 22 also are suspected of shooting at a bus south of St. Louis on the same day, investigators said.

Wheat said shootings at buses also were reported on March 4 in the St. Louis area and March 29 in Kansas City. No injuries were reported in either incident, she said.

On March 4, a bullet entered the right passenger windshield of a bus eastbound from St. Louis to Paducah, Ky., and Nashville, Tenn., Wheat said.

On March 29, a bus arriving in Kansas City from Minneapolis was found to have several dents, and two bullets were recovered, Wheat said.

Another Greyhound bus reportedly was the target of an attempted shooting early Monday in Falksville, Ala., company officials said. The ATF and the FBI were investigating that report.

BY VERNON SCOTT

HOLLYWOOD (APRIL 16) UPI - The Motion Picture Association of America, often the object of controversy in its rating of movies, once in awhile is unarguably correct.

There are relatively rare occasions in which it gives an X rating to a film that is beyond redemption. In those cases the association doesn't even bother to suggest a snip here or a cut there. It just delivers an unconditional, unequivocal X and that's the end of it.

Such a picture is ''Henry: Portrait of a Serial Killer.'' The rating is so clearly justified that even the film's director, John McNaughton, finds it difficult to argue.

His picture is based on a pair of real-life murderers who casually and brutally raped, maimed, mutilated and randomly killed their victims.

''Henry: Portrait of a Serial Killer'' includes scenes so graphic that an estimated 5 percent of its audiences run from the theater.

Writer-director and co-producer McNaughton took considerable liberty with some exploits of the real-life murderers - Henry Lee Lucas, now on death row in Texas, and Ottis Elwood Toole, now on death row in Florida - but found it necessary to avoid many gruesomely bizarre crimes that were too revolting even to hint at.

According to McNaughton, the murderers were responsible for 360 victims over a period of seven years. They've denied killing anyone.

''They were random killers,'' McNaughton said. ''If they passed a hitchhiker on the road they'd just pull over a little and run him down.''

There is sex and nudity in the picture, but it is nothing compared to the obscene violence.

Impressionable youngsters and prudent adults would be far better off watching a hard core porno film than the horrors of McNaughton's movie.

Yet, almost unbelievably, ''Henry: Portrait of a Serial Killer'' has received more than its share of good reviews, surprising even McNaughton.

Positive reviews or 10-best lists came from Variety, The Village Voice, The Chicago Tribune, Rolling Stone, The Boston Globe and The San Francisco Examiner among others.

Perhaps the most gruesome scene is that of a sister - a leading character - stabbing her rapist brother in the eye with a rattail comb.

''The reason I included the eye-gouging scene is obvious,'' McNaughton said. ''It was the punishment for incest in ancient times.''

The picture was shot entirely in McNaughton's native Chicago in 1985, but because it was given an X, Atlantic Films backed out of releasing it. Now it is being distributed a few cities at a time by Greycat Films of Las Vegas.

''When I sit in theaters and see people running out the door I feel really bad,'' McNaughton said. ''They come in expecting to be entertained and don't know what to expect.

''I don't like to see such discomfort. It wasn't my intent. The ones who leave usually get up when the two men are videotaping the rape and murder of a family in their home.''

Why would he produce such a grim and brutal movie that repulses so many people?

''I was telling a straight-forward story the way things sometimes happen in the world,'' he explained.

''This film isn't about telling - it's about showing. This is a picture that shows murder for what it is. We made it true to life. It cost only $100,000, so it doesn't have to make a lot of money. We didn't make this film for everyone.

''Hopefully we will get the same kind of response from audiences that we have from critics.''

McNaughton hired an all-Chicago cast of unknown performers, starring Michael Rooker in the title role, Tracy Arnold as the unfortunate girl and Tom Towles as her sex-crazed homicidal brother.

To heighten the drama and terror, McNaughton shot his film in European style. It is visually bleak and shocking, making the malignant theme all the more depressing.

Doubtless one reason for the X rating is that serial killer Henry gets away clean at the end of the film.

Since completing ''Portrait of a Serial Killer,'' McNaughton has finished a second film, a horror picture titled ''The Borrowers.'' It is currently tied up in with Atlantic's bankruptcy problems, McNaughton said.

So far McNaughton has been running in hard luck releasing his pictures, a situation exaserbated by his choice of subject matter.

WASHINGTON (APRIL 17) UPI - President Bush, seeking to conclude an embarrassing diplomatic episode, said Monday he intends to nominate Charles Thomas as U.S. ambassador to Hungary, replacing Mark Palmer.

Palmer resigned from the post in February after disclosure that he had made preparations to join an investment concern run by Ronald Lauder, a former U.S. ambassador to Austria. Questions of a conflict of interest were raised since Palmer was expected to head the investment operation's activities in Eastern Europe.

Thomas, 55, of Bethesda, Md., is a career member of the U.S. foreign service. He formerly served as deputy assistant secretary of state for European affairs, and is a specialist in the reduction of conventional forces.

Palmer, regarded as an effective and energetic representative during Hungary's move toward democracy, had hoped to become U.S. ambassador to Moscow.

But the administration decided to retain incumbent Jack Matlock beyond the usual three-year term, and that's when Palmer decided to join the investment corporation.

#90106u2520 04/16/1990 ~United Press International
LAS VEGAS, Nev. (APRIL 16) UPI - Golden Nugget Inc. Monday reported net income of $17.3 million, or 92 cents a share, for the quarter ending Mar. 31, compared to $10.1 million, or 55 cents a share, for the same period a year ago.

Stephen A. Wynn, chairman of the board, said $58.6 million in operating income included $44.3 million generated by The Mirage, $13.5 million from the downtown Golden Nugget hotel-casino and $810,000 from the company's project in Laughlin, Nev., which currently is under construction. Operating income for the first quarter of 1989 was $7.8 million.

Operating expenses totaled $149.4 million for the latest quarter compared to $41.9 million a year ago, according to a corporate announcement.

''We are particularly delighted with the outstanding results of the Golden Nugget Hotel itself during this period of highly publicized intercompany competition,'' said Wynn, a reference to the opening of The Mirage hotel-casino on the Las Vegas Strip in November. ''The downtown property scored its best first-quarter profits in its 44-year history, improving on last year's performance by over 86 percent.''

When Wynn opened the $630 million Mirage on Nov. 22, 1989, financial experts predicted the 3,100-room, tropical-themed resort would have to gross $1 million a day to break even.

Wynn has said the casino operation at The Mirage won more than $1 million a day average in the first two months of operation and that food and beverage revenues exceeded projections.

PHILADELPHIA (APRIL 16) UPI - Occidental Chemical Co. agreed Monday to pay a record fine for polluting the air near its Pottstown, Pa., plant with emissions known to cause cancer, U.S. Attorney Michael Baylson said.

The $687,223 fine was the largest single penalty ever paid for violating limits on vinyl chloride emissions at a single plant, Baylson said in announcing agreement on terms of a proposed consent decree.

Occidental's Pottstown plant manufactures polyvinyl chloride, used in making a variety of plastics products. Vinyl chloride is a known carcinogen, said Assistant U.S. Attorney James Sheehan, chief of the U.S. Attorney's civil division.

Under the terms of the consent decree, the Dallas-based subsidiary of Occidental Petroleum Corp. must install new pollution-control equipment at the plant and train employees in pollution prevention methods.

The consent decree stems from a suit filed last year by the federal Environmental Protection Agency against Occidental Chemical.

#90106u2740 04/16/1990 ~United Press International

SEATTLE (APRIL 17) UPI - A federal judge Monday denied motions by several large insurance companies to dismiss lawsuits filed by The Boeing Co. and said a trial jury will decide whether the carriers should pay for millions of dollars in cleanup costs at two chemical dump sites used by Boeing.

U.S. District Judge William Dwyer set a tentative trial date of May 7 for the suits, rejecting motions for summary judgments to throw out the Boeing suits.

The lawsuits seek payments for cleanup work at the Western Processing site in Kent, Wash., and the Queen City Farms dump about 10 miles east in Maple Valley.The two dumps were used by Boeing for decades as repositories for hazardous waste stemming from its production facilities in the Puget Sound

area.

In the early 1980s the federal Environmental Protection Agency closed both sites. EPA investigators said they had found dozens of toxic chemicals that had leached into the soil and groundwater at the sites.

Numerous insurance companies that sold policies to Boeing - including Aetna, INA, Hartford and Continental - told the aerospace giant that for years it had ample evidence showing the dumping could results in costly cleanups.

Boeing dumped an estimated 24 million gallons of toxic waste at the two sites.Company officials have estimated the cleanups could total $80 million or more.

The insurers charged that Boeing ignored warnings from company employees, an outside consultant and state environmental officials who said continued dumping at the sites would lead to serious problems and that the two sites were poorly equipped to handle toxic waste.

The insurance companies argued that Boeing's knowledge of the potential problems triggered exclusion clauses in its policies that made the company liable for cleaning up damage at the dumps.

The insurers contend that Boeing's coverage protected the company only in cases of sudden or accidental pollution.

CUPERTINO, CA (APRIL 17) BUSINESS WIRE - Grace Ventures Corp. and Horn Venture Partners, the managing partner of Grace Ventures Partnership II, announced Tuesday that Grace Ventures Partnership II has invested $1.35 million in Caelus, Inc., a Spokane, Washington-based developer of integrated manufacturing software for process manufacturing.

This investment is part of a $2.0 million financing.

Founded in 1981, Caelus develops the Caelus Management System (CMS), a fully-integrated manufacturing and enterprise management software package for real-time, mission-critical applications. The company also offers a compendium of customer service and support programs to more than 200 users including several Fortune 1,000 manufacturing and distribution companies worldwide.

Dr. Christian F. Horn, president of Grace Ventures Corp. and managing partner of Horn Venture Partners, stated, ''Caelus is an attractive investment opportunity. The company has a proven product with over 200

users worldwide.

''As the manufacturing industry continues to move to computer integrated manufacturing (CIM), companies will require powerful real-time systems like CMS, which provides the functionality and performance required for CIM. This financing will support a new phase of growth in both new products and customer education and services programs.''

Bob Wilson, president and chief executive officer of Caelus, commented, ''Grace Ventures Partnership II's investment in Caelus reaffirms a commitment to this company and industry. This financing will support a new phase of growth in both our plans for new products and our support and services to customers.''

Grace Ventures Corp., a wholly owned subsidiary of W. R. Grace & Co., and Horn Venture Partners, a partnership of the officers of Grace Ventures, manage 47 high technology, emerging growth company investments through three venture capital funds, including Grace Ventures Partnerships I and II.

LOS ANGELES (APRIL 17) BUSINESS WIRE - H.F. Ahmanson & Co. (NYSE:AHM), the parent company of Home Savings of America, the nation's largest savings and loan institution, Tuesday reported that first quarter earnings increased to $61,751,000, or 62 cents per share, from $39.2 million, or 40 cents per share, for the same quarter of 1989. This 57.5 percent gain in net earnings reflects continued growth in core operating earnings, principally net interest income, which increased 21.0 percent.

Net interest income totaled $286.4 million for the quarter compared with $236.6 million in the first quarter of 1989. This improvement is attributable to a $3.6 billion increase in interest earning assets, mainly adjustable rate single-family mortgages, and increased effective net spread. The effective net spread was 2.68 percent in the first quarter of 1990 compared to 2.41 percent in the first quarter of 1989.

During the quarter, the Company sold $250 million of Adjustable Rate Mortgage loans that had been previously designated for sale. In addition, the Company adjusted, by $2.5 million, the amortization of previously recorded present value gains due to higher prepayments on loans sold.

General and administrative expenses totaled $173.5 million in the first quarter of 1990 compared with $173.5 million in the year ago quarter.

During the first quarter of 1990, federal deposit insurance premiums and assessments increased by $3.3 million. General and administrative expenses as a percentage of average earning assets on an annualized basis was 1.68 percent in the first quarter of 1990 compared to 1.84 percent in the first quarter of 1989.

During the quarter ended March 31, 1990, the company provided $25.2 million for possible loan losses. Net loan charge-offs for the period totaled $16.2 million. The allowance for possible losses was $109.3 million at March 31, 1990. The increase in the provision for losses, from $12.6 million in the first quarter of 1989, reflects management's decision to continue to increase the company's loan reserves.

Non-performing assets totaled $545.6 million at March 31, 1990, or 1.19 percent of total assets, an increase of $41.4 million from Dec. 31, 1989. During the quarter foreclosed real estate, which is included in non-performing assets, increased from $124.5 million at Dec. 31, 1989, to $144.0 million at March 31, 1990.

Earning assets grew by more than 2.9 percent during the quarter to a record $42.0 billion at March 31, 1990, up 9.4 percent from $38.4 billion at the end of March 1989. Retail deposits, including interest credited, increased during the quarter by $660.6 million.

Mortgage loan originations rose 12.2 percent to a first quarter record of $3.4 billion from $3.0 billion in the first quarter of 1989. Virtually all (92 percent) of the loans funded continued to be monthly Adjustable Rate Mortgages and all were on residential properties. Loans on single family homes accounted for 92 percent of total loans funded. The loan portfolio grew by $1.3 billion, or 3.3 percent, during the first quarter to $39.7 billion, up 10% from $36.1 billion at March 31, 1989. In addition, at March 31, 1990, the Company had $1.78 billion of home mortgage loans which it had approved but not yet funded.

H.F. Ahmanson & Company, with $46.0 billion in assets, is the parent company of Home Savings of America. Home's $33.7 billion deposit base is the largest of any U.S. savings institution. It operates 359 savings branches in 9 states and 102 mortgage lending offices in 18 states.

AKRON, OH (APRIL 17) BUSINESS WIRE - Bridgestone/Firestone Inc. announced

Tuesday that Trevor C. Hoskins has been appointed director of public relations and Michael J. Connor, director of government and community relations.

Hoskins will be responsible for the company's public relations activities, including media and employee communications for the company, as well as the Firestone, Bridgestone and Dayton tire brands. Connor will be responsible for monitoring federal and state legislative and regulatory issues and providing company representation to civic organizations in headquarters and plant communities. Both will report directly to Thomas M. Forman, executive vice president.

Hoskins, 55, has 30 years of public relations experience. He was born and educated in England and served in the Royal Air Force in Europe. Hoskins has worked in the United States since 1975. He became a U.S. citizen in 1982.

Hoskins is relocating to Akron from Nashville, where he was director of public relations for Bridgestone (U.S.A.) Inc. Prior to that, he served 18 years with The Goodyear Tire & Rubber Co. where he was director of public relations for its international activities for 10 years. He had previously spent 12 years in public relations in the British auto industry as a staff member and public relations consultant.

He attended International Management Development studies at Syracuse University in 1979, the Carnegie Mellon University Graduate School in Industrial Administration in 1982 and the Graduate School of Management at Northwestern University in 1986.

Connor, 57, joined the Firestone Tire & Rubber Co. in 1957 and has held several management positions in the company's advertising, public relations, marketing services and external affairs departments. In addition, he represents the company in many community organizations including Akron Golf Charities as president of the board of trustees, Akron Regional Development Board, Akron-Canton Regional Airport Authority, Akron City Hospital and Akron Roundtable.

He was graduated from Northwestern University with a bachelor of science degree in journalism. He is also a graduate of the 1968 Executive Development Seminar at Cornell University and the Marketing Management Program at Harvard University in 1978.

Bridgestone/Firestone Inc., headquartered in Akron, is a wholly owned subsidiary of Bridgestone Corp. and was created in August 1989 by the consolidation of the operations of The Firestone Tire & Rubber Co., Bridgestone (U.S.A.) Inc. and Bridgestone (Canada) Inc.

The company operates 16 plants in North America which manufacture

Bridgestone, Firestone and Dayton brand tires and a wide range of industrial and synthetic rubber goods. In addition, Bridgestone/Firestone operates nearly 1,600 MasterCare tire and automotive service centers in the United States.

LONGMONT, CO (APRIL 17) BUSINESS WIRE - PrairieTek Corp. Tuesday announced the signing of a major O.E.M. contract with Sharp Electronics to supply the Japanese laptop manufacturer with 2.5-inch disk drives.

This multi-million dollar contract represents the first of several that PrairieTek plans to announce within the next few months.

Sharp will use the Prairie 120, 20 megabyte hard drive in their recently introduced PC-6220 notebook computer. Sharp's new notebook computer, in addition to incorporating the 20 megabyte PrairieTek drive, has a 12 Mhz 80286 microprocessor and sports a VGA graphics display. The compact system measures only 11 inches (w) by 8.5 inches (d) by 1.4 inches (h) and weighs a mere 4.4 pounds.

''The Sharp agreement represents the first in a series of major agreements which PrairieTek will announce within the next several months,'' according to Steve Volk, PrairieTek's vice president of marketing. ''Sharp's new system is clearly a leading edge product that sets a new benchmark in functionality and size for notebook computers. We are pleased to be a part of Sharp's program.''

According to Sharp several factors influenced their decision to incorporate the PrairieTek drive into its new notebook computer. ''The thinness of the drive, combined with the durability and low power, made the Prairie 120 an ideal match for our system.''

PrairieTek developed the industry's first 2.5-inch drive. The Prairie 120 20MB 2.5-inch drive, developed specifically for notebook computers, measures 4 inches by 2.8 inches with a height of 0.6 inches and weighs only 6 ounces. The Prairie 120 has increased ruggedness and durability due to PrairieTek's unique head unloading mechanism which prevents the heads from ever contacting the media.

Unlike conventional disk drives, in which the read/write heads contact the media when the drive spins down, the ramp loading prevents head slap and eliminates stiction, two major problems in portable environments. The average power consumption of the drive is less than 1 watt.

PrairieTek Corp., a privately held company, was founded in 1986. The company was formed to provide original equipment manufacturers with rugged high-performance, low-power disk drives. PrairieTek manufactures 2.5-inch hard disk drives for notebook and laptop computers and has its headquarters and manufacturing facilities located at 1830 Lefthand Circle in Longmont.

KANSAS CITY, MO (APRIL 17) BUSINESS WIRE - United Telecommunications Inc. Tuesday announced earnings per share of 51 cents for the first quarter of 1990, a 42 percent increase over the 36 cents reported for the first quarter of 1989.

First quarter consolidated net operating revenues increased 15 percent to $2 billion, while operating income for the first quarter increased 34 percent to $265 million from $198 million in the first three months of 1989.

US Sprint reported net operating revenues of $1.2 billion in the quarter, up 24 percent over the corresponding period in 1989. US Sprint had operating income for the first quarter of $85 million, compared to $31 million for the first quarter of 1989.

The first quarter growth in revenue reflects a 13 percent increase in long-distance calling volume over the first quarter of 1989 and a 5 percent annualized gain in access lines.

Operating income for the local telephone companies was $169 million, an increase of $12 million from the first three months of 1989.

Net operating revenues for United's complementary business segment were up 12 percent to $201 million over the comparable quarter of 1989. Operating income for this segment was $11 million, an increase of 5 percent from the 1989 first quarter amount.

#90107b0039 04/17/1990 ~Business Wire

SAN JOSE, CA (APRIL 17) BUSINESS WIRE - The Coast Distribution System (ASE: CRV) reported its financial results for the seasonally weak quarter ended March 31, 1990.

Sales for the first quarter were $34,385,000 in 1990, a 20 percent increase over the same period in 1989. The increase in sales was attributable to the acquisitions, made in September 1989 and January 1990, of Griffin Marine, a distributor of marine parts and accessories, and Mohawk Trailer Supply, a distributor of recreational vehicle parts and accessories.

Coast's sales were adversely affected by a small decline in demand for recreational vehicle parts and accessories and a larger decline for marine parts and accessories.

The company incurred a net loss for the quarter of $98,000. The Mohawk

acquisition, which added a 14th distribution center to the company's network, increased the seasonality of the company's results because of its northeastern location.

Earnings were also negatively impacted by the softness in demand for recreational parts and accessories in the marketplace.

THE COAST DISTRIBUTION SYSTEM CONSOLIDATED STATEMENTS OF OPERATIONS

KANSAS CITY, MO (APRIL 17) BUSINESS WIRE - United Telecommunications Inc. Tuesday announced that next month it plans to initiate the legal and financial steps necessary to change its name to Sprint Corp.

Shareholders overwhelmingly approved the move at United's annual meeting here Tuesday.

Chairman and Chief Executive William T. Esrey told shareholders it is his intention, by the end of May, to notify GTE Corp., holder of a 19.9 percent limited partnership interest in United Telecom's US Sprint long-distance unit, that United is exercising its option to buy out GTE's interest, a prerequisite to the name change.

Esrey said the cost of the book value acquisition is expected to be approximately $500 million. Completion of the transaction is expected by early July.

Reflecting United's increasingly global marketplace, Esrey said that effective with the corporate change, the ''US'' in US Sprint Communications Company will be dropped from the long-distance division's name. The company's local telephone units, such as the United Telephone Company of Ohio, will retain their existing names but with the addition of a line noting their Sprint Corp. affiliation.

United Telecom was founded in 1899 as a small independent telephone company in Abilene, Kan., and has since flourished through growth and acquisition to become a strong player in global telecommunications with 1989 income from continuing operations of $363 million on revenues of $7.5 billion.

The US Sprint long-distance unit includes Sprint International, which markets voice and data products overseas, and Sprint Services providing multi-lingual operator support to the industry along with 800 and 900 services. United's local telephone division consists of 7 companies providing nearly 4 million lines in 17 states.

United also is a major telephone equipment supplier and directory publisher through its North Supply and Directories America companies. In other annual meeting developments United shareholders approved the re-election of Esrey to the 14-member board of directors, along with Warren L. Batts, Joseph L. Dionne, Donald J. Hall, and Charles E. Rice. Shareholders also approved the appointment of Ernst & Young as auditors, and an increase in authorized shares of common stock to 520 million.

GOLETA, CA (APRIL 17) BUSINESS WIRE - Applied Magnetics Corp. (NYSE:APM), the leading independent manufacturer of disk and tape heads for the computer industry, announced second-quarter results.

Ben J. Newitt, vice chairman and chief executive officer, stated that sales for the second quarter were at an all-time quarterly high, amounting to $88,284,000, an increase of $12.32 million and $8,729,000, or 16 percent and 11 percent, over the second quarter last year and first quarter this year, respectively.

Sales for the six months ended March 31, 1990, were $167,839,000, an increase of 5 percent over the same period last year.

Net income for the second quarter of $2,173,000, or 13 cents per share, was $241,000, or 1 cent per share, above the second quarter last year and approximately $1.7 million, or 375 percent, above the first quarter of this year, before consideration of reserves of $18.5 million provided in the first quarter related to a customer defaulting on note receivable payment terms.

Backlog of open orders at March 31, 1990, was an all-time high of $138,562,000, compared with $92,967,000 at March 31, 1989, and $112.4 million at Dec. 31, 1989.

DUBLIN, CA. (APRIL 17) BUSINESS WIRE - Hexcel Corp. Tuesday announced that its board of directors and the board of directors of Dainippon Ink and Chemicals (DIC) have approved the formation of a jointly owned Japanese operating company.

The new company will manufacture and sell honeycomb and advanced composite materials in Japan. The company is expected to be operational in early 1991.

According to Robert L. Witt, president and chairman of Hexcel, and S. Kawamura, president of DIC, the new company will combine the strength of DIC's technological expertise and operational experience in Japan with Hexcel's worldwide marketing and technical expertise in honeycomb and composites. This will allow it to provide a broad range of products and technical support to the rapidly expanding Japanese aerospace industry.

Hexcel Corp. is a world leader in the development and manufacture of honeycomb, advanced composites, reinforcement fabrics, fine chemicals and resins for use in commercial aerospace, space and defense and other growing markets.

DIC is one of Japan's leading diversified chemical companies. In its 80 years of operation, DIC has built up expertise in printing inks, synthetic resins and organic pigments and is now among the world leaders in these areas.

In addition to graphic arts and polymer related products, DIC's lineup includes petrochemicals, engineering plastics, coal pitch-based short carbon fiber, biochemicals and building materials.

An extensive research and development program enables the company to continually expand this lineup and move into new fields. Representation around the globe by the DIC Group ensures that the company's business activities continue to be highly international in scope.

DENVER (APRIL 17) BUSINESS WIRE - Affiliated Bankshares of Colorado Inc. Tuesday reported that earnings in the first quarter of 1990 were significantly improved over earnings for the first quarter last year.

Net income in the first quarter of 1990 amounted to $2,023,000, or 17 cents per share, compared to $1,109,000, or 9 cents per share, in the first quarter of 1989.

Kent Olin, president and chief executive officer, said earnings increased in the first quarter comparison primarily because of higher non-interest revenue and reduced expense on foreclosed property.

The overall level of nonperforming loans declined by $9.9 million in the first quarter comparison and foreclosed property increased by $3.4 million (summary on reverse side). The reserve for loan loss coverage as a percentage of non-accrual loans increased from 73 percent to 107 percent.

Total assets increased 2.7 percent from March 31, 1989 to $2.6 billion as of March 31, 1990. Total loans increased .3 percent to $1.5 billion, and investment securities (primarily U.S. Government securities) decreased 2.1 percent to $651 million.

Total deposits were $2.2 billion as of March 31, 1990, representing an increase of 3.7 percent during the past 12 months. Stockholders' equity (book value) increased 4.6 percent during the past 12 months to $187.2 million ($17.32 per common share).

Affiliated Bankshares is a state-wide bank holding company with $2.6 billion in assets, 28 banks and four bank-related service companies serving the major markets of Colorado.

The company's shares are traded in the NASDAQ National Market System. The NASDAQ symbol is AFBK.

SUNNYVALE, CA (APRIL 17) BUSINESS WIRE - DAVID Systems Tuesday announced the signing of a distribution agreement with Louis Albert Associates Inc. in Canada, thereby providing access to the Canadian marketplace for DAVID's Ethernet twisted pair 10BASE-T LAN family of products.

Louis Albert will carry all DAVID ExpressNet products, including 10BASE-T Hubs, intelligent concentrators and fiber optic products, as well as the newly announced VolksNet 10BASE-T LAN for small network configurations.

''This agreement with Louis Albert provides DAVID with prime access into Canada for our products. Their reputation as communications specialists and network systems integrators is outstanding,'' said Henry R. Nothhaft, president and chief executive officer of DAVID Systems.

''We are very pleased that they will be using DAVID products in the design and implementation of solutions for their customers.''

Louis Albert Associates is a privately held Canadian corporation that has successfully marketed sophisticated communications products since 1968. Corporate headquarters is in Ottawa, with additional offices in Vancouver, Calgary, Toronto and Montreal.

They provide systems integration expertise, leading edge LAN and WAN systems, Network Security, Network Management and Connectivity, both at host and network levels.

Louis Albert counts as its customers leading companies in the airline, telephone and telecommunications, and energy industries, as well as government entities and agents at the federal, provincial and municipal level.

Formed to enhance the role of integrated digital communication, DAVID Systems supplied its first EtherNet LAN products in 1985. As a technical leader in its field, DAVID holds six communications patents and is an active participant in the IEEE 802.3 10BASE-T Consortium at the University

of New Hampshire.

DAVID Systems products emphasis integrated solutions for LANs, voice and data which are easy to expand and adapt to changing customer needs.

LOS ANGELES (APRIL 17) BUSINESS WIRE - TVN Entertainment Corp., in cooperation with telecommunications giant AT&T and the world's largest manufacturer of home satellite receivers, Uniden Corp., Tuesday launched the initial phase of its direct broadcast satellite (DBS) network.

For the first time, satellite dish owners will be able to electronically rent, in their homes, the top 10 movies, on 10 separate channels -- 24 hours a day.

At a media briefing Tuesday, TVN (formerly Touchtone Video Network) turned the switch on its 24-hour promotional channel, which will show trailers for the hit movies licensed by TVN, as well as consumer programming information.

This channel will be transmitted from AT&T's Telstar 303, transponder 24, and will be received by all of the nation's approximately 3 million home satellite dishes, the majority of which are located in rural America.

Because TVN has incorporated AT&T's INFO-1 Automatic Number Identification service into its system design, TVN subscribers can instantly rent any one of the top 10 hit movies, 24 hours a day, months before subscription movie services such as HBO and Showtime, simply by dialing the corresponding toll-free 800 number.

The films that TVN has licensed from the major studios for use during its systems integration phase include such popular box office hits as ''Sea of Love,'' ''Lethal Weapon II,'' ''Dead Poets Society,'' ''Indiana Jones And The Last Crusade,'' ''Casualties of War,'' ''The Package,'' ''Little Monsters,'' ''Turner and Hooch,'' ''Field Of Dreams'' and ''Batman.''

#90107b0127 04/17/1990 ~Business Wire
KANSAS CITY, MO (APRIL 17) BUSINESS WIRE - Concluding 31 years of service to United Telecommunications Inc., Paul H. Henson retired Tuesday as chairman of the board of directors.

He will continue to serve on United's board. The board earlier had elected William T. Esrey to succeed Henson as chairman. Esrey, 50, will continue to serve as president and chief executive, positions he has held since 1985.

Henson, 64, launched his telecommunications career in 1942 with Lincoln Telephone and Telegraph Co. in Nebraska. When he joined Kansas City-based United Utilities in 1959, the company had 5,000 employees, 500,000 customers in 500 rural communities and annual revenues of $42 million.

Today, United Telecom's numbers are approaching 42,000 employees, 4 million local telephone customer lines in 3,000 communities in 17 states, and a US Sprint long-distance division contributing more than half of nearly $8 billion in annual revenues.

Elected United's president in 1964 at age 37, Henson was elevated to board chairman and chief executive officer just two years later. In 1985 the board elected Esrey president and chief executive officer and the two men led the company to become the nation's third largest long-distance company and the ninth largest local telephone system.

Within the first five years of Henson's leadership, United Utilities participated directly in 28 mergers with smaller telephone companies. With the merger of United and North Carolina-based Carolina Telephone and Telegraph Co. in 1969, United's assets exceeded $1 billion for the first time.

The 1974 acquisition of the Florida Telephone Corp. brought 330,000 customer lines and 35 percent of the land mass in the fast-growing Florida market into the United fold. Today, that company boasts more than 1 million customer lines and $100 million in annual net income.

The Henson and Esrey team led United into the fiercely competitive long-distance business in a joint partnership venture with GTE Corp., launching US Sprint in 1986 as the nation's only all-digital fiber-optic network. After an early period of losses, US Sprint today is consistently profitable, with 1989 operating income of $227 million on revenues of $4.3 billion.

Henson served on the board of directors of the United States Independent Telephone Association from 1960-72, and was president 1964-65. A member

of the Business-Higher Education Forum, he was appointed by President Reagan to the National Security Telecommunications Advisory Committee in 1982, and last year was named chairman of that group by President Bush.

Henson holds bachelor's and master's degrees in electrical engineering from the University of Nebraska. He continues to serve on the boards of Kansas City Southern Industries where he recently was named chairman, the University of Missouri-Kansas City, Midwest Research Institute, the University of Nebraska Foundation, Duke Power Co. and Hallmark Cards Inc. He is also a director for the Kansas City Symphony.

In 1989, Henson was named Entrepreneur of the Year by the University of Missouri-Kansas City, Johnson Countian of the Year by Johnson County Community College, the Silver Eagle Award winner by the Boy Scouts of America and the Pirouette Award recipient as the outstanding performing arts contributor of the year from the Kansas City Ballet Guild & Kansas City Tomorrow Alumni Association.

#90107b0132 04/17/1990 ~Business Wire

COLUMBUS, OH (APRIL 17) BUSINESS WIRE - American Electric Power Co. Tuesday reported first quarter earnings of $144,867,000, a decrease of 9.3 percent from the $159,782,000 earned in 1989.

Earnings per share for the quarter were 75 cents, a decrease of 8 cents or 9.6 percent from the 83 cents earned in 1989.

For the 12 months ended March 31, 1990, earnings increased 0.5 percent to $614,002,000 from $611,197,000 and increased 1 cent per share to $3.17 from $3.16 for the like period a year earlier.

Earnings per share for the three-month and the 12-month periods ended in 1990 reflect a slight decrease in the average number of shares outstanding. The company commenced in February a common stock repurchase plan which is expected, when completed, to reduce shares outstanding by approximately 9 million shares.

AEP's operating revenues for the first quarter were $1.299 billion, an increase of 2.8 percent from $1.263 billion in 1989, reflecting an increase in sales to unaffiliated utilities. W.S. White Jr., AEP chairman and chief executive officer, said that although revenues increased, earnings and earnings per share declined from the same quarter last year

as a result of the unseasonably mild winter in the company's service territory which depressed more profitable residential sales. Comparative earnings were further reduced as a result of the commercial operation of a subsidary's new generating unit in December 1989, the cost of which is not yet fully reflected in revenues.

For the 12 months, revenues were $5.176 billion, an increase of 6 percent from $4.885 billion reported a year ago. The increase in revenues and earnings for the 12-month period reflects an increase in sales of electric energy to unaffiliated utilities throughout the 12-month period and the unseasonably cold weather experienced during the fourth quarter of 1989.

American Electric Power is the parent holding company of eight operating electric utilities providing service to 7 million people in Ohio, Indiana, Michigan, Kentucky, Virginia, West Virginia and Tennessee.

DALLAS (APRIL 17) BUSINESS WIRE - Chief Auto Parts, a leading retailer of automobile replacement parts, is initiating its latest environmentally concerned effort -- a vehicle battery recycling program.

Beginning April 22, Chief Auto Parts stores will accept used vehicle batteries for recycling, free of charge to the consumer. This precedent-setting program will be a permanent service available at Chief stores nationwide.

People who wish to recycle their car, truck or any other vehicle batteries

may simply bring them in to any Chief Auto Parts store. GNB battery manufacturers will then handle the actual recycling process. All brands of batteries will be accepted, regardless of where they were purchased.

''In our continued efforts to provide the consumer with top-of-the-line automotive aftermarket products, we'd like to provide that same consumer the means of disposing of those products in an environmentally safe and almost effortless way,'' explained Mike Manor, president, Chief Auto Parts. ''Our new battery recycling program is merely a continuation of Chief's commitment to the environment.''

In addition to the new battery recycling program, Chief Auto Parts stores instituted an Oil Recycling Program and a line of S.A.F.E. (Specially Adapted For the Environment) auto care products last fall.

In-store educational programs also explain the availability of environmentally safe products as well as proper use and disposal of hazardous chemicals.

''The tremendous success of our Oil Recycling Program and our S.A.F.E. products shows us that the public is equally conscious of keeping our environment clean,'' commented Manor.

Chief Auto Parts is based in Dallas with 500 stores in nine states including: California, Texas, Nevada, Arizona, Oklahoma, Tennessee, Kentucky, Alabama and Arkansas.

SANTA MONICA, CA (APRIL 17) BUSINESS WIRE - National Medical Enterprises Inc. (NME), one of the nation's largest health care services companies, Tuesday announced three key promotions within its Specialty Hospital Group (SHG).

Russell D. Ragland Jr. has been appointed senior executive vice president for the Group; Thomas M. Ebejer and Howard B. Finkel have been named executive vice presidents.

Ragland, 38, serves as SHG's senior executive vice president and chief financial officer. He joined Psychiatric Institutes of America (PIA) in 1978, prior to its acquisition by NME in 1982. Before joining PIA, Ragland served as an accountant at Seidman and Seidman Public Accountants.

He holds a bachelor of science in finance from America University in

Washington D.C. and a master of business administration from George Mason University in Fairfax, Va.

Ragland serves on the board of governors of the Federation of American Health Systems, as well as two of the organization's committees: the Health Financing and Legislative Committee, and the Psychiatric Committee. Ragland's membership also includes the Hospital Financial Management Association.

Ebejer serves the Group as executive vice president of Design and Construction, overseeing all SHG's facilities design and construction, telecommunications, materiel management and interior design. Prior to joining NME in 1984, Ebejer served 12 years as a partner in the architectural firm of the Winebrenner and Ebejer Group.

He earned a bachelor of science in architectural engineering from Lawrence University in Southfield, Mich.

Ebejer, 51, holds memberships in the American Institute of Architects, the American Arbitration Association, and the National Council of Architects Registration Board.

As executive vice president, Finkel will continue to direct and manage Psychiatric Management Services, the management services arm of the Group's Psychiatric Institutes of America (PIA) division. Prior to joining NME in 1984, he served as regional director of Mental Health Management.

Finkel, 40, holds a bachelor of arts degree in sociology from Haverford College in Haverford, Pa., and a master of science degree in clinical psychology from Hahnemann Medical College in Philadelphia. Finkel has also completed graduate work in mental health administration at the University of Massachusetts.

The Specialty Hospital Group operates or manages 63 freestanding psychiatric hospitals, 25 physical rehabilitation hospitals, two transitional living centers, and 13 substance abuse treatment centers.

In addition, the Group manages 45 psychiatric, physical rehabilitation and substance abuse units in acute care hospitals.

Its parent company, NME, also owns, operates and manages acute care hospitals throughout the United States and internationally.

Listed: NYSE, PSE, London (NME).

#90107b0244 04/17/1990 ~Business Wire

REDONDO BEACH, CA (APRIL 17) BUSINESS WIRE - The U.S. Air Force Space Systems Division has selected TRW Space & Technology Group to build a satellite weighing less than 1,000 pounds to accommodate a variety of space and technology experiments.

The initial $5,479,254 award to TRW for the Space Test Experiments Platform (STEP) program calls for one satellite, but the contract includes options for TRW to build as many as 12 lightweight experiment-bearing spacecraft over the next six years.

The initial STEP satellite is currently scheduled for launch in 1992 on a small launch vehicle (Pegasus-class). The satellite would carry four experiments in an elliptical polar orbit with an apogee of 1,500 kilometers and a perigee of 195 kilometers.

Two of the experiments will examine the propagation of radio frequencies in the ionosphere; one will take global electronic density measurements and another will collect data for drag and density modeling. The STEP satellite is designed to last a minimum of one year with a goal of three years.

Central to the TRW design STEP program is a core vehicle that provides attitude control, communications, command, telemetry and electric power. The core vehicle can support up to 300 watts of secondary power and uses passive thermal control. The attitude control system can provide three-axis, spin stabilized or gravity gradient capability.

For the STEP program, TRW teamed with Defense Systems Inc. (DSI), of Fairfax, Va., to design a low-cost modular satellite for mission flexibility. TRW Space & Technology Group is an operating unit of Cleveland-based TRW Inc. The group has built more than 175 communications defense and scientific spacecraft; developed over 200 advanced space instruments and integrated some 550 experiments into their host spacecraft.

#90107b0251 04/17/1990 ~Business Wire

PHOENIX (APRIL 17) BUSINESS WIRE - Arizona Commerce Bank (ASE:AZB) Tuesday announced that it lost $334,000 in the first quarter of 1990.

In the comparable quarter of the prior year, Arizona Commerce Bank earned $231,000. For the full year 1989, the bank incurred a loss of $5.6 million.

At the end of the first quarter of 1990, Arizona Commerce Bank reported deposits of $75 million, down from $122 million as of March 31, 1989. Loans at the end of the first quarter of 1990 amounted to $53 million, down from $79 million on the comparable date in 1989.

According to F. Lee Jacquette, chairman and chief executive officer, ''The main factors in the loss in 1990 were ongoing expenses of loan recovery efforts and, especially, foregone income on the substantial portfolio of nonaccrual loans.'' At the end of March, nonaccrual loans were $8 million.

Jacquette went on to say that, ''Unless there is a material reduction in nonaccrual loans, Arizona Commerce Bank expects to continue to report operating losses for the foreseeable future.''

In April 1990, Arizona Commerce Bank received notification from the Federal Deposit Insurance Corp. of a proposed draft enforcement action relating to capital levels and asset quality at the bank. The FDIC intends to present this draft to the bank in May.

The bank is in the process of submitting a capital augmentation plan to the FDIC and the Arizona Superintendent of Banking. According to Jacquette, ''Arizona Commerce Bank, pursuant to this plan, is actively seeking additional capital, recognizing that troubled conditions in banking in Arizona make it difficult to secure outside capital.''

Jacquette added that, ''Arizona Commerce Bank, in order to meet regulatory requirements and to stabilize operations, has downsized the institution, reduced locations and assets, and has cut the size of the staff.''

He added, ''The bank continues to make every effort to contain non-interest expense, but needs to incur substantial expenses for managerial, technical, and legal resources to cope with loan difficulties.''

The bank, Jacquette emphasized, ''can meet the requirements of the federal and state regulators only if it returns to profitability, reduces the level of classified loans indentified by the regulators, and avoids excessive classified loans in the future.''

He went on to say, ''Because of current high levels of classified loans at our institution, and the shaky condition of the real-estate sectors of the local economy, achievement of regulatory requirements is likely to be exceptionally difficult.''

VANCOUVER, BRITISH COLUMBIA (APRIL 17) BUSINESS WIRE - CBR International Biotechnologies Corp. (VcSE:CBZ) announced the formation of a new joint venture company, which, subject to regulatory approval of the transfers of rights and shares involved, will have the exclusive rights to commercialize the stress protein technologies that CBR International and its corporate and contractual affiliates have been working with since 1988.

These rights are currently held among CBR International, its wholly owned U.S. subsidiary, GP Technologies Inc., and Chemistry and Biotechnology Research International Corp. (CBR America), a California corporation in which CBR International holds an 8 percent equity interest.

Under the joint venture arrangements, CBR International will transfer to the new company all of its shares in GP Technologies Inc. and CBR America and all of the direct rights that it holds in the stress protein technologies and related development and exploitation agreements, in exchange for a 19 percent equity position in the new company and $156,000 in cash.

The joint venture company will continue with stress protein research and will be assuming $58,000 of CBR International's development obligation in that regard.

The balance of the rights to the stress protein technologies are being transferred to the joint venture company in exchange for a 31 percent equity interest, with the remaining 50 percent of the common equity to be issued to an investor group that will be providing initial working capital of approximately $500,000, including Trian Equities Ltd., which will take up 22 percent of the common equity.

Richard Glickman of CBR International will serve as president and chief executive officer of the joint venture company.

The new joint venture is intended to permit the stress protein technology development to continue on a controlled basis to early commercialization. The new arrangements will permit CBR International to focus its technical efforts on the transfer of its Gold Probe and Oil Probe technologies from laboratory assays to field-compatible products.

LOS ANGELES (APRIL 18) BUSINESS WIRE - Teledyne Inc. announced Tuesday that the previously announced spin-off of Unitrin Inc. will be completed April 20 when Unitrin stock certificates are mailed to Teledyne shareholders.

Teledyne has been advised by the New York Stock Exchange that Teledyne stock will trade ex-distribution April 23.

The company said Unitrin stock will trade over the counter and be quoted on the NASDAQ National Market System commencing April 23. The symbol will be UNIT. First Boston, Goldman Sachs, Merrill Lynch and Salomon Brothers will be the primary market makers.

Teledyne shareholders will receive one share of Unitrin stock per each share of Teledyne owned. Unitrin is comprised of Teledyne's former insurance and finance companies. Results of the First Quarter, 1990

Unitrin's results for the first quarter were:

TELEDYNE

Financial Highlights (In millions, except per-share amounts)

	Three Months Ended March 31,	
	1990	1989
Revenues	$298.6	$272.1
Net income	$ 25.6	$ 34.7
Earnings per share	46 cents	63 cents

The casualty insurance companies experienced a decrease in underwriting results during the first quarter of 1990 as compared with the prior year primarily due to adverse experience from storms and in personal lines. Per-share amounts for Unitrin were computed using 55,412,845 as the average number of shares as of March 31, 1990, and 1989, as if the shares of common stock had been outstanding for the periods presented.

HONOLULU (APRIL 18) BUSINESS WIRE - The board of directors of Hawaiian Electric Industries Inc. Tuesday declared a quarterly dividend of 54 cents per share, payable June 12, 1990 to shareholders of record of the company's common stock as of the close of business on May 10, 1990.

Earlier in the day at HEI's annual shareholders meeting, the shareholders elected five Class III Directors -- Edwin L. Carter, Richard Henderson, Ben F. Kaito, Bill D. Mills and C. Dudley Pratt Jr. -- to serve a three-year term on the board of directors until the 1993 meeting.

The shareholders also re-elected KPMG Peat Marwick as auditor for the 1990 fiscal year, approved an amendment to the Restated Articles of Incorporation to add a new Article Fourteenth limiting directors liability and adopted the 1990 Nonemployee Director Stock Plan.

SAN FRANCISCO (APRIL 17) BUSINESS WIRE - A disaster expert praises some of San Francisco's earthquake recovery decisions, but says a new tecnology can help minimize the problems from future earthquakes, hurricanes or even assaults on the environment.

John Flavio, executive vice president and chief financial officer of Tenera LP, an international engineering consulting firm headquartered in Berkeley, Calif., said that Tenera has developed a sophisticated disaster-management, computer-based technology.

''We believe this could help lift its users out of the Dark Ages when it comes to anticipating and reacting to disasters like Hurricane Hugo, the October 17 earthquake that struck the San Francisco region, or Chernobyl '' Flavo said, referring to the approaching April 26 anniversary of the 1986 Soviet nuclear plant disaster.

''One only has to look at the aftermath of such human tragedy to see the confusion, shortages of resources and funds, and competing priorities. And what does politics do to all of this?''

Flavio said Probabilistic Risk Assessment has great potential for coping with environmental problems. Chemical companies, for example, face increasing regulatory pressure to make environmental and safety-related changes.

Flavio said leaders in the electric power industry eagerly grasped the opportunity. Flavio said they want to minimize damage to facilities and to surrounding systems, such as roads and bridges, before, during and after earthquakes.

Also, this can give business the confidence to undertake new investment. For the first time, executives can make insightful, documented, practical decisions about such things as whether to build a new plant in a city based on a plan that includes their site location.

Tenera's management team has had significant experience working on the watershed events in the nuclear power industry.

This includes Dr. Tony Buehl, senior vice president, who was one of the few American scientists on the U.S. emergency team sent to Chernobyl and Tenera's Chief Executive Officer Don Davis, an NRC supervisor at the time, who was the first agency official to be on site at the Three-Mile Island accident in March of 1979.

SALT LAKE CITY (APRIL 17) BUSINESS WIRE - Thomas F. Seal, president and chief executive officer of ALPNET Inc. announced Tuesday the signing of a 15-month contract with FMC Corp.'s Ground Systems Division in San Jose, Calif.

Under the contract with FMC, ALPNET will provide translation of technical and training materials from English into Arabic in support of an FMC contract with the U.S. Department of Defense for Foreign Military Sales.

ALPNET, a leader in technical translations, will utilize both its Orem, Utah and London, England facilities to translate and produce the technical and training manuals, as well as slides and video materials.

According to Seal, ''FMC evaluated translation providers from both the U.S. and overseas in making this selection. It decided upon ALPNET based on the high-quality translations we provide, the resources and project management experience ALPNET can bring to a project of this magnitude, and

the overall competitive pricing of the ALPNET offering.''

ALPNET, the largest translation services company in the world, operates a network of 22 translation centers located in nine countries around the world.

ALPNET is traded on the NASDAQ market under the symbol AILP and the Boston Stock Exchange under the symbol APN.

NEW YORK (APRIL 17) BUSINESS WIRE - British adventurer Richard Branson, chairman of Virgin Atlantic Airways, and Per Lindstrand, owner of Thunder & Colt, will join the ranks of such famous aviators as Charles Lindbergh, Howard Hughes and Chuck Yeager when they receive the Clifford B. Harmon International Trophy from Vice President Dan Quayle.

In commemoration of their successful crossing of the Atlantic in 1987 in the world's largest hot air balloon, the Virgin Atlantic Flyer, Branson and Lindstrand will receive the highest aviation honor in Washington on Wednesday, April 18.

The Harmon International Trophies have been awarded annually since 1926 by either the president or vice president of the United States for the ''most outstanding international achievement in the art/science of aeronautics for the preceding year with the art of flying receiving first consideration.''

The famous hot air balloon crossing of the Atlantic, which has won this prestigious award for Branson and Lindstrand, took place in July 1987. The Virgin Atlantic Flyer flew from Sugar Loaf, Maine, to Limavady, Northern Ireland.

The two balloonists covered a total distance of 3,075 miles in 32 hours at an average height of 27,000 feet and speeds of up to 150 miles per hour. Not only was their crossing the first by a hot air balloon, but the balloon itself attained speeds greater than any previous or subsequent manned balloon record.

In addition to his ballooning activities, Branson is one of Britain's leading entrepreneurs whose business ventures include the award-winning long haul airline, Virgin Atlantic Airways, and the sixth-largest record company in the world, Virgin Records.

Commenting on the award, Branson said: ''Both Per and I are deeply honored to be given such a prestigious prize for our adventure four years ago -- which still seems like only yesterday. I shall be returning to the U.K. with the trophy by a more conventional method of transport.''

SAN JOSE, CA (APRIL 17) BUSINESS WIRE - Pacific Western Bancshares Inc. (ASE:PWB), the parent company of Pacific Western Bank, Tuesday reported net income of $4.0 million, or 31 cents per share, for the quarter ended March 31.

The most profitable first quarter on record for the company, the earnings represent an increase of 64 percent over the $2.4 million, or 21 cents per share, earned during the like period in 1989, according to Phillip R. Boyce, chairman and chief executive officer.

The first quarter results continue the company's strong performance that, for the last nine quarters, has produced an average increase of 151 percent over the comparable quarter in the previous year.

In the first quarter, non-interest expenses were $12.3 million, a 14 percent drop from $14.3 million in the comparable period last year. Net interest income, however, grew 11 percent, reaching $15.9 million as compared to $14.3 million during the first quarter last year.

At the end of the first quarter, total assets grew 4.6 percent to $1.08 billion compared to $1.04 billion at March 31, 1989. Net loans increased 22 percent to $827 million from $678 million at the end of the like quarter last year. Deposits expanded 3.9 percent to $979 million as compared to $942 million in 1989.

Shareholders' equity was up 25 percent to $83 million on March 31, from $67 million at the end of the first quarter last year. Return on average assets for the first quarter was 1.53 percent on an annualized basis compared to .99 percent in the like period of 1989. The return on average shareholders' equity in the first quarter was 19.9 percent vs. 14.9 percent in the like period last year.

Average common and equivalent shares outstanding during this like period increased 8.0 percent from 11.8 million at March 31, 1989, to 12.8 million a year later. At the same time, the stock's book value rose from $5.78 per share to $6.79 per share at March 31.

Pacific Western Bancshares Inc. is a bank holding company. Through its subsidiaries, the company offers trust and asset management services, and financially oriented data processing and software development services. The holding company's Pacific Western Bank has 21 offices in three counties serving California's Santa Clara Valley and Monterey Bay area.

#90107b0639 04/17/1990 ~Business Wire

BEVERLY HILLS, CA (APRIL 17) BUSINESS WIRE - Great Western Financial Corp. (NYSE:GWF) Tuesday reported first quarter 1990 net earnings of $74.2 million, or 58 cents per share, a 30 percent increase over the $57.2 million, or 45 cents per share, for the 1989 first quarter.

Net interest income, the primary measure of core operating results, increased 24 percent to a record $286 million compared with $230 million for the 1989 first quarter.

The net interest margin, the difference between the company's yield on earning assets and its cost of funds, was 3.01 percent at March 31, 1990 compared with 2.43 percent a year earlier and 3.01 percent at year end 1989.

Total new loans for the 1990 first quarter were $2.9 billion, compared with a record $3.6 billion for the 1989 first quarter. Total real estate loans, essentially all of which are single-family residential loans, were $2.5 billion in the 1990 first quarter compared with $3.2 billion in the 1989 first quarter. Approximately 85 percent of the company's new real estate loans were monthly adjustable rate mortgages.

The company continued to improve pricing on retail customer accounts, which rose by $745 million in the first quarter of 1990. This contributed to a 30-basis-point reduction in the company's cost of funds compared with the year earlier period.

Retail customer accounts declined by $21 million in the first quarter of 1989. Total customer accounts were $24 billion at March 31, 1990 compared with $22.1 billion a year earlier. Operating and administrative expenses as a percent of average assets for banking operations were 1.52 percent the 1990 first quarter compared with 1.60 percent for the year earlier period.

Great Western Financial Corporation, with assets of approximately $38 billion, is the parent company of a real estate-oriented, retail bank. One of the nation's leading residential mortgage lenders, the company

operates 1,000 mortgage lending, retail banking and consumer finance offices nationwide.

#90107b0642 04/17/1990 ~Business Wire

SAN FRANCISCO (APRIL 17) BUSINESS WIRE - Wells Fargo & Co. (NYSE:WFC) Tuesday reported that earnings per share in the first quarter of 1990 were $3.04, an increase of 19 percent from $2.56 in the first quarter of 1989.

Net income in the first quarter of 1990 totaled $159.8 million, an increase of 13 percent from $141.5 million in the first quarter of 1989.

Return on average assets (ROA) was 1.32 percent and return on average common equity (ROE) was 25.09 percent in the first quarter of 1990, compared with 1.23 percent and 24.52 percent, respectively, a year ago.

Earnings in the first quarter of 1990 benefited from a lower loan loss provision and increased net interest income, partially offset by an increase in noninterest expense. The increase in net interest income primarily resulted from an increase in loans. Net interest income on a taxable-equivalent basis was $559.8 million in the first quarter of 1990, compared with $544 million a year ago.

The company's net interest margin was 5.09 percent, compared with 5.23 percent a year ago.

Noninterest income in the first quarter of 1990 was $199.6 million, compared with $185.4 million a year ago. Noninterest expense totaled $411 million, compared with $386.5 million a year ago.

The provision for loan losses in the first quarter of 1990 was $75 million compared with $100 million in the first quarter of 1989 and $80 million in the fourth quarter of 1989. Net charge-offs for the first quarter of 1990 totaled $42 million, or .40 percent of average total loans. At March 31, 1990, the allowance for loan losses equaled 1.79 percent of total loans.

At March 31, 1990, total nonaccrual and restructured loans amounted to $752.1 million, or 1.7 percent of total loans, compared with $625.1 million, or 1.6 percent, at March 31, 1989. At March 31, 1990, total nonaccrual and restructured loans and other real estate (ORE) amounted to $1.159 billion, or 2.6 percent of total loans and ORE, compared with $960.2, or 2.5 percent, at March 31, 1989.

At March 31, 1990, common equity to total assets was 5.07 percent, compared with 4.78 percent at March 31, 1989; primary capital was 8.03 percent, compared with 7.84 percent; and total capital was 11.52 percent, compared with 11.84 percent.

During the quarter, Wells Fargo completed the acquisition of two California banking companies, Valley National Bank of Glendale and Central Pacific Corp. of Bakersfield, with combined assets of $1.2 billion. Torrey Pines Group of Solana Beach with assets of $437 million was purchased on April 1. These acquisitions are not expected to have a material effect on the company's net income in 1990.

Also in April, Wells Fargo-Nikko Investment Advisors was established following approvals from the Federal Reserve Board and the Office of the Comptroller of the Currency. Wells Fargo contributed certain on its businesses to the joint venture in exchange for approximately a 50 percent interest in the joint venture and $125 million in cash; consequently, Wells Fargo expects to realize a pretax gain of approximately $110 million in the second quarter of 1990.

MEDFORD, OR (APRIL 17) BUSINESS WIRE - Jackson County Federal Savings and Loan Association (JCF) Monday announced the commencement of an offer (the ''exchange offer'') of its new non-voting Series A preferred stock for all of its convertible subordinated debentures due 2008 (the ''debentures''), at the exchange rate of 100 shares of Series A preferred for every $1,000 of debentures tendered.

The exchange offer is scheduled to expire at 12 midnight, Oregon time, on May 11, 1990.

The principal purpose of the exchange offer is to bring JCF into compliance with certain capital requirements included in the Financial Institutions Reform, Recovery and Enforcement Act of 1989 by exchanging preferred stock for outstanding debentures. The debentures, which were originally issued in December 1988 in connection with JCF's conversion from mutual to stock form, cannot be included in regulatory capital under the new rules.

An offering circular and other matierals relating to the exchange offer, together with proxy materials for a May 11, 1990, special meeting of shareholders, were mailed to JCF's security holders today. The offering

circular and further information relating to the exchange offer are available from James W. Shepperd, senior vice president, chief financial officer and corporate secretary of JCF at 503/734-2648.

Additionally, JCF's debentureholders who have not received the offering and proxy materials by April 23, 1990, should contact Shepperd at the above number.

Founded in 1909, JCF is southern Oregon's oldest and largest savings and loan. Medford-based JCF has branches in Medford, Ashland, Grants Pass, Central Point and Jacksonville.

ATLANTA (APRIL 17) BUSINESS WIRE - In the office of the future, workers will be able to turn their desktop telephone systems into multimedia communications centers, as demonstrated in Atlanta Tuesday by Northern Telecom (NYSE:NT) at SuperComm/ICC '90's SUPERHOME and SUPEROFFICE exhibit.

Northern Telecom's demonstration shows an office-of-the-future scenario where one office worker places a telephone call to another location using a desktop computer. During the conversation, the worker uses screen-based telephony to view videos sent from the other location while a co-worker watches the same program. The worker also accesses a switched video network to preview the company's new series of television commercials and can store a clip of it for later use.

Additionally, the exhibit features a bandwidth-on-demand simulation which explains how users will be able to dial-up higher-capacity communications systems to integrate facsimile messages, transfer and share data, share animated graphics and communicate over full motion video using desktop workstations.

In the future, services such as shared video images, video conferencing, and full-motion video to the desktop will be made possible through the use of fiber networks. Implementation of these networks will allow connectivity between various sites at all levels of communication, from voice to video.

Northern Telecom is the leading global supplier of fully digital telecommunications systems. The company provides products and services to the telecommunications industry, businesses, universities, governments and other institutions worldwide. Northern Telecom Inc., with its headquarters in Nashville, Tenn., employs approximately 22,000 people

across the United States.

#90107b0663 04/17/1990 ~Business Wire

ATLANTA (APRIL 17) BUSINESS WIRE - Coca-Cola Enterprises (NYSE:CCE) today reported net income available to common shareholders of $3.9 million, or 3 cents per common share, for the first quarter of 1990 compared to $8.8 million, or 7 cents per common share, for the first quarter of 1989.

Operating cash flow in the first quarter increased approximately 11 percent to $123.6 million.

Brian G. Dyson, president and chief executive officer, said, ''We are pleased with our overall operating results in the first quarter. All aspects of our business performed well, and we expect continued growth in operating cash flow for the remainder of the year.''

CCE's volume in physical cases increased approximately 5 percent in the quarter. Net pricing for case sales to retailers was approximately 2 percent higher than in the first quarter of 1989, and this improvement in the level of pricing offset a 2-1/2 percent increase in related cost of sales per unit.

In February 1990, CCE completed the sale of its food service vending operations in Memphis, Tenn., resulting in a gain of $3.7 million before tax (1 cent per common share). In the first quarter of 1989, CCE recorded a gain of $11 million before tax (4 cents per common share) related to the sale of its Canadian bottling operations.

Other deductions in the first quarter totaled approximately $3.6 million. In the same quarter of 1989, CCE recorded other income of approximately $6.2 million, including a gain of $2.6 million related to the repurchase of certain outstanding debt and a benefit of $4.4 million resulting from favorable resolution of certain liabilities established for previous acquisitions.

Net interest expense was higher in the first quarter of 1990 than in the prior year due to increased debt balances resulting principally from the Company's share repurchase program activities.

Due primarily to tax attributes of the sale of its food service vending operations, CCE's effective tax rate in the first quarter of 1990 approximated 50.9 percent. This compares to 46.5 percent in the same period of the preceding year.

In the first quarter CCE repurchased approximately 2.1 million shares of common stock from public shareholders and from The Coca-Cola Company. Cumulative repurchases in the current 25 million share repurchase program through the end of the first quarter totaled 18.1 million shares. This program is expected to be completed by the end of 1990.

BURLINGTON, MA (APRIL 17) BUSINESS WIRE - M/A-COM Inc. (NYSE:MAI) announced Tuesday that it has reached an agreement with Microwave Radio Corp. (MRC) of Lowell, Mass., for the sale of the M/A-COM MAC Division, M/A-COM's microwave radio operations, located in Chelmsford, Mass.

MRC is a manufacturer of portable microwave point-to-point radios primarily for electronic news gathering applications.

Dr. Thomas A. Vanderslice, chairman and chief executive officer of M/A-COM said that ''the sale, which is the second to be announced as part of the company's restructuring program, is anticipated to be completed by April 30, 1990.'' On April 9, M/A-COM announced that it had reached agreement with Magnum Microwave Corp. of Fremont, Calif., for the sale of the M/A-COM Telecommunications Sources Division.

That sale is also expected to be completed prior to the end of April. Dr. Vanderslice went on to say that, ''both sales will be for cash.'' The MAC Division and Telecommunications Sources Division had fiscal 1989 sales of approximately $19 million and $4 million, respectively.

M/A-COM is a leading producer of radio frequency, microwave and millimeter wave semiconductors, components and subsystems for applications in telecommunications, radar, navigation, missile guidance, electronic warfare, surveillance and command-control- communications-intelligence (C3I) systems. M/A-COM also supplies surveillance products used in intelligence collection applications.

The company's products are used primarily in defense electronics systems, but also have numerous commercial applications.

MILPITAS, CA (APRIL 17) BUSINESS WIRE - For the three months ended March 31, Diasonics Inc. (ASE:DIA) reported net income of $3.9 million, or 5 cents a share, compared with net income in its continuing operations of $2.1 million, or 3 cents a share, in 1989.

Revenues in the first quarter of 1990 rose to $59.3 million, an increase of 28.2 percent from the like quarter of 1989.

''First quarter results were on plan overall,'' said Stewart Carrell, Diasonics' chairman and chief executive officer. ''Management attention is now focused on Ultrasound and the company's U.S.-based Ultrasound operations showed substantial improvement in the first quarter.

''The Spectra Ultrasound System is receiving good clinical acceptance and we intend to continue our high levels of investment in development and manufacturing throughout the year.''

The excellent performance by the company's X-ray division and the improvement in Ultrasound operations accounted for most of the increase in net income. Also contributing was investment income from the temporary investment of proceeds from the sale of the company's Magnetic Resonance Imaging division.

Delays relating to kidney stone FDA approval of the company's Therasonic Lithotripsy treatment system negatively affected reported results.

Diasonics also stated that the stock repurchase program of up to 12 million shares announced previously will begin on Monday, April 23.

Diasonics is a leader in the development, manufacture and distribution of medical ultrasound, high performance x-ray and therapeutic medical instrumentation.

NEW CANAAN, CT (APRIL 17) BUSINESS WIRE - Smith Corona Corp. (NYSE:SCO) Tuesday reported net income of $6.1 million, or 20 cents per share, for the third quarter ended March 31.

This compares with net income of $12.4 million, or 41 cents per share, for

the comparable period in 1989, on a pro forma basis to reflect the company's public offering. Sales for the quarter declined to $110,6 million from $121.8 million a year ago.

For the nine months ended March 31, net income was $34.4 million, or $1.14 per share, on revenues of $391.6 million. This compares to 1989 pro forma net income of $38.4 million, or $1.27 per share, on revenues of $380.7 million.

Results for 1989 include charges of 5 cents and 15 cents for the three months and nine months respectively, related to a now-terminated Supplemental Performance Plan.

G. Lee Thompson, chairman and chief executive officer of Smith Corona, said: ''The sluggish U.S. economy continues to affect the industry, particularly for premium-priced products. At the same time, demand for our lower-priced portable electronic typewriters continues strong, although not sufficient to offset slow high-end sales.

''As earlier reported, we are experiencing pricing pressures from our Far Eastern competitors targeted at the United States market. Our U.S. market position continues strong and we will remain as price competitive as necessary to retain our leadership position, even at the expense of short-term earnings.''

Thompson noted that continuing progress has been made in the company's efforts to control costs and reduce inventory. ''Furthermore,'' Thompson said, ''our international business is very promising, particularly Europe, where we are experiencing significant growth.''

Smith Corona, based in New Canaan, is the world's largest manufacturer of portable electronic typewriters and personal word processors. The company also markets office supplies, forms and customized printed products.

PORTLAND, OR (APRIL 17) BUSINESS WIRE - Louisiana-Pacific Corp. (NYSE: LPX) Tuesday reported that first quarter earnings were about 10 percent below the record first quarter results the company achieved in 1989.

The company earned $35.8 million in this year's first quarter on sales of $474.8 million. This compares with first quarter earnings last year of $39.9 million on sales of $467.0 million. On a per share basis, L-P earned $.95 a share in the first quarter of this year compared to $1.05

per share in the first quarter of 1989.

Harry A. Merlo, L-P's chairman and president, said that unusually wet weather -- particularly in the South -- slowed building activity and precluded logging in some areas near L-P's Southern sawmills. In addition, uncertainty over the direction of interest rates kept many builders and building material distributors from adding to their product inventory early in the year. And, as expected, the pulp market retreated in the first quarter from the record price and demand levels achieved 1989.

''Fortunately, we're seeing increased construction activity now and expect the building products market to strengthen in the second quarter,'' Merlo said.

TACOMA, WA (APRIL 17) BUSINESS WIRE - The majority of Weyerhaeuser Real Estate Co. (WRECO) will continue to be part of the Weyerhaeuser portfolio of businesses, Weyerhaeuser Co. President John W. Creighton Jr. reported Tuesday.

The subsidiary was reviewed as part of Weyerhaeuser's refocusing effort. Steve Lewis, president of WRECO will be responsible for implementing the decisions made as a result of the refocusing study. Operations that will be divested or substantially downsized are:

-- Seattle-based Cornerstone Columbia Development Co. (jointly owned with Portland General Corp.) will be sold as announced on April 6.

-- Westminster Co. will be offered for sale. Headquartered in Greensboro, N.C., and operating throughout North Carolina, Westminster is a homebuilder, land developer, commercial developer and property management firm.

-- Babcock Co. will be downsized and will complete its withdrawal from the homebuilding business. Its remaining businesses will be evaluated in 1991. Headquartered in Coral Gables, Fla., with operations in Orlanda, West Palm Beach, and the Greater Miami area, Babcock is a homebuilder, land developer and commercial developer.

Lewis said that due to the changing structure of the Southwestern U.S. real estate market, WRECO will continue to evaluate the performance of its two Texas real estate subsidiaries -- Centennial Homes in Dallas/Fort Worth and Trendmaker in Houston -- before making a final determination on

the future of those operations.

The impact of Florida's new growth management legislation will affect the profitable land-development and utility-contracting businesses of Scarborough Constructors in Tampa. Consequently, WRECO will evaluate the outlook of the company as it develops a better understanding of the new legislation.

The decisions to divest Westminster and to downsize Babcock were based on the view that the operating areas represented by those companies which Weyerhaeuser has retained offers a greater investment opportunity for the types of land development, homebuilding and commercial real estate projects in which WRECO specializes.

CHICAGO (APRIL 17) BUSINESS WIRE - AM International Inc. said Tuesday it intends to take significant actions in conjunction with its long-range strategic plans for the '90s, which will have a positive impact on the company's long-term financial performance.

The company said these actions include disposal of non-core business units and restructurings and consolidations of its core businesses. In implementing its strategic plans, AM today announced that it has signed a definitive agreement to sell the Digi Electronic Products unit to Barco n.v., a Belgian-based company which manufactures the Digi product line.

The transaction, which has a cash value of approximately $8 million, is expected to be completed in the fourth quarter of fiscal 1990. The Digi business distributes electronic prepress composition systems to the business forms, labeling and packaging industries.

AM said the sale resulted from a strategic review which indicated that Digi had evolved away from AM's core business, the forms press market, and therefore, did not fit the company's strategic plans. AM said the cash received from the sale would be used for working capital purposes. In the last month the company has announced the sale of two other non-core business units -- AM Technologies and the machine tool business of AM Wohlenberg.

The company also said that the contemplated restructurings would include the previously announced consolidation of its Multigraphics and International divisions, the market segmentation of the AM Graphics businesses and further consolidations of the company's European operations

in anticipation of changes in the European Economic Community in 1992.

In addition, AM said it intends to writedown the assets of the Computer Graphics business. In conjuction with these consolidations and restructurings, AM said it intended to take a significant charge in the third quarter which will cause the company to incur a loss in that quarter.

The company added that while it expects to be profitable in the fourth quarter of 1990, the magnitude of the restructuring charge will eliminate that profit, resulting in a loss for the full year.

The company said that pre-tax savings from these consolidations of facilities and restructurings of personnel are expected to be sufficient to recover the charge in approximately two years. AM also said that in the second half of this fiscal year, its cash flow from operations will be significantly less than previously anticipated, due in part, to the company's inability to reduce accounts receivable and inventories to levels planned.

AM International, with world headquarters in Chicago, sells and services a wide range of design, display, reproduction and finishing products and supplies to the worldwide graphics industry. The company conducts its business through three divisions, 17 subsidiaries and a dealer organization located in over 100 countries. AM International's annual revenues are over $900 million. AM International's common and preferred shares are traded on the New York, Pacific and Midwest Stock Exchanges under the ticker symbol ''AM''. The company's warrants are traded on the American Stock Exchange under the ticker symbol ''AML.WS.''

EAST HARTFORD, CT (APRIL 17) BUSINESS WIRE - TRC Environmental Consultants Inc., a wholly owned subsidiary of TRC Cos. Inc. (AMEX:TRR), has signed a contract modification for $1.3 million supporting 18 months of continuing expert hazardous waste engineering consulting at the Naval Education and Training Center in Newport, R.I.

TRC began developing the preliminary contamination assessment plan for the Navy in February 1987 with an initial competitive $1.2 million award. The new contract extends the ongoing work to remedial investigations at five on-site locations and brings the total contract value to $2.5 million. Remedial investigations are extensive physical and analytical monitoring programs which quantify the extent of the problem.

The remedial investigation, when completed, forms the basis for additional phases in the Navy's Installation Restoration Program. These include engineering feasibility studies and remedial design which develop and select alternatives for corrective action, as well as the final clean up implementation.

TRC Cos. Inc. and its engineering, laboratory and instrument subsidiaries service clients from offices across the country.

NORTH STONINGTON, CT (APRIL 17) BUSINESS WIRE - Analysis & Technology Inc. (NASDAQ: AATI), which specializes in submarine and antisubmarine warfare (ASW) services, won over $5.0 million in Navy contracts and contract enlargements during March 1990, A.T. Mollegen Jr., president and chief executive officer announced Tuesday.

The company's total contractual backlog at the end of March stood at approximately $307 million, more than 13 percent above the $269.5 million at March 31, 1989.

Mollegen commented, ''Navy leaders have recently testified to Congress that ASW remains the Navy's top warfighting priority and that Soviet submarines already under construction can be expected to be joining their fleet for the next several years. Navy intelligence sources project the Soviet attack submarine force of 1999 to 'be significantly improved over the force of today.'''

A $2.4 million contract ceiling increase and extension was awarded by the Naval Electronic Systems Engineering Center in San Diego, Calif. A&T will continue to provide services in support of the Navy's SEA NYMPH submarine electronic (warfare) support measures (ESM) system.

A $1.0 million nine-month contract was awarded by the Naval Underwater Systems Center, New London, Conn. A&T will provide field engineering services in support of the submarine electromagnetic systems operational readiness test set and periscope systems.

In addition, A&T received a variety of subcontracts, smaller awards, and add-ons during March. These total $1.6 million and extend for periods up to one year.

ATLANTA (APRIL 17) BUSINESS WIRE - Patrick H. Thomas, chairman, president and chief executive officer of First Financial Management Corp. (NYSE:FFM) Tuesday announced the company again achieved record revenues and earnings for the first quarter of the year.

Net income for the quarter increased 32 percent to $12.6 million, up from $9.6 million earned in the first quarter of 1989. Primary earnings per share were 47 cents compared with 43 cents for 1989, an increase of 9 percent, and fully-diluted earnings per share were 46 cents, up 10 percent from 42 cents.

Revenues for the first quarter were 58 percent higher at $191.7 million versus $121.2 million for the same period last year. At the end of the period, the company had total assets of $4.9 billion, equity capital of $520 million, and cash on hand of $156 million (excluding Georgia Federal).

FFMC is an information services company which offers a broad range of data processing and related services to a large and diverse customer base. FFMC is one of the major suppliers of financial data processing services to banks, thrifts, credit unions and mortgage servicers, a leader in data imaging, micrographics, electronic data base services, and health and pharmaceutical claims processing, and one of the largest merchant credit card processors in the country.

FFMC also owns Georgia Federal Bank FSB, the largest thrift institution based in Georgia, First Family Financial Services, a major regional consumer finance company, and MicroBilt, a leading producer of custom data communications and information processing systems. In addition, FFMC is a member of 41 ATM interchange systems across the United States.

Its common stock is currently traded on the NYSE under the symbol FFM. Its debentures are quoted through NASDAQ under the symbol FFMCG.

LANHAM, MD (APRIL 17) BUSINESS WIRE - VITEQ Corp., the Lanham, Md., designer and manufacturer of high-performance on-line UPS systems, has announced the appointment of Bert I. Helfinstein as president and chief executive officer.

Margaret A. Rodenberg will assume the role of vice president of sales and marketing.

VITEQ founder Alex J. Severinsky will become the vice president of Research and Development and vice chairman of the company's board of directors. Severinsky, who holds a doctorate in electrical engineering from the Central Research Institute for Electronics Instrumentation (Moscow), emigrated from the Soviet Union in 1978. He founded VITEQ in 1986 to fulfill the need for reliable UPS products in the expanding LAN and minicomputer markets.

While serving as president of Entre Computer Centers Inc. (McLean, Va.), Helfinstein was widely recognized for his successful efforts in returning the franchisor to profitability after major losses in European operations and numerous lawsuits threatened its survival. After readying the company for sale and successfuly negotiating a tender offer, Helfinstein left Entre in 1989. Helfinstein has held the position of president in five other companies over the previous 18 years, including Source Telecomputing, Planning Research Corp.'s (PRC) Computer Systems Group, PRC Realty systems and PRC International Reservations Corp. His extensive management background also includes sales, marketing and technical positions with a range of U.S. and international companies.

Prior to joining VITEQ, Rodenberg was vice president of marketing for Entre, where her areas of responsibility included product marketing, purchasing and inventory control, advertising, public relations and investor relations, training and technical support and physical distribution. Rodenberg also developed Entre's major accounts program and grew it to $40 million in sales in its first two years. Her sales management experience also includes positions in high technology and consumer retail companies.

VITEQ On-Line UPS systems support a wide range of applications including multiple microcomputers, LANs, WANs and small and midrange minicomputers. Severinsky and VITEQ's product design team hold four patents on UPS technology and have an additional four pending. International Business Machines (IBM) recently bought a license to use VITEQ's AC to DC Power Converter Circuit patent.

VITEQ's emerging product line includes three UPS systems for the North American market: the VITEQ 386/LAN, with 750 VA of operating power and 7500 VA of inrush power; the VITEQ 15A, with 1.5 kVA of operating power and 15 kVA of inrush power; and the VITEQ MINI/GP, with 3.0 kVA of operating power and 30 kVA of inrush power. VITEQ's MICRO/LAN (750 VA) and MICRO/MINI (1.5 kVA) are designed to meet the computer power requirements of the European marketplace.

VITEQ Corp. was founded in 1986 by Severinsky, and is headquartered in Lanham, Md. Automated manufacturing and assembly operations are based in McKinney, Texas. VITEQ has sales offices in Arlington, Texas; Arlington Heights, Ill.; Los Angeles; Lanham, Md.; Merrimack, N.H.; and West Caldwell, N.J.

#90107b0731 04/17/1990 ~Business Wire

ATLANTA (APRIL 17) BUSINESS WIRE - Equifax Inc. (NYSE:EFX), coming off a good year in 1989, reported Tuesday that net income rose 15 percent in the first quarter of 1990.

Revenue for the international business-information firm increased 12 percent.

Net income was $9,769,000 (20 cents per share) compared with $8,465,000 (17 cents per share), and revenue was $218,041,000 vs. $195,490,000. Operating income rose 20 percent from $15,679,000 to $18,878,000.

''It was an excellent quarter for Equifax,'' said C. B. Rogers Jr.,

president and chief executive officer. ''Demand for our services was quite strong, and all our business segments performed well. Growth in revenue and profit occurred almost across the board.''

Rogers said the sharp increase in operating income was a continuation of a trend to higher profit margins resulting from restructuring, early-retirement options, and other cost-control measures undertaken by the company in recent years. He pointed out that operating margins in 1989, excluding unusual charges, were the highest in almost two decades.

''The quarterly results are especially gratifying because they are on top of a 36 percent operating income growth and a 15 percent revenue growth in the first quarter of 1989,'' he said.

Equifax Inc. is the world's leading provider of information services for business, industry and government. The company has offices throughout the United States and Canada, and recently formed a joint venture with a company in Great Britain to provide information services in Europe.

MOONACHIE, NJ (APRIL 17) BUSINESS WIRE - With sales of its core product line now growing 25-30 percent a year, and with a forecast calling for an equally strong sales performance in 1990 and 1991, Aiwa America Inc. Tuesday instituted a new sales and marketing organization designed to better enable it to meet the needs of a growing and expanding dealer customer base.

According to Tony Utsunomiya, president of Aiwa America Inc., the new organizational structure essentially separates the sales and marketing functions into two inter-related but independent disciplines, both of which report directly to his office.

Effective immediately, Rusty Bennett has been promoted from director of national sales to vice president of sales, reporting directly to Utsunomiya. Bennett joined Aiwa in January of this year after a seven year career at the Panasonic Company, where he held a number of sales and sales management positions. Most recently, he directed all national account and special market programs for the entire Panasonic consumer product line.

Filling the position vacated by Bennet is Aiwa veteran Dick Irvine, who now returns to the company as director of national sales, reporting directly to Bennett. Irvine is charged with the responsiblity of

implementing all national and regional sales programs, as well as with managing the day-to-day activities of Aiwa zone managers and independent sales rep network.

Underscoring just how important the zone sales management structure is to the company, Aiwa today announced the creation of a new zone management level -- that of general manager. At the same time, the company promoted Bob Fisher to the positon of general manager of eastern zone sales, reporting to Irvine.

Out on the west coast, Len Gielarowski, who had served as director of sales at Sherwood Electronics for the last three years, now joins Aiwa as western zone sales manager and Los Angeles branch manager.

All of Aiwa's national marketing programs continue to be directed by Ted Ikegami, vice president of marketing.

Headquartered in Moonachie, Aiwa America Inc. is a leading national marketer of sophisticated audio and video home entertainment systems, personel headphone stereos, audio cassette decks, receivers, compact disc players, and car audio systems.

#90107b0737 04/17/1990 ~Business Wire

WESTBORO, MA (APRIL 17) BUSINESS WIRE - Data General introduced Tuesday the first two members of a completely new generation of ECLIPSE MV/Family systems.

They surpass the price/performance of previous systems by over 200 percent and offer an easy, cost-effective upgrade path. In addition, both systems offer lower cost-per-MIPS than competing systems from Digital and IBM.

The low-end ECLIPSE MV/5500 DC and the mid-range ECLIPSE MV/9500 represent the first time the ECLIPSE MV/Family CPU architecture has been implemented on a single integrated circuit. This reduces chip count and allows more space on the system board for memory, I/O, and other features to enhance reliability and overall system performance.

Based on the same microprocessor, the ECLIPSE MV/5500 DC and the ECLIPSE MV/9500 deliver processing performance of 5 MIPS. They are the most powerful ECLIPSE MV/Family processors ever at their price points and support a wide range of financial, legal, manufacturing, distribution, engineering, and other applications.

In relation to comparably configured competing systems, the cost-per-MIPS of the ECLIPSE MV/5500 DC at $11,400/MIPS is 53 percent less than Digital's MicroVAX 3800 ($24,000/MIPS) and 63 percent less than IBM's AS/400 C25 ($31,000/MIPS). Moreover, the MV/5500 DC supports 24 additional office automation (OA) users than the MicroVAX 3800 and 40 more OA users than the AS/400 C25.

Similarly, the cost-per-mips of the ECLIPSE MV/9500 at $23,300/MIPS is 31 percent less than the MicroVAX 3900 ($33,700/MIPS) and 55 percent less than the AS/400 B35 ($51,400/MIPS). The MV/9500 supports 47 more OA users than the Digital system and 63 more users than the IBM system.

The ECLIPSE MV/5500 DC extends performance of Data General's low-end systems from 1.7 MIPS for the ECLIPSE MV/2500 DC to the 5-MIPS level. The ECLIPSE MV/9500 represents the center of the company's mid-range line, more than doubling the price/performance of the ECLIPSE MV/15000 Model 8.

Ideal for office and work-group environments, the ECLIPSE MV/5500 DC is packaged as a convenient, quiet, under-the-desk system that can be installed and upgraded by the customer. The ECLIPSE MV/5500 DC features from 16 to 32 MB of main memory, compared with a maximum of 24 MB on the MV/2500 DC. Memory is expandable in 8-MB increments. ECLIPSE MV/9500

In contrast to the under-the-desk ECLIPSE MV/5500 DC, the ECLIPSE MV/9500 is packaged in a 10.5-inch-high, NEMA-standard rackmount chassis and supports the full range of ECLIPSE Burst Multiplexor Channel (BMC) and Data Channel (DCH) peripherals and controllers, which expands customers' configuration and high-availability options considerably.

The ECLIPSE MV/9500 features up to 128 MB of main memory, expandable in 8-MB or 32-MB increments. In addition, the new system supports up to 624 direct-connect asynchronous ports for terminals and printers and up to 76.8 GB of Winchester disk storage on the BMC. Pricing

WESTBORO, MA (APRIL 17) BUSINESS WIRE - Data General Tuesday announced it has received first-day orders exceeding $15 million for its new low-end ECLIPSE MV/5500 DC and mid-range ECLIPSE MV/9500 systems.

The orders have been placed by a variety of end-user customers, Value-Added Resellers (VARS), and Original Equipment Manufacturers (OEMS) worldwide.

As part of a larger order worth $16 million that includes 64 ECLIPSE MV/Family computers, systems intergration services, and software development, the Dutch Government's Ministry of Social Affairs placed an order for 47 ECLIPSE MV/5500 DC systems worth $6.5 million.

The MV/5500 DC computers and other MV/Family systems, including three, high-end ECLIPSE MV/40000 computers, will be installed in the Netherlands' Labor Exchange offices nationwide. The computers will support a network to register the unempolyed and all Dutch employers, and to match job vacancies to the registered unemployed people.

International orders for the ECLIPSE MV/5500 DC and the ECLIPSE MV/9500 have been received from companies including MacDonald Dettwiler Technologies Ltd., Vancouver, Canada; Mobil Oil's Japanese subsidiary, Mobil Sekiyu Kabushiki Kaisha; Shimadzu Corp., a Japanese manufacturer of medical diagnostic systems.

Other orders have been received from Banque Industrielle et Commerciale de la Region Sud de Paris (BICS); Israel's Ministry of Defense; and INFORM, a New Zealand VAR.

A number of U.S. companies have also placed orders for the MV/9500, including two healthcare VARS; HBO & Co., Atlanta, Ga., and PHS, Marina Del Rey, Calif. Two end-user customers; Port Huron Hospital, Port Huron,

Mich., and Southern Optical, a manufacturer of glasses and contact lenses in Greensboro, N.C., have also ordered the MV/9500.

RICHARDSON, TX (APRIL 17) BUSINESS WIRE - Ericsson and NYNEX have signed a detailed general purchase agreement that sets conditions for any further purchases of Ericsson's advanced technology equipment by NYNEX. The new agreement puts Ericsson in a position to participate as an established vendor in bids for telelcommunications equipment.

Ericsson AXE switching equipment is already being used by NYNEX companies. New York Telephone is using an Ericsson AXE switch to provide Interactive Mass Announcement Services (IMAS) and other services and is installing an AXE in a central office in Queens.

New England Telephone is presently installing an AXE switch in Watertown, a suburb of Boston.

NYNEX provides informantion products and services to a diverse base of customers nationally and internationally from offices in 13 countries and across the United States.

Through New England Telephone and New York Telephone, NYNEX delivers quality telecommunications services in the Northeastern United States.

Headquartered in Richardson, Ericsson is the wholly owned North American subsidiary of LM Ericsson of Sweden, one of the world's leading manufacturers of telecommunications equipment.

ATLANTA (APRIL 17) BUSINESS WIRE - FiberWorld Northern Telecom's (NYSE:NT) vision of the emerging global telecommunications network, becomes a reality at SuperComm '90/ICC '90 this week with the debut of S/DMS TransportNode, the first of Northern Telecom's Synchronous Optical Network (SONET) products announced last October.

The S/DMS Product Family is the industry's first complete family of products designed for the seamless integration and deployment of fiber

throughout the entire communications network.

S/DMS TransportNode offers the highest-capacity long-haul, interoffice and local transport available in the industry today at 2.488 gigabits-per-second (Gb/s). S/DMS TransportNode also provides management of the high capacity bandwidth enabled by SONET standards.

Finally, S/DMS TransportNode establishes a survivable network architecture for long distance, local and metropolitan area networks, a feature insuring the continued operation of service in the event of a network interruption.

The capacity of S/DMS TransportNode allows transmission of 450,000 simultaneous telephone conversations on a single fiber. When deployed in the network, S/DMS TransportNode will also support:

-- a system delivering 4.976 Gb/s capacity using optical multiplexing;

-- a survivable ring configuration using a single fiber pair; and;

-- a SONET microwave radio system at 512 QAM, twice the capacity of existing systems.

Northern Telecom is the leading global supplier of fully digital telecommunications systems. The company provides products and services to the telecommunications industry, businesses, universities, governments and other institutions worldwide. Northern Telecom Inc., with its headquarters in Nashville, Tenn., employs approximately 22,000 people across the United States.

RICHARDSON, TX (APRIL 17) BUSINESS WIRE - Ericsson and BellSouth have signed a multi-year volume agreement for the purchase of Signal Transfer Points (STPs) which will support BellSouth's conversion to CCS (Common Channel Signaling) SS7 (Signaling System, 7) signaling in its network.

CCS/SS7 signaling enhances BellSouth's network by providing more efficient routing and faster call completion. It also provides access to

information databases required for calling card verification, 800 services and a variety of customized network services.

BellSouth was the first Bell holding company in the United States to begin converting its network to CCS/SS7 signaling. The first Ericsson STP was deployed in South Central Bell Memphis, Tenn. during 1988, making Memphis the first metropolitan area to offer custom calling services on an interoffice basis using CCS/SS7.

Headquartered in Stockholm, Sweden, Ericsson is one of the world's leading manufacturers of telecommunications equipment. Its wholly owned North American subsidiary is based in Richardson.

ALBANY, NY (APRIL 17) BUSINESS WIRE - KeyCorp reported net income of $36.3 million for the first quarter of the year, an increase of 17 percent over net income of $31 million for the same period in 1989.

Earnings per common share were 85 cents for the quarter, an increase of 18.1 percent over the 72 cents reported in the first quarter of 1989.

There was an average of 42.1 million common shares outstanding for the first quarter of 1990 compared to 41.6 million shares for the same period of 1989.

Despite the increase in common shares outstanding, earnings per common share rose at a faster rate than net income because of a significant reduction in KeyCorp's outstanding preferred stock in 1989's third quarter -- including retirement of all convertible preferred shares.

ATLANTA (APRIL 17) BUSINESS WIRE - To help its telephone operating company customers deploy integrated services digital network (ISDN) services, Northern Telecom (NYSE:NT) Tuesday announced the first, free central

office upgrade program that establishes standard ISDN Basic Rate service from its DMS-100 and DMS SuperNode central office switching systems.

The program calls for Northern Telecom to replace, at no charge, all non-standard AMI (Alternate Mark Inversion) equipment with equipment that conforms to the industry-standard 2B1Q.

The company will also provide full credit for inventories of Northern Telecom AMI NT1s (network termination devices) and line cards. The offer will cover all ISDN offices that have shipped as of Jan. 1, 1991.

2B1Q defines the ''U'' interface, or the ISDN line between a customer's premises and the serving central office switch. As such, it provides a single customer interface for all switching system vendors and terminal vendors.

Upgrading DMS-100s and DMS SuperNodes to the 2B1Q standard will enable telephone company customers to buy any U-interface ISDN terminal, including Northern Telecom's NT1, without fear of obsolescence due to standards incompatibility.

Details of the program are as follows:

--One-for-one free replacement of AMI ISDN line cards and NT1 devices that are installed or in inventory by Jan. 1, 1991.

--Free upgrade of AMI Line Concentrating Modules (LCMs) to handle wired capacity of ISDN lines installed and shippped by Jan. 1, 1991.

--Free upgrade to the central office software package that includes 2B1Q capabilities.

2B1Q was established in 1988 by the International Telegraphic and Telephone Consultative Committee (CCITT), the American National Standards Institute (ANSI), and Bellcore, replacing AMI (Alternate Mark Inversion) as the North American standard for the ''U'' interface.

Northern Telecom's 2B1Q solution uses a single-chip Motorola MC145472 U-Interface Transceiver. Jointly developed by Motorola and Northern Telecom, it is the most advanced 2B1Q technology on the market.

Northern Telecom is the leading global supplier of fully digital telecommunications systems. The company provides products and services to the telecommunications industry, businesses, universities, governments and other institutions worldwide.

Northern Telecom Inc., with its headquarters in Nashville, Tenn., employs approximately 22,000 people across the United States.

#90107b0751 04/17/1990 ~Business Wire

CHICAGO (APRIL 17) BUSINESS WIRE - Kemper Investors Life Insurance Co. (KILICO) has introduced Renuity, a flexible premium deferred annuity designed to adapt to the changing needs of individuals.

Renuity offers 100 percent safety of principal, tax-deferred accumulation, and competitive interest rates. But it also offers several features that are particularly unique to this type of annuity.

Clients may select any combination of one, three, or five year rate guarantee periods, which can be renewed for the same duration, or a different one. Within 30 days after a guarantee period ends, contractholders can capitalize on varying interest rates by transferring funds to another guarantee period in amounts as low as $1,000.

Early withdrawal/annuitization charges last only as long as the guarantee period selected, and in some cases may be waived. In addition, KILICO currently credits clients with higher rates on contracts of $100,000 or more. (Until July 16, KILICO is also making this benefit available to contracts of less than $100,000 for the initial guarantee period.)

After the initial purchase, contractholders can make additional payments to Renuity at any time. This allows clients to speed the growth of their Renuity plan, and enables them to lock in competitive rates throughout the life of their annuity contract, helping to meet their retirement needs.

The product requires an initial payment of $10,000, with a $5,000 minimum for each guarantee period selected. Individuals can also establish an IRA rollover and other types of qualified retirement plan distributions with Renuity. There are no initial sales or administrative charges in the product.

Other features that Renuity offers are partial withdrawals of up to $1,000 at any time (as long as a contract value of $9,000 remains in the plan), and a 30 day ''window'' following each guarantee period where any amount can be withdrawn free of charge from the company.

Also, an annual 10 percent partial free withdrawal of the contract value during a guarantee period is available any time after the first year.

Tax-free transfers, a guaranteed estate benefit, and flexible payout options are also featured.

Renuity is available through stockbrokers, financial planners, and insurance agents, as well as through many financial institutions. Kemper Investors Life Insurance Co. is a wholly owned subsidiary of Kemper Financial Companies Inc., a holding company for the financial services units of the Kemper Corp. Kemper Corp. is a non-operating holding company with major subsidiaries in property casualty insurance, life insurance reinsurance and investment services.

KILICO is a legal reserve life insurance company with over $5.0 billion in assets and an A (excellent) rating for financial stability by A.M. Best Co., the noted industry analyst.

WILMINGTON, DE (APRIL 17) BUSINESS WIRE - At the annual meeting of The Dun & Bradstreet Corp. Tuesday, shareowners approved the election of four Class III directors to three-year terms, William E. C. Dearden, former chairman and chief executive officer of Hershey Foods Corporation; Robert J. Lanigan, chairman and chief executive officer of Owens-Illinois, Inc.; Vernon R. Loucks, Jr., chairman and chief executive officer of Baxter International Inc.; and Volney Taylor, executive vice president of The Dun & Bradstreet Corp.

Harrington Drake, having reached the retirement age for Dun & Bradstreet's directors, retired from the board.

Shareowners voted against a proposal to implement the MacBride Principles in its business operations in Northern Ireland, which consist of 16 people in a branch office of a D&B subsidiary. The company has a long-standing commitment to be an equal opportunity employer worldwide, and adheres to the standards of the Fair Employment (Northern Ireland) Act of 1989, passed by the United Kingdom Parliament.

Shareowners approved the appointment of Coopers & Lybrand as independent certified accountants for 1990.

The Dun & Bradstreet Corp. is the world's largest marketer of business information and related services, with worldwide revenue of $4.3 billion in 1989.

LAGUARDIA AIRPORT, NY (APRIL 17) BUSINESS WIRE - Record earnings and revenues were reported by FlightSafety International Inc. (NYSE: FSI) for the first quarter ended March 31.

Net income for the first three months rose 72 percent to $24,479,000, equal to 72 cents per share, from $14,217,000, or 42 cents per share, in the first quarter of 1989.

Effective Jan. 1, 1990, FlightSafety adopted Statement of Financial Accounting Standards No. 96 - ''Accounting for Income Taxes.'' Accordingly the method of computing deferred income taxes was changed to the method prescribed in SFAS No. 96.

The 1990 first quarter net income was increased by $9,011,000, or 26 cents per share caused by the reduction in deferred taxes recorded in prior years for the differences between the book and tax return expenses and changes in tax rates.

First quarter revenues increased 23 percent to $64,657,000 from $52,582,000 in the corresponding 1989 period. Depreciation and amortization expense increased 16 percent to $7,233,000 from $6,212,000 in 1989's first quarter. Income from operations before income taxes increased 37 percent to $30,724,000 from $22,396,000 in 1989.

The 1990 first quarter included a non-recurring before tax loss of $5,885,000 from the sale of the company's marketable securities.

Albert L. Ueltschi, president and chief executive officer of this aviation marine and power training company, said all areas of the company reported earnings and revenue gains in the period.

Increases from major and regional airline training were especially significant. Income from new simulators in operation since the first quarter of 1989 was also a contributing factor.

#90107b0764 04/17/1990 ~Business Wire

ATLANTA (APRIL 17) BUSINESS WIRE - Northern Telecom (NYSE:NT) Tuesday introduced Meridian Norstar Centrex, a software enhancement to the digital key telephone system that gives Norstar users one-button access to Centrex features.

Many features common to large offices are now available for small-to-medium size offices with Norstar Centrex, which provides one-button access to 10 Centrex features: call forwarding, call pick-up, call waiting, consultation hold, executive busy override, make-set busy, ring again, three-way conferencing, transfer immediate, and transfer with announcement.

The liquid crystal display (LCD) on each Norstar telephone set provides step-by-step instructions, and one-button access eliminates user confusion.

Norstar Centrex also provides a unique ''extension'' key, which combines the line and intercom key functions into a single key. This allows users to dial internal or external calls transparently.

Industry standard phones, like 1A2 and single-line sets, can now be monitored for ''busy,'' ''ring,'' and ''idle'' status from a Norstar telephone with Norstar Centrex software.

Norstar Centrex is available on the modular version of Meridian Norstar, the small business communications system introduced by Northern Telecom in March 1988.

Northern Telecom is the leading global supplier of fully digital telecommunications systems. The company provides products and services to the telecommunications industry, businesses, universities, governments and other institutions worldwide.

Northern Telecom Inc., with its headquarters in Nashville, Tenn., employs approximately 22,000 people across the United States.

#90107b0770 04/17/1990 ~Business Wire

ATLANTA (APRIL 17) BUSINESS WIRE - Northern Telecom (NYSE:NT) Tuesday introduced DIALAN Plus, an improved local area network (LAN) service designed to improve an end user's host computer efficiency and information security.

For telephone companies, the service can save money by simplifying maintenance and provisioning procedures. DIALAN Plus operates with the DMS-100 and DMS SuperNode family of central office (CO) switching systems.

DIALAN Plus capabilities are the result of a cooperative effort involving Northern Telecom, integrated voice data module (IVDM) vendors and telephone companies. This effort identified the needs of CO LAN service providers and business users.

The development of a direct RS422 interface on integrated voice data modules eliminates the need for expensive converter cables and patch panels between IVDM's and the main distribution frame located in the central office.

The new RS422 interface reduces implementation cost, and simplifies the installation procedure and training requirements since DIALAN lines and voice lines are now provisioned identically.

DIALAN Plus simplifies maintenance procedures by allowing all testing and diagnostics to be performed from one terminal. DIALAN's integrated testing capabilities allow telephone company personnel to perform loopback maintenance and diagnostics on the customer site IVDM from the DMS-100 Maintenance and Administrative Position (MAP).

This capability results in more effective system maintenance and trouble shooting of line faults, and reduced personnel training costs through the elimination of separate maintenance procedures for customer site IVDMs.

DIALAN Plus is a Northern Telecom data communications product which is available from telephone companies under various marketing names. Inexpensive Integrated Voice Data Modules (IVDM), available from a number of vendors, connect the computer to a telephone jack for all digital, 19.2 kilobit per second transmission via the telephone network. DIALAN Plus also allows simultaneous voice conversation over the same pair of wires using existing telephone sets.

Northern Telecom is the leading global supplier of fully digital telecommunications switching systems. The company provides products and services to the telecommunications industry, businesses, universities, governments and other institutions worldwide. Northern Telecom Inc., with its headquarters in Nashville, Tenn., employs approximately 22,000 people across the United States.

#90107b0777 04/17/1990 ~Business Wire

ATLANTA (APRIL 17) BUSINESS WIRE - Northern Telecom (NYSE:NT) Tuesday introduced an adjunct unit to a standard telephone set that offers a convenient and inexpensive way to view and use incoming Calling Line Identification (Caller ID) information.

Called the Lumina 100, the adjunct is the latest addition to Northern Telecom's portfolio of Custom Local Area Signaling Services (CLASS) terminals.

''The Lumina 100 allows users to enjoy the full range of CLASS features without replacing their current telephone sets,'' said Dan O'Connor, vice president, Terminals, Northern Telecom Inc..

''This product, along with the fully integrated Maestro set introduced in January, provides a solid base of products that our telephone company customers can make available to their subscribers for use with CLASS services.''

The Lumina 100 can store up to 14 unique calling numbers along with the date and time of each call. It also displays whether the call is new or repeated, whether the call comes from an area not equipped for calling number delivery, and whether the call information has previously been displayed during a review of the caller's list.

The Lumina 100 mounts on the desk or wall, and is connected both to the wall jack and to the telephone set. The calling number is displayed between the first and second rings, along with the date and time of the call. The unit can also be plugged directly into a wall jack and will function as a call display device even without a directly connected telephone.

The Lumina 100 is designed as an introductory device for first-time subscribers to Caller ID. The suggested list price for the Lumina 100 is $69.

Northern Telecom is the leading global supplier of fully digital telecommunications systems. The company provides products and services to the telecommunications industry, businesses, universities, governments

and other institutions worldwide.

CINCINNATI (APRIL 17) BUSINESS WIRE - Allen I. Questrom, chairman and chief executive officer of Federated Department Stores Inc. and Allied Stores Corp., announced Tuesday that the companies have accepted the resignation of Frank Doroff, chairman of Federated and Allied Merchandising Services (FAMS).

Doroff, 40, has been chairman of FAMS since June 1988.

''Frank's decision to accept another opportunity, with the new and demanding challenges it presents, is a decision we accept with regret. At the same time, it is one which we can understand and appreciate.'' Questrom said. ''All of us in Federated and Allied have enjoyed working with Frank, and we wish him only the best.''

Questrom indicated that the company has no immediate plans to replace Doroff. Tom Cole, 41, president of FAMS since June 1988, will assume Doroff's responsibilities, reporting to Questrom. Questrom will become even more actively involved in the company's merchandising operations through the New York-based FAMS organization.

''We have made great strides in restoring health and vitality to our merchandising organization in the past three months, and this progress will continue unabated,'' Questrom said. ''We will continue to work closely with our vendor resources in New York and across the country, and this will remain our highest priority in the weeks and months ahead. Organizational changes within FAMS will have no impact on our continuing ability to meet this key objective.''

Doroff's resignation is effective April 23.

NEW YORK (APRIL 17) BUSINESS WIRE - An international partnership of leaders in the sports and entertainment industries -- Centre Group LP in Landover, Md., Ogden Allied Services Corp. in New York, the Wembley Group in London, and the Carlyle Group, a private merchant banking firm in Washington D.C. -- have purchased Ticketron Sports and Entertainment from Control Data Corp.

The announcement of the new partnership behind the nation's oldest and largest computerized ticketing services was made Tuesday at a noon press conference at New York City's Plaza Hotel.

Centre Group Ltd. Partnership -- the corporate umbrella for components that include the NBA Washington Bullets, the NHL Washington Capitals, and their arena, Capital Centre -- is a co-general partner in Ticketron along with the Carlyle Group.

Ogden Allied Services, a limited partner in Ticketron, is a total service management organization operating in stadiums, arenas and convention centers, offices, airports and industrial plants throughout North America and Europe.

Wembley, listed on the London Stock Exchange, is the holding company for a variety of leisure and entertainment operations worldwide.

A limited partner in Ticketron, Wembley is best known to Americans for its 80,000 seat Wembley Stadium in London, home of the Football Association finals, for the Live Aid Concert in 1985 as well as the Nelson Mandela

Anniversary Concert in 1988.

Wembley Group's holdings include high-volume computerized ticketing systems, fast-food outlets, mass marketing and advertising companies, project management (from construction through operation), lighting and sound systems, wagering equipment, film distribution and satellite broadcast facilities.

The Carlyle Group is owned by the Richard King Mellon family. Carlyle Managing Directors, including former Secretary of Defense Frank Carlucci, headed the investor partnerships which recently purchased Coldwell Banker Commercial Group from Sears, Roebuck & Co., the In-Flite airline catering division of Marriott Corp., and Ticketron.

The new system combines Control Data's state-of-the-art Cyber 900 series of super computers with Ticketron's customized software created specifically for the sports and entertainment industry.

Currently used by NASA, NATO and the U.S. Defense Department, the Cyber 900 super computers will redefine the way the sports and entertainment industry utilize computers and information technology well into the next century.

Ticketron's new software was developed following two years of focus groups with clients. It will provide Ticketron clients with the world's most sophisticated customized ticketing system.

Established in 1968, Ticketron made its reputation in the sports and entertainment industry with record-breaking sales for blockbuster rock concerts, major sports events and Broadway shows. In 1979, Ticketron invented the service of charging tickets by phone, now known as Ticketron Phone Charge.

Ticketron operates its North American network from 18 regional offices throughout the United States and Canada along with 11 regional Ticketron Phone Charge operations and more than 700 Ticketron outlets.

#90107b0801 04/17/1990 ~Business Wire

AKRON, OH (APRIL 17) BUSINESS WIRE - Ohio Edison Co. Tuesday reported that earnings on common stock were down one cent per share in the first quarter of 1990, compared with the same period last year.

The Akron-based company said earnings on common stock were $89.8 million,

or 59 cents per share, compared with earnings of $91.6 million, or 60 cents per share, for the first quarter of 1989. Net income was $96.7 million, compared with $98.8 million in the first quarter of last year.

Kilowatt-hour sales to customers in Edison's service area were down about 1 percent. Commercial sales were up 1.2 percent, reflecting continued strength in the service and retail sectors. Residential sales were down 1.0 percent as milder weather reduced electric space heating use. Industrial sales were down 2.0 percent mainly due to reduced production at steel and auto-related companies. Total kilowatt-hour sales were up nearly 1 percent primarily because of a 6.1 percent increase in sales to other utilities.

For the 12 months ended March 31, 1990, earnings on common stock were $331.1 million, or $2.17 per share, compared with $195.6 million, or $1.28 per share, for the same 12-month period in 1989. Earnings results for the 12-month period in 1989 include a $128 million non-cash write-off, or 84 cents per share, for certain nuclear construction costs.

TOLEDO, OH (APRIL 17) BUSINESS WIRE - Dana Corp.'s (NYSE:DCN) board of directors, meeting Tuesday in Toledo, declared a quarterly dividend of 40 cents per share payable on June 15, 1990, to shareholders of record June 1 1990. This is Dana's 210th consecutive dividend and continues the annual dividend rate of $1.60 per share.

Southwood J. Morcott, chairman and chief executive officer, said, ''Dana's markets, other than highway vehicle, performed well during the first quarter. This underlying strength, plus some early signs that the North American truck market will improve in the coming months, is reflected in the board's recommendation that the quarterly dividend previously established be continued.''

The company announced that first quarter 1990 financial results will be released Wednesday, April 18, 1990.

BEVERLY HILLS, CA (APRIL 17) BUSINESS WIRE - The U.S. Air Force has awarded the Guidance & Control Systems division of Litton a $23.4 million contract to produce 199 inertial navigation units (INU) for F-16C/D aircraft.

The award includes purchases for Egypt and South Korea under the U.S. government's foreign military sales program.

Litton has delivered more than 2,000 of these INUs, designated LN-39, to the Air Force for use aboard a variety of tactical aircraft.

Litton produces the LN-39s at Guidance & Control Systems division facilities in Grants Pass, Ore., and Salt Lake City.

Each INU and its associated equipment provide data for navigation, weapons delivery and aircraft equipment stabilization.

Litton's Guidance & Control Systems division, based in Woodland Hills, Calif., is a leader in development and production of inertial navigation systems. It is a unit of Litton's Navigation, Guidance & Control Systems group.

Litton is a technology-based company providing advanced electronic and defense systems, resource exploration services and industrial automation systems for U.S. and world markets.

NEW ORLEANS (APRIL 17) BUSINESS WIRE - Hibernia Corp. (NYSE:HIB) Tuesday announced a $24.9 million net loss, or 92 cents per share, for the first quarter of 1990, compared to net income of $15.2 million, or 57 cents per share, for the first quarter of 1989.

The loss was the result of a special provision of $50 million added to reserves in view of a more conservative approach by federal regulators toward banking industry credit procedures and uncertain economic trends which became apparent during the first quarter of 1990.

Without this special provision, Hibernia would have reported net income of approximately $17.2 million, or 63 cents per share, (which is being reported here only to illustrate the underlying earning capacity of the company).

Hibernia also today declared a regular cash dividend of 25 cents per share. The dividend is payable on May 23, 1990, to shareholders of record on May 9, 1990. The annual dividend rate is currently $1 per share.

''Barring unforeseen events, we expect to return to profitability and to our objectives of a minimum 16 percent return on equity (ROE) and consistent earnings per share growth,'' said Martin C. Miler, chairman of Hibernia Corp.

Total assets of the corporation rose to $7.2 billion at March 31, 1990, an 18.7 percent increase over assets of $6.1 billion at the end of the first quarter last year.

Other results at March 31, 1990, included:

-- Total loans of $4.9 billion, up 12.3 percent from $4.4 billion a year earlier.

-- Total deposits of $6.4 billion, or 29.2 percent higher than deposits of $5 billion at March 31, 1989.

-- Total trust assets of $6.4 billion, a 21 percent increase over assets of $5.2 billion a year earlier. Assets of Tower Mutual Funds were $380 million at the end of the first quarter this year, up 188 percent from $132 million a year ago. Hibernia's Trust Division is the largest in Louisiana and has 50 percent of the state's estimated trust market.

-- A 22.7 percent increase in fee income.

''Consumers of banking industry information will be looking at balance sheet strength, in addition to earning capacity, as an indicator of future performance,'' Miler said. ''With this addition to reserves, Hibernia positions itself to address regulatory changes and strengthens its reserves against future uncertainties in the economy.''

Hibernia's loan loss reserve at quarter-end totalled $109.3 million, which was 2.2 percent of total loans and more than 110 percent of non-performing loans. Total non-performing assets amounted to $139.5 million, including $99 million in non-performing loans. At the end of the first quarter of 1990, primary capital, composed of shareholders' equity and reserves, was $473.6 million.

During the first quarter, Hibernia expanded its Texas operations through the assumption of all deposits and the acquisition of certain assets of two Dallas banks: BancTexas, Dallas, N.A., and Search National Bank. Deposits of Hibernia National Bank in Texas totalled $586 million at March 31, 1990.

As of Dec. 31, 1989, Hibernia had a 46 percent loan share and 39 percent deposit share among its largest competitors in Louisiana's major banking markets and a growing two-state presence. It currently operates from 167 locations: 144 in Louisiana in six major markets which account for approximately 75 percent of the state's loans and deposits and 23 locations in Texas in four major markets.

At the company's annual shareholders' meeting today, shareholders will re-elect the following directors to the corporation's board of directors: W. James Amoss Jr., Richard A. Campbell, Brooke H. Duncan, W. Ray Frye, Robert L. Goodwin, Robert T. Holleman, Hugh J. Kelly, Roland C. Kizer, Sidney W. Lassen, Martin C. Miler and E.L. Williamson.

Directors who are not subject to re-election in 1990 and who continue to

serve on the Hibernia Corp. board are: Robert H. Boh, Leonard H. Bossier, J. Terrell Brown, John W. Deming M.D., T. Robert Fiddler, Richard W. Freeman Jr., Dick H. Hearin, Eamon M. Kelly Ph.D, John P. Laborde, Thomas A. Masilla Jr., James R. Moffett, Donald J. Nalty, George H. Porter III M.D., O.Q. Quick, O.C. Russell Jr., Charles J. Shaw Jr., Joe D. Smith Jr., James H. Stone and Robert E. Zetzmann.

Hibernia Corp. is traded on the New York Stock Exchange under the trading symbol HIB. At March 31, 1990, the corporation had 27.3 million shares of common stock outstanding.

SAN RAFAEL, CA. (APRIL 17) USINESS WIRE - Westamerica Bancorporation (ASE: WAB), parent company of Westamerica Bank, Tuesday reported first quarter net income of $2.4 million, or 45 cents per share.

This represents a 55-percent improvement over first quarter 1989 earnings of $1.5 million, or 30 cents per share, and the fifth straight quarter of earnings increases.

''The strong first quarter results reflect continued progress in key areas of the bank,'' said Westamerica Chairman and CEO David Payne. ''Improved credit quality, control of overhead expenses, and increased loan and deposit volume, have produced an excellent start for 1990.''

Payne indicated that non-performing assets had declined to $14.4 million at March 31 from $21.3 million a year ago, a decrease of 33 percent. The improved credit trends allowed the bank to reduce the loan loss provision to $1.2 million, the same as the prior quarter, from $1.8 million in the first quarter of 1989.

At March 31, Westamerica's reserve for loan losses was $11.8 million, or 1.27 percent of loans. This compares with a loan loss reserve of $11 million, or 1.25 percent of loans a year ago.

Non-interest income in the first quarter of 1990 was $4.1 million, up $564,000 from $3.5 million in the first quarter of 1989. This increase reflects substantially higher mortgage banking and other service fees. Non-interest expense in the first quarter of 1990 was $14.3 million, down 3 percent from $14.8 million in the year earlier quarter and $14.9 million in the previous quarter. The decrease was due primarily to ongoing cost control efforts.

Net interest income on a fully taxable equivalent basis was $15.1 million in the 1990 first quarter, compared with $15.6 million in the same 1989 quarter and $16 million in the 1989 fourth quarter. The net interest margin was 5.01 percent for the first quarter of 1990, compared with 5.56 percent in the year ago quarter, and 5.30 percent for the previous quarter.

The margin was lower than the strong results of the prior year primarily because of a lower prime lending rate and seasonal factors which reduced asset yields more than the bank's funding cost.

Total assets at March 31 were $1.36 billion, an increase of 7 percent from a year ago. Deposits at March 31 were $1.22 billion, compared to $1.12 billion a year ago, an increase of 10 percent.

Total net loans rose $51 million to $921 million at March 31, compated to $870 million a year ago, an increase of 6 percent. Single family real estate and consumer installment loans account for the majority of the loan increase.

Westamerica Bank is a regional community bank with 33 offices located in Marin, Sonoma, San Francisco, Contra Costa, Mendocino, Nevada, Sacramento and Solano Counties.

#90107b0854 04/17/1990 ~Business Wire

CLEVELAND (APRIL 17) BUSINESS WIRE - TRW Inc. Tuesday reported higher sales and operating profit for the quarter ended March 31.

Net earnings were lower because of sharply higher interest expense.

Sales for the quarter were $2.0 billion, up 12 percent from $1.8 billion

in the year-ago period. Operating profit for the quarter was $159 million, up 6 percent from $150 million in last year's comparable period. Net earnings decreased to $57 million from $69 million in the year-ago quarter, and earnings per share on a fully diluted basis were 92 cents vs. $1.12 in last year's first quarter. The drop in net earnings and earnings per share was caused principally by soaring interest rates in Brazil's hyperinflationary economy and financing costs associated with TRW's 1989 acquisitions of Talley's air bag business and Chilton Corp.

In the automotive segment, sales climbed 15 percent to $1.0 billion from $868 million last year's first quarter. A continuing strong European market and higher sales of occupant restraints more than offset a soft market in North America. Operating profit was $81 million, up 7 percent from $75 million in the year-ago period. Lower domestic volume and performance problems at some locations, including higher costs associated with full capacity operations at some European plants, dampened the increase in operating profit. Economic turmoil and currency devaluations in Brazil entirely offset contributions from higher Brazilian sales.

In the space and defense segment, sales were up 4 percent to $805 million vs. $775 million in the year-earlier quarter. The sales increase was attributable to both new contract awards and volume increases in ongoing programs. Operating profit for the quarter rose 12 percent to $66 million vs. $59 million in last year's comparable period. Continuing improvements in program performance added to the operating profit increase.

In the information systems and services segment, sales for the quarter climbed 29 percent to $181 million, up from $141 million. The sales increase resulted from strong performance by the target marketing services business, the acquisition of the Chilton consumer credit reporting business, and higher sales in most other businesses. Operating profit for the quarter was $10 million compared to $13 million a year ago; however, excluding a one-time 1989 gain connected with the Chilton acquisition, operating profit increased by more than 40 percent.

TRW provides advanced technology products and services primarily for the automotive, space and defense and information markets. The company's 1989 sales totaled $7.34 billion.

ORANGE, CT (APRIL 17) BUSINESS WIRE - Hubbell Inc. (AMEX) Tuesday reported that sales, net income, and earnings per share for the three months ended March 31 set new records for first quarter performance.

Sales in the first quarter increased by 7 percent to $173,736,000 vs. sales of $161,755,000 in the equivalent period last year.

Net income and earnings per share rose by 10 percent to $21,144,000 or 74 cents which compared to $19,163,000 or 67 cents for the first quarter of 1989.

Per share results for both periods have been adjusted for the 5 percent stock dividend distributed to shareholders on Feb. 2.

In commenting on the quarter's results, the company noted that the positive comparsions were achieved against a strong performance in the period in the prior year.

Variability was experienced during the year's initial quarter in the levels of shipments and incoming orders not only across the different markets which Hubbell serves, but also from one geographic area to another.

Nonetheless, according to the company, all three of its operating segments reported higher sales and operating profits. In the core distributor-based businesses of the low voltage segment, the lighting division and the industrial controls subsidiary reported the strongest performances with sales and operating profit comparsions well into double-digits.

Units reporting comparsions of similar magnitude included the Ohio Brass subsidiary in the high voltage segment and the pulsecom division in the other segment.

Hubbell Inc. is an international manufacturer of quality electrical and electronic products for commerical, industrial, utility, and telecommunications markets. With annual revenues exceeding $650 million, the company has complied a 29-year record of consecutive annual increases in income from continuing operations.

Hubbell Inc. operates facilities in the United States, Canada, Puerto Rico Singapore and the United Kingdom, and has it headquarters in Orange.

HAUPPAUGE, NY (APRIL 17) BUSINESS WIRE - The Displays Division of Applied Digital Data Systems (ADDS), a subsidiary of NCR Corp., said Tuesday that it began volume shipment of its new 4000 terminal to distribution channels

worldwide as well as to OEMs, system manufacturers, and integrators.

It is the first in a new generation of products, and is being manufactured at ADDS's Hauppauge headquarters.

Commenting on the fact that the 4000 (and all future members of its product family) will be manufactured at ADD's Hauppauge home base, David G. Laws, president and chief executive officer, said, ''Placing all phases of design, production, testing, and marketing in our headquarters building allows us to ensure the highest possible quality and reliability.

''Also, having those functions under one roof enables us to respond more quickly to rapid changes in market demand.''

Priced at $595, the 4000 is a highly reliable ASCII/ANSI/PC terminal with dual-session capability. According to Vincent P. Luciano, director of marketing at ADDS Displays division, the 4000 exhibits a four-fold increase in reliability when compared with the previous generation of terminals.

''That reliability stems from three main design decisions we made early in the product development cycle,'' he said. ''They were to make extensive use of Application Specific Integrated Circuits, to emphasize reliability over cost when selecting components, and to pay special attention to thermal design.''

To verify the quality of the 4000, Luciano pointed out, ADDS put it through more than one million hours of rigorous life testing. ''All of those measures,'' he states, ''demonstrate our commitment to put the ADDS 4000 quality on display for the user.

''Several major OEMs, system manufacturers, and integrators have been attracted to the 4000 because of its reliability, flexibility, and compatibility with existing terminals,'' said Luciano.

''One aspect of its flexibity that they particularly like is its ability to accept plug-in personality cartridges.

''These may be programmed by the reseller or by ADDS to provide additional unique features, which are valuable to their customers,'' he added.

''Initial customer reaction to the 4000's dual-session indicates that it will be a big winner,'' said Luciano. ''They like the ability it gives them to connect with two ports simultaneously, so a single ADDS 4000 can take the place of two separate conventional terminals. In today's fast paced office environment,'' he said, ''People juggle a number of jobs simultaneously, and they want their computers to do more than one task at a time too.''

The 4000 alllows a user to run two applications concurrently, either on the same host machine or on two separate ones. Both sessions can appear on the screen simultaneously, and the active one -- the one that is affected by keyboard input -- can be made to occupy the standard 26-line window that users are accustomed to seeing, while the passive session occupies an 18-line background window. The user toggles between the two with a single keystroke.

ADDS, a subsidiary of NCR Corp., has been a leading manufacturer of general purpose display terminals since 1969.

DALLAS/FORT WORTH AIRPORT, TX (APRIL 17) BUSINESS WIRE - American Airlines announced Tuesday (April 17) that it will begin shifting its West Coast reservations center from Los Angeles to a series of satellite facilities, the first of which is being established in Tucson, Ariz.

Employees in the Western Reservations office will be offered an opportunity to transfer to the new Arizona facility, or any additional satellite office facility American may announce, or transfer to any other existing American reservation center, or take other positions in Los Angeles.

Mueller said the airline will close the Los Angeles facility in mid-1991 following expiration of its lease at 6310 San Vicente Boulevard. He emphasized American will continue to have a major presence in the Los Angeles area, where it employs more than 4,400.

American serves not only Los Angeles International, but other area airports including Orange County, Burbank, Long Beach and Ontario.

American will begin new hourly service between Los Angeles and San Francisco on May 1, giving American 285 flights a day in California, serving 14 cities. American Eagle, the carrier's regional airline partner operates 346 daily flights to 22 cities in the states.

American recently began flying from its San Jose hub to Honolulu, where it offers continuing service to Australia and New Zealand. On June 15 it will add Fresno-Dallas/Fort Worth service, with two flights daily.

Through an agreement with Cathay Pacific, American will begin offering service between Los Angeles and Hong Kong July 1. It is also seeking government approval to fly from Los Angeles, San Jose and Chicago to Tokyo and Nagoya.

#90107b0886 04/17/1990 ~Business Wire

CALGARY, Alberta (APRIL 17) BUSINESS WIRE - Solo Petroleums Ltd. (ALBERTA STOCK EXCHANGE:SOP) Tuesday announced that Shreveport, La.-based venture capitalist L. Cade Havard has agreed to purchase controlling interest in the company from the existing control group.

The purchase by Havard was approved by the Alberta Stock Exchange on March 22, 1990.

Terms of the acquisition call for Havard to acquire 1,020,000 of the existing shares with his investment group and an additional 650,000 new treasury shares via a private placement in the company. This will give Havard and his group 1,670,000 shares of the then 3,250,000 shares outstanding, a 51.4 percent stake in the company.

Further Havard has submitted a feasibility study to the Alberta Stock Exchange on his Scottsdale, Ariz.-based American Medical Aviation Inc. for review. Subject to a favorable review by the exchange of the feasibility study the company will schedule an extraordinary general meeting of the shareholders to vote on the acquisition of American Medical Aviation Inc. which will result in a reverse takeover of Solo Petroleums Ltd.

The shareholders will be asked to approve a capital consolidation (reverse stock split) on the basis of one share for two. After the capital consolidation, the shareholders will also be asked to approve the acquisition of American Medical Aviation Inc.

The purchase by Solo will be completed by issuing 3 million of its shares after consolidation for all of the shares of American Medical Aviation Inc. In addition the shareholders will be asked to approve a name change from Solo Petroleums Ltd. to American Medical Aviation Ltd. and to elect a new board of directors.

Upon a favorable review of the feasibility study and receipt of the purchase contract by the exchange, Havard will complete the private placement and the company's shares will resume trading. The shares will continue to trade on the Alberta Stock Exchange as Solo Petroleums Ltd.

under the trade symbol ''SOP'' until the name change can be effected.

At the time that trading resumes, Havard will join the company as chairman and chief executive officer and assume all management duties. Completion of these items and the resumption of trading of the shares should be completed within the next week.

American Medical Aviation Inc. is a fixed wing, emergency air ambulance company that services the desert southwest from its' operational base on the airport at Scottsdale, Ariz. The company's plans are to become a nationwide air ambulance carrier. The home office for Solo Petroleums Ltd. and American Medical Aviation Inc. will be relocated from Calgary and Scottsdale, respectively, to Shreveport.

For further information, the managment of Solo Petroleums Ltd. suggests that all inquiries be directed to the office of L. Cade Havard in Shrevport. Havard's office phone is 318/865-8410 and the fax number is 318/865-8449.

FAIRFIELD, NJ (APRIL 17) BUSINESS WIRE - Prime Motor Inns Inc. (NYSE:PDQ) announced Tuesday that it has recently completed two debt financings, reached agreement on the sale of certain long-term notes receivable and finalized its previously-announced agreement to sell a major hotel property.

Aggregate proceeds of these transactions will be approximately $110 million. Of this amount, $32 million has been received with the balance expected by April 30. Approximately $57 million of these proceeds will be applied to pay down bank debt. The balance will be used for general corporate purposes, including funding of new hotel properties presently under contruction.

Prime Motor Inns Inc. owns, operates or manages 139 hotels nationwide. Prime is also the franchisor for three lodging chains: Howard Johnson, Ramada throughout the United States, and Rodeway Inns International. In aggregate, these chains total approximately 1,100 properties with 150,000 rooms.

OKLAHOMA CITY (APRIL 17) BUSINESS WIRE - Conoco Tuesday announced that it is relocating the administrative and technical groups supporting New Mexico exploration and production operations from Hobbs, N.M., to Midland, Texas, and Oklahoma City.

Conoco is a subsidiary of Du Pont.

The move, which is to be completed by June 1, will result in the transfer of about 80 jobs, most of which will go to Midland, said D.W. Branch, general manager, onshore exploration and production, North America.

Comparable positions in Midland and other Conoco offices will be offered to most affected employees. Those not relocating will be given outplacement assistance in addition to an excellent severance package and all other applicable benefits.

Conoco's other New Mexico operations include the Maljamar and San Juan natural gas processing plants, as well as transportation and marketing facilities.

#90107b0943 04/17/1990 ~Business Wire

ATLANTA (APRIL 17) BUSINESS WIRE - AT&T introduced a new family of ISDN products Tuesday that will help telephone companies provide data services to businesses that use IBM's Systems Network Architecture (SNA).

These new products switch data over the public network without private lines and modems.

AT&T also continued its leadership role in the ISDN Standards arena by introducing a new network interface that meets the ANSI 2B1Q Basic Rate Interface (BRI) Standard, a technical specification for an ISDN interface used in terminal equipment.

Using the Integrated Services Digital Network (ISDN) capabilities of AT&T's 5ESS (R) Switch, plus a new family of ISDN products, telephone companies can now better serve their customers that use SNA networks, AT&T said.

Designed to work with the IBM 3270 terminal environment, these new products let business customers create multi-host, multi-terminal SNA networking arangements quickly and economically.

Buisness customers that need to move large volumes of computerized information over an IBM SNA network can do it cheaply and quickly by using these ISDN connections.

They can create new office sites across the street or across the country using existing wiring for connections to the host mainframe database.

AT&T also announced a network interface called the NT1U 200 that provides ISDN communications between the central office and a customer's ISDN terminal. The new interface connects two terminals to the same ISDN line, has built-in testing and diagnostics, and conforms to the ANSI 2B1Q standards.

#90107b0970 04/17/1990 ~Business Wire

NEW YORK (APRIL 17) BUSINESS WIRE - Orient-Express Hotels Inc., owners and operators of deluxe hotels, tourist trains and cruise vessels, Tuesday reported net losses of $3.3 million (33 cents per common share) on revenue of $55.9 million for the twelve months ended Dec. 31, 1989.

In 1988 the company earned $21.6 million ($2.21 per common share) on

revenue of $59.9 million, however, these profits arose entirely from gain on sale of assets and not from operations. At the operating level, losses in 1989 were $4.1 million, down from $4.8 million in 1988 but this improvement is less than expected and is considered unsatisfactory.

Italian hotels as a whole showed improvement in 1989 over 1988 and made a meaningful profit contribution. Tourist trains were profitable but earnings were at the same level as 1988 and 1987, which was less than foreseen. North American hotels were loss-making and reorganization of this business will be undertaken in the current year.

Results of United Kingdom hotels were down, due primarily to renovation work which reduced room supply during the construction period. Cruising and Harry's Bar in London both reported substantial improvements in earnings. Earnings from retailing were lower. Management fee income from hotels in Brazil, South Africa and Portugal was up over the prior year.

Progress has been made towards the settlement of the long-standing IRS claim against the company. A proposal which would eliminate most of the company's existing tax losses but not require any material additional provision is under review and a decision by the IRS could be forthcoming this year.

James B. Sherwood, chairman, said that serious consideration is being given to the sale of one of the company's hotel properties, retaining a long-term management contract, and an announcement could be expected shortly. He said that a loss at the operating level is again foreseen for 1990, but this budgeted to be lower than in 1989.

#90107d0230 04/17/1990 ~French/German News Agency

WASHINGTON (APRIL 17) - The editor of National Geographic magazine was abruptly replaced Monday, but a spokesman for the 102-year-old journal Tuesday refused to comment on reports that the move stemmed from an editorial feud.

Wilbur Garrett, 59, who had served as editor for 10 years, was replaced by 63-year-old William Graves, until now assistant editor for expeditions.

The magazine is the monthly journal of the National Geographic Society, which has 10 million members and says it is the world's largest non-profit scientific and educational institution.

In a statement Monday, the society depicted Mr. Garrett's departure as a resignation. But press reports described it as the result of a long-simmering conflict with the president and chairman of the society, Gilbert Grosvenor.

"I wouldn't comment on that," a spokesman for the magazine said of the alleged feud.

The Washington Post Tuesday quoted anonymous sources as saying Mr. Garrett and Mr. Grosvenor had clashed over efforts by the editor to adapt the magazine to a younger readership.

In recent years, the magazine covered topics such as the reconstruction of Vietnam and the fall of the Berlin Wall, and the cover story of its most recent issue dealt with life in New York's Hispanic ghetto of East Harlem.

Mr. Grosvenor -- Mr. Garrett's predecessor as editor -- reportedly opposed efforts to make the magazine's articles jazzier or more news oriented.

Mr. Grosvenor believed readers preferred the traditional coverage -- scenes of nature and colorful tribal customs -- that the publication is most well known for, the Post said.

It said another source of conflict was Mr. Garret's resistance to cutting staff and other expenditures, as Mr. Grosvenor had ordered in response to declining revenues.

#90107d0380 04/17/1990 ~French/German News Agency

LIMA (APRIL 17) - Maoist Shining Path guerrillas Tuesday killed Felipe Santiago Salaverry, a close associate of Peruvian President Alan Garcia and head of the Peruvian Social Security Institute, police said.

National Police General Oscar Diaz Salvador said six to eight armed men riddled Mr. Santiago's body with bullets, bashed his head in with clubs and left Shining Path leaflets at the site on his property 30 kilometers (22 miles) from the capital.

Earlier Tuesday, an army spokesman had announced that government troops with helicopter gunships virtually wiped out a 150-strong guerrilla unit in a jungle battle the army termed a major victory in its war against Shining Path.

An army spokesman said the clash in the Amazon Friday left 112 rebels dead and 20 captured, adding 20 government troops were wounded, four seriously.

He said the battle erupted when government troops tracking the guerrillas through the jungle called in two helicopters as the rebels were about to enter the farm village of Palo de Acero, about 320 kilometers (200 miles) northeast of Lima.

A day earlier, Shining Path rebels had seized two nearby towns and given authorities there three days to leave.

Those attacks led to the mobilization of the army unit that tracked the rebel column near Palo de Acero, the spokesman added.

Authorities say the rebel activity was a continuation of a campaign launched prior to April 8 general elections in a bid to scare voters away from the polls.

Guerrillas Friday held a summary trial in a village square and executed 35 persons they accused of ignoring the rebel boycott of the elections, officials said.

Among those killed in the Amazon village of Naylam were children and pregnant women, authorities said.

Shining Path, led by former sociologist Abimael Guzman, has been fighting to overthrow the Lima government since the early 1980's.

NEW YORK, UNITED NATIONS (APRIL 17) - The U.N. Security Council voted unanimously Tuesday in favor of Namibia's entry into the world body.

The resolution adopted by the 15 council members recommends that the General Assembly make the newly independent Namibia the 160th member of the United Nations.

The assembly is expected to officially admit Namibia on April 23, when it convenes a special session on development.

Namibia gained its independence March 21 after 75 years of South African administration.

The United Nations played a central role in organizing free elections and overseeing the transition to independence for Namibia.

LONDON (APRIL 17) - A British company which helped build steel tubes which are suspected of being part of a huge gun for Iraq said Tuesday it had received an order for a unit which might be used as an aiming device.

Walter Somers, a subsidiary of Eagle Trust, carried out finishing work on the tubes manufactured by Sheffield Forgemasters and also supplied certain parts. The eight tubes were impounded by customs officers last week.

Eagle Trust chief David James said Tuesday that his company received an urgent order early this month from Iraq and informed the Department of Trade and Industry on April 9.

He said that "re-evaluated in the light of subsequent events and publicity, there was concern that the component described in the order might be used as a positioning or aiming device".

Walter Somers engineers also now believed that one part delivered to Iraq last October might be part of a trigger device in a "super-cannon".

Sheffield Forgemasters maintain that the castings were for an oil pipeline after British Sunday newspapers published reports saying they could be used to make a giant cannon to launch rockets or satellites.

The company said it hoped "the Customs and Excise, the DTI and the Ministry of Defense will, after due deliberation, issue a formal statement to end any further conjecture and hypothesis."

ABIDJAN (APRIL 17) - The Ivory Coast government has decided to put off

planned salary cuts which have led to more than a month of anti-government unrest throughout the West African country, a well-informed source said here Tuesday.

There was no official announcement of the move, but Communications Minister Auguste Miremont said a proposal to put off the measures to a later date would be discussed at a meeting of the ruling Ivory Coast Democratic Party in the next few days.

Ivory Coast, formerly a West African success story with flourishing cocoa and coffee industries, has been facing severe economic crisis since the world prices of the commodities have slumped in the past year.

Instability has been increased by continuing uncertainty over the succession of the country's ageing president. Felix Houphouet-Boigny.

The government last month sparked widespread unrest by announcing that it intended to cut civil servants' salaries by eight to 40 percent and take a 10 percent slice from private sector salaries.

The austerity measures were aimed at helping the government find some 136 billion CFA francs (500 million dollars) to reduce a national debt estimated at 500 billion CFA francs (1.7 billion dollars), a condition reuired by donors to open fresh lines of credit.

LONDON (APRIL 18) - The giant financial services group British and Commonwealth has moved to wind up a loss-making computer leasing operation, writing off 550 million pounds (895 million dollars) and obtaining a suspension of its own shares on the Stock Exchange here.

The company said Tuesday that its shares were being suspended at their closing price last Thursday, 53 pence, until B and C published its annual results. However the publication of those results, initially scheduled for April 26, was also postponed sine die.

The leasing operation which the company decided to fold up was Atlantic Computers, which B and C purchased in 1988.

A company statement said that "major problems have been identified which give grave cause for concern about the profitability and carrying value of Atlantic."

Financial papers here said that the leasing group had lost market share and had suffered from clients terminating contracts on unfavourable terms.

B and C said that its other subsidiaries were "trading normally" and gave no cause for concern. However the writing off of Atlantic would mean a sharp drop in group assets, which stood at 1.16 billion pounds (1.9 billion dollars) at the end of 1988.

The suspension of the group's shares at 53 pence put a value of only 200 million pounds on B and C. During the summer of 1987, the shares had peaked at 565 pence.

Atlantic's earnings had slumped from 33.7 million pounds (55 million dollars) in 1988 to only 6.7 million pounds in the first half of last year.

PRAGUE (APRIL 18) - Deputy prime ministers of the 10 nations in the Council for Mutual Economic Assistance, or Comecon, are to meet here on Friday, Czechoslovakian Foreign Trade Minister Andrej Barcak said Tuesday.

The officials are expected to round off work on drafting new statutes and regulations for Comecon, which is undergoing fundamental change as a result of the overthrow or reform of Communist regimes in most of its members.

Czechoslovakia has been to the fore in pushing for reform of the trading bloc, and is particularly interested in the complex question of how to make member-states' currencies convertible.

Mr. Barcak told reporters that Czechoslovakia was hoping to reach agreement with its fellow Comecon members by the end of June on using currencies other than the rouble as a means of exchange.

Comecon heads of government are due to meet for a summit in Budapest in June.

TOKYO (APRIL 17) - Japanese imports of fishery products jumped by 16 per cent to a record 2.41 million tons in fiscal 1989, accounting for about 30 percent of total marine products consumed, a government report said Tuesday.

The Agriculture, Forestry and Fisheries Ministry, in a white paper on Japan's fisheries in fiscal 1989 that ended March 31, 1990, said catches by Japanese fishermen came to 12.78 million tons, up three percent from the pevious year.

The fish catch was valued at 2,722 billion yen (17.1 billion dollars), up five percent and marking the first rise in four years, the report said.

But domestic production of fish caught in Japanese territorial waters increased only one percent from a year earlier to 8.85 million tonnes due to deterioration of local marine resources, it said.

Recalling that fishing conditions on the high seas and in foreign territorial waters have become tougher, the report said Japan should further utilize the resources in its own territorial waters.

Although the fishery industry was bullish in fiscal 1989, the number of fishermen fell by nine percent from 1983 to 314,000 workers as an increasing number of younger people turned away from fishery-related work.

TOKYO (APRIL 17) - The two Koreas, hostile rivals since the Korean Peninsula was divided at the end of World War II, are to form their first ever joint venture, a Japanese press report said Tuesday.

South Korea's Dong-A Pharmaceutical Co. will take out equity in the Soviet-North Korean joint pharmaceutical and medical firm Exman, the newspaper Nihon Keizai said.

The three parties have reached basic agreement on the partnership and will sign a formal contract soon, the leading Japanese economic daily said in a report from the Siberian city of Khabarovsk.

The Khaborovsk-based Exman, capitalized at 26 million rubles (42 million dollars), is owned equally by the Khabarovsk business group Expa and North Korea's Man-Nyon group.

Expa, Man-Nyon and Dong-A have agreed to set aside political differences at government level, the newspaper said. North Korea, faced with lagging economic development, has expressed displeasure at growing ties between the Soviet Union and South Korea.

With limited success, North Korea has been introducing foreign capital and technology to spur its centralized, mostly self-reliant economy since it first formulated a joint venture law in 1984.

In a surprise commentary in February, the North Korea Workers Party newspaper Rodong Sinmun called for economic cooperation with newly-industrialized South Korea which has established diplomat ties with six East European nations and Mongolia over the past year.

"The way of delivering the South Korean economy from dependence and bankruptcy is to achieve its self-sustenance and democtratisation and realise all-around economic cooperation and exchange between the north and the south," the official newspaper said.

The joint venture Exman grows medical herbs, including ginseng, produces medicines and exports to third countries including Japan. It has some 70 North Koreans on its payroll and plans to recruit 300 more, Nihon Keizai said.

Its parent firm, Expa, founded in 1964 as a chicken farm, has expanded into a group of 39 firms with a combined 7,000 employees.

Expa vice chairman Ivan Kim said Expa executives are to visit Seoul shorty to work out details of the partnership with Dong-A, the newspaper said.

TOKYO (APRIL 17) - Japan's money supply grew at an average annual rate of 11.6 percent in March, down from 11.8 percent in February, the Bank of Japan said Tuesday.

The latest increase in the broad money measure - which combines cash in circulation plus demand and time deposits (M-2) with certificates of deposit -- marked the first slowdown from the previous month since August. But it also represented the fourth consecutive increase of more than 10 percent.

"We welcome the fact that money supply growth went down but it is still at a high level," a central bank official said.

The rate of growth in Japan's money supply began accelerating from the second half of last year, hitting 10.6 percent in December and 11.5 percent in January, putting pressure on the central bank to tighten credit.

#90107d6170 04/17/1990 ~French/German News Agency

CANBERRA (APRIL 17) - Australia's biggest company, BHP Pty. Ltd., threatened Tuesday to abandon a 1.5 billion dollar (1.2 billion U.S.) oil field investment unless the government cuts excise duties on crude oil.

Dick Volk, BHP group general manager Australia, said on radio that BHP would not develop oil reserves in the Bass Strait estimated to be between 100 million and 300 million barrels unless the Australian government reduced the tax.

A spokesman for Primary Industries and Energy Minister John Kerin declined to comment on the threat.

The crude oil excise is paid by Bass Strait producers and is based on a complex formula loosely related to the price of a barrel of oil, but it makes no allowance for rapid price changes.

BHP's threat to cut back its oil exploration and development programs could jeopardise Australia's 85 percent self sufficiency in oil.

Mr. Volk said BHP wanted the excise of up to 75 percent on older oilfields reduced because this tax was the nation's highest for any resources operation. He said the money was needed for exploration.

"What we're asking for is something that's a sacrifice right now for the country for a benefit in the long pull for the children," he said.

A recent BHP-commissioned report by the National Institute of Industry and Economic Research said a 35 percent reduction in taxes was necessary to ensure oil fields were developed over the next decade.

#90107d6280 04/17/1990 ~French/German News Agency

PARIS (APRIL 17) - French consumer prices rose 0.3 percent in March after a 0.2 percent rise in February, according to provisional figures issued by the French statistical office INSEE Tuesday.

Price rises are now running at an annual rate of 3.4 percent.

Since the beginning of 1990 prices in France have risen by 0.8 percent. The government has set an objective for the year of 2.5 percent.

Economy ministry analysts attributed part of March's slight inflationary increase to higher automobile prices.

Higher charges in service industries had also had an impact on the March figure despite cheaper prices for petrol products and domestic fuels, analysts said.

If the provisional March figures are confirmed, France will rank second for the lowest inflation rate among leading industrialised nations for the first quarter of 1990. The Netherlands had price rises of 0.6 per cent over the same period.

France now has an inflation rate lower than its principal trading partner, West Germany, which recorded a 1.1 percent increase in prices in the first quarter of this year.

#90107d6310 04/17/1990 ~French/German News Agency
Tokyo (APRIL 17) - Bagdhad has requested Japanese firms to help develop four oil fields in southeastern Iraq, industry sources here said Tuesday.

Major trading houses, including Mitsubishi Corp., and oil firms are expected to offer their concrete cooperation plans for the Iraqi government in one or two months, the sources said.

The sources quoted Iraqi officials as wanting the Japanese concerns to offer wide-ranging cooperation including fund-raising, project management and technical provision to the Gulf nation.

The four oil fields under the development plans are located in al-Qurnah, al-Halfaya and two other spots in southeastern Iraq with a combined output of 1,629,000 barrels a day. The development costs are estimated at 2 billion to 3 billion dollars.

The Iraqi side hopes to conclude the oil development cooperation agreement by 1991 and begin the production between 1994 and 1996, the sources said.

BERLIN (APRIL 17) - West Germany's leading bank, Deutsche Bank AG, is to launch a joint banking venture with East Germany's Deutsche Kreditbank AG, the two banks announced Tuesday.

Deutsche Kreditbank, an independent commercial bank formed two weeks ago, has taken over the commercial business of the the East German central bank the Staatsbank.

The alliance will give Deutsche Bank an existing network of banks in East Germany, which will be used to establish the joint subsidiary in East Germany.

Deutsche Bank will train personnel for the new venture and provide know-how in developing banking services.

In a joint statement carried by the East German news agency ADN the two banks said they did not want to hold a monopoly in East Germany but wanted to help create an efficient banking system.

LONDON (APRIL 17) - British car maker Rover and Japan's Honda have signed a cross-holding deal giving Honda a 20 percent stake in Rover and Rover a 20 percent stake in Honda's British subsidiary, the two groups announced here Tuesday.

The new agreement between the two groups, which had already agreed in principle in July last year to take stakes in each other's capital and boost cooperation, will give Honda 20 percent of Rover's capital of 520 million pounds (832 million dollars).

Rover will take a 20 percent stake in Honda of the U.K. Manufacturing Ltd. (HUM), which currently has capital of 60 million pounds (96 million dollars). But the firm, based in Swindon, south-east England, intends to raise its capital to 370 million pounds by 1993.

Honda will also pay Rover 30 million pounds (48 million dollars) cash to compensate for the difference in the value of the holdings exchanged.

The new agreement was signed in New York on Saturday by Honda's president Tadashi Kume, and Rover's chief executive Sir Graham Day.

Each group's board will now include a representative of the other group who will not hold executive functions. Shoishiro Irimajiri, a senior managing director of Honda, will join Rover's board, while Rover's product development director John Towers will get a seat on HUM's board.

A new HUM plant in Swindon, which will be able to turn out 100,000 cars a year, will start manufacturing a new model towards the end of 1992. The new car will produced in two versions which will be sold separately through Honda and Rover sales outlets.

PARIS (APRIL 17) - Compagnie Francaise de l'Afrique Occidentale (CFAO, the French West Africa Company), has sold the Ruche Meridionale food retail group to the Casino supermarket chain for three billion francs (535 million dollars), CFAO said Tuesday.

It has already sold the 50.73 percent of Ruche's unquoted stock to Casino, and the remaining shares, traded on the stock exchange, will be sold on Thursday, Ruche said.

CFAO is selling its entire stake of 99.36 percent of Ruche stock to Casino.

The deal will strengthen Casino's position in southern France, where the addition of Ruche's businesses is expected to boost its sales by 27 percent, Casino said.

Casino posted sales of 35 billion francs (6.2 billion dollars) last year.

CFAO bought Ruche for 1.5 billion francs (268 million dollars) just over a year ago. But Ruche was not big enough to go it alone in the highly competitive retail trade, sources at CFAO said.

CFAO has now divested all its food interests, as its two other food subsidiaries, Cantelaube and Sodim, had merged with Ruche.

CFAO said it wanted to concentrate on selling home equipment and construction materials. The group also distributes cars, trades in commodities, hires building equipment and operates a shipping business.

JERUSALEM (APRIL 17) - More than 30 Palestinians were injured in clashes with Israeli troops in the Gaza Strip Tuesday a day after Palestinians commemorated the second anniversary of the Tunis assassination of Abu Jihad, the military operations chief of the Palestine Liberation Organization.

Clashes took place Monday in the West Bank, but residents of the Gaza Strip were forced to postpone their protest until Tuesday when the Israeli army lifted a curfew it had placed on the territory.

The most serious incident occured near the Gaza townships of Rafiah and Khan Yunis. Local sources reported 30 persons injured from beatings or being hit by rubber and plastic bullets.

In East Jerusalem's main Salah-a-Din street, a 28-year-old Palestinian woman was attacked with an axe by local youths accusing her of collaborating with Israeli authorities. She was admitted in critical condition to the Mukassed hospital on the Mount of Olives.

The Islamic fundamentalist movement Hammas claimed in a leaflet issued in the West Bank that Egyptian President Hosny Mubarak was collaborating with the Israeli Labor Party in order to frustrate Palestinian rights for self-determination by promoting a confederation between the West Bank and Jordan.

BELGRADE (APRIL 17) - A state of emergency declared 13 months ago in the Yugoslav province of Kosovo will be lifted soon, Belgrade radio reported Tuesday.

The report follows a call for an end to the emergency made earlier Tuesday by the leadership of the Serbian republic, which largely controls the nominally autonomous southeastern province of Kosovo.

The emergency was declared on February 27 last year by the federal leadership, as ethnic Albanians, who outnumber Serbs by nine to one in Kosovo, protested at the constitutional changes which extended Serbia's powers.

The measures have failed to quell ethnic Albanian protests, which left 25 people dead after demonstrators clashed during February and March last year, and about 30 dead after street battles in February this year.

The Serbian leadership, headed by Slobodan Milosevic, came out in favor of ending the emergency during a meeting here Tuesday. Serbia has taken charge of security throughout the province.

Observers predicted the measures would be lifted within days, highlighting that it would also remove the source of a bitter quarrel between the Slovenian and Serbian republics which has threatened the stability of the federation.

The move would also follow international pressure on the Yugoslav leadership. A delegation from the U.S. Congress visited the region during a visit to Yugoslavia earlier this week.

Yugoslav President Janez Drnovsek is meanwhile due to address the European Parliament later this week in the eastern French city of Starsbourg.

#90107d8710 04/17/1990 ~French/German News Agency

BAGHDAD (APRIL 17) - The Iraqi army and hundreds of thousands of citizens Tuesday celebrated the second anniversary of the liberation of Fao from Iranian forces with a show of force against Israel and the West.

People marched through several cities and hundreds of villages, while army troops and tanks paraded and warplanes swooped down over cheering crowds.

About 53,000 Iraqis and 120,000 Iranians were killed in Fao two years ago, when Iraqi elite troops evicted their enemies from this southern port city. The defeat led to other Iraqi victories in the field. Iran eventually accepted a United Nations-sponsored truce in August 1988 after eight years of fighting between the two Gulf neighbors.

Tuesday's show of force coincided with a war of statements between Israel and the West, on the one hand, and Iraq, on the other, following the recent threat by Iraqi President Saddam Hussein to incinerate half of Israel with binary chemical weapons if it attacked his country.

Reports Monday quoted Saddam as saying he had told his field commanders to attack Israel without further orders with binary chemical weapons if the Jewish state struck at Iraq with nuclear weapons.

''We have ordered air force bases and missile formations that as soon as

they heard Israel had hit any place in Iraq with the atomic bomb, they should throw any weapon they can at Israel,'' he said.

The controversy began when British authorities seized 40 U.S.-made triggers for atomic bombs in London on March 29.

The Iraqis said the triggers were to be used for a laser at Baghdad university and lashed out against what they called the West's hypocrisy in allowing the export of high-technology to Israel but not to the Arab world.

#90107d8930 04/17/1990 ~French/German News Agency

BRUSSELS (APRIL 17) - Societe Generale de Belgique (SGB) SA, Belgium's biggest corporation, soared into profit last year after its new French owners applied a tough restructuring plan, according to the company report published Tuesday.

Consolidated net profit was 20.1 billion Belgian francs (574.28 million dollars), after a net consolidated loss in 1988, revised in line with new accountancy rules, of 0.9 billion francs (25.71 million dollars). Dividend will be 84 francs per share, after 76.7 francs for 1988.

SGB was bullish about the coming 12 months.

"Despite a generally less favourable outlook, and thanks to rationalisation that has been carried out or is underway, the group's aim is to achieve a group net result at least equal to that of 1989," it said in a communique.

The result - largely at the top end of stock market predictions - helped push up SGB's stock price to 3,395 francs from 3,350 francs at Thursday's pre-Easter close.

Last month, SGB's managing director, Herve de Carmoy, predicted that consolidated net profit would reach about 15 billion.

SGB, a vast empire with interests in 1,200 companies ranging from banking to minerals and engineering, was the target for Europe's biggest takeover battle in 1988.

CHITTAGONG, BANGLADESH (APRIL 17) - Suspected tribal rebels in two simultaneous offensives in the hills of southeastern Bangladesh killed 22 people and wounded three, security sources here said Tuesday.

They said the rebels from the outlawed Shanti Bahini group stormed the village of Shilchar in the Banderban hill district Monday night, captured 25 Moslem villagers and tied them with ropes before firing on them and leaving 19 dead.

Three of the victims were hospitalized with injuries while three managed to escape the carnage unhurt, the sources said, adding that bodies of 19 villagers were recovered after government forces moved into the village and launched a search operation.

Also late Monday in the village of Debatachari in the nearby hill district of Rangamati, the rebels fired on a tribal family, killing three members instantly, security sources said without giving further details.

In February during the last reported offensive in the nearby Khagrachari hill district, the rebels ambushed a group of Bangladesh security forces, killing one soldier. The ambush followed an earlier incident when troops shot dead four tribal rebels including their "captain" in Rangamati.

The Shanti Bahini insurgents, mostly drawn from the area's dominant Chakma tribe, have been fighting a 16-year bush war for tribal autonomy and expulsion of Bengali-speaking Moslem settlers from the rugged region bordering India and Burma.

In the past 10 years more than 1,000 people, mostly Moslem settlers, have been killed by the rebels.

However, officials have said the rebels' activities have greatly diminished following last year's election for specially created hill councils for Banderban, Khagrachari and Rangamati headed by local tribal leaders.

CAIRO (APRIL 17) - A previously unknown group has threatened to set fire to the Nile Hilton hotel here if it continues to accommodate Soviet Jews on their way to Israel, court sources said Tuesday.

"The hotel will suffer the same fate as the Sheraton-Heliopolis if it continues to take in groups of Soviet Jews in transit for Israel," the Egyptian Organization to Free the Homeland from the Zionist Stain warned in a letter posted from Egypt last week to the hotel director.

Seventeen people perished when the Sheraton-Heliopolis north of here went up in flames March 1. Investigators later ruled that the fire had been accidentally caused.

The group in its warning to the Hilton, located in the heart of Cairo on the banks of the Nile, gave hotel authorities 15 days to comply with their directive.

JOHANNESBURG (APRIL 17) - Seventeen persons were killed and an unspecified number injured in a train derailment thought caused by sabotage in Mozambique, Radio South Africa said Tuesday.

The train was travelling from the South African border post of Komatipoort to Maputo when it derailed 57 kilometers from the Mozambique capital, the radio said.

The broadcast quoted a South African Railways spokesman as saying that saboteurs had apparently planted anti-personnel mines along the railway line. Sixteen waggons and about 200 meters of track were damaged.

#90107d9440 04/17/1990 ~French/German News Agency
SOFIA (APRIL 17) - Bulgaria's communist party was responsible for forced labor camps in which hundreds of political opponents died during the 1950s according to an official report issued here Tuesday.

The publication came as the BTA news agency reported the arrest of two former officials at what the public has dubbed the "death camps" in Lovech and Scravena, in northern Bulgaria, which operated between 1959 and 1962.

"The political and moral responsibility of the politburo and the state leadership is indisputable" said the report. The communist party changed its name earlier this month to the Bulgarian Socialist Party.

Of the 1,235 who passed through the camps, 147 were beaten to death or killed by the inhumane conditions, according to the report by a commission of interior ministry officials and opposition figures.

President Petur Mladenov and Prime Minister Andrei Lukanov laid wreaths Tuesday at the site of the Lovech camp, and appealed for calm.

"If we want ... the violation of fundamental human rights never to be repeated, let us find the strength for a true and sincere national reconciliation", the two leaders said.

The report, which detailed 11 camps, described them as "one of the main methods of combatting political adversaries, people with opinions which differed from the official line, who were described as class enemies" after the communists took power in October 1944.

The camps also dealt with "individuals who breached public order".

In the official literature of the day, the camps were portrayed as "places of work and education".

But, the report says, inmates had to work in nearby quarries from 5.00 a.m. until late at night, with only a brief pause for lunch.

Their guards were selected from among the "sadistic criminals," the report said.

A camp at Belene, an island in the Danube river, will be the subject of a special enquiry. A survivor of the camps has alleged that every day for two and a half months, he transported disfigured corpses onto the island, where they were eaten by pigs. Four people forced to do the work before him all committed suicide.

In its report on the Monday arrests, BTA said that Nicolae Gazdov and

Tsvytako Goranov helped in the running of the so-called death camps.

Former deputy interior minister Mircho Spassov, an 80-year-old retired general, who ran the camps was arrested at the end of March. Several other officers have been stripped of their ranks and are being investigated.

#90107d9510 04/17/1990 ~French/German News Agency

MOSCOW (APRIL 17) - The chairman of a Soviet parliamentary commission Tuesday called for two popular anti-Mafia magistrates to lose their immunity from prosecution, triggering a mass rally in their support outside the Kremlin wall.

But speaking after a nine-month investigation into whether Telman Gdlian and Alexander Ivanov had broken the law during an anti-corruption inquiry which led to accusations against Politburo member Yegor Ligachev, commission head Roy Medvedev also demanded the dismissal of the Soviet Prosecutor-General.

According to the panel, Prosecutor-General Alexander Sukharev was responsible for the conditions under which the judges carried out their investigations.

As Mr. Medvedev delivered his 45-page report, which six of the commission's 16 members refused to sign, some 5,000 people gathered in Manezh square outside to support the two magistrates, both Soviet deputies.

They carried signs saying "Shame on Gorbachev, shame on the central committee", and demanded the resignation of Mr. Sukharev and "his clique at the prosecutor's office".

About 30 members of Moscow's newly-elected City Council joined the demonstration called by liberal movements in the Soviet capital.

Parliament was to vote later in the day on the commission's findings, which generated much interest among deputies with a total 51 people listed to speak.

Mr. Gdlian and Mr. Ivanov stand accused of "abusing power" during their investigation of corruption in the Central Asian republic of Uzbekistan.

The pair took over investigations into the so-called Uzbek Mafia in 1986. Two years later former president Leonid Brezhnev's son-in-law Yuri Churbanov was indicted for corruption.

However both were removed from the case after senior Soviet officials, including Mr. Ligachev, head of the Politburo's hardline conservatives, launched a campaign against them.

Mr. Medvedev said that he agreed with the principle of the fight against corruption but, at the same time, "one does not have the right to break the law."

His report accused Mr. Gdlian and Mr. Ivanov of overstepping their powers of detention by keeping people for long periods for questioning without alerting the prosecutor's office, and of "pressuring witnesses".

A dozen witnesses in their corruption cases committed suicide and confessions were obtained after detentions lasting up to three months. But the report blamed the prosecutor's office for giving the green light in the first place.

Mr. Sukharev, who has told the Moscow radio publication Interfax that he would not resign, said in parliament Tuesday that he did not disclaim responsibility. But "Gdlian and Ivanov must now answer for their acts," he said.

The two have already lost their magistrates' jobs and would face prosecution if deputies decided to lift their parliamentary immunity.

Mr. Sukharev also accused the two magistrates of having committed a "gross political provocation through their insinuations against the president".

Mr. Ivanov recently hinted that Soviet leader Mikhail Gorbachev might have been implicated in corruption scandals during his career but later retracted his accusations.

Radical deputy Boris Yeltsin, making a reappearance in parliament after a

month's absence because of a heart complaint, defended the two magistrates who had only committed "mistakes in their job".

#90107d9620 04/17/1990 ~French/German News Agency

NEW DELHI (APRIL 17) - Indian Prime Minister Vishwanath Pratap Singh said Tuesday he would expand his four-month-old cabinet by the weekend to relieve the burden of ministers holding more than one portfolio.

Mr. V.P. Singh cited as an example Parliamentary Affairs Minister Parvataneni Upendra, who is also Minister of Information and Broadcasting.

The multi-party National Front government assumed office in December after beating former premier Rajiv Gandhi's Congress (I) party in November polls.

Those who have heavy work loads will be given "assistants" and the cabinet will become three-tiered, Mr. V.P. Singh said, suggesting that new cabinet members would be deputy ministers.

The present 22-strong cabinet consists of 17 full-fledged cabinet ministers and five junior ministers of state, compared to a cabinet of almost twice that size named by his predescessor.

#90107d9770 04/17/1990 ~French/German News Agency

BANGKOK (APRIL 17) - Khmer Rouge troops are preparing an attack in northwestern Cambodia following a report that Phnom Penh forces are stockpiling arms and ammunition for a major offensive, a Khmer Rouge official said Monday.

Khmer Rouge Commander Sok Pied said his forces had ordered 700 soldiers to attack the strategic Highway 5, which links the border town of Poi Pet to the northwest Cambodian town of Sisophon.

The troops were armed with mortars and heavy artillery shipped in from

"friendly countries," he said.

The main targets of the attack include Phum Kop, Phum Nimit and Dong Arahn, key firebases for Phnom Pehn forces which protect the western approach to strategic Sisophon, he said.

"We will have good news for you soon," Mr. Sok Pied told reporters at the border.

Cambodian traders who have travelled along Highway 5 told reporters that government soldiers had large stocks of artillery and mortar amunition, as well as Soviet-made BM-21 surface-to-surface rockets at Pho Sam Ton.

Meanwhile, army-run television reported that the Thai army is preparing to evacuate people from along the Thai-Cambodian border due to anticipated conflict between Phnom Pehn troops and the three guerrilla factions.

The report quoted Army Chief of Staff Air Chief Marshall Pisit Salikoopt as saying that Phnom Penh's troops could soon launch an offensive against the resistance, harming the security of people on the border.

#90107d9930 04/17/1990 ~French/German News Agency

EAST BERLIN (APRIL 17) - New East German Defense Minister Rainer Eppelmann Tuesday predicted two German armies for the foreseeable future.

Even after the unification of the German states the East German National People's Army would ''continue to exist for a foreseeable future'', Eppelmann said in an interview with East German radio.

As long as there were two military blocs in Europe there would be two German armies. Eppelmann stressed thereby the ''security policy independence'' of the present East German territory.

The minister said he took seriously the security interests of the Soviet Union, adding that there would shortly be talks between East Berlin and Moscow on the issue.

There was no pressing need for talks with representatives of the North Atlantic Treaty Organization (Nato), he added. No Nato troops were to be stationed in the present East German territory.

Eppelman said he favored an early meeting with his West German counterpart, Gerhard Stoltenberg.

#90107d9990 04/17/1990 ~French/German News Agency
LONDON (APRIL 17) - British Prime Minister Margaret Thatcher, who once said she was proud to be dubbed "The Iron Lady", might be less flattered to learn from the latest issue of Plus Magazine that at least one nine-year-old Briton thinks she is the "Iron Curtain".

A survey of general knowledge among 700 young schoolchildren in England and Wales showed that only 17 percent of them could correctly identify the EEC as the European Economic Community. Others confused the initials with those of chlorofluorocarbons, the gases which destroy the earth's protective ozone shield.

The first name of author Salman Rushdie -- who went into hiding after the late Ayatollah Khomeini branded his novel "The Satanic Verses" as a blasphemy worthy of death -- led some children to reply that he was a fish. Another answer showed that last year's scandal in Britain about food infected with the salmonella bacteria was still alive in the memory of a child who asserted that "Salman Rushdie is what you get if you do not cook meat properly".

In the popularity stakes, Nelson Mandela, the black nationalist leader recently freed after 27 years in a South African jail, received 68 percent of the votes, to 49 for Soviet President Mikhail Gorbachev.

#90107p3248 04/17/1990 ~PR Newswire
OREM, UT (APRIL 17) PR NEWSWIRE - Wicat Systems Inc. (NASDAQ: WCAT), announced today it has been awarded a contract by Douglas Aircraft Co. (Long Beach, Calif.), a division of McDonnell Douglas, for MD-11 computer-based maintenance training for the Centralized Fault Display System (CFDS) Part Task Trainer (PTT). The contract is valued at approximately $800,000.

Under the terms of the agreement, Wicat will design and develop modelled, data-driven simulation of the CFDS device, located in the cockpit of the aircraft. The new training program will instruct line maintenance technicians on the proper identification and isolation of faults monitored by the CFDS.

Upon completion of the training project, expected in May, Douglas Aircraft will implement its training courseware at its Long Beach facility. Wicat will also provide 25 CFDS PTTs to be used in the training program.

In making the announcement, Wicat President and CEO, Robert W. Mendenhall stated, "McDonnell Douglas has established itself as an innovator in computer-based training within the aviation industry." He added that this latest development project is further evidence of their commitment to

providing the best training possible for their new, highly sophisticated aircraft.

Wicat Systems is a world leader in technology-based training and education solutions, providing products and services to help clients achieve 30 to 50 percent learning improvement in schools, industry and government. Wicat's stock is traded in the NASDAQ market under the symbol WCAT.

#90107p3268 04/17/1990 ~PR Newswire

NEW YORK (APRIL 17) PR NEWSWIRE - Salen Lindblad Cruising (SLC), the expedition cruise line, is responding to consumer demand for eastern bloc travel with the addition of a second Black Sea voyage aboard its 130-passenger expedition ship, the Caledonian Star.

The first voyage, sailing from Istanbul on April 22, 1990, was finalized early this year, and within several weeks had virtually sold out. The second voyage, almost identical to the April expedition, sails from Istanbul on Sept. 19, 1990 and returns to the Turkish port on Oct. 2, 1990. The two-week expedition visits ports in Turkey, Rumania, Bulgaria and the Soviet Union.

Ports of call are Istanbul, Samsun and Trabzon in Turkey; Sochi, Yalta and Odessa in the Soviet Union; Sulina, Tulcea and Constantza in Romania, and Nessebur in Bulgaria.

Highlights of the voyage include Tulcea in Romania, a region that boasts more than 300 species of birds, where the Danube River and the Black Sea come together; Yalta, where the Yalta Conference was attended by Roosevelt, Churchill and Stalin in 1945; Odessa, the heart of the "Soviet Riviera," also known as "the pearl of the Black Sea;" Nessebur, a rocky peninsula that is one of the oldest settlements in the Balkans, and Sochi, the largest seaside resort in the U.S.S.R.

The Caledonian Star, a small vessel with a warm and friendly ambience like a first class club, has a wide range of facilities including library, lecture hall, observation deck, swimming pool, single seating dining room, two lounges and 76 outside staterooms.

In the spirit of glasnost, travel from western countries to the Soviet Union and eastern European countries is on the upswing. However, the success of the Caledonian Star's Black Sea program may have as much to do with the expeditionary nature of these voyages, which allows for more flexible shore excursions than is possible on a conventional cruise.

Salen Lindblad Cruising was formed in 1982 and is based in New York City. The line is building the world's first truly "environment-friendly" expedition ship, the M.S. Frontier Spirit, which sails her maiden voyage in the South Pacific in November, 1990. The vessel is, in fact, the first expedition ship to be built in 16 years. Plans to build a second vessel, with partners Mitsubishi Heavy Industries, Mitsubishi Corporation, NYK line and Hapag-Lloyd, are in the works.

For further information, or for a brochure describing these and other voyages, contact Salen Lindlad Cruising, 133 East 55th Street, New York, New York, 10022, or call toll-free, 1-800-223-5688.

WHITE PLAINS, NY (APRIL 17) PR NEWSWIRE - At the SuperComm 90 trade show in Atlanta, NYNEX Information Solutions Group, Inc. and Sun Microsystems, Inc. (NASDAQ: SUNW) today announced an agreement to jointly pursue large-scale systems and network integration projects in the commercial market, both domestically and internationally.

NYNEX and Sun are concentrating on the banking, insurance, brokerage/investment, manufacturing and health care industries. As a Sun Commercial System Integrator, NYNEX will provide customized application solutions and network integration, and will custom design and install Sun SPARC(TM)-based solutions. Both companies are building organizations to support these efforts, which will include joint sales, marketing and development.

Sun's SPARC systems support customers migrating toward open, distributed computing systems, and offer advance networking, broad connectivity and ease of use through the intuitive OPEN LOOK(TM) graphical interface.

"Sun's reputation as a premier UNIX workstation vendor will help us succeed in these promising markets," said Gad Selig, vice president- NYNEX information solutions group. "Using our particular expertise in networking, we will work with Sun to bring the next generation advantages of true distributed computing to commercial customers."

"With customer demand for Sun systems growing quickly in the commercial sector, Sun is forming strategic partnerships with established commercial integrators like NYNEX in order to offer tailored solutions," said Ed Zander, vice president of corporate marketing at Sun. "An industry leader like NYNEX truly understands the needs of the business user."

NYNEX Information Solutions Group, Inc., a subsidiary of NYNEX Corporation (NYSE: NYN), is a leading provider of systems and network integration, industry and cross-industry application software and professional services. The company has more than 6,000 employees in 13 countries and more than 30 U.S. cities.

Sun Microsystems, Inc., headquartered in Mountain View, Calif., is a leading worldwide supplier of network-based distributed computing systems, including professional workstations, servers and UNIX operating system and productivity software.

#90107p3275 04/17/1990 ~PR Newswire

COSTA MESA, CA (APRIL 17) PR NEWSWIRE - Arthur E. Svendsen, chairman of the board of the managing general partner of Standard Pacific L.P. (NYSE: SPF), today announced results for the quarter ended March 31, 1990.

For the quarter, Standard Pacific earned $18,712,000 ($.68 per unit) on revenues of $99,175,000. This compares with earnings of $23,591,000 ($.86 per unit) on revenues of $102,457,000 a year ago. The 1989 partnership income was positively impacted by a gain of approximately $1.5 million ($.06 per unit) from the sale of an industrial building located in Orange County, Calif.

Standard Pacific's revenues and earnings were impacted by the softening of the California housing market, which began in the fourth quarter of 1989. As the market softened, sales and marketing costs increased over the previous year's levels. The increase in these costs contributed to reduced margins from homebuilding operations.

Svendsen stated, however, that the net new home order rate during the first quarter of 1990 increased substantially over the rate experienced during the fourth quarter of 1989. Further, as of March 31, 1990, Standard Pacific's backlog of presold homes for future delivery increased to 604 homes.

In announcing the results, Svendsen also reported the estimated taxable income per partner unit for the quarter ended March 31, 1990, of approximately $.57 per unit based on the partnership's inside tax basis.

Standard Pacific L.P. operates primarily as a geographically diversified builder of medium-priced single family homes with a majority of its operations in California. In addition, Standard Pacific L.P. assists homebuyers in obtaining financing for home purchases through its

wholly-owned subsidiary, Standard Pacific Savings F.A. Standard Pacific L.P. is also engaged in the manufacture and marketing of movable and acoustical office partitions and wood office furniture through its wholly-owned subsidiary, Panel Concepts L.P.

#90107p3284 04/17/1990 ~PR Newswire

BETHEL, CT (APRIL 17) PR NEWSWIRE - Duracell, the world's leading manufacturer of alkaline batteries, has developed an in-pack battery tester that will be included with the most popular-size Duracell(R) alkaline batteries beginning in May.

Called the Copper Top(TM) Tester, the patented device determines how much power is left in a battery when a consumer places the appropriate- size battery in the tester compartment that is part of the package. Once the Tester is squeezed to the top and bottom of the battery, a liquid crystal light bar on the front of the Tester provides the battery's power reading.

The "Good" level indicates ample remaining battery power. The "Replace" level indicates it's time to think about battery replacement.

"More than four years of research has been devoted to the development of Tester," says Charles Perrin, president of Duracell U.S.A. "Tester truly adds consumer value to Duracell batteries -- value that puts an end to consumer concern about battery freshness," he adds.

According to Duracell research, consumers are expected to use Tester frequently, particularly to test batteries before an important event such as a wedding, or baby's first steps; to test batteries stored in a drawer at home to determine remaining service life; and to determine if it's time to replace batteries in devices, such as clocks, or flashlights.

The Copper Top(TM) Tester is Duracell's latest product innovation in the competitive alkaline battery category. The company was first to introduce the "freshness dating" feature on blister packs in 1987 and first to print an "install by" date directly on the batteries.

Extensive consumer research revealed the popularity of the Tester feature, as more than 30 percent of competing brand users said they would try Duracell to receive the in-pack tester.

Tester will initially be offered as a permanent component of all AA- size four packs, AAA-size two packs, and C and D-size two packs. Subsequently, other Duracell alkaline battery packs will include the battery tester.

CONTACT: Jim Donahue, 203-796-4654, or Brian Maloney of Ogilvy & Mather PR, 212-951-5486, for Duracell.

#90107p3288 04/17/1990 ~PR Newswire

SAN DIEGO (APRIL 17) PR NEWSWIRE - First National Corp. (AMEX: FN) parent company of First National Bank, reported record first quarter earnings of $1.3 million, an increase of 29.8 percent from earnings of $1 million in first quarter 1989.

Fully diluted earnings per share were 40 cents, which compared favorably to first quarter 1989 earnings of 33 cents per share.

Total assets on March 31, 1990, increased 27.3 percent to $578.1 million compared to $454 million on this same date last year. Loans also increased 18.2 percent to $380.9 million from 1989 first quarter loans of $322.3 million. Deposits grew to $528.5 million, a 35.2 percent increase from $391.1 million on March 31, 1989.

Net charge-offs as a percent of average loans were .32 percent for the first quarter compared to .29 percent for the same quarter in 1989. The allowance for loan losses stands at 1.14 percent of loans outstanding at the end of first quarter.

Nonperforming assets as a percent of loans plus OREO was .83 percent at March 31, 1990. Coverage is excellent with the allowance for loan loss to nonperforming loans at 140.6 percent.

The company's primary capital ratio was 7.19 percent at March 31, 1990. Shareholders' equity was $37.5 million with a book value of $11.88 per share.

In other areas, the company's presence up the I-15 corridor continues to progress with the expansion of the Riverside, Calif., office. First National will also expand into La Jolla, Calif.'s Golden Triangle area by opening an office during the third quarter.

First National Corp. has seven banking offices and four loan production offices throughout Southern California and Nevada and is the second largest bank headquartered in San Diego.

MILPITAS, CA (APRIL 17) PR NEWSWIRE - Unisys Corporation (NYSE: UYS) and

Zitel Corporation (NASDAQ-NMS: ZITL) announced today that they have entered into a comprehensive, multi-faceted agreement for the development, manufacturing and marketing of solid state disk (SSD) products for use with Unisys A/V/1100/2200 computing systems. The agreement applies to Unisys customers worldwide with existing and planned mainframe installations, and is effective immediately.

Under the agreement, the two companies will co-market Zitel's SSD products in the United States and Western Europe. Zitel will manufacture the SSD products at its facility in Milpitas, Calif. The Unisys sales force will market the products in the rest of the world, and provide customer service support worldwide for currently installed SSD products and future installations.

Unisys and Zitel will develop enhancements for the current Zitel SSD products, which will include the adoption of industry standard interfaces and increases in density. The companies will also collaborate on the design and development of future new products.

According to Marlin Kovaleski, Unisys vice president for peripheral products and strategic marketing, "This agreement makes sense in terms of enhancing product availability and adding value to the Unisys customer. Our partnership with Zitel will allow Unisys to concentrate in other product areas central to our long-term strategic plans."

Unisys estimates that the value of the agreement between the companies may exceed $200 million over the next few years if all opportunities under the agreement are explored.

Zitel Corporation (NASDAQ-NMS: ZITL), with corporate offices in Milpitas, is a publicly owned designer and manufacturer of advanced semiconductor memory systems for both OEMs (original equipment manufacturers) and business end users. Zitel has offices in the United States, England and France.

Unisys Corporation (NYSE: UYS) is a $10 billion manufacturer of commercial information systems, defense systems and related services. It has more than 80,000 employees and 60,000 customers in over 100 countries.

#90107p3295 04/17/1990 ~PR Newswire

BUFFALO, NY (APRIL 17) PR NEWSWIRE - Goldome (NYSE: GDM) today reported net income of $25.4 million, or $.88 per share, for the quarter ended March 31, 1990, compared to a loss of $38.8 million, or $1.41 per share,

for the first quarter of 1989.

Results for the recent quarter were supported by an improved net interest margin, reduced expenses, and a gain in excess of $20 million from the sale of securitized loans.

Goldome's net interest income in the first quarter of 1990 was $41.2 million, compared to $34.7 million in the first quarter a year ago, and $33.9 million in the fourth quarter of 1989. Goldome's interest margin has strengthened each quarter subsequent to the major restructuring of the bank's investment portfolio which began in the second quarter of 1989.

Total operating expenses in the first quarter of 1990 amounted to $66.3 million, compared to $87.6 million for the previous quarter and $103.2 million for the first quarter of 1989. Salaries and employee benefits for the recent quarter were $24.1 million, compared to $39.5 million in the first quarter of 1989, and $24.6 million in the fourth quarter of 1989.

The difference between interest rate sensitive assets and liabilities which reprice within one year narrowed from a negative gap of 29.2 percent of total assets at the end of the first quarter of 1989, and a negative 19.5 percent at the end of 1989, to a negative gap of 17.5 percent of total assets at the end of the first quarter of 1990.

During the first quarter of 1990, Goldome finalized the sale of $390.6 million of securities backed by second mortgages originated by Goldome Credit Corp., the company's Birmingham, Ala.-based consumer lending subsidiary, and recorded a gain in excess of $20 million. The proceeds from this sale were used to further reduce the bank's short- term, variable-rate liabilities and decrease the vulnerability of net interest income to interest rate fluctuations.

Goldome is a consumer banking company with retail bank franchises in New York State and Florida.

PITTSBURGH (APRIL 17) PR NEWSWIRE - National Intergroup, Inc.(NYSE:NII) today announced that it has withdrawn its proposal, submitted on Dece. 20, 1989, to acquire the outstanding Cumulative Convertible Preference Units of Permian Partners, L.P., not currently owned by it.

A wholly-owned subsidiary of NII is the general partner of Permian Partners. Under the proposal, holders of the Partnership's Preference Units would have received $4.00 per unit in cash, reduced dollar for

dollar for any further distributions made on the Preference Units, other than the $0.2875 per unit distribution in respect of the quarter ending Dec. 31, 1989.

NII stated that the independent directors of the general partner of the Parntership, who had been requested to review the proposal, had advised NII that, after consultation with their financial adviser, they could not recommend NII's proposal. NII further stated that it continues to believe that the proposal is an attractive one for Unitholders and regrets that the transaction will not go forward.

#90107p3301 04/17/1990 ~PR Newswire

PITTSBURGH (APRIL 17) PR NEWSWIRE - Mellon Bank Corp. (NYSE: MEL) today reported net income for the first quarter of 1990 of $65 million, compared with income of $53 million, before extraordinary gains, in the first quarter of 1989.

Fully diluted earnings per common share were $1.25 in the first quarter of 1990, vs. $1.10 in the first quarter of 1989, excluding extraordinary gains.

While achieving increased earnings, the corporation also continued to significantly reduce its medium- and long-term loans to Lesser Developed Countries (LDC). Excluding Mexican loans restructured under the 1989 Brady Plan refinancing, medium- and long-term LDC loans were $65 million at March 31, 1990.

"Our first quarter results represent strong performance by the corporation " said Frank V. Cahouet, chairman, president and chief executive officer of Mellon Bank Corp. "Many of our businesses performed well, we reduced expenses, and we effectively neutralized the LDC debt issue." Cahouet noted that earnings per share, excluding extraordinary gains, were at their highest quarterly level in more than three years.

Compared with the first quarter of 1989, the quarter's positive results reflected increases in service fee revenue, trading revenue and other revenue, as well as a decrease in operating expense. These factors more than offset a decrease in net interest revenue.

Service fee revenue for the quarter was $171 million, compared with $163 million in the first quarter of 1989. Trading and other revenue for the quarter increased to $12 million from $5 million the prior year. Operating expense for the quarter decreased to $276 million, from $283 million in the first quarter of 1989. Net interest revenue was $199

million, compared with $212 million the prior year.

The provision for possible credit losses was $35 million, unchanged from last year's first quarter. Nonperforming assets, excluding LDC loans, increased $9 million from year-end 1989, to $545 million at March 31, 1990.

With assets of $30.8 billion at March 31, 1990, Mellon Bank Corp. is one of the nation's 25 largest bank holding companies. Through its subsidiaries, it provides wholesale, middle market and retail banking, as well as numerous service products including trust and investment, cash management and financial data processing.

#90107p3303 04/17/1990 ~PR Newswire

SAN DIEGO (APRIL 17) PR NEWSWIRE - Great American Bank, SSB (NYSE: GTA) today announced the Office of Thrift Supervision (OTS) has approved its capital plan. As approved by the OTS, the capital plan requires a capital infusion of approximately $350 million that would bring the bank into compliance with all three capital requirements by Dec. 31, 1990.

Great American also announced fourth quarter and 1989 year-end results. For the quarter ended Dec. 31, 1989, Great American recorded provisions for loan and foreclosed real estate losses totaling $271.2 million, which contributed to a net loss for the quarter of $198.9 million or $8.30 per share, fully diluted, compared to net income of $19.8 million or $.80 per share, fully diluted, for the same quarter in 1988.

During 1989, Great American recorded provisions for loan and foreclosed real estate losses totaling $405 million, which resulted in a net loss for the year of $263.4 million or $11 per share, fully diluted. This compared to net income for 1988 of $49.3 million or $1.99 per share, fully diluted.

At Dec. 31, 1989, shareholders' equity was $373.5 million or 2.35 percent of Great American's total assets of $15.9 billion. This compared to shareholders' equity at Dec. 31, 1988, of $646.8 million or 4.01 percent of the bank's total assets of $16.1 billion.

At Dec. 31, 1989, Great American's tangible capital of $85.9 million or .55 percent of adjusted total assets was $148.2 million below its required tangible capital of $234.1 million. Its core capital of $299.9 million or 1.92 percent of adjusted total assets was $168.4 million below its required core capital of $468.3 million; and its risk-based capital of $494.2 million or 3.74 percent of risk-weighted assets was $351.3 million below its required risk-based capital of $845.5 million.

A dividend of $34.6 million was paid to Great American by its real estate development subsidiary on Feb. 16, 1990, which if paid by year-end 1989 would have increased the year-end total of tangible capital to $120.5 million or .77 percent of adjusted total assets, and correspondingly would have increased core and risk-based capital.

Great American, established in 1885, is a regional savings bank which at Dec. 31, 1989, had 213 retail branches and 16 loan offices located primarily in Western states, and consolidated assets of $15.9 billion.

#90107p3309 04/17/1990 ~PR Newswire

WASHINGTON (APRIL 17) PR NEWSWIRE - U.S. Department of Health and Human Services (HHS) Secretary Louis W. Sullivan, M.D., today announced that the Food and Drug Administration has licensed a new immune globulin to help protect transplant patients from the severe, potentially fatal effects of cytomegalovirus infections that can be carried by donated kidneys.

FDA approved Cytomegalovirus Immune Globulin Intravenous (Human), or CMV-IGIV, for treating kidney transplant patients who show no signs of infection with cytomegalovirus prior to their surgery, but who are receiving kidneys from cytomegalovirus positive donors.

CMV-IGIV is derived from human plasma that contains high concentrations of cytomegalovirus antibodies. When CMV-IGIV is administered to uninfected patients shortly before and for some time after they receive their transplanted kidneys, it wards off the severe effects of subsequent cytomegalovirus infection. Since people infected with cytomegalovirus before their transplant surgery already have the antibodies necessary to ward off the severe effects of this infection, they do not require this CMV-IGIV.

The approval is based on a controlled trial and an open study protocol of the immune globulin conducted by the drug's sponsor, the Massachusetts Public Health Biologic Laboratories of Jamaica Plain, Mass. These studies demonstrated that CMV-IGIV could dramatically reduce the incidence of severe cytomegalovirus infection in kidney transplant patients, and indicated that it might also reduce related deaths.

The immune globulin has been available to physicians treating kidney transplant patients through a Treatment IND (investigational new drug application) since October 1987.

The Treatment IND mechanism was established by FDA to allow patients with serious or life-threatening conditions for which there are no satisfactory treatments to obtain promising experimental drugs.

Physicians interested in obtaining CMV-IGIV can contact the American Red Cross, Northeast Region, which is distributing the product, at 617-461-0891.

#90107p3313 04/17/1990 ~PR Newswire

PHILADELPHIA (April 17) PR NEWSWIRE - Scott Paper Co. (NYSE: SPP) today reported that its first quarter 1990 earnings per share decreased 27 percent, from $1.12 in 1989 to $0.82.

Net income for the first quarter declined 31 percent, from $86.5 million to $60.1 million in 1990. Dollar sales for the first quarter increased 2 percent to a record of $1.30 billion from $1.27 billion in 1989.

Philip E. Lippincott, Scott's chairman and chief executive officer, commented that "the decline in our first quarter earnings was principally due to significantly lower results from our S.D. Warren printing and publishing papers business, a shortfall in our foodservice business and higher interest expenses."

Scott's overall results in the first quarter of 1990 were impacted by higher interest expense due to an increase in the company's debt level resulting from the financing of its capital expansion program and the purchase in 1989 of its common stock warrants. In the first quarter of 1990, earnings per share were calculated on the basis of fewer shares, reflecting the purchase of these warrants.

#90107p3317 04/17/1990 ~PR Newswire

FAIRFIELD, CT (APRIL 17) PR NEWSWIRE - General Electric Company's (NYSE: GE) earnings per share for the first quarter of 1990 were $1.06, up 13 percent from $0.94 in the first quarter of 1989, Chairman John F. Welch, Jr. reported today. Net earnings were $950 million, up $101 million, or 12 percent from $849 million for the first quarter of 1989.

Consolidated revenues were $12.6 billion in 1990's first quarter, an

increase of 6 percent from $11.9 billion for the comparable 1989 period.

Welch said: "The continuation of double-digit earnings growth into a fourth year reflects solid operating margin improvement from continued productivity gains. Operating margin on sales of goods and services was 11.8 percent for the first quarter of 1990. This was a record first quarter and was more than one full point above last year's 10.7 percent.

"Very strong earnings improvements were reported by GE Capital, Power Systems and Aircraft Engines. Other strong contributions to the higher earnings for the quarter came from Lighting, Medical Systems, Electrical Distribution and Controls, and Transportation Systems.

"Incoming order trends in the first quarter of 1990 generally continued the pattern that developed in 1989, with substantial strength in bookings for longer-cycle businesses. New orders for Power Generation were up 60 percent from last year's first quarter, and Medical Systems equipment orders ran 25 percent ahead of a year ago. Aircraft Engines total backlog, including options, was at the $35 billion level, following significant new orders from Lufthansa and Aeroflot, the Soviet National Airline. Incoming order rates for short-cycle markets, while relatively flat for the quarter, turned up in March. The company's growing global presence was apparent, particularly in Plastics where strong March orders in Europe and Asia more than offset softness in domestic markets.

"The recent trend in short-cycle orders, continued strength in longer-cycle businesses, and improved operating margins from company-wide productivity gains give us confidence that 1990 will be another excellent year.

"As noted earlier, growth in earnings per share outpaced growth in net earnings as GE's $10 billion share repurchase program began to have an impact. Under the program, the company reacquired 11.6 million shares at a cost of $728 million during the first quarter, bringing the total shares acquired to 15.3 million at a cost of $963 million since inception of the program in November 1989."

ST. LOUIS (APRIL 17) PR NEWSWIRE - Southwestern Bell Corporation (NYSE: SBC) today reported net income of $247.8 million for the first quarter of 1990, compared with $238.8 million for the first quarter of 1989. Revenues for the three months ended March 31 were $2,129.2 million, up from $2,057.6 million for the first quarter of 1989.

Earnings per share for the first quarter of 1990 were $.82, compared with $.79 for the comparable 1989 quarter. Return on shareowners' equity was 11.74 percent, up from 11.12 percent in the first quarter of 1989.

"Much of our improved performance is the result of increased access lines in the telephone company and growth in our cellular telephone business," said Edward E. Whitacre, Jr., chairman and chief executive officer. "Our cellular customer base increased by 15 percent in the first quarter and 63 percent in the last in the last 12 months."

Southwestern Bell Mobile Systems continued to attract a record number of new cellular telephone customers in its 24 markets nationwide. Mobile Systems added 59,000 new customers during the first quarter -- more than double the number of new customers added during the same period last year. It ended the quarter with more than 441,000 customers compared with 270,000 last year. With 30 million potential customers, this represents a penetration rate of 1.5 percent.

Southwestern Bell Telephone Company added more than 115,000 access lines during the first quarter, compared with 94,000 during the first quarter of 1989.

Positive adjustments resulting from agreements regarding past network access revenues, partially offset by various rate reductions, were key factors that contributed to the increase in net income.

"I feel confident about how the decade has begun for Southwestern Bell. In the next three quarters, we'll continue working toward more responsiveness in the marketplace and promoting regulatory reforms," Whitacre said.

Southwestern Bell Corporation, based in St. Louis, is an international communications corporation with 1.1 million shareowners. It provides a variety of products and services through its principal subsidiaries including Southwestern Bell Telephone Company, Southwestern Bell Yellow Pages, Southwestern Bell Telecom, Southwestern Bell Mobile Systems, Metromedia Paging Services, Mast Advertising & Publishing, and Gulf Printing.

#90107p3334 04/17/1990 ~PR Newswire

CALHOUN, GA (APRIL 17) PR NEWSWIRE - Carriage Industries Inc. (NYSE: CGE) a leading manufactuer of carpet for specialized markets, today reported record net sales of $30.4 million for the third quarter ended April 1, up from $26.7 million last year.

Earnings for the quarter were $178,000, or four cents per share, compared with $77,000, or two cents per share, last year.

Sales for the first nine months were $82.9 million, up from $74.0 million a year ago. Earnings for the nine months were $236,000, or five cents per share, compared to $1,570,000 or 32 cents per share, for the same period last year.

"Although the quarter's sales gain was primarily due to the acquisition of Bretlin, our earnings improvement was more broad based," said Clarence E. Harris, chairman and chief executive officer. "In fact, after-tax earnings would have been $450,000 higher had we not had charges related to the discontinuance of a Medart division which manufactured material handling equipment."

Commenting on the future, Harris said, "While we still expect some weakness in a few of our niche markets, improving market conditions and better manufacturing efficiencies should result in increased profitability."

Carriage is a vertically integrated manufacturer of carpet supplying specialized markets. The company is a leader in the manufactured housing, recreational vehicle, marine and exposition/trade show industries. Carriage also produces carpet for the contract/residential, hospitality/commercial and home center/needlebond markets and operates a metal fabricating company.

Corporate offices are in Calhoun, Ga. Sales offices and distribution centers are strategically located across the United States. The company's transportation subsidiary, Carriage Transport, operates one of the largest trucking fleets in the carpet industry.

#90107p3335 04/17/1990 ~PR Newswire

ATLANTA (APRIL 17) PR NEWSWIRE - Unisys Corp. (NYSE: UIS) today announced NAP/Open and a UNIX OS-based NAP application development environment, two major enhancements to the Network Applications Platform (NAP), a powerful voice processing system.

NAP integrates a digital telecommunications switch and intelligent application and database processors to provide the technical environment in which many applications can be easily developed.

NAP/Open is a communications linkage based on standard OSI protocols that provides an interface between NAP and external control processors. NAP/Open gives network service developers enormous flexibility in today's heterogeneous computing environments in that call connection and voice handling resources provided by NAP can be directed from virtually any standards-compliant computer system to the NAP.

"The exciting thing about NAP/Open is that it opens the capabilities of NAP to literally hundreds of potential application developers, implementing their services on computers as small as PCs or minicomputers " said Gary Alexander, President of Unisys Communications Industry Systems Division. Further, every external computer interfacing to NAP adds its processing power incrementally to the complex, producing a network-integrated voice handling system with more power than any of us had ever imagined."

The interface specification and command set will be available to service developers in mid-1990.

Unisys also announced that it is creating a UNIX OS-based application development environment that will take advantage of the NAP/Open interface. The development of a 'C' language command library will enable third party software providers to deliver a wide variety of applications more quickly to the service provider while protecting their investment in UNIX talent.

"Many of our customers have told us they want to utilize their existing and future investments in UNIX talent, equipment, databases, and applications to develop and/or support the exciting new network services that Unisys NAP provides. Moreover, they want to maximize the transportability of their applications to a variety of hardware platforms - both from Unisys and other vendors," Alexander said.

Any user, typically a telephone company, a communications carrier or an information provider will be able to extend all or a subset of the commands to third party developers of network services. The same set of

NAP commands used by NAP-hosted applications will be available to applications developed on external computer systems. Developers will have access to the full resources of NAP, which in its maximum configuration can include thousands of voice ports and over a hundred thousand hours of voice storage.

Unisys Corp. is a $10 billion manufacturer of commercial information systems, defense systems and related services. It has a 20-year history of providing computers to telephone companies, in which it has over a $1 billion installed base in all seven of the Regional Bell Holding Companies many independent Telephone companies and foreign PTTs. It has more than 80,000 employees and 60,000 customers in more than 100 countries.

#90107p3340 04/17/1990 ~PR Newswire

DAYTON, OH (APRIL 17) PR NEWSWIRE - NCR Corporation (NYSE: NCR) said today that first-quarter orders reached the highest level for any quarter in the company's history. Revenue increased slightly in the quarter, and earnings per share declined.

Earnings per share decreased 5 percent in the quarter to 73 cents, compared with 77 cents per share for the same period last year. Net income declined 15 percent in the quarter to $52 million, versus $61 million reported for the year-ago period. During the first quarter, NCR repurchased 1.6 million common shares under its share-repurchase program.

This program continued to have a favorable impact on earnings per share while negatively affecting net income. First-quarter revenue was $1,265 million, up 1 percent over last year's $1,250 million.

Consolidated worldwide revenue increased on both a U.S. dollar and local currency basis. NCR's operations in the United States and overseas recorded gains in revenue in the quarter.

The year-to-year decline in income was attributable primarily to lower gross margins and the share-repurchase program. The deterioration of gross margins in the quarter was due, in part, to the impact of lower-margin shipments to major accounts in the United States and Europe.

NCR Chairman and Chief Executive Officer Charles E. Exley, Jr., said, "The U.S. dollar value of first-quarter worldwide orders showed a substantial gain over the prior year and set an all-time record for any quarter. Orders in the United States showed a gain, while orders overseas achieved an all-time record with a substantial gain over the prior year. Growth was achieved in all of our markets aborad led by the Pacific Group," he

said.

Excluding the impact of currency changes on order backlogs in both periods the U.S. dollar value of worldwide orders in the quarter achieved a new high for any quarter and posted a good gain over the prior year. Total orders also showed a good gain when measured on a local currency basis.

"Several of our major product lines achieved new quarterly record for orders in the quarter. These included self-service financial terminals and retail terminal systems," Exley said. "In addition, worldwide orders of personal computers achieved new highs in value for any quarter, boosted by market acceptance of NCR's new PC386sx/MC and PC486/MC models.

"We are pleased with the strong order performance in the first quarter," Exley said, "which follows the good order performance shown in the prior two quarters. Although revenue and earnings results were in line with our expectations, we continue to be concerned about the competitive pressures on gross margins.

"With continuing good order performance, and emphasis on cost control, we still see the opportunity to achieve single-digit revenue and earnings growth for the full year.

"Our recently announced Open, Cooperative Computing strategy together with the continued high level of spending on research and development, will position NCR to take advantage of the emerging sixth era of computing," Exley said.

NCR Corporation develops, manufactures, markets, installs and services business information processing systems for worldwide markets.

#90107p3342 04/17/1990 ~PR Newswire

PITTSBURGH (APRIL 17) PR NEWSWIRE - Equimark Corp. (NYSE: EQK) today announced a consolidated net loss of $15,447,000 or $1.38 per common share for the quarter ended March 31, 1990.

This loss is within the projected range of operating results previously announced on April 9, 1990.

The net loss in the first quarter of 1990 is primarily due to a significant increase in the corporation's provision for possible loan losses and to losses taken due to the sale or writedown of certain nonperforming real estate.

In the first quarter of 1989, Equimark recorded net income of $5,681,000, or $0.50 per common share.

Alan S. Fellheimer, chairman and chief executive officer of Equimark, reiterated that "the first quarter loss represents a temporary setback in Equimark's five-year record of financial improvement.

"Continued uncertainties surrounding the economic climate in Equimark's marketplace have resulted in additional pressures that may affect the ability of certain Equimark borrowers to meet their obligations, together with an indicated reduction in the value of loan collateral including commercial real estate."

In this regard and in connection with the previously announced sale of its credit card business anticipated to occur in the second quarter of 1990, the corporation has taken measures to accelerate, at discounted values, the settlement of certain nonaccrual loans and the disposition of certain parcels of nonperforming real estate.

First quarter results include a substantial increase in the consolidated provision for possible loan losses which serves to replenish the reserve for loan chargeoffs taken during the period related, in part, to the accelerated settlements of nonaccrual loans at discounted values.

Similarly, the portfolio of nonperforming real estate has been written down to lower estimated net realizable values based upon current negotiations to dispose of certain properties.

CONTACT: Alan S. Fellheimer, 412-288-5500, or Michael E. Jehle, 412-288-5801.

#90107p3350 04/17/1990 ~PR Newswire

PITTSBURGH (APRIL 17) PR NEWSWIRE - Chambers Development Co. Inc. (AMEX: CDVA, CDVB) reported today that for this first quarter of 1990, net sales increased 60.6 percent, earnings from operations gained 57.7 percent, and net earnings rose 44.2 percent, compared with the same period of 1989.

For the three month period ended March 31, 1990, net sales reached $59 million, compared with $36.8 million during the first quarter of 1989, while earnings from operations advanced to $11.9 million from $7.6 million for the comparable 1989 period. Net earnings rose to $7.9 million for the first quarter of 1990, up from $5.5 million in the prior year.

Primary earnings per share for the quarter increased 25 percent to $.15 from $.12 reported in the first quarter of 1989, and fully diluted earnings per share of $.15 increased 36.4 percent from $.11 for the

comparable 1989 period. The earnings per share amounts have been adjusted to reflect the two-for-one stock split effected in the form of a 100 percent stock dividend, which was declared by the company April 11, 1990. The stock dividend will be distributed May 14, 1990 to all shareholders of record as of April 27, 1990.

"I am very pleased with these solid first quarter results," said John G. Rangos Sr., president and chief executive officer of Chambers. "I look forward to the remainder of the year with confidence."

Chambers Development Co., Inc., headquartered in Pittsburgh, is a leading environmental firm offering services in collection, hauling, recycling and landfill development.

#90107p3351 04/17/1990 ~PR Newswire

LOWELL, MA (APRIL 17) PR NEWSWIRE - Wang Laboratories Inc. (AMEX: WAN) today announced new pricing for its VS 5000 computers that can save customers an average of 25 percent and up to 40 percent of the price of previous entry-level configurations. The company also announced plans now under way for continuing development of its flagship VS computer family in the 1990s.

Wang also backed up its commitment to quality with a new buyer-protection program. Effective immediately, the company will offer a one-year limited warranty on new VS 5000 and VS 8000 central processing units. In addition Wang will deliver a free Wang FAX-150 facsimile machine to customers who purchase a new VS 8000 mid-range or VS 10000 high-end system. Customers will be encouraged to use the device to contact Wang Chairman Richard W. Miller if they are not fully satisfied with their new VS.

"Today's announcements reflect our continuing commitment to create products and services that focus on our customer's need for high performance, competitive pricing, and investment-protection," said Miller. "We are also expressing great confidence in the quality and reliability of the VS computer."

Wang introduced four new VS 5000 models offered in 12 configurations that range in price from $12,000 to $125,000. Prices for comparably configured systems previously listed at $18,400 to $139,000.

VS 5000 enhancements include an increase in base memory, the inclusion of a tape drive as a standard feature, and a price reduction on SCSI (Small Computer Systems Interface) peripherals. All new models are available

immediately and include the VS operating system, with its unique architectural ability to support integrated data, text, image, and voice applications on the same system.

The new VS 5000 entry-level model is configured with 2 megabytes (Mb) of main memory, a 145Mb disk, and a 150Mb streaming cartridge tape in a 5-slot system chassis. This configuration supports 10 users and is designed for customers who require a limited number of workstations for distributed applications.

Wang now offers a 150Mb streaming cartridge tape drive as a standard feature for VS 5000 systems, and has increased base memory for the VS 5000 Model 40 and Model 50 from 2Mb to 4Mb with no increase in price. This represents a $7,500 price decrease over previous VS 5000 configurations. SCSI option prices have been substantially reduced to lower the costs associated with adding additional disk or tape to a VS 500 installation.

Since its introduction in mid-1988, the VS 5000 has become the most popular in the VS product family, with more the 7,500 installed systems supporting applications that range from general-purpose data processing and office automation to software development to integrated imaging.

VS Development Wang's VS strategy reemphasizes Wang's long-term commitment to VS users and outlines projects for re-engineering the product line from a proprietary platform to an OPEN/Server environment -- an environment that will be available to the many thousands of installed VS processors as well as new systems.

"The enhancement of the VS hardware and system software platforms will continue to be a major development priority in the 1990s," said Miller. "As our new Applications Engineering groups begin to bring industry-specific products and services to the marketplace, the VS will continue to play a strategic role."

Wang perceives that during the 1990s, the VS will play an important role as a traditional mid-range computer system, as a strategic applications server in Wang's OPEN/Server and OPEN/Architecture environments, and as an integrated image server.

Wang will also continue to extend and enhance its VS platforms. Current development directions and priorities include:

-- Central processors: Wang will continue to leverage its state-of-the-art technology to enhance price/performance across the entire VS product family. The emphasis will be on larger, more powerful VS systems that can serve a greater number of users. Wang's primary central processor unit (CPU) development programs will focus on the extension of the VS 8000 and VS 10000 I/O architectures. The next processor generation

expected to come to market in early 1991, is currently in the advanced design phase.

-- Input/Output and peripheral environments: The I/O performance of the VS architecture, a significant product differentiator, will be extended and enhanced. In the VS 8000 and VS 10000 architecture, Wang will migrate to SCSI-based disks, tape peripherals, and controllers, enabling Wang to offer a common set of cost-effective peripherals across the entire VS family.

-- Communications: The VS is recognized within the industry as an excellent platform for multivendor integration, especially in IBM mainframe environments. Wang's planned addition of client/server communications will continue to strengthen this position. Wang plans to continue development of new generations of local and wide-area network and telecommunications controllers that will improve performance, and will migrate its networking software environments from proprietary architectures to those based on international or de facto standards.

-- Operating system: Wang will continue to enhance the VS/OS to provide support for increasingly larger populations, and to add enhancements that increase its value in mission-critical environments. Wang will also enhance its system software environment to improve support for both imaging and server environments.

CONTACT: Linda Volpe Kincaid, 508-967-6425, or Edward F. Clough, 508-967-2917, both of Wang Laboratories Inc.

#90107p3353 04/17/1990 ~PR Newswire

AKRON, OH (APRIL 17) PR NEWSWIRE - David L. Burner has been elected senior vice president of The BFGoodrich Company (NYSE: GR).

Burner, 51, currently is president of BFGoodrich Aerospace and will retain responsibility for the management of that division.

BFGoodrich Aerospace designs and manufactures aircraft wheels and brakes, ice-protection systems, evacuation systems, instruments and avionics and engineered fasteners for the aviation industry worldwide. The division also provides aircraft maintenance, repair and overhaul services. Division sales were $443 million in 1989--an increase of 34 percent over 1988.

Burner joined BFGoodrich in 1983 as vice president, finance for the company's Engineered Products Group. He served in several other management positions before being named executive vice president of the aerospace division in 1985. He was appointed president in 1987.

Before joining BFG, Burner was executive vice president and chief financial officer of ABS Industries in Willoughby, Ohio.

A 1962 graduate of Ohio University, Burner is an Ohio native and now lives in Hudson, Ohio. He is on the board of directors of the General Aviation Manufacturers Association and of INROADS/Northeast Ohio and is a trustee of the Ohio Aerospace Institute.

BFGoodrich is a major producer of vinyl resins and compounds and specialty chemical products, as well as a supplier of aerospace products and services to the commercial, civil and military aviation markets. Sales for 1989 totaled $2.4 billion.

DETROIT (APRIL 17) PR NEWSWIRE - Ford Motor Company (NYSE: F) has notified Lincoln-Mercury dealers that the base manufacturer's suggested retail price of the all-new 1991 Mercury Tracer will be $8,969 -- $389 lower than the price of the 1989 model.

The luxuriously equipped four-door LTS model, a new version of the Tracer using a high-performance DOHC 16-valve, four-cylinder engine, is priced at $11,219, and the five-door station wagon model of the 1991 Tracer is priced at $9,990.

Preferred Equipment Packages, offering discounts of $400-$650 on groups of popular options, will be available on the Tracer base four- door and wagon models. The various packages include such popular options as air conditioning, power steering, rear window defroster, and tilt steering column.

The suggested retail price of a comparably equipped Tracer base four-door and wagon model, including destination and delivery charges, and the Preferred Equipment Package most likely to be chosen by customers, reflects an average increase of 0.8 percent over the 1989 models.

Ross H. Roberts, Ford vice president and general manager of Lincoln-Mercury Division, said, "The 1991 Tracer will be a car of uncompromised quality and customer value. I am pleased we can punctuate that by placing such an attractive and competitive price tag on the Tracer.

"We believe our dealers will be in a very competitive position when the cars go on sale in June."

For example, the suggested retail price of the 1991 base four-door notchback model -- comparably equipped -- is $727 under the 1990 Toyota Corolla DX. The price of the 1991 model station wagon -- comparably equipped -- will be $587 under the 1990 Honda Civic wagon and $931 under the 1990 Toyota Corolla DX wagon.

Ford Motor Company also notified Ford and Lincoln-Mercury dealers of the prices of the 1991 Ford LTD Crown Victoria and Mercury Grand Marquis full-size sedan and station wagon models. The manufacturer's suggested retail price of a comparably equipped LTD Crown Victoria and Grand Marquis sedan, including destination and delivery charges, and the Preferred Equipment Package most likely to be chosen by customers, reflects an average increase of 1.8 percent over the 1990 models, or $354.

STAMFORD, CT (APRIL 17) PR NEWSWIRE - GTE (NYSE: GTE) today reported that consolidated net income for the first quarter of 1990 rose 8 percent to $355 million, compared with $329 million a year ago. Earnings per share also increased 8 percent to $1.05, compared with 97 cents reported in the year-earlier quarter. Consolidated revenues and sales were up 9 percent to $4.5 billion, compared with $4.1 billion the previous year.

The numbers reported today represent record-high results for any first quarter in the company's history.

"These record-high results were driven by a continued excellent performance from telephone operations and our other telecommunications businesses," said GTE Chairman and Chief Executive Officer James L. "Rocky" Johnson. "Electrical Products performed consistent with our expectations, taking into account competitive pressures and a softening in the automotive industry."

FORT MILL, SC (APRIL 17) PR NEWSWIRE - Springs Industries (NYSE: SMI) today announced lower sales and earnings for the first quarter of 1990.

Net sales in the first quarter were $459,201,000, down 2.7 percent from net sales of $471,862,000 in the first quarter of 1989. Net income was $7,563,000, or $.42 per share, down 50.5 percent from net income of $15,289,000, or $.86 per share, in the first quarter a year ago.

Walter Y. Elisha, Chairman and Chief Executive Officer, stated, "While we are disappointed with the drop in first quarter earnings, this is tempered somewhat by the fact we are comparing with an exceptionally good quarter a year ago. In both our home furnishings and apparel fabrics lines, the first quarter is usually our slowest season, and this was certainly true in 1990. Unusual conditions in early 1989 were an exception to our normal quarterly pattern.

"On the other hand, it must be recognized that Springs and the textile industry as a whole are not experiencing favorable market conditions at present. This is particularly true in the apparel fabrics area where our planned capacity reductions have been more than matched by market decline, leading to production curtailments and some unabsorbed fixed costs. While we would not expect these conditions to continue indefinitely, there is no present indication that our apparel fabrics business will improve in the current quarter. Certainly, the unrelenting growth in both fabric and garment imports is not helping a recovery.

"In our home furnishings and industrial groups, we experienced some decline in earnings from last year's banner first quarter, but not nearly to the extent felt in fabrics. In both these groups our order positions are satisfactory, and we expect to operate a normal schedule in plants serving these markets as the year progresses. As previously noted, our extensive modernization and plant conversion program peaks in 1990, and extraordinary project expenses and interruption costs will moderate home furnishings earnings throughout the year. Looking further forward, however, we are confident these one-time costs will prove to be wise as the new decade progresses."

#90107p3368 04/17/1990 ~PR Newswire

WORCESTER, MA (APRIL 17) PR NEWSWIRE - Genica Pharmaceuticals Corporation today announced that it has acquired an exclusive worldwide license from Columbia University in New York for two new tests for neurological diseases that heretofore have been very difficult to diagnose. The license is to the proprietary technology, including the patent application relating to the GM1 Autoantibody Test and to a proprietary MAG Autoantibody Test. The announcement was made jointly by Nigel Fleming, Ph.D., chairman, and James W. Hobbs, president and chief executive officer of Genica.

Both are immunodiagnostic tests that detect the presence of autoantibodies in patient blood serum samples, but are used in different conditions.

Developed at the Department of Neurology at Columbia University's College of Physicians and Surgeons, the MAG Autoantibody Test is the first definitive test available for polyneuropathies caused by antibody-mediated destruction of the myelin sheath that surrounds peripheral nerves. The destruction of the insulating sheath is thought to be caused by antibodies produced by a patient's immune system that react with his or her own tissues.

Symptoms of this disease, which strikes middle-aged and elderly adults, include tingling, burning and shooting pains in the hands and feet, as well as weakness, tremors and a staggering, wide gait. The disease is treatable with immunosuppressive drugs and/or plasmapheresis. The MAG Autoantibody Test is anticipated to be used to monitor therapy as well as to detect the condition.

The GM1 Autoantibody Test is used to detect increased levels of GM1 autoantibodies that have been implicated in several neurological disorders including motor and sensorimotor peripheral neuropathies and some lower motor neuron disorders. This test will also be used to monitor therapy.

Columbia University is tranferring the technologies, in accordance with the terms of the exclusive license, for the MAG and GM1 Autoantibody Tests to Genica. The company will offer them commercially in the second quarter of 1990. Testing of all samples will take place in Genica's reference laboratory located in the Massachusetts Biotechnology Research Park in Worcester, Mass.

Genica Pharmaceuticals develops and commercializes diagnostics and

therapeutics for neuromuscular and peripheral neurological diseases. Genica is dedicated to providing neurologists with emerging, innovative technologies that improve the quality of health care for their patients in a cost-effective manner.

#90107p3375 04/17/1990 ~PR Newswire

HOUSTON (APRIL 17) PR NEWSWIRE - Granada BioSciences, Inc. (AMEX: GBI) has signed a five-year contract to furnish genetically superior Holstein embryos and technical services to dairy farmers in the northern Spanish Province of Cantabria.

The Texas-based biotechnology and genetic engineering company has had numerous overseas projects over the past nine years. However, this is the second major contract which employs Granada's advanced reproductive technologies, reports David G. Eller, Granada chairman. An earlier contract covers embryo cloning products and services in the United Kingdom.

"This new agreement is expected to yield revenues of $12 million over its life span," Eller said. "We've already received an order for 300 embryos and expect sales will be in excess of 5,000 during the balance of the year."

The provincial government of Cantabria will subsidize half the cost of participation for local dairy farmers, and is joining with Granada in marketing the program within the region, he said.

According to Juan Hormaechea, president, and Vincente de la Hera, secretary of Cattle, Agriculture and Fisheries for Cantabria this is the first embryo transfer center in Spain.

"Not only will our dairy farmers have access to the best genetics available, our animals will be able to produce 15 to 18 calves per year instead of just one. The high quality of the imported embryos will make possible milk production of 10,000 kilos," Secretary de la Hera said.

Embryos from animals that exhibit superior performance will be offered at a cost of $350 and $500 each. The embryos will be supplied jointly by Granada BioSciences, Inc. and American Marketing Services of Richmond, Va.

Granada BioSciences will provide technical services to the project, including start-up supervision of Cantabria's newly-built embryo transfer center and the government's specially trained technicians, marketing assistance, and technical help in making the initial transfers.

Granada pioneered embryo transfer technology in the 1970s and extended its R&D activities to include sexing and cloning in the 1980s. The company produced the world's first cloned bovine triplets in August 1986 and successfully produced seven identical calves from a single embryo in 1987.

FORT WORTH, TX (APRIL 17) PR NEWSWIRE - Snyder Oil Corporation (NYSE: SNY) (the "company"), announced today that the 1989 annual report for Snyder Oil Partners L.P. (the "partnership"), one of the company's predecessors entities, which will be included in the company's annual report, will be delayed due to the recent consolidation of the partnership into the company. The report is expected to be mailed by mid-May.

In the interim, a copy of the Partnership's Form 10-K as filed with the Securities and Exchange Commission is available upon request.

The company was formed in March through the consolidation of the partnership and SOCO Holdings Inc., a privately-held oil company whose principal subsidiary was the general partner of the partnership. The company will continue the activities of its predecessors in the production and development of oil and gas, acquisitions, exploration and natural gas processing, tranportation and marketing. The company's stock is traded on the New York Stock Exchange under the symbol "SNY."

RICHMOND, VA (APRIL 17) PR NEWSWIRE - Reynolds Metals Company (NYSE: RLM) today reported first-quarter net income of $77.7 million, or $1.31 a share compared with net income of $124.5 million, or $2.15 a share (fully diluted) a year ago.

Revenues in the latest period were $1,396.7 million, down four percent from $1,455.5 million in the same quarter of 1989.

William O. Bourke, chairman and chief executive officer, said the company's first-quarter results were adversely affected by the steep decline in price levels for aluminum ingot and many aluminum fabricated products compared with a year ago.

"Aluminum ingot prices today are approximately 40 percent below where they were at the beginning of 1989, and we have seen varing degrees of price erosion for many fabricated aluminum products as a result," Mr. Bourke said.

"While the overall economy has been sluggish since late last year, especially in key automotive and construction markets, in recent weeks we have seen a quickening in aluminum demand which has been reflected in some price improvement and acceleration of order rates," he said.

"Our company's fundamentals continue to be strong, and we expect business to improve as the year unfolds," Mr. Bourke said.

The company's aluminum shipments in the latest quarter were up two percent to 319,700 metric tons, compared with 312,900 tons in the same period a year ago.

#90107p3395 04/17/1990 ~PR Newswire

MINNEAPOLIS (APRIL 17) PR NEWSWIRE - Norwest Corporation (NYSE: NOB) today reported record net income of $62.8 million for the quarter ended March 31, 1990, a 10.2 percent increase over the $57.0 million earned in the first quarter of 1989. Net income per common share was 66 cents, compared with 60 cents in the first quarter of 1989, an increase of 10.0 percent. Return on common equity was 19.7 percent and return on assets was 1.06 percent for the first quarter of 1990, compared with 19.3 percent and 1.11 percent, respectively, in the first quarter of 1989.

Lloyd P. Johnson, Norwest's chairman and chief executive officer, said, "Our record first-quarter earnings reflect a continuation of the strong earnings performance of each of our businesses. The banking group's record quarterly earnings were up 10.4 percent over 1989's first quarter, while Norwest Financial's earnings improved 32.0 percent over the same quarter.

"In view of the uncertain economy and slow regional real estate market," he said, "we provided $53.0 million for credit losses this quarter, thereby increasing our credit reserve by $12.2 million after charge-offs of $40.8 million. Our reserves are among the strongest in the industry. We believe this conservative reserving approach, our loan review practices and our policy of aggressively charging off problem loans place us in a strong position considering today's credit environment."

Norwest's net interest margin was 4.96 percent for the first quarter of 1990, compared with 4.70 percent in the fourth quarter of 1989. This increase is due to lower short-term borrowing rates and a shift in earning asset mix to consumer loans which earn a higher rate of return. Average loans and leases continued to grow in the first quarter of 1990 and were up 10.6 percent over the first quarter of 1989 and 0.7 percent over the fourth quarter of 1989.

Consolidated tax-equivalent net interest income in the first quarter of 1990 was $271.1 million, compared with $241.9 million in the first quarter of 1989, an increase of 12.1 percent, and $256.1 million in the fourth quarter of 1989. This increase from the first quarter of 1989 was due primarily to a 15.7 percent increase in average earning assets. Non-interest income increased 21.7 percent due primarily to increased mortgage banking fees and investment securities gains compared with investment losses in the corresponding quarter a year ago.

Norwest provided $53.0 million for credit losses for the first quarter of 1990, compared with $33.8 million in the same period a year ago and $44.5 million in the fourth quarter of 1989. Net credit losses totaled $40.8 million, compared with $32.6 million in the first quarter of 1989 and $49.7 million in the fourth quarter of 1989.

Norwest Corporation is a $24.7 billion diversified financial services organization providing banking, banking related and specialized financial services through a total of more than 1,160 offices in 47 states and internationally.

#90107p3400 04/17/1990 ~PR Newswire

ROCKFORD, IL (APRIL 17) PR NEWSWIRE - Sundstrand Corporation (NYSE: SNS) today reported first quarter 1990 sales of $401.2 million, an increase of 6.4 percent over first quarter 1989 sales of $377.1 million.

Earnings available for common stock in the first quarter of 1990 were $26.6 million, equivalent to $1.43 per share. Earnings available for common stock in the first quarter of 1989 were $23.0 million, equivalent to $1.24 per share.

The increase in sales reflected continued strength in the commercial aerospace and most industrial markets which more than offset the continued decline in military aerospace activity. Earnings from the increased sales were constrained by higher administrative expenses in the first quarter of 1990, by softness in end markets served by the company's heat transfer division, and by the integration of Maco-Meudon by the company's Sullair subsidiary.

Incoming orders for the company's industrial business segment for the first quarter of 1990 were materially higher than in the first quarter of 1989. Orders for the company's aerospace business segment for the first quarter of 1990 were slightly higher than in the first quarter of 1989.

Total unfilled orders on March 31, 1990, were $1,190.4 million compared to $1,184.1 million on March 31, 1989, and $1,161.0 million on Dec. 31, 1989.

Sundstrand Corporation, with 1989 sales of $1,595.4 million, is a market leader in the design, manufacture, and sale of a variety of proprietary, technology-based components and subsystems for aerospace (67 percent of 1989 sales) and industrial (33 percent of 1989 sales) markets. Sundstrand's common stock is listed on the New York, Midwest, and Pacific Stock Exchanges under the symbol SNS.

#90107p3409 04/17/1990 ~PR Newswire

CALGARY, ALBERTA (APRIL 17) PR NEWSWIRE - NOVA Corp. of Alberta (Toronto, Montreal, Alberta: NVA) reports today that the unaudited consolidated net income for the three months ended March 31, 1990, was $36 million on revenue of $1.2 billion, compared with a breakeven position in the last quarter of 1989, before adjustments for accounting changes and the write-down of certain investments, and $129 million on revenue of $1.3 billion in the first quarter of 1989.

Basic and fully diluted net income per common share were 11 cents, compared with a loss of 10 cents in the last quarter of 1989 and income of 51 cents and 48 cents, respectively, in the first quarter of 1989. The basic per share calculations are on a total of 299 million average common shares outstanding in 1990, compared with 298 million average common shares in the last quarter of 1989 and 245 million average common shares outstanding in the first quarter of 1989. The increase in average common shares outstanding was due to a common share rights offering in the fall of 1989.

Petrochemicals and plastics prices, while still substantially below those in the first quarter of 1989, were better than in the last quarter of 1989. Plastics profits in 1990 were reduced by temporary supply interruption for feedstock in the polystyrene business and profits continue to be reduced by the strength of the Canadian dollar versus the United States dollar.

Pipeline net income increased, reflecting the continuing expansion of the Alberta Gas Transmission Division's pipeline system to meet customer demand for service.

In late March, NOVA announced that it would evaluate offers from other corporations seeking the purchase of or merger with NOVA's Rubber Division which constitutes the global synthetic rubber business acquired as part of the Polysar acquisition in 1988. NOVA had intended to continue owning this business unit but has decided that it will now investigate other possibilities because of the strength of interest expressed. Terms of any transaction will be negotiated only if the value offered is fully attractive and would be subject to approval by NOVA's board of directors. On April 11, 1990, NOVA issued $100 million 12-5/8 percent Sinking Fund Debentures, Series 19. The proceeds from the issue were used to repay bank loans and notes issued to finance capital expenditures of the Alberta Gas Transmission Division pipeline system.

In February, the NOVA board of directors declared a quarterly dividend of 13 cents per common share, payable May 15, 1990, to shareholders of record at the close of business April 27, 1990.

NOVA is a widely held, shareholder-owned company operating internationally from world headquarters in Calgary, Alberta, Canada. NOVA builds its businesses principally on pipelining and the manufacturing and marketing of materials processed from hydrocarbons.

#90107p3413 04/17/1990 ~PR Newswire

NORTHBROOK, IL (APRIL 17) PR NEWSWIRE - Idex Corp. (NYSE: IEX) today reported that it experienced a 1 percent decline in sales and an 18 percent decrease in net income in the first quarter of 1990. A three-week work stoppage upon expiration of a labor agreement at the company's Viking Pump unit prevented the company from reporting stronger results.

Donald N. Boyce, chairman and president of this major manufacturer of fluid handling and industrial products, said, "Incoming orders in the first quarter of 1990 were at record levels. Had it not been for the interruption in production at Viking, our performance would have surpassed our earlier expectations and slightly exceeded last year's first quarter. We remain confident that 1990 will be another record year for IDEX."

Net income in the first quarter of 1990 was $3,796,000 vs. $4,654,000 in the comparable 1989 period. Income before an extraordinary credit for utilization of net operating loss carryforwards was $3,206,000 in this year's first quarter compared to $4,005,000 in the year-ago quarter.

Earnings per share before the extraordinary credit were 30 cents this year vs. 36 cents a year ago when there were, on average, 35 percent fewer shares outstanding. Including the extraordinary credit, first-quarter earnings per share were 35 cents vs. 45 cents in the year- ago period. It is estimated that earnings per share would have been approximately 7 cents higher had it not been for the production interruption at Viking.

Sales were $55,208,000 in this year's first quarter, compared to $55,749,000 for the same period in 1989.

Boyce observed that, while incoming orders at IDEX plateaued in the fourth quarter of 1989 as U.S. economic growth slowed and certain segments of American industry experienced some softening of activity levels, orders for IDEX during the first quarter of 1990 were at record levels. They improved by 7 percent over the first quarter of 1989 and by 10 percent over the immediately preceding calendar quarter.

Backlogs rose by $4.5 million in the first quarter, largely because of the inability to meet demand at Viking. IDEX normally operates with a modest backlog in an effort to provide superior customer service, and expects that the backlog will be brought back into line in the near future.

The chemical processing industry continued to provide strength at the company's pump businesses, and new C.N.C. machinery lines in the industrial products group produced improved orders as well. The transportation equipment segment of the ecomony remained weak, and resulted in somewhat lower orders for the company's vibration control devices and lubrication systems. On balance, however, the diversity of products produced and markets served enabled IDEX to continue to report

higher order activity.

IDEX Corp. is a manufacturer of a wide array of proprietary, highly engineered industrial products, including industrial pumps, stainless steel banding and clamping devices, sheet metal fabricating equipment and tooling, automatic lubrication systems, and vibration control equipment.

CONTACT: Wayne Sayatovic, vice president-treasurer of IDEX, 708-498-7070, or Nick Farina or Audrey Lowe, 312-266-7800, or Lillian Armstrong, 212-661-8030, all of the Financial Relations Board, for IDEX

HOUSTON (APRIL 16) PR NEWSWIRE - TE Products Pipeline Company, Limited Partnership (NYSE: TPP) (TEPPCO) reported today that it has now successfully tested 100 percent of the 165 miles of 8-inch propane pipeline between Watkins Glen and Selkirk, New York. The company conducted a hydrostatic test of this pipeline to ensure its integrity prior to placing it back in service.

The hydrostatic testing, which was being conducted by an independent testing company, consists of filling the pipeline with water by injecting it into a subsection and holding the water for 12 hours at a pressure well in excess of the normal operating pressure.

The final phase of the hydrostatic test involves drying the line. This is accomplished by moving rubber squeegees through the line to remove moisture. The drying procedure is scheduled for completion by April 23.

Upon completion of this final phase of the test, the TEPPCO line from Watkins Glen to Selkirk will be capable of resuming service. Service will be resumed upon approvals by the appropriate governing authorities.

#90107p3419 04/17/1990 ~PR Newswire

HOUSTON (APRIL 17) PR NEWSWIRE - National Asset Bank (a bank in liquidation) (NASDAQ: NABK) today announced that it had entered into an agreement with First Interstate Bancorp of Texas, Inc. (FIBOT) and First Interstate Bank of Texas, National Association (First Interstate) terminating the management and servicing agreement between the bank and First Interstate under which First Interstate had been appointed to act as exclusive agent for the management and servicing of the bank's assets and loans in return for a management and servicing fee equal to approximately

12-1/2 percent of the amount of gross collections and other realizations in cash with respect to the bank's assets plus out- of-pocket expenses.

Under the termination agreement, First Interstate will receive its management fee through Dec. 31, 1989, certain assets of the bank and the payment of certain expenses incurred by it through April 30, 1990. First Interstate has agreed to provide various services to the bank on a contract basis through July 31, 1990 to the extent needed by the bank.

A spokesman for the bank stated that the termination of the management agreement reflected a desire of both parties to separate their operations and permit the bank to manage and service its own loans and assets.

The spokesman further stated that, while the specific effect that the termination of the management agreement will have on the bank's financial position is still being reviewed, the elimination of fees payable to First Interstate under the management and servicing agreement will have a positive impact on the book value of the bank's assets and the bank's financial position.

The spokesman, however, noted that the positive impact would be reduced by the additional expenses that will be necessary for the bank to incur in connection with the management and servicing of its own assets.

As previously reported, the outstanding shares of common stock of the bank were issued to the stockholders of Allied Bancshares, Inc. as a distribution in connection with the merger of Allied with and into FIBOT. The initial assets of the bank consisted primarily of participation interests in non-performing loans and various real estate and other non-performing assets transferred to it by Allied upon the bank's inception.

The bank is currently operating under a plan of voluntary complete liquidation and its business consists solely of collecting or otherwise realizing on its loan and other assets and distributing the net proceeds to its stockholders.

MORRIS PLAINS, NJ (APRIL 17) PR NEWSWIRE - Warner-Lambert Company (NYSE: WLA) said today it achieved record first-quarter sales and earnings. For the three months ended March 31, 1990, earnings per share rose 20 percent to $1.79.

Net income increased 19 percent to $120 million. Worldwide sales increased to $1.10 billion, a gain of 8 percent on a reported basis or 9 percent at constant currency rates. Net income and sales were a record for a first quarter, while EPS was a record for any quarter.

Joseph D. Williams, chairman and chief executive officer, said all of the company's business segments contributed to Warner-Lambert's growth in the quarter, both in domestic and international operations. "This outstanding first-quarter performance strengthens our confidence that we will meet our announced objective to increase earnings per share by at least 16 percent during 1990," Williams said.

During the quarter, worldwide sales of the company's ethical pharmaceutical products rose to $359 million, up 10 percent from the same period a year ago. Growth in the segment was led by the lipid- regulating drug Lopid and the anticonvulsant Dilantin. The company's line of prescription pharmaceuticals also includes the cardiovascular drugs Dilzem Accupril and Procan SR, the anti-infectives ERYC, Doryx and enoxacin, and the analgesic Ponstan.

Paced by Halls cough tablets and Listerine antiseptic mouthwash, worldwide sales of non-prescription health care products rose 4 percent to $355 million in the first quarter. Other products in the segment include Lubriderm skin care products, Benadryl antihistamine, Benylin cough syrup, Rolaids antacid, Sinutab sinus medication, Tucks medicated pads and Anusol hemorrhoidal preparations.

Sales of gums and mints increased 9 percent to $250 million in the first quarter. Segment growth was led by Clorets gum and mints, Bubblicious bubble gum, Trident sugarless gum and Certs breath mints. Among other products in the segment are Chiclets candy-covered gum, Dentyne gum and chocolate/caramel brands including Junior Mints, Sugar Daddy, Sugar Babies and Charleston Chew!.

Sales of the company's other products grew 12 percent to $137 million in the first quarter. Included in this segment are Schick razors and blades, Capsugel empty hard gelatin capsules and Tetra home aquarium products.

During the first quarter, Warner-Lambert: -- announced that it has achieved a major advance in materials science by transforming conventional starch into a biodegradable material with many of the characteristics of plastics.

The company, which expects to market the new "bio-plastic starch" under the trademark Novon, has established an Environmental Polymers Division to commercialize this important business opportunity.

In March, Warner-Lambert dedicated a facility in Arlesheim, Switzerland, near Basel, that will serve as the European research and development center and first operating pilot plant for Novon.

-- realigned executive responsibilities to support its succession planning process.

Lodewijk J.R. de Vink was elected executive vice president and president, U.S.

Operations; John F. Walsh was named to succeed de Vink as president of International Operations, and Frank Lazo was promoted to vice president and president, Canada/Latin America Group, succeeding Walsh.

-- reaffirmed its intention to file for regulatory approval for Cognex (tacrine/THA) by mid-year in the U.S. and Europe.

Cognex is in clinical trials in the U.S. sponsored by Warner-Lambert and the National Institute on Aging.

Warner-Lambert is a worldwide company devoted to developing, manufacturing and marketing quality health care and consumer products.

It employs approximately 33,000 people at its operations in 130 countries. In 1989, Warner-Lambert's earnings per share rose 22 percent to $6.10. Sales increased 7 percent to $4.2 billion.

#90107p3429 04/17/1990 ~PR Newswire

BASKING RIDGE, NJ (APRIL 17) PR NEWSWIRE - AT&T (NYSE: T), the Communications Workers of America (CWA) and the International Brotherhood of Electrical Workers (IBEW) announced today tentative agreement on a non-management retirement plan that will add three years of age and three years of service to the records of all non-management employees on May 1, virtually doubling the number of workers eligible for a pension.

Currently, some 18,000 non-managers now are entitled to a service pension; the new plan, which is subject to approval by the unions, will increase that number to 34,000.

The voluntary plan also allows individual AT&T organizations to offer special incentives to non-management employees where there are more people than the workload requires. Such measures include tacking on even more age and seniority for workers -- and offering a 15 percent "sweetener" that would boost monthly pension payments.

AT&T has 165,400 non-managers worldwide. Essentially, the special incentives will help certain AT&T business units and divisions cut overhead costs and consolidate offices as part of a continuing company-wide effort to meet competition and trim operating expenses, largely through voluntary plans.

No financial impact for the non-management plan has been estimated because neither the number of participating AT&T organizations nor the number of non-management volunteers is known at this time.

In 1989, a special pension was offered to AT&T managers that added five years of age and service, plus 15 percent to pension checks for up to five years; it was almost identical to the offer that can be made to non-managers in overstaffed AT&T organizations. Out of 32,121 supervisors eligible last year, 12,535 (39 percent) took it. The program cost AT&T $163 million; the annual savings is estimated at $450 million, according to the company. Currently, AT&T has 116,000 managers.

The company employs 280,400 people worldwide -- about 29,000 fewer than January 1989, and about 93,000 fewer than January 1984.

#90107p3436 04/17/1990 ~PR Newswire
MORRIS TOWNSHIP, NJ (APRIL 17) PR NEWSWIRE - Allied-Signal Inc. (NYSE: ALD) today introduced a new cut-resistant medical glove liner that protects surgeons and other medical professionals against AIDS, hepatitis and other infectious diseases carried in the blood.

The liner, designed to be worn under latex gloves, prevents accidental cuts or nicks that can expose medical personnel to the transmission of infections.

Made from Allied-Signal's Spectra polyethylene fiber, a material so strong it is used in bullet-resistant police vests, the glove liners provide 35 times the protection of latex surgical gloves and 17 times the protection of heavy leather work gloves.

The new gloves are light in weight -- less than one-half ounce each -- and help to minimize the loss of dexterity and sense of feel so that wearers can take a pulse, write a note and even pick up a dime while wearing them.

The gloves have been clinically tested in hospital operating rooms nationwide throughout the past year. "Since they offer the optimum balance of protection, sensitivity and comfort to surgeons, we anticipate that they will soon become a standard item among medical professionals," said Phillips.

The new gloves allow air to reach the skin and draw perspiration away from the wearer's hands. They can withstand disinfectant cleaning solutions while maintaining cut-resistant properties and, since they can be readily sterilized, are reusable.

These glove liners are available in operating room (O.R.) and clinical styles and are distributed by Lovel-Schenck, Inc., Charlotte, N.C. and Smith & Nephew Perry, Masillon, Ohio.

Allied-Signal is an advanced technology company with businesses in aerospace, automotive products and engineered materials.

#90107p3438 04/17/1990 ~PR Newswire
NEW YORK (APRIL 17) PR NEWSWIRE - John R. Stafford, chairman, president

and CEO of American Home Products Corporation (NYSE: AHP), today reported that sales and earnings for the first quarter were at record levels. Net sales for the first quarter of 1990 increased 4 percent to $1,813,435,000. Net income increased 12 percent to $314,488,000. Net income per share increased 11 percent from $1.81 to $2.01. Prior year results have been restated for the merger with A.M. Robins Company, Incorporated (Robins) on a pooling-of-interests basis.

Net sales in the Health Care Products segment increased 3 percent in the 1990 first quarter. Food and household products segment sales increased 8 percent.

Income before taxes included net interest expense of $17 million in the 1990 first quarter, principally the result of commercial paper financing in connection with the funding of the Dalkon Shield Trusts in the fourth quarter of 1989. Income before taxes as restated for the first quarter of 1989 included net interest income of approximately $23 million and provisions totaling approximately $18 million for the deconsolidation of the Latin American subsidiaries of Robins, the loss on the disposal of its pet care business and the write-down of certain of its intangible assets.

Net income for the first quarter of 1990 benefited from a lower effective tax rate, resulting from the utilization of Robins' net operating loss carryforwards relating to the funding of the Dalkon Shield Trusts in 1989.

BRANCHBURG, NJ (APRIL 17) PR NEWSWIRE - Eckardt C. Beck, chairman of the board, president and chief executive officer of Air & Water Technologies Corporation (AMEX: AWT) has announced that Michael J. Scholtens has joined the company as president of R-C Environmental Services and Technologies (R-C EST) and vice president of the Research- Cottrell Companies.

Scholtens will report directly to Donald A. Deieso, president and chief executive officer of Research-Cottrell.

"Mr. Scholtens comes to us with an outstanding record of accomplishments in developing businesses that serve the power generation markets," said Beck. "His solid engineering experience coupled with a proven track record of bringing innovative R & D efforts to profitable commercial entities will be an invaluable asset to R-C EST's developing operations."

R-C EST, the newest of the Research-Cottrell family of companies provides a full range of problem solving services and technologies to the industrial community. R-C EST's disciplines include air pollution

consulting and permitting assistance, combustion technology services, advanced technology, and research and development. Discus(tm), the award-winning dense phase dry sorbent injection system is one of R-C EST's newest technologies.

Scholtens' many professional accomplishments include serving as president of the Combustion Engineering Corporation's independent power production subsidiary, Power Projects, Inc., where he captured over $300 million in new business.

Scholtens is an honors graduate from the U.S. Naval Academy with a specialty in nuclear engineering.

Research-Cottrell, one of the nation's oldest and most recognized air pollution control firms, is a member of the Air & Water Technologies family of environmental companies. Through its subsidiaries, Air Pollution Control Division, Custodis, Ecodyne, Flex-Kleen, KVB, Environmental Services and Technologies, and R-C Europe, Research-Cottrell provides the expertise, technology and service to comprehensively solve any air or thermal pollution problem.

Air & Water Technologies Corporation, through its operating units, Research-Cottrell, Metcalf & Eddy Companies, Inc. (NASDAQ: METC), and Residuals Mangement provides a braod range of environmental services in the areas of air pollution control, water resource management, and waste by-product disposal and reuse.

#90107p3442 04/17/1990 ~PR Newswire

SAN JOSE, CA (APRIL 17) PR NEWSWIRE - Keegan Management Company, Inc. (NASDAQ: KMCI), today announced results for the first quarter ended March 31, 1990.

Net sales for the period were $12.7 million as compared to $10.5 million in the first quarter of 1989. Net income for the quarter was $505,000, or $0.12 per share, as compared to $323,000, or $0.11 per share, earned during the comparable period one year ago. Average common stock and common share equivalents outstanding increased to 4,182,000 as compared to 2,900,000 in the first quarter 1989 as the result of the company's initial public offering on Dec. 20, 1989.

Kenneth W. Keegan, president, noted that the company has experienced a reduction in potential client calls and sign-ups during the month of April as a result of the recent adverse publicity the weight loss industry has experienced, largely due to congressional hearings investigating the

commercial diet market and its practices and a class action suit brought against Nutri/System, Inc., by their former clients in Miami.

"It is too early to precisely predict what impact these events will have on our operating results, or how they will affect our long-term performance. However, Nutri/System, Inc., and Keegan Management Company have taken positive, direct action to inform the public and we believe that business will return to normal levels by the third quarter," Keegan stated.

"The Nutri/System Weight Loss Program is designed to provide safe and effective weight loss and complies with the guidelines of the American Medical Association and the nutritional standards of the American Heart Association, as well as the stated principles of the American Dietetic Association and the National Cancer Institute. It has successfully helped millions of clients lose weight safely," he added.

Keegan Management Company owns and operates 74 Nutri/System Weight Loss Centers in the metropolitan San Francisco Bay Area, Iowa, Kansas, Kentucky Michigan, Nebraska, Indiana and Ohio.

CONTACT: David Walke or Terence Gordon, 212-986-5900, or Douglas Sherk, 415-243-8603, all of Morgen-Walke Associates, for Keegan Management.

FREMONT, MI (APRIL 17) PR NEWSWIRE - Gerber Products Company (NYSE: GEB) today announced the appointment of Harland E. Hodges as president and chief executive officer of the Gerber Childrenswear, Inc. unit of Gerber Apparel Group. He replaces G. Raymond Empson, who has resigned.

Kent Robinson, Gerber Apparel Group president and chairman of Gerber Childrenswear, said, "Harland's recent involvement as a consultant to the Gerber Apparel Group, combined with his broad-based industry experience, will enable him to assume his new responsibilities with a minimum learning curve."

Hodges most recently was a partner of Management Consulting with Ernst & Young with an extensive practice in vertical integrated textile and apparel companies. He also has held marketing, systems, and financial positions with J.P. Stevens and Milliken & Company.

Hodges has a Ph.D. from Clemson University and B.S. and M.A. degrees from Appalachian State University.

Hodges will assume his duties at the new Gerber Childrenswear, Inc. headquarters in Greenville, S.C., effective today, April 17.

#90107p3458 04/17/1990 ~PR Newswire

CANTON, OH (APRIL 17) PR NEWSWIRE - Diebold, Incorporated (NYSE: DBD) today reported that net income for the first quarter ended March 31 grew to $7,923,000, or $.60 per share, compared with 1989 first quarter net income of $7,577,000, or $.58 per share, an increase of five percent.

Net sales in the first quarter of 1990 were $113,218,000, compared with $114,379,000 during the same period last year, a decrease of one percent.

"Orders received during the first three months of this year were 23 percent higher than orders entered in the first quarter of 1989," said Robert W. Mahoney, chairman and chief executive officer. "In addition, product backlog is up 17 percent compared to last year at this time."

He also commented that, "The product mix of orders in late 1989 and the first three months of 1990 was heavily weighted toward automated teller machines (ATMs) from both our domestic and international markets.

"While the trend for income growth in 1990 remains positive, our second quarter results may not exceed last year's levels," Mahoney said. "Changes in production schedules required to meet increased customer demand, combined with the manufacturing restructuring started in 1989, have temporarily impacted manufacturing flexibility and extended the time required to increase ATM manufacturing schedules.

"We are confident about our performance for the entire year as we continue to implement our growth strategies for the decade of the 1990s," Mahoney said. "These growth strategies include expanding worldwide distribution channels, increasing the research and development investment; continuing implementation of cost-containment, productivity and quality improvement programs to offset ongoing competitive pricing pressures, exploring strategic alliance, joint ventures and acquisitions; and continuing the manufacturing restructuring."

Mahoney said that the newest development in the manufacturing strategy occurred earlier this month when Diebold announced the site of its second highly automated focus factory. The company purchased a 120,000-square-foot building in Sumter, S.C., for fabrication of ATM components and security products. Diebold will use an innovative team management style at the facility, which is expected to begin operating in the fall of 1990.

In the quarter just completed, several major orders were placed for

Diebold products. Placing significant orders for ATMs were U.S. Bank, Portland, Ore., as well as international distributors Hidromex, S.A. de C.V. in Mexico and Colinversiones, S.A. in Colombia. In addition, The Hertz Corporation, Park Ridge, N.J., placed a major order for equipment for its self-service return system, while Shell Canada Products Limited ordered automated fuel systems.

Diebold, Incorporated is a world leader in the automation of self- service transactions, security products, software and service for these systems. Headquartered in Canton, Ohio, Diebold maintains offices worldwide.

HARTFORD, CT (APRIL 17) PR NEWSWIRE - Northeast Savings, F.A. (NYSE: NSB) announced today that it has received approval from the Office of Thrift Supervision (OTS) of its application to form a savings and loan holding company. Under the holding company, the holders of the capital stock of Northeast Savings will become holders of the capital stock of the holding company, Northeast Federal Bancorp, Inc.

The formation of the holding company is also subject to the approval of a majority of the common stockholders of Northeast Savings. In addition, FDIC approval of the exchange of their preferred stock is pending. The OTS approval required that Northeast Savings obtain approval of the district director before declaring any dividend until Northeast Savings meets its fully phased-in capital requirements.

Northeast Savings anticipates mailing a notice of a special stockholders' meeting and a proxy statement to common stockholders. This special stockholders' meeting will take place during the current quarter. Upon completion of the meeting and subsequent reorganization to the holding company, Northeast Savings anticipates that it will be in compliance with the new capital requirements within the time frame specified by the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA).

The sole function of Northeast Federal will be to hold 100 percent of the stock of Northeast Savings. Following this reorganization, Northeast Savings will continue its current business as a federally chartered savings and loan association whose deposits are insured by the FDIC.

One of the largest thrifts based in New England, Northeast Savings operates retail branches in Connecticut, New York, and Massachusetts, and mortgage offices in California, southern Connecticut, and Long Island.

SPOKANE, WA (APRIL 17) PR NEWSWIRE - Montana Precision Mining Ltd. (NASDAQ: MPML) announced today that it has entered into an Option Agreement with Pegasus Gold Corp. (AMEX, Toronto: PGU). During the option period, Pegasus will conduct an exploration program consisting of surface mapping and sampling, ground geophysics, trenching and possibly limited RVC drilling. If the option is exercised, Pegasus and MPML will form a Joint Venture to explore, develop and mine mineral deposits on the Emery Project.

MPML controls 94 contiguous patented and unpatented lode mining claims covering over 1,400 acres or two thirds of the total area within the historic Emery Mining District, Powell County, Mont.

MPML, with offices in Spokane, Wash., and Eureka, Mont., is involved in mining exploration and development and Skygas, a revolutionary waste-to-energy process for the gasification of solid and semi-solid wastes.

#90107p3468 04/17/1990 ~PR Newswire

CANTON, OH (APRIL 17) PR NEWSWIRE - Today, The Timken Company (NYSE: TKR) announced consolidated financial results for the company and its subsidiaries for the three-month period ended March 31, 1990.

	First Quarter Ended March 31 (Thousands of Dollars Except Per Share Data)	
	1990	1989
Net Sales	$408,543	$434,724
Income Before Taxes	34,530	43,216
Provision for Income Taxes	15,471	15,487
Net Income	19,059	27,729
Net Income Per Share	$0.63	$0.98
Average Shares Outstanding	30,324,820	28,401,641

Consolidated net sales for the first quarter of 1990 were $408.5 million,

which represents a 6.0 percent decline from the 1989 first quarter record sales level of $434.7 million. The decline in net sales resulted from reduced sales volumes offset in part by improved product mix and increased selling prices in the company's Bearing Business. Steel sales demand and selling prices declined to levels below the first quarter of 1989. Although net sales declined from the same period a year earlier, net sales have increased 25.3 percent from the fourth quarter 1989 level of $325 million, which was adversely influenced by a 37-day work stoppage.

Net income for the first quarter was $19.1 million (4.7 percent of net sales) in 1990 compared to $27.7 million (6.4 percent of net sales) in 1989. Net income per share was $.63 for the first quarter of 1990 compared to $.98 for the first quarter of 1989 on 1.9 million more average shares outstanding.

#90107p3472 04/17/1990 ~PR Newswire

ATLANTA (APRIL 17) PR NEWSWIRE - NYNEX Corporation (NYSE: NYN) and Lotus Development Corporation (NASDAQ: LOTS) today announced at SuperComm '90 the creation of an alliance between the two companies to work together to integrate NYNEX's broadband data communication technologies with Lotus' personal computer client/server applications.

Specifically, the two companies plan to integrate NYNEX's SMDS (Switched Multimegabit Data Service) offering that is currently being tested at NYNEX's Science & Technology Center, with Lotus Notes, Lotus' newly released group communications product. As partners, the two companies will explore joint marketing research, technical specifications and requirements, and will conduct joint R&D activities. The companies will also pursue specific customer opportunities. The first public showing of SMDS and Lotus Notes will be at the Eastern Communications Forum, a major meeting of regional operating companies that will take place May 7-11, 1990, in Boston.

"This partnership is good news for businesses interested in taking full advantage of emerging applications for electronic collaboration," commented Dr. John McQuillan, president of McQuillan Consulting. "New broadband services, such as SMDS, will enable high quality support for groupware like Lotus Notes. NYNEX and Lotus should help close the gap between telecommunications and networked personal computing."

SMDS is the first step in the development of broadband transport services, including the future broadband integrated services digital network (BISDN). SMDS will interconnect local area networks by providing broadband transport across public, packet-switched networks of rates up to

45 million bits per second (Mb/s). The service, which is expected to be available in 1991, will make a variety of broadband applications available through the public-switched network, including medical imaging, multi-media conferencing, and advertising, publishing and real estate applications.

"NYNEX has been, and continues to be, proactive in working with computer vendors, workstation and LAN manufacturers, and software and applications developers in order to ensure that our SMDS offering meets with success in the market," said Walter Johnston, director - Prototype Services Development at NYNEX Science & Technology. "NYNEX's alliance with Lotus is a significant example of this strategy that will ultimately benefit our mutual customers."

"We are delighted to work together with NYNEX by sharing our knowledge base of PC-based client/server computing," said Larry Moore, general manager for Lotus' Communications Products Group. "The SMDS service is a major advancement for client/server computing and for products like Lotus Notes. We look forward to the relationship and its availability in 1991."

Shipped last December, Lotus Notes is a group communications software product that allows people to create and access shared information using personal computers, and local and wide area networks.

NYNEX is the fourth largest telecommunications company in the United States ranking by sales. The company provides information products and services to a diverse base of customers internationally. Through New York Telephone and New England Telephone, NYNEX delivers quality telecommunications services to the Northeastern United States.

Lotus Development Corporation is the leading provider of applications software for personal computers and information services delivered on CD-ROM.

CONTACT: Victoria Petrock, 914-644-7245, or Rosalia Bacarella, 914-644-7253, both of NYNEX; or Sue Jensen of Lotus Development Corp., 617-577-8500.

#90107p3475 04/17/1990 ~PR Newswire

DETROIT (APRIL 17) PR NEWSWIRE - David J. Campbell has been named president and chief executive officer of The Detroit Medical Center (DMC), it was announced today by Peter W. Stroh, DMC board chairman.

Campbell joined the DMC in January of 1988 as executive vice president and chief operating officer, and president of the DMC Hospital Group. He has been acting president and chief executive officer of the DMC since January

of this year, when Joseph L. Hudson Jr. announced his retirement.

Campbell joined the DMC from Allegheny Health Services, Inc., Pittsburgh, where he served as executive vice president and chief operating officer. Before Allegheny, he was with Henry Ford Hospital of Detroit for four years, and with the University of Michigan Hospital in Ann Arbor for eight. He is a graduate of Michigan State University and the University of Michigan.

He is a member of numerous boards and associations, including American Health Care Services, American Hospital Association, Society of Hospital Planning and Marketing, American Public Health Association, American College of Hospital Administrators and Group Health Association of America.

In making the announcement of Campbell's appointment, Stroh said: "We are most pleased that David Campbell has accepted the DMC's invitation to serve as president and chief executive officer. His background and experience in multiple settings and especially his involvement with the DMC over the past two years, will enable him to lead the DMC into the years ahead as an important provider of health- care services in southeastern Michigan. He shares the DMC's concerns and sensitivity to local community needs and a commitment to caring, high-quality service. We look forward to his continued leadership."

PACOIMA, CA (APRIL 17) PR NEWSWIRE - K-Swiss Inc. announced today that it has filed a registration statement with the Securities and Exchange Commission relating to the proposed initial public offering of 1,450,000 shares of Class A common stock. Goldman, Sachs & Co. will lead manage the offering with Merrill Lynch Capital Markets acting as co-manager. Of the shares being offered, 1,115,000 will be sold by the company and 335,000 will be sold by selling stockholders. It is currently anticipated that the initial public offering price will be between $12 and $15 per share.

The company intends to use the proceeds from the sale of its shares to repay borrowings under the company's revolving credit facility and thereby to increase working capital.

K-Swiss Inc. designs, develops and markets high performance and casual athletic footwear. The company presently offers footwear for tennis, basketball, walking, volleyball, squash and other court sports.

A registration statement relating to these securities has been filed with

the Securities and Exchange Commission but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This press release shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

NEW YORK (APRIL 17) PR NEWSWIRE - The board of directors of Sundstrand Corporation (NYSE: SNS) today declared a quarterly cash dividend of 55 cents per common share payable on June 20, 1990, to shareholders of record at the close of business on June 6, 1990. It will be the 184th consecutive quarter that the company has paid a dividend.

At the company's annual meeting, scheduled for 11 a.m. today at the Helmsley Palace in New York, Sundstrand shareholders will vote on a board of directors' proposal to increase the company's authorized common stock and effect a two-for-one stock split of the company's outstanding common stock. If the shareholders approve the stock split, the quarterly cash dividend will become $.275 per share on the increased number of shares.

Sundstrand Corporation, with 1989 sales of $1,595.4 million, is a market leader in the design, manufacture, and sale of a variety of proprietary, technology-based components and subsystems for aerospace (67 percent of 1989 sales) and industrial (33 percent of 1989 sales) markets. Sundstrand's common stock is listed on the New York, Midwest, and Pacific

Stock Exchanges under the symbol SNS.

SAN ANTONIO, TX (APRIL 17) PR NEWSWIRE - Lancer Corporation (AMEX: LAN), a San Antonio-based leading manufacturer of fountain soft drink and citrus beverage dispensing systems sold worldwide, founded 23 years ago with a current employment of 500 employees, today announced results of operations for the fourth quarter and year ended Dec. 31, 1989.

Revenues for the fourth quarter and year ended Dec. 31, 1989 were $7,108,471 and $32,357,237 compared with $8,150,835 and $34,745,783, respectively, for the previous year. The 1989 revenues reflect a decrease of seven percent over 1988 due to a decrease in sales activity in the company's line of citrus dispensers.

A net loss of $1,373,168 was recorded for the year ended Dec. 31, 1989 compared to net earnings of $1,488,987 for the year ended Dec. 31, 1988. The fourth quarter 1989 reflected a loss of $2,110,717 compared to net earnings of $210,095 for the same period in 1988. This fourth quarter loss reflects the effects of inventory valuation and cost of sales

adjustments resulting from lower overall sales, a shift in sales mix to products with low gross margins and the effect of relocating two product lines in accordance with a multi-phase program, completed in 1989, to consolidate major assembly operations in one facility. The loss results in refundable federal income taxes of $1,777,543.

The company recently opened a Maquiladora in Piedras Negras, Mexico to make subassemblies for its dispensing equipment. By moving repetitive processes to Mexico and benefiting from generally lower manufacturing costs, the company hopes to enhance existing production and maintain its competitive position in the global marketplace.

Presently the company has a record backlog for dispensing systems, particularly in the international division.

#90107p3493 04/17/1990 ~PR Newswire

BATON ROUGE, LA (APRIL 17) PR NEWSWIRE - A major step in the protection and conservation of one of the most ecologically important stands of bottomland hardwoods, forested wetlands, and wildlife habitats in the State of Louisiana and the U.S. was taken here today.

General Motors, The Nature Conservancy, and Muirfield/Pitts (a private group) in cooperation with the Delta Environmental Land Trust Association (D.E.L.T.A.), held a news conference at the Louisiana State Capitol in Baton Rouge to outline a series of agreements which will result in the conservation of more than 30,000 acres of property in Northeast Louisiana. Located in Tensas, Catahoula, Franklin and Concordia parishes, the area includes old growth stands of bottomland hardwoods and is habitat for the threatened Louisiana Black Bear.

Known as the Fisher Lumber properties and owned by General Motors since 1926, the properties once provided a source of hardwoods and wood milling services for the variety of wood products that were used to produce automobiles.

"GM has now owned this land and helped to preserve it for more than 60 years," said GM Executive Vice President Robert T. O'Connell. "When we first acquired it, our primary interest in the property was its timber. But by the 1930s, other materials had replaced wood as a major automotive component and we stopped taking timber from the land for our own use."

O'Connell said that because GM's primary business remains the manufacture and sale of automobiles, the automaker decided to convey the Fisher Lumber properties to The Nature Conservancy and Muirfield/Pitts.

"The second reason," added O'Connell, "is that both types of property are rapidly disappearing from the American scene. In view of the rich history of the Fisher Lumber properties, we're happy that as a result of this conveyance it will continue to be available for the enjoyment and benefit of future generations."

Bottomland hardwoods once covered over 11.3 million acres in Louisiana. These forested wetlands are threatened to be degraded or gone by the turn of the century unless protected.

"The bottomland hardwood systems once supported populations of Black Bear, Florida Panther, Red Wolf, Ivory-billed Woodpecker, and Bachman's Warbler " said Nancy Jo Craig, executive director of the Louisiana Nature Conservancy. "An average of 90 square miles of bottomland hardwoods have been lost each year since 1952, primarily due to agricultural conversion."

GM reached agreements to convey roughly 11,000 acres, which includes a donation of approximately 4,000 acres, of the Fisher Lumber properties to The Nature Conservancy.

#90107p3504 04/17/1990 ~PR Newswire

PHILADELPHIA (APRIL 17) PR NEWSWIRE - Philadelphia Electric Co. (NYSE: PE) said today electric sales in the first three months of 1990 increased slightly over the first three months of 1989, despite the warmest weather in the first quarter billing period in 16 years.

The company reported that residential and commercial sales in March 1990 totaled 2.685 billion kilowatt-hours (kwh), down 1.8 percent from sales in March 1989. But sales for the first three months of the year totaled 8.485 billion kwh, a 1 percent increase over the same three months in 1989.

PE said the increase in sales came despite the warmest first quarter billing period since 1975.

On a weather-corrected basis, PE said, electric sales were up 2.5 percent in the first quarter of 1990, reflecting continuing economic development in its service territory.

That development, and its increasing demand for electricity, have continued to result in records for PE electric output for the last five years.

In 1989, PE's record output totaled 35 billion kwh, surpassing the previous record of 34.7 billion kwh, set in 1988, by 0.8 percent.

LEXINGTON, MA (APRIL 17) PR NEWSWIRE - Raytheon Company (NYSE: RTN) today announced the acquisition of REMCO S.A., a Spanish producer of electronic and electromechanical control subsystems. REMCO, which is located in Barcelona, was acquired form Jaeger Iberica, a subsidiary of FIAT. Its 1989 sales were approximately $9 million.

The company produces custom designed subsystems used for control of home appliances as well as for automotive applications. This acquisition will further expand Raytheon's presence in a high growth commercial electronics market and provide access to the fast growing southern European sector of this market.

Raytheon is a diversified international company with worldwide 1989 sales of $8.8 billion and 77,600 employees. REMCO will become part of the company's Raytheon Europe subsidiary, which is headquartered in London. It is composed of six additional subsidiary companies which are active in defense electronics, computer software, wire, electronic controls and semiconductors.

NEW YORK (APRIL 17) PR NEWSWIRE - AVX Corporation (NYSE: AVX), a wholly owned subsidiary of the Kyocera Corporation (NYSE: KYO), announced today that its board of directors has authorized the redemption of all its outstanding 8-1/4 percent convertible subordinated debentures due 2012 and 13-1/2 percent subordinated sinking fund debentures due 2000.

The date of redemption for the 8-1/4 percent convertible subordinated debentures will be May 15, 1990, and the redemption price will be 105.775 percent of the principal amount of the convertible subordinated debentures plus accrued interest. Holders of the convertible subordinated debentures should surrender them for payment on or after May 15, 1990, at the following address:

if by mail:	if by hand:
Chemical Bank	Chemical Bank
P.O. Box 25996	Corporate Tellers
Church Street Station	55 Water Street
New York, N.Y. 10008	Second Floor, North Building
	New York, N.Y. 10041

Prior to the close of business on the date of redemption, each $1,000 principal amount convertible subordinated debenture is convertible into 19.55 American Depositary Shares of Kyocera Corporation, each representing two shares of common stock, 50 yen par value, of Kyocera. The right to convert the convertible subordinated debentures will terminate at the close of business on the date of redemption.

Any holder of debentures who surrenders a debenture for conversion during the period commencing May 2, 1990, and ending at the opening of business on the date of redemption is required to deliver $41.25 in New York Clearing House funds payable to AVX for each $1,000 principal amount of debentures so surrendered.

If a holder of debentures surrenders a debenture for conversion after the opening of business on the date of redemption and prior to the close of business on the date of redemption, which is the time the right to convert the debentures terminates, such holder is not required to deliver $41.25 in New York Clearing House funds payable to AVX for each $1,000 principal amount of debentures so surrendered.

The conversion agent is:

if by mail:	if by hand:

Chemical Bank P.O. Box 25983 Church Street Station New York, N.Y. 10008	Chemical Bank Corporate Tellers 55 Water Street Second Floor, North Building New York, N.Y. 10041

The date of redemption for the 13-1/2 percent subordinated sinking fund debentures due 2000 will be June 1, 1990, and the redemption price will be 104.5 percent of the principal amount of the subordinated sinking fund debentures plus accrued interest thereon. Holders of the subordinated sinking fund debentures should surrender them for payment at the following address:

if by mail: Chemical Bank P.O. Box 25996 Church Street Station New York, N.Y. 10008	if by hand: Chemical Bank Corporate Tellers 55 Water Street Second Floor, North Building New York, N.Y. 10041

EL SEGUNDO, CA (APRIL 17) PR NEWSWIRE - Richard P. Bermingham, president and chief executive officer of Collins Foods International Inc. (NYSE: CF) has been elected a director of Farr Company (NASDAQ: FARC). He succeeds James V. Crawford, who retires from the board at the company's annual meeting next month.

Allan B. Foy, chairman and president of Farr Company, said: "It is a pleasure to welcome Mr. Bermingham to our board. His extensive experience in both finance and operations will be a valuable resource for us, and we look forward to his counsel."

Bermingham, 51, joined Collins Foods in 1968 when it became publicly held and has played a key role in the company's growth into a major food service operator with over $1 billion in sales (both company-operated and franchised) and over 950 Sizzler and Kentucky Fried Chicken restaurants in the United States and overseas.

He first served as the company's chief financial officer, was named president of the Collins Foods Service subsidiary in 1975 and became president of Collins Foods International Inc. five years later. In 1987, he assumed the additional responsibility of chief executive officer.

Bermingham also serves as vice chairman of Sizzler Restaurants

International Inc., a 66 percent owned subsidiary. He is a director of Collins Foods and Sizzler, as well as the Kentucky Fried Chicken Purchasing Co-Op, California Restaurant Association, University of Colorado Foundation and is a past director of Boy Scouts of America.

Bermingham, a CPA, spent five years with Arthur Andersen & Co. before joining Collins Foods. Born in Montclair, N.J., he holds a bachelor of science degree from the University of Colorado.

Farr Company is a leading producer of filters for particulates, liquid and gaseous filtration systems. The company has nine manufacturing facilities in the United States as well as plants in Canada and England.

#90107p3529 04/17/1990 ~PR Newswire

WYOMISSING, PA (APRIL 17) PR NEWSWIRE - Lawrence R. Pugh, chairman and chief executive officer of VF Corporation (NYSE: VFC), reported results for the first quarter at the annual meeting of shareholders held today in Wyomissing, Pa. Net income was $23.2 million, compared with $38.3 million in the 1989 quarter, and earnings per share were $.39 for the quarter, compared with $.56 in 1989. Sales for the quarter were $567 million, up from $563 million in the prior year.

The board of directors declared a regular quarterly cash dividend of $.25 per share, payable June 18, 1990 to shareholders of record as of the close of business on June 8, 1990.

Pugh said the downturn in earnings was primarily attributable to poor performance at VF's Lee and Jantzen divisions. Pugh reported, "A first quarter sales shortfall and operating deficiencies at Lee, plus a sales decline at Jantzen, contributed to the lower than expected operating results. In addition, plant closings announced during the first quarter to bring Lee's production capacity more in line with projected demand resulted in one-time charge of $4.1 million. For these reasons, consolidated earnings per share for VF Corporation are down 30 percent from those reported in the first quarter of 1989."

VF Corporation is the world's largest publicly owned apparel company and is a leader in the jeanswear, sportswear/activewear, intimate apparel and occupational apparel markets. Its principal brands are Lee, Wrangler, Rustler, Girbaud, Bassett-Walker, Jantzen, JanSport, Vanity Fair, Vassarette, Modern Globe, Red Kap and Big Ben. In 1989 VF ranked 173rd in Fortune's "500 Largest U.S. Industrial Corporations."

#90107p3532 04/17/1990 ~PR Newswire

CINCINNATI (APRIL 17) PR NEWSWIRE - The Kroger Co. (NYSE: KR) said today that first quarter sales from continuing operations rose 7.1 percent over the comparable 1989 first quarter, while operating cash flow from continuing units was virtually even with the previous year.

Sales in the first quarter from continuing units totaled $4.559 billion, compared to $4.255 billion in the 1989 first quarter, which contained the important Easter holiday. Identical store sales in the quarter increased 6.5 percent.

Operating cash flow (pre-tax earnings before interest, depreciation and LIFO) from continuing units totaled $191.6 million, versus $192.4 million in last year's first quarter. Reduced interest expense contributed to a lower net loss in the quarter of $10.3 million, or 12 cents loss per share compared to a net loss of $19.0 million, or 26 cents loss per share, in the first quarter last year.

Kroger Chairman and Chief Executive Officer Lyle Everingham said the first quarter performance reflects the Company's determination to be "aggressively responsive" to changing competitive or general business developments. He noted that the higher sales were achieved despite increased competition in several key markets, plus the negative impact of a week-long work stoppage in Texas midway through the quarter.

"In light of the challenges we faced in the quarter -- and the fact that we did not have the Easter holiday to bolster sales and cash flow -- we are quite pleased with the total Kroger performance," Everingham said. "Our first quarter results indicate that despite a very substantial debt obligation, we are determined -- and able -- to protect our investment wherever and whenever we are challenged," he added.

Kroger President and Chief Operating Officer Joseph A. Pichler said sales vitality quickly returned to normal in the Houston and San Antonio areas following a 7-day strike in late February. "Our experience in Texas has amply demonstrated Kroger's commitment to operating within a competitive cost structure while rewarding performance through incentive plans and the maintenance of attractive benefit plans for our employees. It is a policy that we must follow as Kroger works to reduce our restructuring debt."

ATLANTA (APRIL 17) PR NEWSWIRE - James B. Williams today was elected president and chief executive officer of SunTrust Banks Inc. (NYSE: STI).

Williams had served as vice chairman since SunTrust began operation in mid-1985. Joel R. Wells Jr., who had been president since the formation of SunTrust, was elected chairman of the board of the regional bank holding company.

Robert Strickland, who had seved as chairman and chief executve officer since SunTrust was organized, relinguished those positions but will continue to serve as chairman of the executive committee. These actions by the SunTrust board of directors implemented the senior management succession plan proposed by Strickland this past February in anticipation of his mandatory retirement in the spring of 1992.

At the regular quarterly meeting of the board following the fifth annual meeting of SunTrust shareholders, L. Phillip Humann was promoted to senior executive vice president - banking. Humann, who was elected an executive vice president last year, was previously chairman of the board and chief executive officer of Trust Company Bank, Atlanta, largest of the 53 banks in the SunTrust group serving Florida, Georgia and Tennessee.

The board declared a regular quarterly cash dividend of 21 cents per common share, payble on June 15 to shareholders of record Jun 1. This dividend totals $26.8 million on the approximately 127.7 million shares of SunTrust common stock outstanding.

At the annual meeting, shareholders re-elected six directors to three-year terms expiring in 1993: James D. Camp Jr., attorney, Fort Lauderdale, Fla.; Roberto C. Goizueta, chairman of the board and CEO of The Coca-Cola Company; Joseph L. Lanier Jr., chairman of the board and CEO, Dan River Inc.; J. Walter Tucker Jr., vice chairman of Keystone Consolidated Industries, and Strickland and Wells.

Three directors retiring from the board under the corporate bylaws are: Charles J. Kane, chairman of the executive committee, Third National Corp.; Donald T. Senterfitt, former vice chairman of both SunTrust and Sun Banks Inc., and James M. Sibley, partner in the Atlanta law firm of King & Spalding.

#90107p3546 04/17/1990 ~PR Newswire

LONDON (APRIL 17) PR NEWSWIRE - Charterhouse and Del Monte Food's European management announces that contracts have been exchanged for the U.S. $375 million buy-out of the European processed foods division (Del Monte Foods Europe) and associated overseas companies, of Del Monte Corporation formerly part of the RJR Nabisco Group. The new company will be named Del Monte Foods International.

The transaction has been jointly arranged by Charterhouse Bank, and Charterhouse Development Capital in the United Kingdom and Charterhouse Group International, Inc. in the United States.

The institutional equity element of the transaction ($136 million) has been jointly underwritten by the Second Charterhouse Buy-Out Fund, the Charterhouse European Partners and by Charterhouse Equity Partners (U.S.). Del Monte Food's European management and employees will own an important part of the equity.

Mezzanine finance of $80 million has been arranged by Charterhouse Bank through PIC Capital Group, the London-based unit of the Prudential Insurance Company of America, which is providing the mezzanine finance and also subscribing $10 million of equity.

Senior debt (including both acquisition debt and working capital) of $212.6 million has also been arranged by the debt services division of Charterhouse Bank and underwritten by a syndicate of leading international banks. The capital markets division of Charterhouse Bank is arranging foreign exchange and interest hedging cover.

Commenting on today's announcement, Edward Cox, chairman of Charterhouse Development Capital, said: "Del Monte Foods International is a high quality business which combines a strong branded image with good growth prospects in a non-cyclical industry.

"We are delighted to have been able to arrange this acquisition alongside management with a strong equity base to provide the company with a firm basis for its continued development as a major European food company."

Del Monte Foods International's management team is headed by Leon Allen, who has been president and chief executive officer of Del Monte Foods Europe since May 1988, having joined Del Monte Corporation in 1982. Allen is a U.S. citizen, but is based in the Staines, U.K., headquarters of Del Monte Foods International.

The other principal members of the team are: Peter Brooks (vice president of Del Monte Foods International and managing director of the Northern Europe division)

Roger Price (vice president and chief financial officer) Enrico Sola (vice president of Del Monte Foods International and managing director of the Southern Europe division).

Allen said today: ''We are pleased and excited at the prospect of European ownership for Del Monte Foods International. In Europe the Del Monte brand has achieved record sales and earnings over the past several years. We fully expect the pattern to continue in the future - even more so now that we are in control of our own destiny."

#90107p3548 04/17/1990 ~PR Newswire

CHICAGO (APRIL 17) PR NEWSWIRE - For the first quarter of 1990, Whitman Corp. reported income from continuing operations of $25.7 million, down 35 percent from last year's $39.7 million.

Earnings per share from continuing operations (after the preferred dividends) were 16 cents a share, down 48 percent from last year's 31 cents a share.

Last year's first quarter included a gain of 15 cents a share from an ESOP transaction and foreign currency exchange. There was no such gain in the first quarter of 1990, making the two quarters virtually equal.

Three of Whitman Corp.'s four operating companies reported increases in sales and operating income. Pet's first-quarter operating income, which included a substantial contribution by Van de Kamp's, was up 19.3 percent; Pepsi General's operating income was up 11.7 percent. And Midas was up 7.3 percent. Hussmann Corp. had an operating loss of $2.6 million as a result of a deferral of orders into the remainder of the year.

Consolidated sales were $927.4 million, up 7.9 percent for the first quarter of last year. Operating income was $85.4 million, up 6.8 percent.

PRINCE GEORGE, BRITISH COLUMBIA (APRIL 17) PR NEWSWIRE - C.T. Hazelwood has been named president and chief executive officer of Northwood Pulp and Timber Ltd., based here. He succeeds Horst Sander, who had in 1989 announced his plan to retire.

Hazelwood, whose appointment is effective May 15, 1990, comes to Northwood from Great Northern Nekoosa Corp. in New Augusta, Miss., where he was senior vice president of the Leaf River Forest Products division. During that time he developed a manufacturing improvement program which increased the mill's production by more than 30 percent. He also led efforts which significantly improved the mill's environmental quality protection system. He will take over leadership of an integrated forest products company which celebrated its 25th anniversary in 1989.

Jointly owned by the Mead Corporation (NYSE: MEA) of Dayton, Ohio, and Noranda Forest Inc. of Toronto, Ontario, Northwood operates in the central interior of British Columbia a bleached softwood kraft pulp mill with a capacity in excess of 500,000 tonnes annually, four sawmills with lumber manufacturing capacity of 700 million board feet, a plywood plant which produces 450 million square feet per year, and a tree nursery growing 11 million seedlings annually.

Northwood employs about 2,000 men and women directly, and more than 800 people are employed by contractors in wood harvesting and silviculture operations.

The search for Sander's successor took about six months, according to James Van Vleck, chairman of the board of Northwood and senior vice president of the Mead Corporation. Noranda Forest's president, R.T. Kenny, said "Mr. Hazelwood's experience, accomplishments and approach to management offer a good fit for Northwood."

Mr. Hazelwood is a 19-year veteran of the pulp and paper industry. He began his career with Container Corporation of America following his graduation with a B.S. degree from North Carolina State University in 1971. He held positions of varied and increasing responsibilities with Union Camp Corporation, Boise Southern Company and Great Southern Paper Company until he joined Great Northern Nekoosa Corp. in 1982.

Mr. Hazelwood will be based in Northwood's corporate offices at Prince George, B.C.

BRANCHBURG, NJ (APRIL 17) PR NEWSWIRE - Kenneth W. Turnbull, chairman and chief executive officer of United National Bancorp, reported income figures for the first quarter of 1990 of $1,137,000 versus $1,257,000 for the same period a year ago. Per share earnings were 53 cents compared to 58 cents in the first quarter of 1989.

Total deposits rose to $524,312,000 from $500,375,000, a 5 percent increase, and assets increased to $598,191,000 from $578,450,000. Total loans stood at $315,862,000, compared to $312,451,000 in 1989.

"Deposit growth has picked up modestly in spite of continued strong competition from the super regionals and money market mutual funds," Turnbull said.

ARLINGTON, VA (APRIL 17) PR NEWSWIRE - Gannett Co., Inc. (NYSE: GCI) achieved slightly higher net income in the first quarter of 1990, according to an announcement today.

Net income totaled $75,001,000 in the quarter, compared to $74,901,000 earned in the first quarter of 1989. Earnings per share were unchanged at 47 cents. In the year-earlier quarter, earnings included a pretax gain on the sale of certain newspaper operations equal to $9 million, or approximately 3 cents per share.

Revenues in the quarter were $813,400,000, compared to $817,559,000 in 1989. Operating income declined 5 percent to $137,528,000 from $145,039,000. Pretax income improved $150,000 to $125,901,000, reflecting lower interest expense.

In a letter to shareholders, Gannett said a deteriorating consumer economy and restructuring in the retail industry combined to produce the poorest advertising environment in almost 20 years. Some major department stores, which traditionally were among the most important advertisers, sharply

reduced their ad expenditures. Advertising managers struggled to claim a larger share of a shrinking pie.

Newspaper advertising revenues declined 3 percent in the first quarter, reflecting a 6 percent decline in ROP advertising volume and reduced newspaper advertising in Detroit, where a joint operating agreement was implemented Nov. 27, 1989. Retail lineage was lower at most newspapers, and particularly soft in the eastern half of the country.

At USA Today, paid advertising pages totaled 851, compared to 896 in the year-earlier quarter. Because of rate increases and higher readership, advertising revenues advanced 8 percent and, as a result, USA Today had a significant year-to-year gain.

Outdoor revenues advanced 4 percent. Transit revenues increased sharply, reflecting an aggressive bus shelter construction program in New York, Los Angeles and other cities.

Broadcasting revenues were lower in the quarter. Gannett is a nationwide news and information company that publishes 83 daily newspapers, including USA Today, and 52 non-daily publications, including USA Weekend, a newspaper magazine. It operates 10 television stations, 16 radio stations Gannett News Services and the largest outdoor advertising company in North America.

Gannett also has marketing, television news and program production, research satellite information systems and a national group of commercial printing facilities, Gannett has operations in 41 states, the District of Columbia, Guam, the Virgin Islands, Canada, Great Britain, Hong Kong, Singapore and Switzerland.

CANTON, OH (APRIL 17) PR NEWSWIRE - At the annual meeting of shareholders of The Timken Company (NYSE: TKR) held today in Canton, Ohio, Richard A. Gulling, James W. Pilz and Joseph F. Toot, Jr. were elected directors for three-year terms to expire at the 1993 annual meeting.

The remaining eight directors will continue to serve until the expiration of their respective terms. They are:

1. Stanley C. Gault; John M. Timken, Jr.; W.R. Timken, Jr. and Alton W. Whitehouse -- terms to expire at the 1991 annual meeting.

2. Robert Anderson, Peter J. Ashton, Ward J. Timken and Charles H. West -- terms to expire at the 1992 annual meeting.

At a meeting of the board of directors that followed the annual meeting of shareholders, the following officers were elected for the ensuing year:

W.R. Timken Jr.	Chairman -- board of directors
Joseph F. Toot, Jr.	President
Peter J. Ashton	Executive Vice President -- Bearings
Charles H. West	Executive Vice President -- Steel
Maurice J. Amiel	Vice President -- Bearings -- Europe, Africa and West Asia
Bill J. Bowling	Vice President -- Human Resources and Logistics
Larry R. Brown	Vice President and General Counsel
Donald L. Hart	Vice President -- Bearings -- North and South America
Robert L. Leibensperger	Vice President -- Technology
J. Kevin Ramsey	Vice President -- Finance and Treasurer
John J. Schubach	Vice President -- Strategic Management

In other business conducted during the annual meeting, two proposals from individual shareholders, which were not recommended by the board of directors, were defeated by shareholder votes.

On a separate matter, the board of directors reported that the company had almost completed the stock repurchase of the one million shares announced in November 1989. At today's meeting, the board of directors authorized the repurchase of up to one million additional shares of the company's common stock. The repurchased shares will be used primarily to fund various employee benefit plans and the company's dividend reinvestment plan. The company plans to continue to repurchase these shares over time in open-market transactions. Morgan Stanley & Company will assist in the repurchase. As of today, there were approximately thirty million shares outstanding.

NEW YORK (APRIL 17) PR NEWSWIRE - Alliance Capital Management L.P. (NYSE: AC) announced that yesterday it purchased from Alliance Money Reserves, a money market mutual fund managed by Alliance Capital with assets exceeding $1 billion, $8.7 million principal amount of commercial paper notes issued by Mortgage and Realty Trust (MRT). MRT filed for reorganization under Chapter 11 of the Federal Bankruptcy Code on Apr. 12, 1990.

Dave H. Williams, chairman of Alliance Capital, stated that based on information publicly disclosed by MRT there will be sufficient income and assets to properly satisfy all creditors. At this early stage of the bankruptcy proceedings it is not possible to determine whether or to what extent Alliance Capital may be required to reduce the carrying value of the MRT securities. Alliance Capital does not believe at this time that a charge, if any, would have any effect on Alliance Capital's business activities or a material effect on its results of operations.

Alliance Capital Management L.P. is a leading international investment adviser, providing investment management services to institutions, primarily pension funds and endowments, and to individual investors through a broad line of mutual funds and cash management products. As of March 31, 1990 Alliance Capital managed more than $43 billion in assets.

DALLAS (APRIL 17) PR NEWSWIRE - American Airlines will inaugurate daily nonstop jet service today between Stewart International Airport near Newburgh, N.Y. and American's major connecting hubs at Chicago and Raleigh/Durham, N.C.

Inaugural activities, featuring civic and business leaders from New York, including New York Gov. Mario Cuomo, took place at the airline's newly renovated terminal.

Stewart thus becomes the fifth airport served by American in the New York metropolitan area. The others are Kennedy, LaGuardia, Newark, and Islip's MacArthur Airport on Long Island. Also, American is the first airline to operate scheduled passenger air service at Stewart, a former Air Force base now owned by the State of New York and operated by the Department of Transportation.

"We're looking forward to the inaugural because this service shows

American's continued commitment to the New York metropolitan community," said Jerry R. Jacob, the airline's eastern division vice president. "Bringing service to Stewart is a great opportunity for American, and we are delighted to be a part of the large and growing Mid-Hudson Region."

The Stewart schedule will consist of six roundtrip flights a day -- three serving Chicago and three serving Raleigh/Durham -- with 118-seat Boeing 727 tri-jets.

Through the hubs, American and its regional partner, American Eagle, will provide travelers and shippers convenient connecting services to more than 100 other major points, including Los Angeles, San Francisco, Phoenix, Dallas/Fort Worth, Houston, New Orleans, Miami and Orlando, Fla. Overseas points served through the hubs include Honolulu, Paris, Frankfurt, Brussels and San Juan.

DALLAS (APRIL 17) PR NEWSWIRE - American Express Publishing Corporation today announced it had signed an agreement to acquire Southwest Media Corporation, the publisher of D Magazine.

Financial terms of the transaction were not disclosed. "D Magazine is unique with a special character and sense of the Dallas/Ft. Worth Metroplex," said Thomas O. Ryder, president of American Express Publishing "and we are purchasing Southwest Media Corporation with the intent to maintain D Magazine's heritage and sense of community."

American Express Publishing Corporation currently owns and publishes six consumer magazines:

- NewYork Woman, - L. A. Style, - Atlanta Magazine (purchased in August 1989), - Food & Wine, - Departures, and - Travel & Leisure. "The purchase of D Magazine fits with our overall publishing strategy," said Ryder. "We want to invest in city magazines around the country that have strong ties to the community and its economy. We particularly like Dallas because it is a city on its way back and we are willing to invest in its future.

American Express currently has more than 2,500 employees in Texas in 21 locations throughout the state. It has 18 travel service offices, including six in Dallas as well as sites in Ft. Worth, Irving, and Plano. In addition, there are nearly 100,000 locations in Texas that accept the American Express Card.

American Express Publishing Corporation is a wholly owned subsidiary of American Express TRS, which, in turn, is a wholly owned subsidiary of American Express Company (NYSE: AXP). American Express TRS has primary business interests in travel, financial, insurance and communications business.

NEW YORK (APRIL 17) PR NEWSWIRE - The American Stock Exchange announced that Veronex Resources Ltd. (AMEX: VX) of Los Angeles, began trading 12,784,803 common shares today. Veronex Resources is a Canadian diversified natural resource company that has international holdings in oil and gas, gold and forest products. The company previously traded in the NASDAQ National Market System under the symbol VEOXF.

Trading under ticker symbol VX, the common stock opened on 1,000 shares at 4-3/8.

Veronex Resources' principal asset is its 40 percent working interest in the 72,000 acre Enim Oil Project located onshore South Sumatra, Indonesia. The company also has a 50 percent interest in the Congress Mine Property, a gold project in the Bridge River Mining District of British Columbia, Canada, and a forest products wood chip opportunity in East Kalimantan, Indonesia, that provides fiber products to the pulp and paper industries.

The company reported a loss of $581,000, or a $.05 per share loss, on revenues of $2,708,000 for the nine months ended Nov. 30, 1989, compared with a loss of $16,362,000, or a $1.73 per share loss, on revenues of $21,000 for the comparable period in 1988.

OAK BROOK, IL (APRIL 17) PR NEWSWIRE - McDonald's Corporation (NYSE: MCD) today announced the creation of "McRecycle USA," an environmental leadership program which sets an annual goal of purchasing $100 million worth of recycled materials for use in the construction, remodeling and operations of its U.S. restaurants.

Through this large-scale commitment to recycling and the environment, McDonald's is creating the largest new market for recycled materials in the United States. It represents the corporation's initial goal of having recycled products make up at least 25 percent of its annual expenditures on materials used to build, remodel and equip its restaurants.

Each year in the USA, approximately 375 new restaurants are built and 1,000 are remodeled by McDonald's. The products used in the construction and renovation of McDonald's restaurants range from building insulation and landscape timbers to table tops and waste containers to wallboard and roofing materials -- all of which can be made out of recycled materials.

"Recycling is one of the most important environmental steps America can take," stated Ed Rensi, president of McDonald's USA. "But there is an urgent need to expand the market for recycled materials so that individuals, communities and businesses can sustain -- and even increase -- their recycling efforts."

Rensi added, "Through 'McRecycle USA,' McDonald's is taking action to stimulate the market for recycled products by becoming a major buyer of recycled materials of all kinds. We challenge suppliers to provide us with these recycled products. We are a new $100 million a year market, waiting to be tapped."

Rensi stressed that McDonald's new $100 million market for recycled products is in addition to the more than $60 million that the company already is spending annually on recycled paper products such as napkins, drink carriers, tray liners and Happy Meal containers.

Shelby Yastrow, McDonald's senior vice president of environmental affairs, noted, "We're the largest user of recycled paper products in the quick service restaurant business. Now we're prepared to use our purchasing power to stimulate demand for a wide range of products made from recycled

materials."

To assist producers and suppliers of recycled products, McDonald's has established the McRecycle USA Registry Service. Manufacturers with recycled products to sell McDonald's can call toll-free at 1-800-453-1000 to register. They will receive information by mail regarding the program and how they can qualify to sell their products to McDonald's.

MINNEAPOLIS (APRIL 17) PR NEWSWIRE - International Multifoods Corp. (NYSE: IMC) today reported fiscal 1990 net earnings of $25.3 million, or $1.96 per share, down from the prior year which included a number of major unusual gains.

Net sales for the year ended Feb. 28, 1990, rose 7 percent to a record $2.1 billion. Operating earnings before major unusual items ("operating earnings") were up 6 percent with strong improvements in U.S. operations.

Included in the major unusual items last year were a significant gain on the sale of the company's domestic flour business and exchange gains on Venezuelan investments. In fiscal 1990, major unusual items amounted to a loss. Interest expense was up due to the company's expansion program and the full-year impact of the repurchase of common stock late in fiscal 1989.

For the fourth quarter, net earnings were $4.1 million, or $.32 per share, compared with $7 million, or $.56 per share the previous year. The decline in earnings was due to major unusual gains which were realized in last year's fourth quarter.

Net sales in the fourth quarter of fiscal 1990 were up 7 percent to $528.3 million. Operating earnings advanced 3 percent to $18.7 million, with continued strong results in the United States. For the quarter, U.S. net sales were up 10 percent; operating earnings advanced 29 percent.

ATLANTA (APRIL 17) PR NEWSWIRE - John H. Harland Co. (NYSE: JH) today reported record first quarter results.

Sales for the first quarter ended March 31 were $90.5 million, an 8 percent increase from 1989's $83.8 million. Net income was $14.9 million up 5.1 percent from $14.2 million last year. Net income per share was 40 cents, compared with 37 cents in 1989. Return on equity was 21.5 percent.

"Thanks in part to several value-added features to check orders, Harland's product mix is strengthening and assisting in the sales gain," said J. William Robinson, Harland chairman and chief executive officer. "In addition, almost 92 percent of our personal check orders are produced using offset printing technology, improving our efficiency."

During the quarter, Harland introduced MasterPieces(TM), a personal check line that represents a new concept in checking. The 12 check designs are pre-priced, and include many extras free with each order. "MasterPieces(TM) provides consumers with a wider selection of checks," said Robinson. "The standardized line also allows financial institutions to present checking products quickly and easily."

Also during the quarter, Harland began the construction process for a new building to replace its existing Memphis, Tenn. check printing operations. The company plans to move from its current 14,600-square-foot facility to a 34,000-square-foot operation in Bartlett Tenn. later in the year. The operation serves financial institutions in Arkansas, western Tennessee northern Mississippi and parts of Kentucky.

Harland is a major national participant in the financial and educational fields with production facilities across the United States and in Puerto Rico.

PALO ALTO, CA (APRIL 17) PR NEWSWIRE - MITEM Corporation, a producer of Macintosh(TM) information-management software, has announced that Exis, an information technology firm of KPMG Peat Marwick, will provide software training for MITEM's customers.

Under the agreement, Exis will offer training on MITEM's MitemView(TM) software tool. Exis will also provide project management, systems planning and analysis, application development, system configuration, and support for systems developed using the MITEM tool.

"With the MitemView tool, users can access multiple host applications through a Macintosh interface without impacting on the host environment," said Barry Margerum, president and CEO of MITEM. "The combination of MITEM's technology tools and Exis' systems-integration capabilities will give Macintosh users an unparalleled ability to gain the greatest benefit from their current investment in mainframe hardware and software."

"Many Fortune 500 companies are currently using MitemView software in such applications as host-based electronic mail systems, contract management, mainframe transaction systems, and executive support functions," said Joseph Garappolo, principal, desktop technologies and training with Exis.

MITEM Corporation is based in San Jose, Calif., and develops products to simplify user access and communications with minicomputers, mainframes, and other information sources, including CD-ROM and network servers.

Exis, a technology firm of KPMG Peat Marwick, provides a full range of systems integration services, including project management, systems planning and analysis, application and database development, system configuration, training and support.

With 130 offices in the United States, KPMG Peat Marwick provides accounting and auditing, tax, and management consulting services to a variety of corporations and individuals. It is a member of the international firm of KPMG, which maintains more than 600 offices worldwide and posted revenues of $4.3 billion in 1989.

DEARBORN, MI (APRIL 17) PR NEWSWIRE - After the last final exam, a successful job interview and a long-awaited graduation ceremony, the college grad can drive to that new job in a new Ford car or truck.

Ford Motor Company (NYSE: F) can't help make exams easier, but its College Graduate Purchase Program can make it easier and less expensive for new graduates to buy or lease a 1990 or 1991 model Ford or Mercury car, Ford light truck, or 1989 Mercury Tracer.

Participants in the program receive a $500 rebate -- on top of any incentives currently being offered (except Ford Employee Purchase Plans and the First-Time Buyer Program). The program also includes pre-approved credit amounts from Ford Motor Credit Company for eligible Ford and Mercury vehicles.

Eligible to participate are all graduating college seniors earning bachelor's degrees, as well as those graduating with advanced degrees, between April 1, 1989, and Dec. 31, 1990. Vehicles must be purchased or leased from dealer stock between April 1, 1990, and Dec. 31, 1990, or factory-ordered by Oct. 1, 1990.

The $500 cash rebate may be received as a direct payment from Ford or applied to the purchase. For those who finance through Ford Credit, no co-signature or down payment is required if the delivered price of the vehicle falls below the pre-approved credit amount for that vehicle.

Students wanting more information should call the program's toll-free telephone number: 1-800-321-1536.

CHICAGO (APRIL 17) PR NEWSWIRE - EAC Industries, Inc. (AMEX: EAC) today announced that it expects a loss of approximately $12.5 million for the fiscal year ended Jan. 31, 1990. This loss results in large part from the following items:

-- Write-off of intangible assets during the fourth quarter as follows: 1. Deferred relocation costs approximating $5.5 million primarily in the current year ($1 million greater than previous estimates) relating to the recent move of the company's Ideal Security Hardware subsidiary from St. Paul, Minn. to Johnson City, Tenn.

2. Goodwill approximating $1.2 million, also relating to Ideal. -- Fourth quarter accounting and audit adjustments at Ideal, of approximately $2.3 million, principally relating to inventory evaluation and shrinkage, accounts receivable and accrued liabilities. Poor accounting controls and records contributed to the size of these adjustments. Management has already taken action to correct these control weaknesses.

-- $750,000 in bank fees incurred in refinancing EAC's line of credit. -- Poor operating results at Ideal caused primarily by disruptions resulting from the recent move of its operations.

-- Legal and consulting fees relating to attempts to sell EAC or its subsidiaries.

-- Provisions for losses from discontinued operations. EAC has decided to switch from the LIFO to FIFO method of inventory accounting at Ideal with a resulting benefit to the 1990 fiscal year of approximately $400,000.

In spite of the significant problems involving EAC and its Ideal subsidiary, the company's other operating subsidiary, Goodren Products Corporation, continues to generate operating profits of approximately $760,000 for the year ended Jan. 31, 1990.

As a result of its sizable loss, EAC projects a Jan. 31, 1990 net worth of approximately $1 million.

The company also announced that it expects to file its SEC Form 10- K, which will contain the final audited figures, on or before May 1, 1990.

The board of directors has fixed the close of business on Apr. 27, 1990 as the record date for the determination of shareholders who are entitled to notice of, and to vote at, the meeting or any adjournments thereof. The transfer books of the company will not be closed.

EAC is a holding company serving the hardware and point-of-purchase advertising markets through its subsidiary companies.

NEW YORK (APRIL 17) PR NEWSWIRE - Following today's annual meeting of shareholders, Sundstrand Corporation President and Chief Executive Officer Harry C. Stonecipher announced the approval by shareholders of an increase in the company's authorized common stock and a two-for-one stock split of the company's outstanding common stock.

The shareholders approved an amendment to the company's certificate of incorporation reducing the par value of its common stock from $1.00 per share to $.50 per share, reclassifying each outstanding share of $1.00 par value common stock into two shares of $.50 common stock, and increasing the company's authorized stock from 50 million shares of $1.00 par value common stock to 150 million shares of $.50 par value common stock.

The amendment will become effective at the close of business on June 6, 1990, for distribution on June 20, 1990. Shareholders will receive new certificates for the additional stock resulting from the split, and should retain their existing share certificates, which should not be destroyed or returned to the company.

The board of directors of Sundstrand Corporation earlier today declared a quarterly cash dividend of $.55 per common share payable on June 20, 1990,

to shareholders of record at the close of business on June 6, 1990. With the approval of the stock split, the quarterly cash dividend becomes $.275 per share on the increased number of shares. It will be the 184th consecutive quarter that the company has paid a dividend.

Sundstrand Corporation, with 1989 sales of $1,595.4 million, is a market leader in the design, manufacture, and sale of a variety of proprietary, technology-based components and subsystems for aerospace (67 percent of 1989 sales) and industrial (33 percent of 1989 sales) markets. Sundstrand's common stock is listed on the New York, Midwest, and Pacific Stock Exchanges under the symbol SNS.

DALLAS (APRIL 17) PR NEWSWIRE - Whitehall Corporation (NYSE: WHT) announced today that its board of directors had considered the merger proposal submitted by Cambridge Capital Fund, L.P. and concluded that it would not be in the best interests of the stockholders to pursue the proposal.

In arriving at this decision, the board considered, among other factors, the conditional nature of the proposal including the lack of financing commitments, the inadequacy of the $20 per share price in relation to Whitehall's business prospects, and the value of Whitehall's assets including cash of approximately $10 per share.

The board also deemed the proposal untimely in relation to the consummation of Whitehall's strategic plan to capitalize on the expanding market for the maintenance and repair of aging commercial aircraft and the potential for growth in the company's participation in supplying equipment and services for the U.S. Navy's anti-submarine warfare program.

Whitehall Corporation designs and manufactures marine sensor systems, adapts commercial geophysical technology for underwater threat detection systems for the military, rebuilds, modifies and maintains aircraft, and offers land and marine geophysical exploration services.

AMANA, IA (APRIL 17) PR NEWSWIRE - Amana Refrigeration, Inc. has announced the opening of a unique program developed to make recycling easier for the 2,500 employees at its Iowa plant.

The program will officially begin April 20 with a ribbon-cutting ceremony at the Amana plant involving Iowa Governor Terry Branstad and Amana Chairman and Chief Executive Officer Henry J. Meyer. The opening coincides with the approach of Earth Day on April 22, a global event developed to focus greater attention on environmental issues.

"We've seen from our own company programs that recycling can be very effective in reducing space required for landfills," Meyer said. "We believe we can further expand these benefits by providing this service to employees."

With the new program, Amana employees may bring their newspapers, plastic milk jugs and used motor oil from home and deposit them in specially designed collection facilities at the plant. Amana will work with local companies to have the items recycled.

Amana will match funds generated by the program and donate the money the end of each year to a non-profit environmental concern in Iowa on behalf of Amana employees. Proceeds from the first year will be given to the Wetlands of Iowa, a program of the Iowa Natural Heritage Foundation.

The Amana program is believed to be one of the first of its kind for a non-recycling related business.

"For recycling to be successful, it needs to be convenient. Many of our employees come from smaller communities which do not have recycling collection stations. By locating stations at the work place, we hope to make the recycling process much easier," Meyer said.

Amana, a subsidiary of Raytheon Company (NYSE: RTN), Lexington, Mass., manufactures at its Iowa plant refrigerators, freezers, cooktops, ranges and Radarange(R) microwave ovens. Amana products are sold throughout the U.S. and in over 100 countries worldwide.

CONTACT: Ann Humbert or Joyce Keiser, both of Amana, 319-622-2142.

#90107p3659 04/17/1990 ~PR Newswire

SACRAMENTO, CA (APRIL 17) PR NEWSWIRE - Foundation Health Corp. today announced a multi-million dollar computer systems change that will affect nearly every area of company operations -- from member services to claims payments.

This month, the company will begin loading a new software package, specifically designed for the Health Maintenance Organization (HMO) industry, onto its new IBM 3090 mainframe computer. The move marks the first step in a long-range plan to overhaul and upgrade the corporation's management information systems.

"The vast majority of HMOs, including Foundation, have experienced a strain on their computer systems' capabilities," said Daniel D. Crowley, Foundation Health Corp.'s chief executive officer. "In response, most of these companies 'upgrow' their systems into a patchwork of PCs and mini-computers. Foundation, however, is one of the first HMOs on the West Coast to invest in a fully integrated system which can accommodate virtually unlimited growth."

The new system will go on-line in stages, beginning in July, and is expected to cost about $8 million over the next five years. It replaces Foundation's eight-year-old Hewlett-Packard computer system, which the company has outgrown.

The system software, Q-Care, was developed by Systems Choice Inc., a wholly owned subsidiary of General Telephone & Electric (GTE) Health Care Systems. An identical system currently is being used by The Travelers Health Network, an HMO with 125,000 members in 11 U.S. markets.

The system will support three main areas of the company's commercial business: member services, claims payments, and premium bilings. It is expected to speed member I.D. card processing and elegibility checks; provide timely, accurate claims payments; generate premium billings; help reduce administrative costs; and generate detailed managed care reports.

"Foundation Health is purchasing a proven product -- one which will actually reduce substantially the company's cost of growing," said Crowley. "The system will be tested carefully and introduced in a way that benefits everyone involved." Crowley noted that the company is forming a steering committee comprised of network physicians who will help oversee related systems modifications and enhancements.

Meanwhile, Foundation Health Federal Services is developing a plan to evaluate bringing claims processing in-house for its CHAMPUS Reform Initiative (CRI) contract. Currently, Electronic Data Systems (EDS) performs some processing for CRI claims.

Foundation Health Corp. is the parent company of Foundation Health, a California Health Plan. The plan is a federally qualified HMO with 280,000 members throughout a 23-county area in California. The HMO is the largest Independent Practice Association (IPA) model managed care organization in California (December 1989, "Interstudy").

The corporation's government arm, Foundation Health Federal Services Inc., is the prime contractor for the CRI. CRI is a potential five- year, $3 billion contract to provide health care to dependents of active duty personnel, military retirees and their dependents, and survivors of deceased military personnel.

NEW YORK (APRIL 17) PR NEWSWIRE - McGraw-Hill, Inc. (NYSE: MHP) reported first quarter net income of $16,489,000, a decline of 47 percent from the same period last year.

Revenue for the quarter increased 7.6 percent to $420,022,000. Earnings per share for the first quarter were 34 cents versus 64 cents a year ago.

"The results are in line with our expectations," said Joseph L. Dionne, chairman and chief executive officer of McGraw-Hill, Inc. "We anticipated a soft first quarter for several reasons."

Greater seasonality: "The formation last year of the joint venture school publishing company -- a major investment for McGraw-Hill -- has increased the seasonality of our business. And, as expected, the Macmillan/McGraw-Hill School Publishing Company posted a loss in the first quarter. But our share of the loss -- $12.8 million, including a $4.7 million benefit from accounting changes adopted by the joint venture -- is actually less than anticipated. We expect fine results from the joint venture company for the full year."

One-time gains: "In the first quarter of 1989, the company had a one-time after tax gain of $8 million when it changed its accounting for income taxes, adopting the Financial Accounting Standards Board Statement No. 96."

Increased interest expenses: "Borrowing for acquisitions in 1989 and earlier this year has led to a nearly $8 million pre-tax increase in interest expense in the first quarter compared to a year ago."

A higher tax rate: "The company benefited from a reduced tax rate in the first quarter of 1989, the result of divestitures. The tax rate for 1990 is 43 percent versus 30 percent a year ago.

"We've also begun to realize savings from last year's realignment of operations and from dispositions of unprofitable businesses.

"All four operating segments showed revenue increases for the first quarter with financial services and educational and professional publishing posting double-digit gains.

"Our operating profits increased 2.9 percent for the first quarter. A good performance by Standard & Poor's Ratings Group, particularly in municipals contributed to financial services' first quarter gain in operating profit.

"Educational and professional publishing benefited from a strong performance by Shepard's/McGraw-Hill, our legal publisher, and improvement at the college division, which offset softness in the healthcare business.

"Continuing investments in our construction information business and a shortfall in certain computer and communications operations and decreased advertising in Business Week were factors in the decline in information and publications services' operating profit.

"Broadcasting's operating profits were off due to increased programming costs and softness in some of our markets.

"We expect results to improve throughout the year and anticipate achieving our target for 1990 -- earnings of $3.50 to $4.00 per share."

NEW YORK (APRIL 17) PR NEWSWIRE - The Turner Corporation (AMEX: TUR) announced today that it has received an award from the Associated General Contractors for the First Interstate World Center building in Los Angeles.

At the AGC national convention held in San Francisco in March, The Turner Corporation received a merit award for the 75-story First Interstate building. The structure, the tallest building west of the Mississippi, features an interior core which allows the building to resist the maximum creditable earthquake expected in Los Angeles.

This is the third consecutive year Turner has been honored with a national AGC award. Last year, Turner's 75 State Street project in Boston received the organization's Build America award. In 1988, the

Turner-built United Airlines Terminal at Chicago's O'Hare International Airport won the same recognition.

"Winning recognition from the AGC is always an honor," said Harold J. Parmelee, president and chief executive officer, Turner Construction Company, "because the AGC is one of the most well respected organizations in our industry."

Further, Alfred T. MacNeill, chairman, president and chief executive officer of The Turner Corporation, expressed continued confidence in the outlook for 1990, advising, "We expect the first quarter 1990 earnings to be about $.35 per share."

Based in New York City, The Turner Corporation, through Turner Construction Company and other construction subsidiaries, is the nation's largest diversified builder of commercial, industrial, hospital and healthcare, institutional, government building and multi-unit housing projects. Operating through more than 35 offices, Turner has construction projects underway throughout the United States and abroad.

During 1989, The Turner Corporation put in place $3.6 billion of new construction and had a backlog of construction volume of approximately $4.7 billion at year end.

PITTBURGH (APRIL 17) PR NEWSWIRE - How much do Pittsburghers really know about their health?

The answer to this question and many others was studied by Pittsburgh-based Thrift Drug Co. through a comprehensive research survey called the Pittsburgh Health Survey.

Thrift Drug commissioned the Pittsburgh Health Survey to identify local residents' general health understanding about wellness, heart disease, diabetes, cancer and a host of other health-related topics. A profile of the health habits and risk factors of the average Pittsburgher also was developed.

The Pittsburgh Health Survey was developed with medical input from Dr. Stanley M. Marks, president-elect of the Allegheny County Medical Society. Parker Marketing Research, an independent firm, conducted the telephone survey among a random sampling of 400 Pittsburghers in early March.

The results of the Pittsburgh Health Survey, in the form of a resource guide called "Thrift Drug Health Lines," will be available to all Pittsburghers at the Thrift Drug Healthfair and Beauty Show which will be held at the Monroeville Expo Mart Saturday, April 28, noon-7 p.m., and Sunday, April 29, noon-5 p.m. Admission is free and open to the public. The Thrift Drug Healthfair and Beauty Show serves as a way for Pittsburghers to receive healthcare information. In addition, Pittsburghers can learn more about their personal health from their more than 100 participating vendors who will be giving free screenings and product samples.

According to Craig Sinclair, vice president of marketing for Thrift Drug, "Healthcare is a growing concern nationally, as well as here in Pittsburgh. At Thrift Drug, we are committed to providing healthcare information to our customers through our pharmacists, and serving as an important resource for healthcare needs in the communities we serve. That's why we're also involved in such activities as the Pittsburgh Health Survey research and the Thrift Drug Healthfair and Beauty Show -- to further advance healthcare education in our city."

Sinclair added that the Pittsburgh Health Survey will assist Thrift Drug in developing new programs to address the health misconceptions which are identified in the study.

Since its founding in 1935, Thrift Drug has grown to become the 11th largest drug store chain in the United States. Currently, Thrift Drug operates more than 450 stores in 19 states across the country, including 90 in the Pittsburgh region.

#90107p3682 04/17/1990 ~PR Newswire

HOUSTON (APRIL 17) PR NEWSWIRE - American Capital Management & Research, Inc. (NYSE: ACA) today reported net income of $5.07 million, or $0.21 per share, for the first quarter of 1990, compared with $5.16 million, or $0.21 per share, for the same period a year ago. First quarter 1990 revenues totaled $24.45 million, down from $25.52 million during the first quarter of 1989.

Assets under management as of March 31, 1990 were $12.8 billion, down from $13.2 billion a year earlier. This decline in assets under management includes a decline in market valuations during the first quarter of 1990. Excluded from the comparison are assets of affiliated insurance companies, which totaled $1.1 billion at the end of the first quarter of 1989. As reported previously, these assets are no longer being managed by the company as of Jan. 1, 1990.

Sales of fund shares at net asset value were $374.1 million in the first quarter, up from $312.7 million a year earlier. Such amounts include sales of the family of funds under the Common Sense Trust of $191.7 million and $126.2 million, for the respective periods.

Although the company has experienced a decrease in management fees, net income was relatively stable for the first quarter of 1990 as compared to the 1989 period because of reduced expenses and a higher equity in earnings from the Common Sense Trust joint venture with A.L. Williams, a wholly owned subsidiary of Primerica Corporation.

American Capital Management & Research, Inc. is a Houston-based investment management and marketing organization which provides investment advisory services to 36 mutual funds and closed-end investment companies. Primerica Corporation (NYSE: PA) owns approximately 83 percent of the outstanding common shares of American Capital.

NASHVILLE, TN (APRIL 17) PR NEWSWIRE - Corroon & Black Corporation (NYSE: CBL) today announced the appointment of Frank F. White, Jr., president of the Benefits & Specialty Sales Group (BSSG), to the position of chief executive officer of the group. The promotion is effective May 1, 1990.

Donald R. King will remain as chairman of the Nashville-based operating group. King will serve as a consultant to the group and be responsible for development and implementation of the BSSG merger strategy. He will also continue to serve on the staff of Corroon & Black Corporation as a senior vice president.

In his new position, White assumes full executive responsibility for BSSG's three operating divisions: wholesale property & casualty, life &

health programs, and the human resources and actuarial consulting group.

John R. Lamberson, president and chief operating officer of Corroon & Black Corporation, commented, "As we implement the management succession and regional and niche merger programs called for in the Corroon & Black strategic plan, Frank White's expertise and years of experience are an invaluable resource for the group and the corporation."

Prior to his current post in BSSG, White served as executive vice president of Corroon & Black's Brokerage Services Group, and has held responsibility for the group's Midwestern, Northeastern and Southeastern regions.

A native of Nashville, White joined Blair, Follin, Allen & Walker (BFAW), a Nashville-based predecessor firm of Corroon & Black, in 1965. During his 25-year career, he has served in numerous executive posts, including executive vice president and chief operating officer of BFAW, executive vice president of BSSG, and president and chief executive officer of Corroon & Black of Nashville, Inc.

The Benefits & Specialty Sales Group markets and administers life, health, wholesale property & casualty programs, and provides employee benefits and actuarial consulting services.

Corroon & Black Corporation, headquartered in New York City, is one of the world's largest full-service insurance intermediaries, providing insurance brokerage, risk management services, reinsurance brokerage, and employee benefits, compensation, and actuarial consulting to individuals, local governments, professions, business, and industry. It has subsidiaries across the United States and affiliated offices throughout the world. The corporation was founded in 1905 in New York City.

COLUMBUS, OH (APRIL 17) PR NEWSWIRE - John B. McCoy, chairman and chief executive officer of Banc One Corporation (NYSE: ONE), Columbus, Ohio announced today that at the board meeting following the annual meeting, Banc One's directors declared a regular quarterly dividend of $.26 per common share. The dividend, which is an increase of 10 percent over last year's first quarter dividend of $.24 per share, will be paid on June 30 to shareholders of record as of June 15, 1990.

Banc One Corporation previously reported record first quarter earnings of $101.8 million or $.70 per share. Earnings per share grew 16.7 percent over 1989 first quarter earnings of $.60. Banc One's net income was 10 percent above the previous record high of $92.6 million in the fourth quarter of 1989. Banc One's results now include its share of the net income of Bank One, Texas. Per share data for last year has been restated to reflect the 10 percent stock dividend paid to shareholders on March 2, 1990.

Banc One Corporation has assets of $27.2 billion, not including Bank One, Texas, and common equity of $2.34 billion as of March 31, 1990. Banc One Corporation now operates banking organizations in Indiana, Kentucky, Michigan, Ohio, Wisconsin and Texas with 670 offices.

WAYNE, PA (APRIL 17) PR NEWSWIRE - Bank of New England Corp. (NYSE: NEB) has selected SEI Corp. (NASDAQ: SEIC) to provide an integrated trust accounting and securities processing system for the trust and private banking division of its five bank affiliates -- Bank of New England, N.A., Bank of New England-Old Colony, Bank of New England-West, Connecticut Bank & Trust Co., and Maine National Bank.

Maine National Bank has been an SEI client since 1979. In announcing the five-year agreement today, Richard G. Scheide, executive vice president and head of the trust and private banking division of Bank of New England Corp., said, "After a thorough investigation of the capabilities of other systems, we selected SEI for its proven, advanced technology and fully integrated functionality as well as its track record of successful on-time conversions."

Bank of New England Corp.'s five affiliated banks will use SEI's complete product line -- TRUST 3000 (trust accounting); INVEST 3000 (portfolio management); TRADE 3000 (trade order processing); and SOURCE 3000 (securities/financial information database).

Henry H. Greer, SEI executive vice president and head of its information services division, said, "We are extremely pleased with Bank of New England's decision. The 3000 product line will contribute significantly to the bank's ability to continue to attract and serve trust clients." He noted that the system conversion will be complete in the first quarter of 1991.

SEI is a technology-based financial services company providing processing services and mutual funds to bank trust departments, and consulting and comparative evaluation services to pension funds and investment managers. The Information Services Division provides banks and other financial services institutions in the United States and Canada with a comprehensive IBM-based accounting and management support system used to effectively manage their trust departments.

#90107p3727 04/17/1990 ~PR Newswire

TAMPA, FL (APRIL 17) PR NEWSWIRE - TECO Energy, Inc. (NYSE: TE) reported earnings for the quarter ended Mar. 31, 1990 of 48 cents per share compared to 49 cents per share for the same quarter last year.

Operating income from the major diversified companies, TECO Transport & Trade and TECO Coal, increased 19 percent compared to the first quarter in 1989. These strong results, together with certain tax adjustments, helped offset the effect of lower revenues at Tampa Electric resulting from unusually mild winter weather.

Consolidated net income for 1990's first quarter was $27.4 million on revenues of $236.5 million, compared to net income of $27.9 million on revenues of $248.7 million for the first quarter of 1989.

Tampa Electric's first-quarter operating income was $42 million on revenues of $204.2 million. This compared to $48.3 million on revenues of $220.1 million for the 1989 period.

Mild winter weather was the main cause of the decrease. Lower energy sales to other utilities, higher depreciation expense and lower base rates effective Jan. 1, 1990 also decreased the utility's operating results. The rate reduction replaced the previous practice of making customer refunds designed to reflect lower federal income taxes.

Operating income from TECO Energy's diversified companies for the first quarter of 1990 was $8.9 million on revenues of $78.4 million, compared to

operating income of $8 million on revenues of $71.9 million for the same period in 1989.

Higher volume by the water transportation and storage companies combined with higher market prices and lower operating costs at the coal mining subsidiary contributed to the improved results.

Average shares outstanding during the most recent quarter were 56,812,990, compared to 56,754,016 in the first quarter of 1989.

TECO Energy is a diversified energy-related holding company headquartered in Tampa. Its principal companies include Tampa Electric, TECO Transport & Trade, TECO Coal, TECO Coalbed Methane, TECO Properties, TECO Power Services and TECO Investments.

NEW YORK (APRIL 17) PR NEWSWIRE - Bristol-Myers Squibb Company (NYSE: BMY) announced today that it has reached settlements with two suppliers of bulk chemicals to generic drug manufacturers who conceded that Bristol-Myers Squibb's patent on crystalline cefadroxil monohydrate (Duricef(R)) is valid and enforceable. Under the agreements, Dobfar and Interchem agreed they will not supply the compound to companies infringing on Bristol-Myers Squibb's patent.

On Mar. 29, Bristol-Myers Squibb announced it had reached settlements with Zenith Laboratories Inc. and Biocraft Laboratories Inc., who conceded that Bristol-Myers Squibb's patent on crystalline cefadroxil monohydrate is valid and enforceable and agreed to immediately cease all manufacturing and selling of products that infringe on that patent. Additionally, both Zenith and Biocraft were enjoined from future sale until the patent expires on Mar. 11, 2002.

The agreements follow rulings in Bristol-Myers Squibb's favor by the International Trade Commission and United States Court of Appeals for the Federal Circuit against Biocraft, Kalipharma, Inc., and other parties. Hearings against Kalipharma concluded on Mar. 30 in the Federal District Court in Newark, N.J.

NEW YORK (APRIL 17) PR NEWSWIRE - Sara Lee Corporation (NYSE: SLE) announced decisions in two separate legal actions involving trademark infringement by Berkshire Fashions, Inc.

The Federal Court of Appeals in New York affirmed a decision prohibiting further sales by Berkshire of Energizer gloves and slippers, finding Berkshire to have infringed Sara Lee's Sheer Energy mark.

In addition, The Federal District Court in New York found Berkshire in contempt of court for using a Double Diamond design and wrist strip which were "deliberately and impermissibly close to" Aris Isotoner's well-known Double V mark and trade dress utilized on Isotoner gloves. The court issued an injunction prohibiting further sales of Berkshire's gloves bearing those designs and ordered an accounting of profits and attorney's fees in amounts to be determined.

The first case was brought by Sara Lee Corporation, the second suit/case against Berkshire was brought by its division, Aris Isotoner.

Gordon H. Newman, general counsel said, "We are gratified that the courts have again recognized and protected our valuable trademark rights. We will continue to take whatever legal action is necessary to protect consumers from confusion arising from our competitors' use of deceptive trademarks or trade dress."

Sara Lee Corporation is an international food and consumer products company that manufactures a variety of packaged goods under such well-known brand names as Hanes, Bali, Isotoner and Sheer Energy. Aris is a leading manufacturer of gloves, slippers and other fashion accessory products. It also distributes Sara Lee's Sheer Energy gloves and slippers to mass-merchandise stores throughout the United States.

#90107p3744 04/17/1990 ~PR Newswire

MILWAUKEE (APRIL 17) PR NEWSWIRE - The Allied Industrial Workers International Union (AFL-CIO) is launching a corporate campaign and boycott against Whirlpool Corp. (NYSE: WHR), the giant appliance manufacturer.

The campaign will kick off with the 65,000-member union's participation in the company's annual stockholders meeting in Chicago on April 24.

Since last September, Whirlpool has engaged in a concentrated union busting effort against AIW Local 370 in Ft. Smith, Ark., which represents

some 3,500 workers at the company's refrigerator plant there, the union said.

After the union rejected the company's economic proposals last September, Whirlpool imposed a 58-cent-an-hour wage cut (slashing the hourly rate to $10.19), ended cost of living protections, halted dues checkoff and curbed arbitration protection, the union said. Last month, the company took another "step backward," AIW President Dominick D'Ambrosio said, calling for a two-tier wage and benefit structure, with new employees starting at 60 percent of the regular rate.

AIW's campaign will attack Whirlpool's corporate leadership and financial status and launch a nationwide "Don't Buy" effort against all Whirlpool products. "In 1989 the company recorded major gains in profits," D'Ambrosio said. He charged that Whirlpool's actions are part of a corporate plan to weaken unions at five other company locations and to maintain a non- union status at seven of its manufacturing facilities.

AIW will ask the AFL-CIO to initiate an all-union boycott of Whirlpool products among its 14 million affiliated members, the first nationwide boycott in several years against a big-ticket consumer product.

CONTACT: Ken Germanson of the Allied Industrial Workers of America, 414-645-9500 or 414-483-1754; or Greg Kenefick of Kenefick Communications, 202-347-7778, for the Allied Industrial Workers of America.

ARLINGTON HEIGHTS, IL (APRIL 17) PR NEWSWIRE - Motorola, Inc.'s (NYSE: MOT) radio-telephone systems group said today that the Federal Communications Commission (FCC) has adopted rulemaking changes in the 18 GHz Digital Termination Service (DTS) band to allow the applications of low power radio communications capabilities inside buildings.

The 18 GHz DTS band, as indicated by the FCC in 1988, is vastly underused by current license holders; hence, the commission's decision to encourage new proposals for a more effective spectrum utilization.

"We are very pleased with the FCC decision. Innovative radio applications such as those proposed in our Wireless In-building Network (WIN) comments will provide new levels of communications flexibility to business customers," said Al Zabarsky, general manger of Motorola RTSG's strategic operations.

Unlike other wireless in-building solutions, such as 'wireless PBXs,' WIN's architecture provides wide band widths and multi-megabit data rates needed to connect the modern, computer- and telephone- intensive office

environment.

"The development of a WIN-based system that addresses wireless in-building connectivity, combined with our current and planned analog and digital cellular technologies, allows Motorola to offer a complete range of wireless products in the domains of business and personal communications, voice and data communications, and in- and out-of-building communications," said Bernard R. Smedley, senior vice president of Motorola, Inc. and general manager of the radio-telephone systems group.

Motorola is the front runner in the development of PCN (Personal Communications Network) and DECT (Digital European Cordless Telephone), and is pioneering digital cellular technologies for Europe, Japan and the United States.

Motorola is the world's leading designer, manufacturer and supplier of cellular systems, infrastructure equipment and subscriber products.

VANCOUVER, WA (APRIL 17) PR NEWSWIRE - Ken Peterson Jr., chairman and chief executive officer of Columbia Extrusion Corp. announced a senior management reorganization of the firm.

Craig W. Anderson, president of Columbia Aluminum Corp. (the parent company of Columbia Extrusion Corp.), will expand his duties and become interim president of Columbia Extrusion Corp. Robert L. (Bob) Roberts, current president, will assume full-time responsibilities for sales and marketing.

According to Peterson, "The challenge of restarting the facility and rebuilding market share for a previously closed facility has been greater

than anticipated. We need Bob Roberts' skills dedicated, full time, to our sales and marketing effort. Also, the utilization of Craig Anderson, who successfully led the start up of our Goldendale facility, emphasizes the importance we place on the operations, quality and service in Rockwall."

Peterson added, "We have invested millions of dollars into plant, equipment, employee development, and training. We have a motivated work force that wants to succeed. This change is designed to maximize our efforts for positive results. Columbia Extrusion Corp. is a high capacity, three-press aluminum extruder in metropolitan Dallas. The facility also has the largest secondary aluminum cast house in Texas. Columbia Extrusion Corp. is a subsidiary of Columbia Aluminum Corp. The Rockwall facility currently employs a total of 102 people.

Columbia Extrusion Corp. is a wholly owned subsidiary of Columbia Aluminum Corp. of Goldendale, Wash.

BOSTON (APRIL 17) PR NEWSWIRE - Bank of New England Corporation (NYSE: NEB) today announced that it has reached an agreement in principle to sell all the securities activities handled by its wholly owned discount brokerage unit, New England Discount Brokerage, Inc., to Charles Schwab & Co., Inc. for an undisclosed cash price.

This transaction will contribute to BNEC's liquidity, improve its equity capital and continue its downsizing. Last week, the company had announced additional progress in its asset sales program through the sale of New England Commercial Finance Corporation and its mutual fund custody

business.

BNEC is continuing a strategy of reorienting its operations on its core businesses of consumer banking, trust and private banking, and middle-market, small commercial, and real estate lending in the New England region.

Charles Schwab & Co., Inc. is America's largest discount brokerage firm with five offices in New England and 110 branches nationwide, and with customer assets of over $26 billion.

Bank of New England Corporation is a Boston-based interstate bank holding company with assets of $25 billion and banking offices in four New England states. Its common stock is listed on the New York Stock Exchange and is traded under the symbol NEB.

CHARLOTTE, NC (APRIL 17) PR NEWSWIRE - The board of directors of First Union Corporation (NYSE: FTU) today declared quarterly cash dividends for both its common stock and its series 1990 cumulative adjustable rate perpetual preferred stock (NYSE: FTUpr).

The common stock dividend of 27 cents per share is payable June 15 to stockholders of record as of May 31.

The dividend rate for the cumulative adjustable rate preferred stock is 10 percent per annum, applied against $50 ($1.25 per share), and is payable June 30 to shareholders of record as of June 15.

The preferred stock was issued in connection with the January 29, 1990 merger of First Union and Florida National Banks of Florida, Inc.

As of March 31, 1990, First Union Corporation had assets of $39.1 billion and operated 821 banking offices in North Carolina, South Carolina, Georgia, Florida and Tennessee and 278 nonbanking offices in 36 states and two foreign countries.

#90107p3791 04/17/1990 ~PR Newswire
BOSTON (APRIL 17) PR NEWSWIRE - Bank of New England Corporation (NYSE: NEB) Chairman Lawrence K. Fish today unveiled a plan to restore the corporation's financial strength and rebuild it into a well-capitalized, strong regional bank of approximately $20 billion in assets serving New England.

The plan calls for rebuilding the corporation's liquidity and capital, strengthening the quality of its credit operation, reorganizing the management structure, increasing contacts with customers, and reducing costs. The recovery phase of the plan, now underway, will extend into 1991 and overlap with the rebuilding program.

"We are at an important juncture, largely because of the deterioration in commercial real estate throughout New England which has had a number of adverse effects on our financial situation," Fish said. "Solving these problems will require major financial and business restructuring which, while challenging, will allow us to rebuild a strong regional bank with a carefully controlled risk profile.

"While the ultimate size and shape of the company will depend on the actions we take in the recovery period, we intend to follow a strategy that focuses our attention on retail banking; commercial banking to community middle-market, and some large institutions and corporate enterprises; real estate lending; and trust and private banking," Fish added. "We're going to keep it simple: we're going to make sound loans."

The major elements of the recovery plan call for: -- Restoring liquidity to adequate levels and reducing borrowing from the Federal Reserve by stabilizing deposit levels through a targeted marketing and advertising

campaign, a national retail certificate-of-deposit campaign, and pledging or securitizing a number of assets.

-- Rebuilding capital by selling non-strategic assets and businesses which are not required either for our recovery plan or our long-term strategy. The corporation plans to sell its affiliate banks in Maine and Rhode Island, Maine National Bank and BNE-Old Colony.

-- Strengthening the loan portfolio by appointing a senior credit officer, establishing a "collecting bank" to eventually move off the balance sheet a portion of nonperforming real estate assets, and increasing our commitment to the controlled loan division.

-- Adopting a new organizational structure that clarifies line accountability, introducing new management processes, making selected staffing changes, and streamlining the governance structure.

-- Reducing costs through shrinking the size of the work force by a third, sharply trimming non-personnel expenses such as travel and entertainment, occupancy, etc., and increasing revenues and profitability in core businesses.

-- Reaching out to customers by increasing the personal effort of senior managers to contact current customers and attract new ones.

Bank of New England Corporation is a Boston-based interstate bank holding company with assets of $25 billion and banking offices in four New England states. Its common stock is listed on the New York Stock Exchange and is traded under the symbol NEB.

#90107p3794 04/17/1990 ~PR Newswire

ROSEMEAD, CA (APRIL 17) PR NEWSWIRE - Southern California Edison is increasing its investment in energy efficiency programs by $30 million in 1990 as part of a unique environmental partnership between regulators, California electric and gas utilities, consumer groups and environmental organizations.

Collectively, this diverse group has proposed a plan for the utilities to invest $500 million in energy efficiency over the next two years, which will result in more than $1 billion in energy savings. The increase in funding will bring Edison's level of investment in energy efficiency programs to about $140 million in 1990 and 1991.

"This agreement represents the strong commitment Edison, and the other organizations involved, have to saving energy, controlling energy costs and preserving environmental quality," said Howard P. Allen, SCE chairman and chief executive officer.

Responding to a California Public Utilities Commission concern that California was losing its international leadership in energy efficiency, the group spent six months negotiating the proposals outlined in "An Energy Efficiency Blueprint for California," jointly released by the group of 15 institutions. They include the Natural Resources Defense Council, the California Public Utilities Commission's Division of Ratepayer Advocates, the Toward Utility Rate Normalization (TURN) group, the California Energy Commission, Pacific Gas & Electric, San Diego Gas & Electric, Southern California Gas and Southern California Edison.

Specifically, Edison plans to expand its current programs with a focus on long-lived energy efficiency equipment for new and existing buildings. These are known as "lost opportunities," because if customers or builders put in less efficient equipment now, it can be many years before it is replaced.

Earmarked for expansion are: Residential and commercial new construction programs, including Edison certification of energy efficiency standards and cash incentives for builders;

Nonresidential hardware rebates, including a new lighting program aimed at small and medium-sized commercial customers;

Residential energy management incentives, including incentive payments tied to efficiency improvements and encouragement of participation by even the smallest consumers;

Direct assistance to low-income and elderly customers, including special programs for ethnic communities.

DETROIT (APRIL 17) PR NEWSWIRE - Commercial electric sales for March set a record high for the month but declining sales to the steel industry contributed to a nearly 1-percent overall reduction in Detroit Edison sales, compared with year-earlier figures.

A total of 3.3 billion kilowatt-hours (kWh) were sold in March. Record commercial sales of 705 million kWh were 1.8 percent higher than March

1989 and the eighth consecutive year-to-year increase for sales in this class. Since March 1989, more than 3,300 commercial customers have been added to Detroit Edison's southeastern Michigan service area.

Sales to residential customers were 943 million kWh or 0.7 percent below the record March 1989 sales.

Declining steel production brought March industrial sales down to 1.5 billion kWh or 0.6 percent below March 1989.

BIRMINGHAM, AL (APRIL 17) PR NEWSWIRE - Jones Plumbing Systems Inc. (AMEX: JPS) announced today consolidated net sales of the company were $38,734,000 for the fiscal year ended Dec. 31, 1989, which represents a 15 percent increase when compared to the consolidated net sales for the fiscal year ended Dec. 31, 1988.

A portion of that increase reflected the purchase of an on-going screw machine business.

The company reported net income attributable to common stock of $1,810,000 ($.33 per share) for the year ended Dec. 31, 1989, compared to $2,147,000 ($.44 per share) for the fiscal year ended Dec. 31, 1988. The reduction of net income attributable to common stock was due primarily to a decrease in gross margins and higher operating costs resulting from competitive market conditions, inclusion of a new screw machine business, and manufacturing start-up costs related to new products.

Jones Plumbing Systems Inc. is based in Birmingham, Ala., and is a fully integrated manufacturer and distributor of over 11,000 individual plumbing products, related hardware and other items. Its plant includes an automated cast iron foundry, rubber and plastic injection molding equipment, machining, stamping, roll forming and tooling and die facilities. The company sells its products to more than 6,800 customers who are wholesale plumbing suppliers, hardware wholesalers and original equipment manufacturers located primarily throughout the United States.

MINNEAPOLIS (APRIL 17) PR NEWSWIRE - Honeywell Inc. (NYSE: HON) today announced that its board of directors formally authorized Honeywell management to develop plans to spin-off its Defense and Marine Systems business into an independent company.

The company expects to complete the planning process, including requisite regulatory approvals, and present a plan for board approval in third-quarter 1990.

In July 1989, Honeywell announced that it would reduce its dependence on weapons markets and that it intended to divest its Defense and Marine Systems business. On April 3, Honeywell said it was pursuing both sale and spin-off alternatives. Today's announcement reflects the board of directors' approval of management's recommendation to pursue plans for a spin-off. Honeywell said that while today's action does not foreclose the possibility of a sale of these businesses, it believes that a spin-off offers the best value for shareholders.

It is expected that a spin-off would be structured such that common stock in a new company would be distributed on a pro rata basis to Honeywell shareholders. The company said that in addition to providing value directly to shareholders, Honeywell expects to generate proceeds from a borrowing by Honeywell which would be assumed by the new company.

In addition to board approval, final approval of the spin-off plan is subject to the receipt of a favorable IRS determination that the distribution of shares will be tax-free to Honeywell shareholders.

Defense and Marine Systems is a leading supplier of lightweight torpedoes and precision and conventional weapons to the U.S. armed services and NATO. The unit's 1989 sales were $1.138 billion, with net income of $53.8 million.

The business, headquartered in Minneapolis, comprises four divisions and two operations: Armament Systems Division (ammunition); Ordnance Division (air-delivered conventional weapons, mines); Precision Weapons Operations (precision munitions); Marine Systems Division (sonar receive and transmit systems, weapons sonars, mine countermeasure systems); Underseas Systems Division (Torpedo systems and related products); and Advanced Marine Systems Operation (undersea vehicles, surveillance systems). The unit employs 7,500 people, primarily in locations in Minnesota, Illinois and Washington.

Honeywell is a global controls company that provides products, systems and services for homes and buildings, industry, and aviation and space. The company had 1989 sales of $6.1 billion.

#90107p3814 04/17/1990 ~PR Newswire
LEXINGTON, MA (APRIL 17) PR NEWSWIRE - Raytheon Services Nevada, a subsidiary of Raytheon Company (NYSE: RTN) has been selected by the Department of Energy (DOE) as the winner of a competition to provide services for the Nevada Test Site and Pacific Operation.

Raytheon and DOE will negotiate a contract for critical support services valued at up to $625 million over a five-year period, beginning Oct. 1, 1990. The first-year contract increment is expected to be approximately $115 million.

Raytheon Company will provide management, operating and technical services to DOE through a newly established subsidiary, Raytheon Services Nevada. The new subsidiary will be composed of incumbent contract personnel from Fenix & Scisson of Nevada and key management and technical personnel from Raytheon subsidiaries and divisions, including Raytheon Service Company, Burlington, Mass., United Engineers & Constructors, Philadelphia, Pa., and its Stearns-Roger Division, Denver, Colo.

According to Dennis J. Picard, president of Raytheon Company, "The key to our success in this competition was the strength and experience of each of the Raytheon operations involved, combined with that of Fenix & Scisson,

and the tremendous synergy that we developed by all joining together for this important project."

Approximately 1,200 engineers, specialists, and support personnel will be employed under the contract. Raytheon expects that there will be substantial continuity between the incumbent workforce and that to be employed by Raytheon Services Nevada.

The Nevada effort is predominately conducted at the Nevada Test Site (NTS) and in Las Vegas. NTS is a 1,350-square-mile federal reservation located approximately 65 miles north of Las Vegas. The Pacific activities are conducted primarily at Johnston Atoll and on the Hawaiian Islands of Oahu and Kauai.

Services to be provided at NTS include project management, surface and subsurface engineering, technical suppport, communications, and construction inspection. Work to be performed in the Pacific includes project management, air terminal operations, marine services, facilities engineering, supply, utilities, medical services, communications, construction, operation, maintenance and other base support services.

Raytheon Company is a diversified, international, technology-based company active in electronics, aviation, appliances, industry services, construction and publishing.

MILWAUKEE (APRIL 17)PR NEWSWIRE - American Medical Buildings, Inc. (AMEX: A) announced today its results for the year ended Dec. 31, 1989.

The company had income from continuing operations of $150,000 ($.01 per share) for the year ended Dec. 31, 1989, compared to a loss of $5,917,000 ($.47 per share) for the year ended Dec. 31, 1988.

The company reported a loss from discontinued operations for the year ended Dec. 31, 1988, of $447,000 ($.03 per share). The loss resulted from the sale of the company's satellite transponder.

The company had income from continuing operations of $6,000 ($.00 per share) for the three months ended Dec. 31, 1989, compared to income of $360,000 ($.03 per share) for the comparable quarter of 1988.

During the three months ended Dec. 31, 1989, the company entered into two agreements for architecture and construction services for projects having a total value of $6.7 million. The total backlog of agreements at Dec. 31

1989 was $47 million.

HELENA, MT (APRIL 17) PR NEWSWIRE - Representatives of the Joe Brooks Chapter of Trout Unlimited and the Upper Yellowstone Defense Fund have called on the State Department of Health and Environmental Sciences to take the strongest possible action against the Church Universal and Triumphant for the spills of gasoline and diesel fuel which have been discovered in the last several days.

Over 30 thousand gallons of fuel have leaked from underground tanks on CUT land into ground water and into Mol Heron Creek.

"The church has consistently resisted close scrutiny of its construction activities under the guise of protecting its private property rights. Now their irresponsible installation of these tanks has jeopardized both public and private property rights of others along the Yellowstone," said John Bailey, spokesman for the Joe Brooks Chapter of Trout Unlimited. He noted that the spills have put one of the major spawning streams for the Yellowstone cutthroat trout at risk.

The Upper Yellowstone Defense Fund filed a formal complaint with the Water Quality Bureau, seeking an investigation and enforcement action. "The state should be seeking not only corrective action for the mess they've made, but also civil penalties," said Julia Page of the Upper Yellowstone Defense Fund.

The two groups have vowed that they will pursue a lawsuit in federal court under the Federal Clean Water Act if the state fails to take enforcement action. "The church has turned the Upper Yellowstone basin into a disaster area, and if the state doesn't act, we will," said Bailey.

#90107p3843 04/17/1990 ~PR Newswire

ST. LOUIS (APRIL 17) PR NEWSWIRE - The U.S. Navy/McDonnell Douglas F/A-18 Hornet surpassed one million lifetime flying hours during recent operations at sea.

Launched from the deck of the aircraft carrier USS Eisenhower, which is deployed to the Mediterranean Sea, Navy pilot Lt. Cmdr. Randy Causey

recorded the one-millionth flight hour on April 10.

The milestone achievement combines flying hours for all F/A-18 operators, including the Navy and Marine Corps, the National Aeronautics and Space Administration (NASA), the Canadian Forces, the Royal Australian Air Force and the Spanish Air Force. It comes just seven years after the Hornet first reached operational capability with the Navy in March 1983. First flight took place in November 1978.

"Recording one million flight hours this early in the program is a reflection of the utility and flexibility of the F/A-18," said James L. Spehr, vice president and general manager of the F/A-18 program for McDonnell Douglas (NYSE: MD).

"Operators are finding that the F/A-18 flies more hours than other aircraft because it's ready to fly more often. Its reliability is excellent," he said.

The Hornet's historic flight also marked Causey's 1,000th flight hour in the F/A-18. He is a member of Strike Fighter Squadron 136, based at Naval Air Station Cecil Field, Fla.

More than 900 F/A-18s have been delivered worldwide. The air forces of Kuwait and the Republic of Korea will begin flying F/A-18s in the early- to mid-1990s, and Switzerland named the Hornet the "clear winner" in its recent new fighter aircraft competition.

The Hornet is built in St. Louis by the McDonnell Aircraft division of McDonnell Douglas. Northrop Corp. is the principal airframe subcontractor. General Electric builds the aircraft's engines, and Hughes Aircraft makes the radar.

#90107p3845 04/17/1990 ~PR Newswire

DETROIT (APRIL 17) PR NEWSWIRE - Turner Construction Company, a nationally prominent general contractor, has been hired to facilitate the development of Grayhaven Marina Village, a Detroit waterfront community, scheduled for completion in July 1990.

The announcement was made by Jay Turner, president of J & J Slavik, Inc., and Charles H. Brown, president of Grayhaven Estates Development Company, the general partners and co-developers of Grayhaven.

The 190-apartment unit and townhouse community and 104-boat slip marina is currently 85 percent completed.

Delays in construction by the original general contractor have compelled the developers to hire the Turner Construction Company, of Detroit, as construction consultants. Turner anticipates completion of the project within 90 days.

"We are very excited about Grayhaven taking its place as an active and vital member of the riverfront community," said Brown. "With the addition of Turner Construction to our team, we are assured our residents will be able to move into and enjoy their new homes on schedule."

Turner Construction, one of the largest and most respected full- service contractors in the nation, has been brought on the project as a construction consultant. The firm will ensure its timely completion and maintain the high standards of quality and architectural excellence of the Grayhaven development.

"Turner Construction's past track record of completing projects within the exacting determinants of cost, time and quality is respected throughout the industry," said Mr. Turner. "We are optimistic there will be no further delays on the project."

Schervish Vogel Merz, P.C., architects of Grayhaven, will continue to serve in the capacity as the design architects, and will help to facilitate the construction transition.

Original completion for Grayhaven was to have occurred several months ago. However, Grayhaven's developers terminated its relationship with the original contractor, the Toledo-based Douglass Company, due to unreasonable construction delays. The action came after a suit was filed against the Douglass Company March 2, 1990.

Brown said a thorough assessment of the status of subcontractors involved in the project is currently in progress, but it is expected that most will continue to work on the development. He added that other contractors may also be brought on the project to facilitate its successful completion.

CAMBRIDGE, MA (APRIL 17) PR NEWSWIRE - Polaroid Corporation (NYSE: PRD) reported today that net earnings for the first quarter of 1990 were $31.8 million. Net earnings in the first quarter of 1989 were $25.9 million, which reflected a charge for Shamrock-related expenses. Primary earnings per common share for the 1990 first quarter were 43 cents per share

compared with 29 cents per share in the first quarter last year.

First quarter operating profits were $65.4 million compared with $34.9 million last year. Last year's first quarter operating profit reflected $38.5 million of expenses related to the unsuccessful takeover attempt by Shamrock Holdings, Inc. and certain of its affiliates. Without these expenses, last year's operating profits would have been $73.4 million.

Worldwide sales were $436.2 million for the 1990 first quarter, compared with $442.3 million in the first quarter of 1989.

Polaroid Corporation, with sales of almost $2 billion, is the worldwide leader in instant imaging. The company supplies instant photography, cameras and films, conventional films, videotapes and electronic visual communication products to family, business, and technical and industrial markets.

CHICAGO (APRIL 17) PR NEWSWIRE - Ameritech (NYSE: AIT) today reported net income for the quarter ended March 31 of $303.5 million, compared with $300.8 million from the same period a year ago.

Earnings per share were $1.13, compared with $1.12 in the first quarter of 1989, on 268 million average shares outstanding. Quarterly results were affected by one-time expenses of approximately $54 million related to work force reductions.

"During the quarter, we streamlined operations to further strengthen our competitive position," said Ameritech Chairman and Chief Executive Officer William L. Weiss. "Work force reductions totaling 1,265 at Illinois Bell and Michigan Bell were achieved through early retirement incentives."

"In addition, we announced plans to consolidate 14 data processing locations into four regional centers over the next five years," Weiss said. "Technological improvements and new efficiencies will enable the centers to operate with about 700 fewer people by 1995."

Revenues for the quarter increased 4.7 percent, to $2.6 billion, primarily due to continuing growth in customer telephone and mobile lines. Customer telephone lines increased by 448,000, or 2.9 percent, to 16,041,000; and mobile lines rose by 93,000, or 57 percent, to 257,000, over the same period a year ago.

Expenses for the quarter rose 5.8 percent, primarily due to the early retirement incentives related to the force reductions. Excluding these one-time charges, expenses increased 3.2 percent.

Return to equity was 15.8 percent, compared with 15.2 percent for the first quarter of 1989, and return on total capital was 11.6 percent, compared with 11.8 percent.

During the quarter, the U.S. Appeals Court in Washington, D.C., ordered the U.S. District Court overseeing the Bell system breakup to review its decision barring the regional companies from offering information services.

Weiss said he was encouraged by this ruling because it provides an avenue for possible removal of the information services restriction and sets standards that could provide relief on the manufacturing and long-distance restrictions as well.

Weiss also said that during the quarter Ameritech received its most favorable incentive regulation ruling to date when the Michigan Public Service Commission adopted a plan that gives Michigan Bell greater earnings flexibility.

The plan -- which began April 1 and runs through 1994 -- allows earnings above a certain level to be shared between customers and shareowners, and invested in Michigan's telecommunications infrastructure.

BOSTON (APRIL 17) PR NEWSWIRE - The board of directors of Boston-based Massachusetts Casualty Insurance Company announced today the appointment of John M. Quinlan as president and chief executive officer. Quinlan replaces Milan A. Heath, who has resigned.

Massachusetts Casualty Insurance Company is a major underwriter of individual non-cancellable disability income insurance with assets of nearly $107 million at year-end 1989. The company was acquired by Sun Life of Canada in December 1986.

Quinlan, formerly executive vice president of individual insurance operations of State Mutual Life Assurance Company of America, Worcester, Mass., has more than 35 years of insurance industry experience.

Quinlan joined State Mutual in 1954 in the data processing area. He left briefly in the early 1970s to serve as managing director of Insurance Systems of America, a software development consulting firm for the

insurance industry.

In 1973, Quinlan returned to State Mutual where he served in a number of executive positions including vice president of data processing, senior vice president of administration, and senior vice president of individual insurance. He was named an executive vice president in 1986. Quinlan also served as president/director of SMA Life Insurance Company, the stock subsidiary of State Mutual.

Quinlan, a graduate of Clark University, attended the Harvard University Advanced Management Program in 1988. He is a Chartered Life Underwriter and a Chartered Financial Consultant.

"We expect Massachusetts Casualty to build on its strong foundation under the direction of John Quinlan. John's distinguished insurance background and strong leadership abilities, combined with the talented staff at MCIC, will bring the company to new levels of success," said David D. Horn, senior vice president and general manager of the U.S. operations of Sun Life of Canada, and chairman of the MCIC board of directors.

Sun Life of Canada and its subsidiaries market a range of insurance, pension and investment products in the United States as members of Sun Financial Group. Sun Life's total assets under management at year-end 1989 was more than $46 billion.

TORONTO (APRIL 17) PR NEWSWIRE - The Horsham Corporation (NYSE: HSM) today announced that Peter Munk, chairman, has been appointed chief executive officer. Jerry Garbutt has been appointed president and chief operating officer of Horsham. Munk is also chairman and chief executive officer of American Barrick Resources Corporation.

Munk, founder of both companies, will assume an active role in the management of Horsham which has become a much larger operating company with the acquisition and integration of Clark Oil & Refining Co.

In announcing these changes, Munk said the Garbutt will bring to Horsham the managerial and financial strengths he has provided to American Barrick Resources Corporation in its growth over the past five years. American Barrick is 22.4 percent owned by Horsham.

Garbutt has been associated with Munk and his group of companies since 1980, most recently as executive vice president and chief financial

officer of American Barrick Resources Corporation. Garbutt will continue as a director of American Barrick.

With the successful completion of the Clark acquisition and arrangement of permanent financing, Ian W. Delaney, president and chief executive officer of Horsham is resigning to pursue his own business interests. Delaney, who is a major Horsham shareholder, will remain a director and will continue to work closely with Horsham management.

The Horsham Corporation has become a major North American company with revenues of over U.S.$2 billion and assets of more than U.S.$800 million. The company is listed on the Toronto, Montreal and New York stock exchanges (HSM).

SEATTLE (APRIL 17) PR NEWSWIRE - Because of an overwhelming demand for luxury hotel rooms that meet the needs of the business and pleasure traveler alike, the Seattle Sheraton Hotel & Towers has just completed phase one of its $7 million renovation project.

The emphasis of phase one focused on the Towers section. With a 30 percent increase in its total number of rooms, Towers now consists of 103 luxury rooms and suites. The exclusive Towers registration area has been expanded so that two Guest Service Agents may work side by side. The

Towers lounge was also expanded by 40 percent, as was its kitchen facilities. Towers guests are served a complimentary continental breakfast buffet, as well as high tea in the afternoon and hors d'oeuvres in the evening. During non-meal times, guests can use the lounge to conduct small meetings or utilize a workstation, complete with telephone-computer hookup.

An additonal 300 rooms in the main hotel, 14 floors in all, were also renovated. Each room was completely redone; from the carpet and drapes to the furniture and wall covering. Over 7,300 pieces of furniture were purchased as were 3,000 gallons of paint, 38,000 yards of wall covering, 23,000 yards of carpet and eight miles of vinyl baseboard. All totaled, phase one required in excess of 50,000 man-hours.

TORONTO (APRIL 17) PR NEWSWIRE - Robert M. Smith, president and chief operating officer, American Barrick Resources Corporation (NYSE: ABX), today announced that Alan Hill has been appointed executive vice president operations and Gregory Wilkins has been appointed executive vice president and chief financial officer.

Hill, formerly senior vice president, operations, has responsibility for the company's six producing gold mines in Canada and the United States. Hill has been responsible for the preparation and implementation of the company's $400-million development program at the Goldstrike Mine.

Wilkins, formerly senior vice president, finance, assumes overall responsibility for the company's financial policies and programs. He is taking over the position of chief financial officer from Jerry Garbutt who has been appointed president and chief operating officer of The Horsham Corporation. Horsham owns 22.4 per cent of American Barrick.

In making these announcements, Smith stated that the appointments both at American Barrick and Horsham further strengthen the company's management group. Jerry Garbutt will remain as a director of American Barrick and thus continue to make a contribution to that company.

American Barrick is a leading North American gold mining company with assets of more than US$1 billion. The company's shares trade on the Toronto, Montreal, and New York stock exchanges (ABX), the Paris Bourse, and the Swiss stock exchanges (ABR).

MIAMI (APRIL 17) PR NEWSWIRE - Overseas Investment Recovery Corporation, a successor in interest to Overseas Corporation, today won a default judgement in United States District Court, Southern District of Florida, against the Federal Deposit Insurance Corporation (FDIC).

The decision, which was made by Judge Thomas Scott, states that the FDIC is liable for the losses Overseas suffered through its association with Vernon Savings and Loan Association of Dallas, Texas, since taken over by entities related to the FDIC.

"We are elated to learn that the United States District Court has confirmed our position," said Augusto Menendez Jr., chairman, president and CEO of Overseas. "We are now looking forward to the prospect of moving ahead with our business."

Overseas is seeking $50 million in compensatory damages and $750 million in punitive damages in the case which was filed in federal court on March 7, 1990 by James F. Gilbride of Gilbride, Heller & Brown.

The counts alleged in the suit include fraud; recklessness; breach of construction loan agreement; tortious interference with contract; breach of contract; negligent misrepresentation and breach of fiduciary duty.

Overseas Corporation is a Miami-based real estate development and management company that has planned and developed innovative and successful resort complex projects in the United States, the Caribbean, South America, Europe and Australia. Overseas was ranked as the 148th largest company in Florida on Florida Trend's 1989 list of the 200 largest Florida corporations and as the 32nd largest Hispanic company among the nation's 500 largest Hispanic corporations in 1988.

CALGARY, ALBERTA (APRIL 17) PR NEWSWIRE - Canadian Occidental Petroleum Ltd. (Toronto: CXY) announces that its wholly owned subsidiary CanadianOxy North Sea Petroleum Ltd., Total Oil Marine (Total) plc. and Ultramar Exploration Ltd. have reached an agreement with National Power, a recently privatized UK power company, to supply gas from the Caister field to a new combined cycle power station to be in service towards the end of 1993 in Killingholme, South Humberside, England.

The Caister field, operated by Total, lies in the southern gas basin of the North Sea in UKCS block 44/23a and is a medium size field located approximately 160 kilometers from the Yorkshire coast in 43 meters of water.

Development is expected to be by means of a single steel platform with the gas being transported through a new pipeline to Killingholme.

The gas sales contract with National Power at present, involves three of the four Caister partners. Licensees in Block 44/23a are:

CanadianOxy North Sea Petroleum Ltd.	25 percent
Total Oil Marine plc.	45 percent
Ultramar Exploration Ltd.	19 percent
Conoco (U.K.) Ltd.	11 percent

Developing the Caister field and bringing the gas to market is part of CanadianOxy's long term strategy to increase its presence internationally in seeking more attractive returns for the company.

#90107p3894 04/17/1990 ~PR Newswire

LONG BEACH, CA (APRIL 17) PR NEWSWIRE - The Federal Aviation Administration (FAA) today began engine and aircraft performance certification tests on the first McDonnell Douglas (NYSE: MD) MD-11, a major milestone in the new tri-jet's test program that was reached just over three months after its maiden flight.

"The speed with which this milestone was reached is attributable to the aircraft's design and production quality, the planning and teamwork on the project, and the hard work of the FAA staff assigned to the program," said MD-11 flight test program head George Field. "These factors allowed us to begin FAA testing very early on."

The second aircraft, which began flight testing March 1, is scheduled to start FAA tests in early May. Both are based at the company's test facility in Yuma, Ariz. The third MD-11 is scheduled to fly before the end of April.

Five MD-11s will be used in the flight-test program, with FAA certification expected before the end of the year.

The first two aircraft are powered by General Electric CF6- 80C2- D1F high bypass turbofan engines, each rated at 61,500 pounds of takeoff thrust for the MD-11. The engines are controlled by a new electronic fly-by-wire system that eliminates routine mechanical throttle adjustments, similar to fuel-injection on today's cars.

"The engines have been reliable and efficient, and have operated trouble-free," Field said.

For the current series of tests, new GE production and instrumented engines have been installed on the first ship, which to date has accumulated 140 hours of flight time. Project pilot John Miller and his crew will continue to test the aircraft's performance and handling while cruising, climbing, descending, and at extreme center of gravity conditions.

Ten Douglas test pilots have been qualified to fly MD-11s. The aircraft have flown at speeds of up to Mach 0.945 and at altitudes of up to 39,000 feet.

ATLANTA (APRIL 17) PR NEWSWIRE - NovAtel Communications Ltd. announced the release of the V04D system software package. Cellular service providers are now offered the convenience of selecting from a full spectrum of NovAtel 800 CM software features -- and tailor-making the package to meet their customers' needs.

''This latest system software enhancement provides our system users the most advanced features available,'' says Jim Chitkowski, NovAtel's Vice President of U.S. Systems Sales and Marketing. ''With automatic call

delivery, formatted as a preliminary release of IS-41, mobile users can originate and receive calls as they travel anywhere within the NovAtel network. This capability, coupled with intersystem handoff between NovAtel and other manufacturers of cellular system equipment, gives NovAtel a clear networking advantage.''

With the release of V04D, NovAtel has attained its goal of providing a single package containing all 800 CM standard and optional software features. The numerous system options are easily selected from a menu, allowing service providers greater control by activating features as required.

NovAtel developed the V04D software package in response to input from our customers base on required networking and subscriber features. ''NovAtel's aim is to continue to monitor the marketplace, listen to our customers' needs, and provide features and services that will permit our operators to generate revenue or reduce costs,'' says Chitkowski.

''The innovative distributed architecture of our CM system product family gives our customers a competitive edge in delivering high quality cellular service over a wide market range, from cities such as Grand Rapid, Michigan or Calgary, Alberta down to the smallest Rural Service Areas (RSAs),'' says Dr. Arunas Slekys, NovAtel's Senior Vice President of Research and Development. ''The V04D software is another example of the superiority of our networking capability.''

Headquartered in Calgary, Alberta, Canada, NovAtel Communications Ltd. is a subsidiary of Alberta Government Telephones. A leader in cellular technology, NovAtel currently employs more than 1,300 people in the research, development, manufacture and sale of cellular telephones and cellular systems worldwide.

NovAtel Communications Inc., U.S. Systems Sales, is located in Norcross, Ga., and is responsible for the marketing and implementation of cellular systems in the United States.

#90107p3911 04/17/1990 ~PR Newswire

ATLANTA (APRIL 17) PR NEWSWIRE - NovAtel Communications Ltd. announced the development of a prototype portable Supplementary Cellular System (SCS TM). The SCS is intended to serve as a complement to traditional regional cellular products in unique applications.

The NovAtel SCS is designed to provide reliable, affordable cellular service in locations such as subways, parking garages, recreational areas,

and construction and mining sites. In addition, NovAtel envisions SCS to be ideal for cellular telepoint service where SCS stations may be placed in well-traveled, public areas for originate-only service from a cellular phone.

''The SCS further demonstrates NovAtel's commitment to developing innovative, cost-effective alternatives for cellular system operators,'' says Sandy Moore, NovAtel Executive Vice President.

The SCS has been in development at NovAtel since 1988. The stand- alone, portable cellular unit is contained in a single rack mount unit measuring 19-inch x 22-inch x 17.5-inch and weighing less than 100 pounds. The SCS is powered by 110-volt AC power, providing 240 milliwatts of power per channel.

The unit provides signal coverage in a five-mile radius using an eight-decibel gain antenna elevated 60 feet. The compact size of the SCS allows the unit to be pole mounted with an appropriate environmental cabinet. The prototype SCS contains three NovAtel base station transceivers which allow mobile-to-mobile and mobile-to-land conversations.

The SCS is presently being market-tested to identify potential applications and product enhancements. ''The SCS test provides an opportunity to gauge customer response to the potential uses of the product,'' says James Chitkowski, NovAtel's Vice President of U.S. Systems Sales and Marketing. ''Our field trials of the SCS will provide a great deal of insight into the future development of supplemental wireless communications. With the advancement of this innovative technology, the SCS could become the forerunner of tomorrow's cellular telepoint service.''

Headquartered in Calgary, Alberta, Canada, NovAtel Communications Ltd. is a subsidiary of Alberta Government Telephones. CALGARY, ALBERTA (APRIL 17) PR NEWSWIRE - NovAtel Communications Ltd. has appointed Graham Rivers as managing director of NovAtel's European operations in its Melksham, Wiltshire office. Rivers has assumed responsibility for cellular sales, marketing and service.

Prior to joining NovAtel, Rivers worked for Harris Systems Limited as U.K. Marketing Manager. He has 14 years of sales and marketing experience with Harris Systems and Burroughs Machines Limited.

Rivers is a graduate of Bradford University, with a Masters degree in Business Administration.

''As managing director of NovAtel Europe, Graham will be responsible for enhancing NovAtel's position as an aggressive, service-oriented competitor within the challenging cellular industry,'' says Sandy Moore, executive vice president. ''In making this appointment, it demonstrates our ongoing effort to ensure continued growth of our cellular market share, in addition to providing our customers with the standard of products and service they have come to expect.''

Headquartered in Calgary, Alberta, Canada, NovAtel Communications Ltd. is a subsidiary of Alberta Government Telephones. PALO ALTO, CA (APRIL 17) PR NEWSWIRE - Lincoln N.C. Realty Fund Inc. (AMEX: LRF) the "company" today reported a net loss of $650,023 or 33 cents per share, on revenues of $3,591,684 for the year ended Dec. 31, 1989.

This compares with net income of $3,022,848 or $1.51 per share on revenues of $5,143,319 for the year ended Dec. 31, 1988.

In the fourth quarter of 1989 the company reported a loss of $659,842 or 33 cents per share, on revenues of $696,298 as compared with net income of $673,000, or 33 cents per share, on revenues of $987,000 for the fourth quarter of 1988.

William F. Garlock, president of the company, stated that income for 1989 reflects an allowance of possible losses of $2,750,000 or $1.38 per share for its Lincoln Wrigley Creek investment and its Lincoln Rancho Bernardo investment. The loan loss reserve for the Lincoln Wrigley Creek investment of $1,750,000 was previously reported in the third quarter of 1989. The loan loss reserve of $1,000,000 for the Lincoln Rancho Bernardo investment has been recorded in the financial statements in the fourth quarter.

Lincoln N.C. Realty Fund Inc. is a real estate investment trust. Its securities are listed on the American and Pacific stock exchanges.

CHICAGO (APRIL 17) PR NEWSWIRE - Resort Income Investors Inc. (AMEX: RII) today reported earnings for the year ended Dec. 31, 1989. Net income for the year was $6,408,091, or $1.54 per share, based on 4,156,000 shares outstanding. Included in net income for the year is Bonus Interest of $578,450 received by the company from the early retirement of the company's Laguna Niguel loans made to an affiliated borrower.

Resort Income Investors Inc. began operations in November of 1988 and, therefore, 1988 net income of $728,167 is not comparable to 1989 results.

Company Chairman Dennis J. Callaghan stated that the company was pleased that operating results during its first full year of operations enabled the Company to pay dividends of $1.575 per share. He noted that annual dividends of $1.50 per share are guaranteed by Hemmeter Guaranty Corp. through Oct. 31, 1991.

The company operates as a Real Estate Investment Trust (REIT) under the provisions of the Internal Revenue Code. As such, it is required to distribute at least 95 percent of its taxable income each year to continue to qualify as a REIT.

Resort Income Investors Inc. (RII) is a Chicago-based REIT. RII is a lender focusing on the destination resort market and has a portfolio of participating pre-development mortgage loans made to affiliates of Honolulu-based Hemmeter Corp.

The Investment Manager of RII is RC&H Inc., a Chicago-based affiliate of Ruff Callaghan & Hemmeter Company (RC&H Company). The Investment Manager is responsible for reviewing investment options and making investment recommendations to the RII board of directors. Two of the principals of RC&H Company, George Ruff and Dennis Callaghan, serve as principals of the Investment Manager.

RC&H Company is an affiliate of Hemmeter Corp., a company founded and headed by Christopher B. Hemmeter, the recognized leader in the development of luxury destination resorts. Previous developments of Hemmeter Corporation include the Hyatt Regency Waikiki at Hemmeter Center in Honolulu, the Hyatt Regency Maui, the Westin Kauai at Kauai Lagoons, the Westin Maui, and the Hyatt Regency Waikoloa on the Big Island of Hawaii.

UNIVERSAL CITY, CA (APRIL 17) PR NEWSWIRE - MCA Inc. (NYSE: MCA) announced today that its previously announced acquisition of the David Geffen Company and related music publishing business was effected today. In the acquisition, MCA issued approximately 921,914 shares of a new Series B Participating Convertible Preferred Stock of MCA to David Geffen. Each share of the Series B Preferred Stock will pay a dividend equal to 10 times the dividend paid on the share of MCA common stock and will carry one vote per preferred share. Under the terms of the merger agreement, MCA is expected to issue not more than approximately 622,000 shares of MCA common stock pursuant to certain existing agreements of The David Geffen Company.

As earlier reported, in connection with the acquisition, MCA and Mr. Geffen have entered into a stockholder's agreement which governs the terms under the Series B Preferred Shares may be converted into MCA common stock. Such conversion, on the basis of 10 MCA common shares for each preferred share, may occur only upon disposition of the preferred shares by Mr. Geffen and only in accordance with the methods of disposition permitted in the stockholder's agreement. The stockholder's agreement also establishes limits on the number of preferred shares which may be converted by Mr. Geffen and sold during a four-year period and contains a 20-year "standstill" agreement. Mr. Geffen has also entered into a long-term employment agreement with MCA providing for David Geffen's exclusive services in the music industry.

ROYAL OAK, Mich. (APRIL 17) UPI - A mail bomb went off Monday night outside a suburban Detroit post office as last-minute tax returns were being mailed, injuring a postal worker, officials said.

The postal worker, identified by police as Tom Berlucci, 29, noticed a large manila envelope smoldering in a basket of mail at a curbside drop site set up by the U.S. Postal Service as a convenience to 11th-hour tax filers, police Lt. Ray Taylor said.

Berlucci reached into the basket, picked up the envelope and threw it into a nearby puddle, where it ''blew up,'' Taylor said. Witnesses described the detonation as a ''pop'' accompanied by a flare of flame that quickly burned out.

''What appears to have happened is a letter bomb went off,'' Taylor said. The officer said he did not know the address on the envelope, but witnesses said it was addressed to ''The Tax Thieves.''

Berlucci, 29, who suffered burns to both hands, was treated at William Beaumont Hospital and released. He suffered no disabling injuries, Taylor said.

Postal inspectors, the FBI and agents from the U.S. Bureau of Alcohol, Tobacco and Firearms helped city police cordon off the area.

#90107u0154 04/17/1990 ~United Press International

CHICAGO (APRIL 17) UPI - The Chicago Blackhawks had one foot in the grave and the other dangling over it Monday night.

But after their penalty killers gave them life, Wayne Presley sent the Minnesota North Stars reeling and rookie Jeremy Roenick knocked them out.

Presley and Roenick each scored twice in a four-goal second-period outburst that sparked Chicago to a 5-2 triumph, enabling the Blackhawks to capture their first-round playoff series 4-3.

''It was just like a fight,'' Roenick said. ''You're backed into a corner. You have to come out swinging, and we felt threatened. That's when you fight your best - when you're threatened.''

The Blackhawks, the Norris Division champs during the regular season, will face the St. Louis Blues in the best-of-seven division finals, beginning Wednesday at Chicago Stadium. The Blues took their semifinal series from the Toronto Maple Leafs, 4-1.

''That was an extremely tough series we just went through,'' Blackhawks coach Mike Keenan said. ''But it worked great. We're very happy.''

The Blackhawks not only were forced to overcome a 1-0 deficit in Game 7, but had to play the last two periods without top playmaker Denis Savard and defenseman Keith Brown, both assessed game misconducts for high-sticking.

After Savard was ejected late in the first period, with Chicago trailing 1-0 on Don Barber's goal, both he and the sellout crowd went crazy. The high-scoring centerman heatedly argued his case with referee Andy vanHellemond, then slammed his stick as he skated off the ice, and the debris began flying.

The North Stars failed to cash in on the ensuing 2:18 two-man advantage, with Chicago goalie Greg Millen making three big saves. After a penalty to Barber early in the second period neutralized a Minnesota power play, the Blackhawks began storming back.

''With Savard gone, they became a team,'' Minnesota coach Pierre Page said. ''That was the turning point.

''We knew before the series started they had more firepower. In the end, we are able to stop Savard, and they were able to stop (North Stars leading scorer Brian) Bellows. But we weren't able to stop the other ones as well as they stopped our other ones.''

Presley scored first at the three-minute mark to tie the game 1-1, taking a behind-the-net feed from Duane Sutter and slapping it past goaltender Jon Casey.

With the crowd still standing, the right winger connected again 1:06 later to give Chicago a 2-1 lead. Adam Creighton's shot got caught in traffic in front of the Minneosta net, but Presley gathered in the puck, backed up a step and lifted it up top. It was his fifth goal of the playoffs after scoring just six in the regular season.

''They're going to be down after not scoring on the two-man advantage,'' Presley said. ''After that, they had another good three minutes, and they

didn't score. That's going to bring a team down, and as soon as we scored, you didn't know what was going to happen.''

After Page called a timeout, the North Stars appeared to compose themselves. But Roenick then sent them staggering late in the second with a pair of goals in a 1:25 span.

''It was the third and fourth goals that killed us,'' Bellows said.

Roenick made it 3-1 at 12:41 after stealing the puck from North Stars center Perry Berezan deep in the Minnesota zone. Casey stopped the first stuff attempt, but Roenick kept swatting away, and the puck dribbled past the prone goaltender.

Roenick connected again at 14:06, taking a pass between the circles from Steve Larmer and blasting a shot into the left corner for his fifth goal of the series. Roenick quick-stepped around the ice, as the standing-room crowd of 17,883 went wild.

The Blackhawks outshot the North Stars 15-8 during the decisive second period. Casey, outstanding throughout the series, didn't have much of a chance on Presley or Roenick.

Minnesota's Ulf Dahlen brought Minnesota within 4-2 midway through the final period, but Greg Gilbert iced the win with 2:50 left, scoring his fourth goal of the series.

The North Stars, who won went 10-5-1 in their final 16 games of the regular season to clinch the Norris's final playoff spot and overcame the season-long sideshow of the franchise's possible move or sale, were through.

''Our guys worked as hard as they could,'' Page said. ''They didn't give up. They helped the cause of hockey in Minnesota. They didn't get down themselves. They didn't let the fans down.'' alternate lead

OILERS 4, JETS 1

Edmonton goaltender Bill Ranford was a shaken man after the first game of the series against the Winnipeg Jets.

He had surrendered three easy goals in a 7-5 loss. The fans were on his back and the outlook wasn't good.

But Ranford bounced back with an overtime win in the second game and excelled in the series since then.

He frustrated the Jets Monday night with big saves in a 4-1 Edmonton

victory in the deciding Game 7 of the series.

''My confidence was at a lot higher level tonight than it was after Game 1 '' said Ranford. ''That's understandable but I don't want to get it at too high a level. I want to keep it at par and think about the next series.''

Both teams were jittery after the opening faceoff and neither registered a shot on goal until the game was seven minutes old.

It took only 28 seconds for both teams to score after play opened up.

Glenn Anderson dashed around Jet defenseman Teppo Numminen and jammed the puck by goalie Stephane Beauregard at 8:54 of the first period. It was Anderson's first goal of the series.

Jet captain Thomas Steen tied the score 1-1 at 9:21 when he wristed a 25-foot shot past Ranford's outstretched glove.

Anderson figured prominently in the Oiler's second goal with an up-ice pass that sent Mark Lamb into the clear. Lamb made no mistake finding a hole between Beauregard's pads on the breakaway and gave Edmonton a 2-1 lead at 17:52 of the first period.

''I just came off the bench and went up the middle,'' said Lamb. ''Anderson put a great pass on my stick and I just put it in.''

Ranford stopped Jet Brent Ashton on a breakaway to keep the second period scoreless.

Ashton got the puck behind Ranford but it didn't go in.

''It trickled through and was on its way but he reached back and grabbed it,'' said Ashton. ''It was one of those things. He played well and you got to give him a lot of credit.''

Beauregard saw his masked counterpart stone the Jets on more than one occasion.

''He made some unbelievable saves, including a couple I don't think he saw '' said Beauregard. ''Everything was working out for him and nothing for us.''

Esa Tikkanen gave the Oilers a 3-1 lead at 5:09 of the third period when he was set up in the slot by Craig MacTavish. Tikkanen fired a 25-foot drive by Beauregard for his fourth goal of the series.

Jari Kurri scored at 17:38 of the third period on a breakaway to ice the victory.

The Jets have never won a playoff series against the Oilers. Edmonton has won 25 games and lost only seven to Winnipeg in six playoff series dating back to 1983.

#90107u0156 04/17/1990 ~United Press International

LONDON (APRIL 17) UPI - Black nationalist leader Nelson Mandela told more than 70,000 rock fans at an anti-apartheid concert and a potential television audience of 1 billion people that the end of racial separation in South Africa will come ''sooner, rather than later.''

Tumultuous applause and cheering greeted Mandela and his wife, Winnie, as they walked on stage Monday night at London's Wembley Stadium. The event was arranged as a special tribute to Mandela, the deputy president of the African National Congress who was released Feb. 11 after 27 years in jail.

Passionate chants of ''Nelson! Nelson!'' and other outbursts lasted 10 minutes and drowned out his first attempts to speak.

''Friends, it will not be long now before we see the end of the apartheid system,'' Mandela said during his 20-minute address. ''The dreams of millions of people to see our country free ... will be realized sooner, rather than later.''

The live telecast of the event reached 26 nations - a potential audience of 1 billion people - and gave Mandela an extraordinary opportunity to galvanize opposition against the white minority government in Pretoria and its policies of racial separation known as apartheid.

The concert was not broadcast in the United States.

More than 70,000 fans braved a cold drizzle to cheer, dance, wave flags and release balloons as a succession of musicians performed on a vast stage adorned with African-style art murals.

The concert, lasting more than four hours, included appearances by Tracy Chapman, Simple Minds, Lou Reed, Neil Young, Peter Gabriel, Little Steven and many African stars. It was of similar magnitude to the 1985 Live Aid concert and a 1988 event staged to mark Mandela's birthday in captivity.

Various artists delivered songs and speeches aimed at rallying people against apartheid.

''You heard the great man,'' said Gabriel, who recorded a song on the plight of Steve Biko, a black leader who died of a brain hemorrhage while in police custody in 1977. ''They still need our support,'' he said.

''Don't give up.''

Mandela indirectly criticized Prime Minister Margaret Thatcher, who eased sanctions against the South African government of President Frederik de Klerk because it proceeded with reform plans, including releasing him and legalizing the ANC.

''Reject any suggestion that the campaign to isolate the apartheid system should be wound down. It is only those that support apartheid who argue that the Pretoria government should be rewarded for the small steps it has taken,'' Mandela said.

''There are some in this world who wish to support the South African government by giving it rewards,'' he said. ''But we, representing the overwhelming majority of people in our country, come to you for support, which we need now more than ever before.''

Mandela said the concert should mark the reintensification of the anti-apartheid struggle and the fight to transform South Africa into a non-racial democracy. Sanctions were a key weapon, he said.

''The apartheid crimes against humanity remain in place. It continues to kill and maim ... oppress and exploit ... to rain death and destruction on the peoples of Mozambique and Angola.''

Mandela was scheduled to return to Britain for an official visit in May, when he plans to meet Thatcher during a global tour that will also take him to the United States and the Soviet Union.

He said in an interview with the Daily Mirror that Thatcher was ''a very powerful lady - one I would rather have as an ally than an enemy.''

#90107u0169 04/17/1990 ~United Press International
(APRIL 17) UPI - ALMANAC:

Today is Monday, April 23, the 113th day of 1990 with 252 to follow.

The moon is waning, moving toward its new phase.

The morning stars are Venus, Mars and Saturn.

The evening stars are Mercury and Jupiter.

Those born on this date are under the sign of Taurus. They include English playwright William Shakespeare, probably born on this date in 1564, James Buchanan, 15th president of the United States, in 1791, Russian composer

Sergei Prokofiev in 1891, novelist Vladimir Nabokov in 1899, actress-diplomat Shirley Temple Black in 1928 (age 62), singer Roy Orbison in 1936, actors Lee Majors in 1940 (age 50) and Herve Villechaize in 1943 (age 47), and actresses Sandra Dee in 1942 (age 48) and Valerie Bertinelli in 1960 (age 30).

On this date in history:

In 1898, the U.S. government asked for 125,000 volunteers to fight against Spain in Cuba.

In 1941, at an ''America First'' rally in New York City, aviator Charles Lindbergh said, ''It is obvious that England is losing the war.'' Lindbergh opposed U.S. entry into World War II.

In 1965, more than 200 U.S. planes struck North Vietnam in one of the heaviest raids of the Vietnam War.

In 1985, former Senator Sam Ervin died at age 88. The North Carolina Democrat directed the Senate Watergate investigation that led to President Richard Nixon's resignation.

In 1987, an apartment building under construction in Bridgeport, Conn., collapsed, killing 28 construction workers.

A thought for the day: William Shakespeare wrote in ''Coriolanus'' that ''action is eloquence.''

#90107u0185 04/17/1990 ~United Press International
(APRIL 17) UPI - ALMANAC:

Today is Sunday, April 29, the 119th day of 1990 with 246 to follow.

The moon is waxing, moving toward its first quarter.

The morning stars are Venus, Mars and Saturn.

The evening stars are Mercury and Jupiter.

Those born on this date are under the sign of Taurus. They include bandleader and composer Duke Ellington in 1899, publisher William Randolph Hearst in 1863, Japanese Emperor Hirohito in 1901, film director Fred Zinneman in 1907, actress Celeste Holm in 1919 (age 71), English skiffle group leader Lonnie Donegan in 1931 (age 59), poet Rod McKuen in 1933 (age 57), symphony conductor Zubin Mehta in 1936 (age 54) and middle-distance runner Jim Ryun and golfer Johnny Miller, both in 1947 (age 43).

On this date in history:

In 1885, women were admitted for the first time to examinations at England's Oxford University.

In 1945, American troops liberated 32,000 prisoners from the Dachau concentration camp near Munich.

In 1985, four gunmen escaped with nearly $8 million in cash stolen from the Wells Fargo armored car company in New York.

In 1986, an arson fire destroyed more than 1 million books in the Los Angeles Central Library.

In 1988, the first condor conceived in captivity was born at San Diego Wild Animal Park.

A thought for the day: Former Brooklyn Dodgers executive Branch Rickey said that ''luck is the residue of design.''

-30- 1576

#90107u0191 04/17/1990 ~United Press International

(APRIL 17) UPI - Long in tradition, the Boston Red Sox gave Patriot's Day a special significance all its own.

On a day when the city of Boston honored American hero Paul Revere, the battles of Lexington and Concord and the events that led to the start of the Revolutionary War, the Milwaukee Brewers staged a revolution of their own Monday by assembling a 20-hit attack to annihilate the Red Sox 18-0.

''It didn't matter who I threw out there today,'' said Boston Manager Joe Morgan, refering to the members of his pitching staff. ''It would have

been the same way after you got going.''

Milwaukee feasted on Red Sox pitching, roughing up five victims, en route to its biggest margin of victory in Brewers' history.

Starter Mike Boddicker, 1-1, who took the loss, was knocked around for six runs and six hits in 2 1-3 innings.

Many of the 35,478 in attendance had left by the eighth inning when the crowd turned to the Brewers' side.

''I noticed after I came out of the game that they were booing when we made an out and cheering after we got a hit,'' said Milwaukee's Dave Parker.

Parker and Greg Brock both went 4-for-4, as the Brewers tied a club record with nine doubles. Brock scored three runs and produced three RBI and Parker scored three times and collected two RBI. Greg Vaughn added three hits and three RBI in four at-bats.

''Maybe we can play more of these 11 o'clock games,'' joked Brock. ''It was one of those days you can't figure out.''

The game began at 11:06 a.m., the traditional starting time for baseball at Fenway Park on the holiday, which also coincides with the running of the Boston Marathon.

Lefthander Teddy Higuera, 1-0, coming off an injury-riddled 1989 season, worked 6 1-3 innings of two-hit ball for the victory. He walked four and struck out three.

''It'd be nice if we could pick and choose our runs,'' Milwaukee Manager Tom Trebelhorn said. ''It was a strange game. We had nine doubles and didn't even use The Wall.''

It was the worst loss Boston suffered in 35 years, since being shutout 19-0 by the Cleveland Indians on May 18, 1955.

Elsewhere in the American League, Toronto topped Baltimore 4-2, Cleveland dropped Kansas City 6-3, and Seattle sank Minnesota 6-3.

In the NL, it was: New York 10, Chicago 1; Montreal 5, Philadelphia 4; St. Louis 6, Philadelphia 4; Cincinnati 5, Atlanta 3; and San Francisco 3, Los Angeles 1.

-- AROUND THE AL --

BLUE JAYS 4, ORIOLES 2

At Toronto, John Cerutti held Baltimore to three hits in five scoreless innings, pacing Toronto to its fourth win in its last five games. Cerutti, who struck out five and walked none to improve to 1-1, received relief help from Tom Henke. He pitched two shutout innings for his first save. For Baltimore, Jay Tibbs, 0-1, took the loss and Cal Ripken hit a two-run homer.

INDIANS 6, ROYALS 3

At Kansas City, Mo., Cory Snyder had four hits, including three doubles, and knocked in two runs in Cleveland's rain-delayed victory. Tom Candiotti 1-0, earned the win despite allowing 10 hits over five innings and Doug Jones notched his second save. Loser Mark Gubicza, 1-1, allowed six runs in 1 1-3 innings.

MARINERS 6, TWINS 3

At Seattle, Jeffrey Leonard and Ken Griffey Jr. hit two-run homers, helping Seattle snap a five-game losing streak and making a winner of pitcher Randy Johnson, 1-1. The left-hander worked seven innings, allowing five hits and three runs while striking out six, and Mike Schooler picked up his second save. David West, 0-2, gave up four hits and four runs and took the loss.

#90107u0203 04/17/1990 ~United Press International
(APRIL 17) UPI - TV HIGHLIGHTS:

WEDNESDAY, APRIL 18

6:30 p.m.
PBS, ''Nightly Business Report.''

7 p.m.
(Note: In some regions, news is broadcast at 6 or 6:30 p.m. Check with local affiliates for details.)
ABC, ''ABC's World News Tonight with Peter Jennings.''
CBS, ''CBS Evening News with Dan Rather.''
NBC, ''NBC Nightly News with Tom Brokaw.''

8 p.m.
ABC, ''Growing Pains'' - Jason and Maggie are stunned when Carol, who has just received a big promotion at work, announces that she isn't going to college after all.
CBS, ''Sydney'' - Billy falls in love with one of Matt's clients and asks Syd to find out what the young lady thinks of him.

NBC, ''Unsolved Mysteries.''

8:30 p.m.
ABC, ''Head of the Class.''
CBS, ''Normal Life'' - Jake has to choose between his dream of becoming a rock musician and Anne's dream that he go to college.

9:00 p.m.
ABC, ''Doogie Howser, M.D.'' - Doogie feels the wrath of Eastman Medical Center's board of directors when he is caught performing surgery on a little boy's beloved pet dog. R.
CBS, ''Jake and the Fatman'' - When Derek summons enough courage to demand that McCabe assign him a case of his own, he receives more than he bargained for including a corrupt judge and intimidated witnesses.
NBC, ''Night Court.''

9:30 p.m.
ABC, ''The Marshall Chronicles.''
NBC, ''FM.''

10 p.m.
ABC, ''Equal Justice'' - Mike is agitated because Bach insists that he work with Gene on a racially charged case, which in turn creates a breach with Della; JoAnn is ecstatic when Peter Bauer accepts her invitation to attend the D.A.'s annual party, but she's overcome by a case of nerves - and too much wine.
CBS, ''Wiseguy'' - With McPike in a coma, Vinnie tries to heal his own wounded spirit while Kousakis goes on a psychopathic rampage and holes up in the church tower, armed and dangerous.
NBC, ''How to be Famous'' - Jerry Seinfeld and Spy magazine combine for a satirical look at something ''ultimately inconsequential'' - fame - by examining America's fascination with famous celebrities and the world they live in.

10:30 p.m.
PBS, ''How Do You Get to Carnegie Hall?'' - Southern-born black pianist Jimmy McKissic had always dreamed of making his classical debut at Carnegie Hall. This film documents the entertainer's remarkable journey from cocktail lounges to the New York concert stage to make his unlikely dream come true.

11:30 p.m.
ABC, ''ABC News Nightline.''
CBS, ''Wiseguy.''
NBC, ''The Tonight Show Starring Johnny Carson.''

12:30 a.m.
CBS, ''Night Heat.''

NBC, ''Late Night With David Letterman.''

1:00 a.m.
PBS, ''Trying Times: 'The Visit.''' R.

1:30 a.m.
CBS, ''Nightwatch.''
NBC, ''Later With Bob Costas.''
PBS, ''Today's Japan.''

(APRIL 17) UPI - SPORTS TRANSACTIONS

BASEBALL

New York (AL) - Sent pitcher Lance McCullers to Columbus of the International League (AAA) on injury rehabilitation.

Los Angeles - Placed catcher Rick Dempsey on 15-day disabled list; recalled catcher Carlos Hernandez from Albuquerque of the Pacific Coast League (AAA); shifted outfielder Kirk Gibson from the 15 to 21-day disabled list.

Philadelphia - Named Dave Cash manager of Batavia of New York-Penn League (A).

COLLEGE

Indiana - Named Kris Kirchner men's swimming coach.

Minnesota - Named Linda Hill-MacDonald women's basketball coach.

San Diego - Men's assistant basketball coach Maury Hanks resigned.

UC Irvine - Named Tom Ford athletic director.

Virginia - Named Jeff Jones basketball coach.

FOOTBALL

Denver - Signed two free agents: kicker Ian Howfield and punter Paul Calhoun.

Miami - Released linebacker Bob Brudzinski, tight end Bruce Hardy, tackle Jon Giesler and cornerback Don McNeal; signed free agent running back George Swarn.

San Diego - Signed two free agents: kicker Tom Whelihan and punter Keith English.

HOCKEY

Philadelphia - Fired general manager Bobby Clarke.

St. Louis Blues - Recalled goaltender Pat Jablonski.

(APRIL 17) UPI - The Indiana Pacers found the right Person to carry them to the playoffs.

Person scored 33 points and Indiana clinched its third playoff appearance in 14 years with a 111-102 triumph over the Chicago Bulls Monday night. The victory also gave the Central Division title to Detroit, eliminating the Bulls.

Person scored 9 straight Indiana points over a 2:40 span late in the fourth quarter, including a 3-point shot wih 3:57 remaining to give the Pacers their largest lead at 100-90.

''I felt like I had to lead us to the playoffs,'' Person said. ''Somebody had to step up. I said, 'Chuck, it's crunch time and they need you.'''

Person waved his hands in the air and and the crowd jumped to its feet in a standing ovation.

''That was my way of telling the fans I'm going to be the last one to leave here and they're going to have to live with me,'' Person said. ''I'm just an intense guy and I wanted people to realize how important this was.''

Indiana advanced to the postseason for the first time since 1987. Only Person, Vern Fleming and backup center Greg Dreiling remain from that team.

''This is much better (than 1987) because of the things we have had to go

through,'' Person said. ''The owners, Vern and myself had to go through all sorts of things. There has been some turmoil here. But if we can play like this in the playoffs, we can beat anybody.''

Indiana, 41-38, matched its second-best win total and pulled within one game of Milwaukee for sixth-place in the Eastern Conference playoff race. The Pacers won a season-best seventh straight home game and took the season series with Chicago for the first time in six seasons.

Chicago was eliminated from division title hopes but remained third in the conference race. The Bulls, who had won nine of their previous 10 games, can tie the Pistons for the division's top record, but they have already lost the season series between the two clubs.

''We have to play defense,'' Chicago coach Phil Jackson said. ''We gave up a few easy baskets. We were there but we couldn't convert down the stretch. The energy wasn't there.''

NBA scoring leader Michael Jordan, averaging 33.7 points, was kept to 23 points, his fewest against Indiana this season. Scottie Pippen added 19 for the Bulls.

-- AROUND THE NBA --

In other games, New York mauled Miami 119-102, San Antonio stopped Charlotte 110-101, Portland nipped the L.A. Clippers 93-85 and Phoenix powered past Golden State 141-129.

KNICKS 119, HEAT 102

At New York, Patrick Ewing scored 25 points in three periods and Kiki Vandeweghe scored all of his 22 points in the second half for the Knicks. The Heat was paced by Grant Long with 17 points, while Billy Thompson scored 15 and Jay Edwards added 13.

SPURS 110, HORNETS 101

At Charlotte, N.C., Willie Anderson scored 28 points and David Robinson added 25 points and 12 rebounds to lead San Antonio. Sean Elliott had 20 points and Rod Strickland 15 for the Spurs, who tied a club record of 53 wins set during the 1982-83 season.

TRAIL BLAZERS 93, CLIPPERS 85

At Los Angeles, Jerome Kersey scored eight of his 23 points in the final five minutes and finished with 10 rebounds to spark Portland. Portland moved 1 1/2 games ahead of Utah in the battle for second place in the Western Conference. The Clippers, who have lost four of their last five

games, were paced by Charles Smith, who had 10 of his 21 points in the final quarter.

SUNS 141, WARRIORS 129

At Oakland, Calif., Dan Majerle came off the bench to score a career-high 32 points and help Phoenix complete a four-game season sweep of Golden State. The Warriors' Chris Mullin scored a game-high 35 points and Rod Higgins added a season-high 28 points on 10-14 shooting.

-30- 4001

#90107u0340 04/17/1990 ~United Press International

(APRIL 17) UPI - The Montreal Expos won the battle of the bullpens Monday night, capitalizing on five walks from Philadelphia relief pitchers to fashion a come-from-behind 5-4 victory.

Andres Galarraga drove in two runs, including the winner in the seventh inning when he walked with the bases loaded, to lead Montreal.

Joe Hesketh worked two innings of relief to bring his record to 1-0. Jeff Parrett, 0-2, was the loser.

Steve Frey came on in the ninth for the Expos and earned his second save byinducing Lenny Dystra to hit into a double play to end the game.

Montreal's decisive three-run rally in the seventh was fueled by four walks.

With one out Spike Owen hit the first pitch over the fence down the third base line for his first homer of the season to narrow the lead to 4-3.

Jeff Parrett relieved starter Terry Mulholland and gave up a walk to pinch hitter Mike Aldrete, who was replaced by pinch runner Dave Martinez. Delino DeShields singled and pinch hitter Larry Walker drew a walk to load the bases.

Tim Raines singled to right, scoring Martinez to knot the score at 4-4, but DeShields was thrown out at the plate trying to score from second on a superb throw by Von Hayes.

''The way I pitched against Montreal,'' said Parrett, ''you'd think I was still pitching for them.''

Todd Frohwirth relieved Parrett and walked Tim Wallach to load the bases, then walked Galarraga to force home Walker for a 5-4 Montreal lead.

''Last year I may have swung in that situation,'' Galarraga admitted. ''I

swung at a lot of inside and outside pitches last season.''

Galarraga broke a club record last season by striking out 158 times.

''Frohwirth walked both Wallach and Galarraga but I wanted him to face them because before tonight they were 0-10 against him,'' said Phillies Manager Nick Leyva. ''Jeff Parrett still isn't sharp. The bull pen lost this game for us.''

Elsewhere in the National League, St. Louis edged Pittsburgh 6-4, Cincinnati beat Atlanta 5-3, New York pounded Chicago 10-1, and San Francisco overcame Los Angeles 3-1.

In the AL, it was Milwaukee 18, Boston 0; Toronto 4, Baltimore 2; Cleveland 6, Kansas City 3; and Seattle 6, Minnesota 3.

-- AROUND THE NL --

CARDINALS 6, PIRATES 4

At Pittsburgh, Terry Pendleton went 2 for 4 with a two-run first-inning double and Pedro Guerrero added two hits to lead St. Louis. Jose DeLeon, 1-0, scattered two hits over 5 1-3 innings. John Smiley dropped to 0-2. The Cardinals got the winning runs in the eighth when pinch-runner Dave Collins and Terry Pendleton advanced on a double-steal. Collins scored on catcher Don Slaught's errant throw to third, and Pendleton, who went to third on the play, scored when Ozzie Smith hit into a double play.

REDS 5, BRAVES 3

At Atlanta, Jack Armstrong combined with two relievers on an eight-hitter and Gary Larkin and Paul O'Neill drove in two runs apiece to extend Cincinnati's season-opening winning streak to six games. Armstrong, 2-0, gave up five hits over seven innings while striking out three. The Reds' 6-0 start was the best for the team since 1980, when they went 8-0. Starter Pete Smith, 1-1, took the loss for the Braves.

METS 10, CUBS 1

At Chicago, Frank Viola scattered four hits over six innings and Howard Johnson and Mark Carreon each had three RBI to lead New York. Viola, 2-0, struck out eight and walked one. In two starts this year, the left-hander hasn't allowed a run. Alejandro Pena pitched three innings to earn his first save. Steve Wilson, 0-2, allowed three runs in 5 1-3 innings, gave up six hits and struck out seven in suffering the defeat. The Mets batted around in the seventh inning, scoring six runs with two outs against Jeff Pico.

GIANTS 3, DODGERS 1

At Los Angeles, Will Clark drove in two runs and Mike LaCoss allowed five hits in picking up his second win to help San Francisco snap a three-game losing streak. LaCoss retired the first nine men he faced and did not give up a hit until Mike Scioscia singled with one out in the fifth. Dodger starter Fernando Valenzuela, 0-2, gave up six hits and three runs in six innings.

#90107u0398 04/17/1990 ~United Press International

WASHINGTON (APRIL 17) UPI - Millions of Americans withheld their 1989 tax forms from federal, state and local governments until the last minute, packing post offices from coast to coast to beat the always-frenzied filing deadline.

Larger post offices, some of which adopted a fair-like atmosphere, remained open early Tuesday to accommodate an overflow of filers, some of whom frantically completed tax forms while waiting in long lines to mail them.

The Internal Revenue Service said 111 million taxpayers are expected to file 1989 returns, with about 6 million qualifying for automatic extensions until Aug. 15. Another 23 million returns were expected to be filed this week.

Despite the report of one violent incident - a letter bomb that slightly injured a postal worker in Royal Oaks, Mich. - there were indications that the final filing day for most of the country went smoothly.

There was no last-minute crush in New England as the annual holiday to honor forces who first battled the British in the American Revolution

delayed by 24 hours the deadline for the six-state region. The national deadline was extended by a day this year because April 15 fell on a Sunday.

Throughout the country, postal employees posted curbside accepted returns from motorists. Many other filers strolled agreeably into friendly, if not slightly panicked post offices.

At the huge Terminal Annex postal facility in downtown Los Angeles, thousands of late filers snarled traffic, braving a chilly rain to beat the deadline.

''I'm late as usual, I can't help it,'' said Michael James of North Hollywood, who drove up in his black BMW.

''They've been very nice, it's a festive mood,'' Jose Estrada, one of 20 postal workers working Monday night. ''They've come by smiling.''

Accountant Larry Greenblatt continued his yearly tradition of handing out bagels, jokes and free tax advice in front of the postal building, swearing he is not trying to drum up business, only ''celebrate the end of the tax season and the beginning of the baseball season.''

At New York's main post office, live jazz soothed the anxious mood in a cavernous lobby. Three radio stations blasting different music and a pickup truck with mobile searchlights livened a scene reminiscent of a New Year's Eve in Times Square.

Vendors distributed free bottles of aspirin and antacid to help those who didn't have the head or stomach for limited income credit, excess deduction or taxable pensions.

An estimated 15,000 people pass through the lobby each year on tax deadline day.

Diane Todd, a postal employee, paused for breath to wonder why customers assumed she would know anything about how to fill out the federal Form 1040. ''They find out I work here and start asking questions,'' she said. ''Hey, I went to someone myself.''

Phoebe Reynolds, 22, settled by a column on the steps and said she saw no reason not to wait until the last minute. ''I'm perfectly comfortable,'' she said. ''It is kind of ridiculous, but you meet a lot of people.''

Postman Peter Letterese took a break from hand-stamping envelopes addressed to the Internal Revenue Service to admit, ''I don't mind it so much, but my arm's getting a little sore.''

In Washington, drive-up bins accommodated thousands of filers outside the

city's main post office, located about a mile from the nation's IRS headquarters.

Inside, filers scurried among the old building's towering pillars in an attempt to find the right window, the right form and a pencil - with an eraser.

''I was supposed to work, but left early to come here,'' said one taxpayer.

From Philadelphia to Fresno, the IRS's 10 service centers geared up for the last-minute crush.

''We do have those people who pride themselves on getting as close to the deadline as possible,'' said Bill Statemeir of H&R Block in Boston. ''We've added extra personnel to handle it.''

At the IRS facility in Ogden, Utah, employees worked ''way ahead of schedule'' because of an increase in electronic filings, officials said.

The IRS said as of April 5 it had paid out $38.6 billion in tax refunds, with the average refund running $851 compared to $824 last year. An estimated two-thirds to three-fourths of taxpayers are expected to get refunds.

-30- 4541

#90107u0442 04/17/1990 ~United Press International

OKLAHOMA CITY (APRIL 17) UPI - Thousands of Oklahoma teachers went on strike to protest against state lawmakers who ''thumbed their noses at the public'' by rejecting a $230 million education-reform package, a union leader said.

On the first day of the strike, some 15,000 teachers and school employees stayed away from their jobs Monday and 145 school districts were closed, said Kyle Dahlem, president of the Oklahoma Education Association.

The OEA, Oklahoma's largest teachers association, said the strike was expected to last through the week.

''The response to the call for a work stoppage has been overwhelming,'' Dahlem said.

Many of the striking teachers went to the state Capitol in Oklahoma City, where last Wednesday the Senate squelched a $230 million package that would have raised teacher salaries - which are the third-lowest in the nation - consolidated some schools, and aimed to produce a more equal level of education quality and finance across the state.

Hundreds of schoolchildren joined their teachers on the steps of the Capitol for a rally Monday. No headcount of demonstrators was immediately available from police or the governor's office, but unofficial estimates ranged from 14,000 to 20,000.

''We are here to protest the action of 20 senators last Wednesday night when they thumbed their noses at the public, the business community, teachers and, most important of all, the children of Oklahoma,'' Dahlem told the protesters.

The teachers association leader said the demonstrators have ''joined together to protest the failure of the Oklahoma Legislature to deal with the crisis in public education'' in Oklahoma.

Dahlem read a statement of support from Keith Geiger, president of the National Education Association, the national teachers group with which the OEA is affiliated.

''Make no mistake about it - there is an educational emergency in Oklahoma right now,'' the statement said. ''The future of Oklahoma depends in large part on the courageous actions taken this week by school employees as you stand up for what is right and so desperately needed.''

Teachers also milled through the halls of the Legislature Monday wearing stickers saying, ''We have waited long enough.'' They stood in long lines at lunch counters and restrooms, but were advised by the OEA to limit direct contact with lawmakers and to stay out of the House and Senate galleries.

The walkout was not endorsed by the state's other teacher association, affiliated with the American Federation of Teachers, which considered the strike illegal.

The OEA insisted the ''withholding of services'' was legal because the only type of work stoppage prohibited by law is a strike during contract negotiations.

Although Dahlem said the strike will last through the week, it is not yet clear if the level of support will be as strong as it was Monday.

The response to Monday's protest request varied across the state. Schoolrooms in Tulsa, the state's largest district, were empty. Oklahoma City school Superintendent Arthur Steller, whose teachers are represented by the AFT, said Oklahoma City schools would remain open and teachers who do not report for work will be temporarily replaced.

Some district school officials have canceled classes for one to five days, while others said schools will remain open whether teachers show up or not.

The Legislature's action Wednesday killed an emergency clause in an education bill that would have put the reform measures and $230 million in taxes - to be raised through increases in sales, personal income and corporate taxes - into effect the moment Gov. Henry Bellmon signed it.

#90107u0508 04/17/1990 ~United Press International

(APRIL 17) UPI - Heavy thunderstorms Tuesday pounded parts of Texas, Arkansas and Oklahoma, where massive wind gusts tore down power lines and ripped roofs off buildings, while rain and snow fell over much of the Midwest.

National Weather Service forecasters said they recorded a wind gust of 92 mph late Monday as it zipped past the Will Rogers Airport in Oklahoma City.

''We've got roofs blown off everywhere ... and power lines down in every quadrant of the city,'' said an Oklahoma City police dispatcher, who declined to give her name. ''Schools, businesses. They (the winds) were not very discriminating.''

The dispatcher said it would be difficult to determine how extensive the damage and the power outages were until daylight, but there were no reports of injuries.

Police reported seeing at least one tornado touch down south of the northwestern Arkansas town of Pea Ridge, just south of the Missouri border Monday evening. The twister was on the ground for only a few seconds and did little damage, police said.

Scattered thunderstorms early Tuesday continued across much of northern Arkansas, southeastern and east central Oklahoma and northwestern and northern Texas. There were no reports of major flooding.

Mississippi and parts of Florida were rainy but most of the South was fair. Temperatures ranged from 60 degrees in Macon, Ga., to a high of 76 in Miami.

Clouds rolled into Maryland, Pennsylvania and West Virginia early Tuesday, dropping light rain on scattered areas in the region. Southern New Jersey also saw cloudy skies but reported little rain.

Temperature lows in the 30s and 40s were reported in Pennsylvania, while lows in the 40s were seen in Maryland and southern New Jersey.

In New England, skies were clear and temperatures warmer. Boston was clear and near 50 degrees early Tuesday, while Cape Cod was clear and 43.

A high-pressure area that burdened runners in the Boston Marathon with 60-degree temperatures and sun on Monday was replaced with a cold front Tuesday, but more high pressure appeared en route from the west.

The Midwest was generally chilly, ranging from the lower 30s in northern sections to the mid 40s in the south.

A band of precipitation moved through portions of Michigan, where Sault Ste. Marie reported snow showers and 30 degrees. Detroit posted 41 and rain. Northern Ohio was also rainy.

Some of southern Illinois, including Carbondale, reported heavy rain.

Missouri was rainy, with heavy rain reported moving into the southwest part of the state. St. Louis reported light rainfall and a temperature of 46.

Isolated showers moved across Iowa. Reporting stations in Wisconsin and northern Illinois said skies were clear and temperatures brisk.

In the West, Southern California was hit by scattered showers and isolated thundershowers that dropped up to a 10th of an inch of rain, contributing to scores of freeway accidents.

Cloudy skies and scattered showers also swept over northern and central California from a weather system moving ashore near Santa Barbara. Some heavier showers and thundershowers produced over a quarter inch of rain in the mountains of central California.

Southwest Oregon and the coast were cloudy. There were scattered thunderstorms, with Chiloquin reporting hail.

Coastal Washington was cloudy and foggy, while eastern Washington had high thin clouds.

WARSAW, Poland (APRIL 17) UPI - President Wojciech Jaruzelski may resign after parliamentary elections expected next year but will not step down now, the spokesman for his office said Tuesday.

The former Communist Party leader is realistic about the future and ''will not insist on the full six-year term'' to which he was elected by Parliament last July, spokesman Slawomier Witek told United Press International.

But ''Jaruzelski has no reasons to consider his resignation (now) because his cooperation with the government and Parliament is good,'' he said.

Solidarity leader Lech Walesa, whose popularity reportedly has dropped in recent months, has declared Jaruzelski is not leading Poland and said he would run for president ''in the next elections.''

Presidential spokesman Witek suggested Walesa's statement was part of his strategy before the Solidarity Congress opens Thursday in the seaport of Gdansk.

Although the next parliamentary elections are not due until 1993, fully free elections are expected next year because the June 1989 elections involved a political agreement in which Solidarity could run for only 35 percent of the seats in the lower house of Parliament.

Witek suggested Jaruzelski would ''seek approval from the new Parliament and government'' after the next elections and if it were not forthcoming, he might resign.

''If he (Jaruzelski) recognizes the political and economic reforms he has initiated have been peacefully steered through this hot period, the merits are more important, and not the term,'' he said.

Walesa, in an interview with the government newspaper Rzeczpospolita, charged Jaruzelski - formerly Poland's communist prime minister - with being inefficient as president and with allowing former communist officials to ''rob'' Poland.

Walesa said communist managers still run most of Poland's enterprises and if he were president, he would oust them. ''Poland is being robbed,'' he said, adding the current situation requires a man unstained by a communist past.

Walesa also said as president, he would push popular Solidarity Prime Minister Tadeusz Mazowiecki toward faster reform. Mazowiecki formerly was one of Walesa's top advisers and Walesa has described him as a longtime friend.

''If the fate allowed me to be president, I would like Mazowiecki to be prime minister,'' he said. ''But I would coordinate my cooperation with him and I would force him to take fast actions.''

Walesa's statement coincided with a report by the Solidarity newspaper Gazeta Wyborcza that said Walesa's popularity dropped by 34 percent since November.

Walesa was referred to as the fourth popular ''institution'' after

Mazowiecki, the Catholic Church, and the Parliament. Jaruzelski took tenth place.

BEIJING (APRIL 17) UPI - China's Communist Party should have more control over higher education to ward off ideological infiltration by ''hostile foreign forces,'' a commentary in the official media said.

The People's Daily, the Communist Party newspaper that reflects leadership views, used frequent military analogies to call for stronger political indoctrination in universities to prevent a recurrence of last year's massive student-led democracy movement.

''Hostile foreign forces attempt to undertake peaceful evolution,'' the commentary said. ''They are always plotting to use their thought, culture and technological superiority to influence our universities and young students.

''We must make the party in universities into a staunch battle fortress ... we must make schools into strong fronts of socialist culture.''

''Peaceful evolution'' is a stock phrase for what China's aging leaders charge is a Western plot to undermine socialism by means of a subtle infusion of concepts such as political pluralism and Western democracy.

The commentary appearing days after the first anniversary of last year's protests repeated the government line blaming the West for the 1989 upheavals.

Student protests sparked by the death of the relatively liberal former Communist Party chief Hu Yaobang last April 15 exploded into massive street demonstrations calling for an end to official corruption and a more open government.

The protests came to a bloody end when the army opened fire on demonstrators June 3-4. At least hundreds of people died in the crackdown.

Since the military crackdown, Chinese authorities have passed tough new rules on overseas study and renewed emphasis on political orthodoxy in education.

The People's Daily article echoed senior Chinese leaders insisting political orthodoxy take precedence over intellectual knowledge, calling for strengthening the ''party's construction in the universities'' to ''thoroughly carry out the party's educational policy of putting moral education first.''

''Only then will we complete the task of training (university students) as the 'red and expert' successors of the construction of the socialist cause '' it said.

The term ''red and expert'' refers to the radical policies of Mao Tse-tung who was suspicious of educated professionals and prized commitment to communism, or ''redness,'' over expertise.

While there have been no calls for a return to Maoism, China's state-run press has published similar demands for ''redness'' in the military and party.

An education official said privately the number of students applying for party membership has been decreasing yearly.

Students at a leading Beijing university said several of their classmates have withdrawn from the Communist Youth League, the party's junior branch, as a form of protest over last June's crackdown.

MANILA, PHILIPPINES (APRIL 17) UPI - At least 21 people were killed in three days of violence related to the communist insurgency in the central and southern Philippines, the military said Tuesday.

Eight police and soldiers were killed Tuesday when communist rebels ambushed security forces en route to reinforce a beleaguered militia outpost in the central Philippines, a military report said.

The report said a military truck carrying the troops hit a landmine 270 miles south of Manila and rebels waiting in ambush opened fire, killing six national police troopers and two militiamen. At least one person was wounded.

A radio report said a spokesman for the communist New People's Army telephoned a radio station claiming responsibility for the ambush, saying it was in ''response to government's total war policy'' against the insurgents.

In the southern Philippine province of North Cotabato, six soldiers and seven rebels were killed in a gunbattle Saturday, the armed forces said.

Gen. Renato de Villa told reporters some 300 guerrillas firing mortars and machine guns attacked two military outposts in Tulunan village at midnight but the soldiers repulsed the rebels in a fierce gunbattle.

At least 700 people have been killed in the communist insurgency this year the military said.

The 19,000-member NPA is the army of the outlawed Communist Party of the Philippines, which has been fighting the Manila government for the past 21 years.

WASHINGTON (APRIL 17) UPI - Increases in housing and clothing costs pushed inflation at the retail level up 0.5 percent in March, the same as the previous month, to an annualized rate of 5.2 percent, the Labor Department reported Tuesday.

The department said two-thirds of the increase came from gains in housing, apparel and upkeep costs. Homeowners' costs rose 1 percent in March to partially offset decreases in home heating fuel prices.

Food and beverage costs gained 0.4 percent during the month, but the gain was less than in preceding months, according to the department's consumer price index.

During the first three months of the year, the index rose 8.5 percent, the largest quarterly increase since 10.1 percent in the second quarter of 1982, the department said.

An increase in food prices accounted for about 25 percent of the gain, with energy costs making up 18 percent of the increase and shelter costs contributing 8 percent of the rise.

Last month, housing prices rose 0.5 percent, compared with a 0.2 percent gain the month before. Shelter costs gained 0.7 percent, with costs for homeowners gaining 0.1 percent and renters' costs rising 0.3 percent.

The index for apparel and upkeep rose 1.6 percent in March after a 3.3 percent gain the month before. The department attributed the rise to the continued early introduction of higher-priced spring and summer wear.

Food and beverage costs gained 0.4 percent during the month. Food on grocers' shelves rose 0.2 percent after rising 2.9 percent in January and 0.5 percent in February.

Fruit and vegetable costs dropped 1 percent during the month while meat, poultry, egg prices rose. Prices for seafood and fish dropped 2.1 percent. Restaurant bills also increased during March, gaining 0.6 percent.

Transportation costs dipped 0.1 percent last month after rising 0.3

percent in February. The department attributed the decline to lower motor fuel prices. Gasoline prices declined 1.4 percent in March after rising 8.5 percent the month before.

Lower automobile purchase prices also contributed to the decline, the department said.

Medical care costs gained 0.8 percent in March to a level 8.6 percent above year-ago prices. Prescription drugs, non-prescription drugs and medical supplies gained 0.6 percent.

Entertainment costs gained 0.4 percent during the month, the same increase as posted in February.

(APRIL 17) UPI - Stock prices on the Tokyo Stock Exchange eased slightly Tuesday in slow trading.

The blue-chip Nikkei Average of 225 selected issues, which plunged 750.74 points Monday, lost 1.58 points to 28,461.60.

The broader-based Tokyo Stock Exchange Index of all listed major shares slipped 1.20 points to 2,128.57.

An estimated 400 million shares changed hands, compared with 233 million shares Monday.

Declines edged out advances 484 to 418, with 176 issues unchanged.

Elsewhere in Asia, stock prices soared on the first day of trading following the long Easter weekend in heavy trading on the Hong Kong Stock Exchange.

The key Hang Seng Stock Index, which climbed 35.71 points Thursday, jumped 24.75 points to 3020.44.

Turnover was a heavy 1.526 billion shares, compared with 1.305 billion shares Thursday.

Markets in Hong Kong were closed Friday and Monday for the Easter holiday.

In Australia, stock prices ended mixed in thin trading on the Sydney Sharemarket.

The blue-chip All Ordinaries Index, which fell 7.2 points Thursday, slipped 0.8 point to 1,499.2. The All Industrials Index added 4.7 points

to 2,320.4 and the All Resources Index fell 1.0 points to 871.8.

The closely watched Gold Index lost 4.9 points to 1,568.5.

Turnover amounted to around 55.9 million shares, compared with 81.7 million shares Thursday.

Markets in Sydney were closed Friday and Monday for an extended Easter break.

WASHINGTON (APRIL 17) UPI - Construction of new single-family homes and apartments fell 9.3 percent in March in the worst showing in more than a year, the Commerce Department reported Tuesday.

The Northeast - where housing starts plunged 37.8 percent in March - was the hardest hit region of the nation, recording its lowest level of new housing construction since March 1983, the department said.

Housing starts were off 11.5 percent in the South, up 6.8 percent in the Midwest and off 0.5 percent in the West, said the monthly report compiled by the department's Census Bureau.

The overall March decline in housing starts, the lowest since a 12.4 percent drop in January 1989, followed a fall of 7.1 percent in February, the department said.

New building permits reached their lowest level since October 1982, falling 7.6 percent in March after diving 25.2 percent in February after January's warm spell and December's cold snap, the Commerce Department said.

Permits for single-family homes declined 7.2 percent in March after slipping 2.1 percent in February, the department said. All the housing figures were adjusted for seasonal changes, such as the weather, and calculated at an annual rate.

In March, the construction of new single-family homes nationwide declined 1.2 percent after falling five percent in February, the Commerce Department said.

On the apartment front, construction of buildings with two, three and four units fell by 0.4 percent in March, while construction of apartment buildings with five or more units remained virtually unchanged last month, the department said.

#90107u0734 04/17/1990 ~United Press International
ROYAL OAK, MI (APRIL 17) UPI - A mail bomb addressed "To The Tax Thieves" went off outside a suburban Detroit post office as last-minute tax returns were being mailed, injuring a postal worker, officials said.

The explosive device was in a heavy brown padded envelope that also contained a tea bag in apparent reference to the Boston Tea Party, the historic tax protest of 1773, investigators said.

"From the writing on the envelope, there was an indication it was some kind of tax protest," said U.S. Postal Inspector Fred Van de Putte. Several groups of tax protesters were at the post office at the time, but they denied responsiblity for the device and decried such actions.

Police said the postal worker, Tom Berlucchi, 29, noticed the package shortly before 8:30 p.m. smoldering in a basket of mail at a curbside drop site set up by the U.S. Postal Service as a convenience to 11th-hour tax filers. The deadline for federal and state tax returns was midnight Monday.

Van de Putte said Berlucchi tried to put out the flames with his fingers. Another employee shouted for Berlucchi to toss the envelope in a nearby puddle of water.

Berlucchi picked up the envelope, threw it into the puddle and tried to stamp out the flames with his foot. "Berlucchi said he heard a small pop and the envelope burst into flames and sparks," Van de Putte said.

Berlucchi, who suffered burns to both hands, was treated at William Beaumont Hospital and released. He suffered no disabling injuries, said police Lt. Ray Taylor.

Postal inspectors, the FBI, and agents from the U.S. Bureau of Alcohol, Tobacco and Firearms helped city police cordon off the area. Some tax returns sutained "minor damage" in the incident but officials declined to be specific. Van de Putte said all the returns will be forwarded to the IRS.

Van de Putte said the contents of the envelope included a pyrotechnic

device like a Roman candle. Royal Oak Fire Capt. Ron Gammon said the envelope also contained an unidentified red fluid and a fuse. "I guess the fluid was supposed to be blood. It flew all over the place," Gammon said.

Postal workers praised Berlucchi, a maintenance employee for ten years, for his quick action. "If he hadn't pulled it out, a lot of mail would have burned up and possibly someone would have been injured if the letter would've made it onto the truck," said Judith Baker, manager of plant and equipment engineering at the Royal Oak branch.

#90107u0744 04/17/1990 ~United Press International

NEW DELHI, INDIA (APRIL 17) UPI - About 500 devotees of the Hare Krishna sect staged a prayer vigil Tuesday at the American Embassy, protesting a U.S. court ruling to sell five temples in the United States to pay $5 million to a former member.

Leaders of the Hindu sect said similar vigils were to be staged in other cities around the world to dramatize their cause.

''The purpose of the prayer vigil is to bring to the attention of the U.S. government the feeling of Hindus all over the world regarding the recent California high court decision ...'' said Gopal Krishna Swami, a New Delhi leader of the International Society for Krishna Consciousness.

''We are hoping that the feeling of Hindus will be communicated to the U.S. State Department and to the government,'' Swami said.

About 500 Hare Krishna demonstrators gathered peacefully across the street from the U.S. Embassy to chant and pray.

Many carried signs bearing such slogans as ''Don't take away our temples '' and ''Save Hindu temples in America Mr. Bush - Hindus want justice''

Swami and other Hare Krishna followers briefed a U.S. diplomat just outside the embassy gates. The representative said he would convey their message to Washington.

Tuesday's prayer vigil stems from a 1977 lawsuit by an American woman who contended her daughter was brainwashed and held against her will by the sect.

In 1983, a jury in Superior Court of Orange County, Calif., found the sect liable and a judge ordered them to pay $32 million. A court later reduced the amount and last year the Fourth District Court of Appeals reduced the award to $5 million.

Five Hare Krishna temples held in receivership are to be sold if the group does not pay the judgement.

Sect leaders said they have appealed to the U.S. Supreme Court to overturn the lower court's decision.

A spokesman at the Potomac, Md. Krishna Temple, which has organized prayer vigils in front of the U.S. Archives in Washington in recent weeks, said the five temples threatened with sale include one each in New Orleans and New York and three in California.

Sect leaders said they have appealed to the U.S. Supreme Court to overturn the lower court's decision. Friday the Supreme Court ordered a delay in the sale of the temples to allow the Krishna group time for the court to consider the appeal.

#90107u0751 04/17/1990 ~United Press International

NEWTON, MA (APRIL 17) UPI - Rep. Barney Frank, D-Mass., announced Tuesday that he will run for re-election even though the House ethics committee has yet to rule on its investigation into his hiring a male prostitute.

Frank, who represents the 4th Congressional District of Massachusetts, said that with the May 8 deadline for filing nomination papers approaching he decided to make the announcement now rather than waiting for the conclusion of the investigation.

The committee is investigating Frank's hiring of male prostitute Stephen Gobie. Last summer Gobie, 34, revealed he had been a sexual partner of Frank from 1985 until 1987. Frank acknowledged he initially paid Gobie for sex and then hired him as a personal assistant paid with Frank's own money.

"After consultation with friends and supporters, I have concluded that I will run for re-election," Frank said in a statement. Frank said he "looked forward" to discussing the committee report when it is announced.

Gobie alleged he operated a prostitution ring from Frank's Capitol Hill apartment with the congressman's knowledge. Frank, however, denied knowing about the business. Gobie's allegations led to the ethics committee's inquiry.

WASHINGTON (APRIL 17) UPI - Increases in housing and clothing costs pushed inflation at the retail level up 0.5 percent in March, the same as the previous month, to an annualized rate of 5.2 percent, the Labor Department

reported Tuesday.

The department said two-thirds of the increase came from gains in housing, apparel, and upkeep costs. Homeowners' costs rose one percent in March to partially offset decreases in home heating fuel prices.

Food and beverage costs gained 0.4 percent during the month, but the gain was less than in preceding months, according to the department's consumer price index.

During the first three months of the year, the index rose 8.5 percent, the largest quarterly increase since 10.1 percent in the second quarter of 1982, the department said.

An increase in food prices accounted for about 25 percent of the gain, with energy costs making up 18 percent of the increase and shelter costs contributing eight percent of the rise.

In a separate report, the department said real average weekly earnings rose 0.1 percent in March, reflecting a 0.4 percent gain in average hourly earnings. Average weekly hours worked remained unchanged at 0.3 percent. Average weekly earnings totaled $343.23 during the month while average hourly earnings were $9.92, the department said.

Last month, housing prices rose 0.5 percent, compared with a 0.2 percent gain the month before. Shelter costs gained 0.7 percent, with costs for homeowners gaining 0.1 percent and renters' costs rising 0.3 percent.

The index for apparel and upkeep rose 1.6 percent in March after a 3.3 percent gain the month before. The department attributed the rise to the continued early introduction of higher-priced spring and summer wear.

Food and beverage costs gained 0.4 percent during the month. Food on grocers' shelves rose 0.2 percent after rising 2.9 percent in January and 0.5 percent in February.

Fruit and vegetable costs dropped one percent during the month while meat, poultry, egg prices rose. Prices for seafood and fish dropped 2.1 percent. Restaurant bills also increased during March, gaining 0.6 percent.

Transportation costs dipped 0.1 percent last month after rising 0.3 percent in February. The department attributed the decline to lower motor fuel prices. Gasoline prices declined 1.4 percent in March after rising 8.5 percent the month before. Lower automobile purchase prices also contributed to the decline, the department said.

Medical care costs gained 0.8 percent in March to a level 8.6 percent above year-ago prices. Prescription drugs, non-prescription drugs and

medical supplies gained 0.6 percent.

Entertainment costs gained 0.4 percent during the month, the same increase as posted in February.

#90107u0812 04/17/1990 ~United Press International

DALLAS (APRIL 17) UPI - The blood of distance runners runs clear as spring water compared to the fat-laden, milky plasma of the average sedentary American, but the reasons are unclear.

A recent report fuels the debate among scientists as to whether people who exercise benefit most from improved muscle conditioning or from the weight lost as they become more active.

However, those on both sides say people should not put off exercising while waiting for a resolution.

A group of California researchers performed a year-long study, following 46 men who lost weight by exercising, a second group of 42 men who lost weight by dieting alone and a third group of 42 men who did neither.

The exercisers, who were mostly runners, were encouraged not to diet, while the dieters were counseled not to exercise, said Paul T. Williams, one of the authors of the study that appeared recently in the journal Circulation, which is published by the American Heart Association.

Distance runners are known to have 25 percent to 50 percent higher than average levels of high density lipoproteins, or HDL, the so-called ''good'' cholesterol that is important in removing excess fat from the body.

People with high HDL levels are less likely to have heart and blood vessel disease.

Williams, a scientist at the Lawrence Berkeley Laboratory in California, said runners probably have such high HDL levels because they are able to clear fat and cholesterol out of the blood stream much more rapidly than people who do not exercise.

His findings suggest runners have high HDL levels because of the overall weight loss that occurs with an exercise program.

''One of our main conclusions was that the increase in HDL in the 46 men who exercised could be attributed almost entirely to the reduction in weight,'' Williams said.

When the statistics were adjusted to eliminate body mass as a factor, the runners had the same HDL levels as the group which neither dieted nor exercised.

The men who dieted also increased their HDL, but compared to the exercisers, they did not gain as much HDL per pound of weight lost.

Williams' co-investigator, Peter Wood of Stanford University, said the findings may help explain the surprising fact that people who eat more tend to have less heart disease.

Several studies that tracked people's calorie intake over a period of years found those who ate the least were more prone to heart problems. Wood thinks it is because bigger eaters are likely to be more physically active.

''More calories don't add weight if they are burned,'' said Wood, who has run more than 100 marathons over the past 50 years.

He stressed, however, that he is not recommending increased calorie intake for individuals who are overweight and do not plan to exercise.

The California study is disputed in an editorial carried in the same issue of Circulation. Its author is heart specialist Dr. Paul Thompson, who heads a team of researchers at Brown University, Providence, R.I., studying HDL levels in distance runners.

Thompson thinks exercise itself is the key to boosting the body's ability to get rid of fat. Muscles of runners ''become hungry for fat,'' he said, by secreting an enzyme called lipoprotein lipase that breaks down blood fats so they can be stored as energy.

Thompson, a long-distance runner like Wood, said his studies suggest exercise increases HDL levels regardless of whether weight is lost. Long-term weight loss is not necessary to achieve the almost immediate effect of making muscles hungry for fat, he believes.

Williams and his colleagues disagree. They think it is the high lipase activity of the fat cells, rather than muscle cells, that is responsible for the runners' ability to clear fat rapidly.

What no one disagrees about, however, is the benefit of regular exercise.

''If you exercise, your HDL will probably go up,'' Thompson said. ''Some of that increase will probably be due to exercise alone, and some of it will be due to weight loss.''

The scientists say if can learn why distance runners have more HDL,

perhaps someday they can find effective ways to increase HDL levels for couch potatoes, too.

#90107u0848 04/17/1990 ~United Press International

WASHINGTON (APRIL 17) UPI - The total output of the nation's factories, mines, and utilities increased by 0.7 percent in March on a surge in the production of motor vehicles and parts, the Federal Reserve Board said Tuesday. The report also said American industry was operating at 83.3 percent of capacity in March, an increase of 0.4 percentage point.

With the March report, the Federal Reserve revised the manner in which it calculates industrial production and capacity utilization, using 1987 as the new base year for its indicators. Industrial production was up 0.8 percent in February after falling by 1.3 percent in January and gaining 0.4 percent in December, the Fed said.

In addition to the 16 percent March increase in the production of cars and light trucks, American utilities made a significant contribution to the monthly increase, with production levels surging by 6.1 percent vs. a decline of 1.2 percent in February. "Temperatures were more normal after an unseasonably warm January and February," the report said.

Overall manufacturing production edged up by 0.3 percent in March, after a gain of 1.1 percent in February. Production of durable goods was up 0.3 percent and production of non-durable goods was up 0.9 percent.

Production at the nation's mines climbed by 0.6 percent last month after falling by 1.6 percent in February, the Fed said.

March consumer goods production increased 0.8 percent after a gain of 1.4 percent in February, March business equipment production was up by 1.0 percent after a gain of 1.4 percent in February.

Production of construction supplies edged up to 0.2 percent from 0.1 percent in February and materials production climbed by 0.7 percent last month after gaining 0.4 percent in February, the report said.

#90107u0879 04/17/1990 ~United Press International

MIAMI (APRIL 17) UPI - A bankruptcy judge approved an emergency financing plan to loan General Development Corp. $10.5 million for six weeks, over objections from an attorney representing the real estate company's customers. U.S. Bankruptcy Judge A. Jay Cristol approved the plan Monday, calling it the last best hope for creditors and customers.

Attorney Douglas Lyons, who represents 70,000 GDC homesite purchasers and 450 home buyers, objected because the stopgap loan is secured by GDC's entire $1 billion in assets.

The collateral include tens of thousands of homesites that purchasers have made payments on for as long as ten years but still do not hold title to. "It's just another case of the haves determining the fate of the have-nots " Lyons said. He said he is considering advising lot buyers to stop paying on the property. "If they stop paying now, it's probably a total loss," the judge said. "I wish I had better news for your people, but they are in peril."

The loan from eight banks, with an interest rate two percent above prime, is due June 1. The judge said the banks, which are already owed $175 million, were the only source of funds.

The plan gave small creditors two breaks. First, the banks must sell the collateral that secures their $175 million loan if General Development defaults on the $10.5 million loan.

Only if proceeds fall short of $10.5 million can they then tap other GDC assets. The banks also promised to release any liens they might hold on lots that are paid in full by purchasers.

The loan money will be used to complete timeshare units at Vistana, a community near Orlando that is not in bankruptcy and is one of GDC's most valuable assets. Some funds also will go to finish about 120 partially built homes, said GDC Treasurer Margaret Graff.

Monday's hearing was the third since GDC filed for Chapter 11 protection April 6, shortly after pleading guilty to defrauding customers by inflating land values.

Cristol also considerd a request from GDC's biggest shareholder to lift an automatic stay on litigation so he can pursue a shareholder suit against the company.

Attilio Petrocelli, who controls 12.6 percent of GDC's stock, hopes to proceed with a proxy contest that could end with shareholders replacing the current board with his slate of directors. His attorney said the current directors are not equipped to lead GDC out of its financial crisis. Cristol told Petrocelli and GDC to try to work out a settlement by Friday.

MADRID, SPAIN (APRIL 17) UPI - Romanian Prime Minister Petre Roman urged Spain Tuesday to help develop his country's ties with the European Community.

Roman, in Madrid on an official two-day visit, also invited the Spanish business community to invest in Romania and he asked for guidance in developing Romania's democratic institutions.

Roman is head of the provisional government, the National Salvation Front, that has been in charge of Romania since the fall of Nicolae Ceaucescu. He is also a candidate for president in May 20 elections.

The prime minister was scheduled to hold talks with the president of Spain's Socialist government, Felipe Gonzalez, King Juan Carlos and leaders of the private and public sectors.

Roman wants Spain's help in reviving discussions aimed at setting up an agreement of cooperation with the EC, a process the EC suspended in the closing days of the Ceaucescu regime.

Roman also suggested that Spain and Romania establish contacts between their respective members of Parliament and between leaders of Spain's political parties.

Roman, noting that tourism is Spain's principal earner of foreign exchange also solicited guidance in developing that industry, particularly in the Carpathian Mountains and on the coast of the Black Sea.

WASHINGTON (APRIL 17) UPI - The Food and Drug Administration Tuesday approved a new immune system therapy to protect kidney transplant patients from a potentially fatal infection that can be carried by donated kidneys.

FDA officials said the new product, which consists of laboratory-produced antibodies, is approved for treating transplant patients who receive kidneys from donors who have been infected with cytomegalovirus.

Most adults in the United States have been exposed to the common virus and it is usually harmless. But when cytomegalovirus is carried in a donated kidney, transplant patients, whose immune systems are depressed by drugs to prevent organ rejection, often are unable to fight off the uncontrolled spread of virus infection to the lungs, liver and eyes.

The patient's infected organs can be damaged, and in some cases are eventually destroyed by infection, sometimes leading to death, FDA officials said.

''Matched organs are critical to recipients' survival and hard to come by. Today's action will help thousands of kidney transplant patients get kidneys from well-matched donors and - even though the organs may carry the cytomegalovirus - avoid the devastating effects of these infections,'' Assistant Health Secretary James Mason said.

The new product, called cytomegalovirus immune globulin intravenous (human), or CMV-IGIV, is approved for use in kidney transplant patients who show no signs of cytomegalovirus infection before surgery, but who are receiving kidneys from cytomegalovirus-positive donors.

CMV-IGIV is derived from human blood that contains high concentrations of antibodies that attack cytomegalovirus. When CMV-IGIV is given to uninfected patients shortly before and for some time after they receive transplanted kidneys, it wards off the severe effects of subsequent cytomegalovirus infection.

Since people who have been exposed to cytomegalovirus before their transplant already have the antibodies needed to ward off severe effects of the infection, they do not require CMV-IGIV.

Studies have shown CMV-IGIV, developed by Massachusetts Public Health Biologic Laboratories of Jamaica Plain, Mass., dramatically cuts the incidence of severe cytomegalovirus infection in kidney transplant patients, and may also reduce related deaths.

The immune therapy has been available to physicians treating kidney transplant patients on a special case-by-case basis since October 1987.

A small number of patients have suffered side effects like flushing, chills, muscle cramps, back pain, fever, nausea, vomiting and wheezing. The treatment should not be administered to patients with hypersensitivity to immunoglobulin A, the FDA said.

Doctors interested in obtaining CMV-IGIV can contact the American Red Cross, Northeast Region, which is distributing the product.

The telephone number for the Northeast Region Red Cross is 617-461-0891.

#90107u0924 04/17/1990 ~United Press International

TOKYO (APRIL 17) UPI - The Supreme Court Tuesday, affirming Japan's

capital punishment policy is constitutional, upheld the death sentence against a convicted killer who has written best-selling autobiographies while in prison.

Japan's highest court ruled against an appeal by Norio Nagayama, 40, a former coffee shop employee who was convicted in the slayings of four people in a series of robbery attempts in 1968.

''In light of the nature of the crimes, their motives and results, and fully considering the childhood of the accused and his age at the time of the crimes, I cannot help but to allow the death penalty to be upheld,'' presiding judge Mitsuhiko Yasuoka said in handing down the ruling.

Yasuoka said the killing of four people in less than one month is unpardonable and that the death penalty is constitutional in view of Japan's capital punishment policy.

The case has drawn public attention because the defendant won fame for a series of books he has written while on death row telling of the poverty he suffered as a child.

One of his books, ''Tears of Ignorance,'' was a best-seller in 1971 and another, ''Wooden Bridge,'' won an award in 1984.

In 1968, Nagayama stole a pistol from a U.S. military base near Tokyo and shot to death four people, including two taxi drivers, in robbery attempts in Tokyo and other cities, according to court records. He was arrested in 1969.

Court officials said the Supreme Court decision was made unanimously by four judges, leaving little room for a possible retrial.

It was unknown when the sentence would be carried out. The Justice Ministry makes it a rule not to make public execution of death convicts.

Nagayama was sentenced to death by hanging by the Tokyo District court in 1979 but the verdict was reduced to life imprisonment by the appellate court, the Tokyo High Court, in 1981.

The Supreme Court, however, ordered a retrial in 1983 and in 1987 the appellate court reversed its ruling and sentenced him to death.

The case provoked controversy in the news media, which called for multilateral discussions on capital punishment in light of a United Nations resolution adopted last year proposing the abolition of a death penalty.

Defense lawyers argued that Nagayama's death sentence violates the

constitution in view of its provision forbidding ''cruel punishments.'' They contended the defendant was a mentally unstable juvenile at the time of the crimes.

Japanese dailies said Nagayama was abandoned by his parents as an infant and did not finish school. A recommendation for his membership in Japan's top writers' association was rejected.

PARIS (APRIL 17) UPI - The Goddess of Democracy, a converted research vessel due to begin beaming radio broadcasts to China this month, has been harassed by Chinese cargo ships during its voyage from France, project organizers charged Tuesday.

The ship, sponsored by the Chinese dissident group A Boat for Democracy, left the French port of La Rochelle March 17 and is approaching Singapore, from which it will sail to its position off the Chinese coast.

The ship's news and music programs will be broadcast 24 hours a day and will reach all 1 billion mainland Chinese, according to the sponsors.

The group said the ship could be subject to hostile action from Beijing authorities during the next few days as it approaches the Chinese coast. The sponsors said the vessel was the object of ''intimidating maneuvers'' by Chinese cargo ships recently, but gave no further details.

The Chinese government protested the French decision to allow the ship to sail from its shores and called on France to forbid news coverage of the event.

''The Chinese dictatorship is based on lies and the Goddess of Democracy, which represents the freedom to inform in China, gives great fear to the Chinese authorities,'' said Yan Jaiqi, president of the Federation for Democracy in China, the group that is sponsoring the ship.

In an unrelated development, French high school students have gathered 4,000 signatures in support of Li Datong, a Chinese journalist imprisoned by the authorities.

''Phosphore,'' a magazine for adolescents that sponsored the petition drive, said Li, 30, is the former head of the education section of the daily Chinese Youth. The French magazine said Li was arrested in September 1989 after he called for press freedom in China.

#90107u0982 04/17/1990 ~United Press International
WASHINGTON (APRIL 17) UPI - The Supreme Court ruled Tuesday the government does not have to negotiate with employee unions before hiring outside contractors to do government work.

The justices, in a 6-3 decision, reversed a lower court ruling that found such contracting issues must be negotiated.

Justice Antonin Scalia, writing for the majority, said a union's proposal to negotiate ''contracting out'' decisions infringes on the government's management authority in violation of the Civil Service Reform Act.

Chief Justice William Rehnquist and Justices Byron White, Harry Blackmun, Sandra Day O'Connor and Anthony Kennedy joined Scalia in the majority, while Justices William Brennan, Thurgood Marshall and John Paul Stevens dissented.

At issue was the rights of government to hire an outside company to do a job or provide a service.

The government maintained it has the right to contract for such services without consulting federal employee unions; the unions argued that before the government can take that step it must be negotiated in collective bargaining.

The case emerged after the National Treasury Employees Union, representing employees of the Internal Revenue Service, proposed in negotiations that contracting out be subject to grievance and arbitration provisions.

The agency declined to bargain over the proposal but the Federal Labor Relations Authority ruled the proposal was negotiable and the U.S. Court of Appeals for the District of Columbia eventually agreed.

88-2123 Department of the Treasury, Internal Revenue Service vs. Federal Labor Relations Authority and National Treasury Employees Union

#90107u0994 04/17/1990 ~United Press International
BEIRUT, LEBANON (APRIL 17) UPI - Violence caused by power struggles among rival Christian and Moslem forces engulfed both sectors of the war-torn Lebanese capital Tuesday, killing 10 people and wounding 30 others, police said.

Using anti-armor rockets and automatic arms, hundreds of pro-Syrian Shiite Amal gunmen and Hezbollah militants fought for more than seven hours,

paralyzing most businesses and shutting schools in Syrian-policed west Beirut, police said.

Police and hospital sources said nine people were killed and 30 others were wounded, including three women, in the Amal-Hezbollah violence that raged from daybreak to midday.

Meanwhile, intermittent violence was reported in the Christian enclave where antagonist Christian forces have been engaged in a warfare with heavier guns since Jan. 31, police said.

They said troops of military leader Michel Aoun and Samir Geagea's militiamen sporadically fired mortars and rockets at each other's positions, forcing many civilians to huddle in sandbagged shelters.

One army soldier was killed in the gunfire exchanges, police said.

At least 922 people have been killed and 3,010 wounded since the outbreak of the violence for the control of the 310-square-mile Christian enclave.

In southern Lebanon, Pro-Syrian Shiite Amal gunmen said they attacked an Israeli-held position with rockets and machine gun fire Tuesday, killing and injuring an unspecified number of Israeli soldiers and members of the loyal South Lebanon Army.

The Amal statement could not be immediately confirmed and Israel did not comment on the reported violence.

Israel has established a so-called ''security zone'' along the Lebanon-Israeli border that is patrolled by about 1,000 Israeli troops and 2,600 members of the South Lebanon Army.

The Shiite violence in west Beirut largely subsided during the afternoon after Moslem officials appealed for calm and Syrian forces staged scattered foot patrols.

''Why did they hurt my dear girl? What for?'' a 40-year-old woman wailed beside her critically wounded 15-year-old daughter at Barbir Hospital. The west Beirut hospital, which was crowded with wounded people, appealed for blood donations.

''I have shoot-to-kill orders. I warn you to get off the streets,'' cried a Syrian officer, whose soldiers disengaged rival Shiite gunmen around the Iranian Consulate building in the residential area of Burj Abi Haidar.

Bearded gunmen retreated inside the shell-pocked Iranian-occupied multi-story building near the site of a battle earlier. Civilians, many clad in pajamas, left their cars on nearby rubble-strewn roads.

The violence between Amal and Hezbollah, vying for control of the country's 1.5 million Shiites, spread to Beirut's southern suburbs, where the extremists reportedly hold some of the 18 foreigner hostages in secret hideouts.

''Stop spoiling your faith and wasting your blood,'' Sheikh Mohammed Mehdi Shamseddine, the vice president of the higher Shiite council, said in an appeal, expressing outrage at the inter-Moslem violence on the 22nd day of the Moslem fasting month of Ramadan.

Recurring big and small blasts forced thousands of civilians to huddle indoors throughout the day. A number of women appeared on some streets shopping from vegetable stands and mingling with nervous gunmen.

The fighting broke out at daybreak as dozens of gunmen with automatic weapons and rocket grenades scattered on roads and took positions behind parked cars, witnesses said.

An Amal spokesman said gunmen guarding the Iranian consulate triggered the street fighting.

''The followers of Fadlallah and Mohtashemi opened fire and tossed hand grenades without provocation,'' the spokesman said, referring to Sheikh Mohammed Hussein Fadlallah, Hezbollah's mentor, and Ali Akbar Mohtashemi, Iran's radical former interior minister.

The extremists in a statement said the violence erupted when Amal gunmen opened fire on a house of a Hezbollah member.

A Syrian force contained tension between the two rivals Monday after gunmen shot dead an Amal militiaman in west Beirut. The pro-Syrian group accused Hezbollah of killing the gunman, but the militants denied the charge.

#90107u1004 04/17/1990 ~United Press International

NEW YORK (APRIL 17) UPI - Avon Products Inc. has asked a federal court to void the purchases of Avon shares made by Chartwell Associates, an unfriendly investor group that has acquired a 16 percent stake in the door-to-door cosmetics company.

Chartwell, whose members include representatives of Avon rival Mary Kay Cosmetics Inc. of Dallas, the Fisher real estate family of New York, and oil heir Gordon Getty, has purchased more than nine million shares of Avon common stock for about $312 million over the last six months.

In a suit filed with the U.S. District Court in Manhattan late Monday, Avon alleges that Chartwell made "false, incomplete, and misleading" public disclosures in filings with the Securities and Exchange Commission regarding the group's purchase of Avon shares.

The "true, undisclosed purpose for their investment in Avon is to acquire an unfair competitive advantage for the benefit of Mary Kay ... at the expense of Avon, its employees and its public shareholders," the suit said. A Chartwell spokeswoman said the group had no immediate comment on the suit.

Avon's suit also seeks to enjoin Chartwell from acquiring additional shares in Avon and to require the group to dispose of the blocks of Avon stock it already has acquired. Chartwell also has purchased about 50,000 shares of Avon preferred stock, or less than one percent, for about $1.3 million.

In the suit, Avon said that Chartwell, contrary to statements made in SEC filings, "left the door wide open to arrange some sort of merger or combination between Avon and Mary Kay."

The suit is the latest salvo in the continuing struggle between Avon, the world's largest cosmetics maker, and its much smaller rival, which also uses independent sales representatives to distribute beauty products.

Late last month, Avon agreed to nominate two directors proposed by Chartwell and said it would hire John P. Rochon, Mary Kay's vice chairman, as a consultant to Avon. The agreement allowed Avon to skirt a potentially bruising proxy fight with Chartwell.

The suit said Rochon, as part of the pact, was to sever his ties with Mary Kay. Instead, the suit said, Rochon, is negotiating to receive "substantial monthly payments" from Mary Kay through an intermediary.

Earlier this month, Avon amended its shareholder rights plan to make a hostile takeover more difficult. Sources said Chartwell was preparing a lawsuit challenging Avon's so-called poison-pill plan.

#90107u1067 04/17/1990 ~United Press International

LONDON (APRIL 17) UPI - Family and friends of John McCarthy, the British journalist held by Moslem extremists in Lebanon, marked his fourth anniversary in captivity Tuesday with a church service, a media campaign and a protest outside the Iranian Embassy.

The Foreign Office said it was a ''desparately sad anniversary'' and that it welcomed recent statements in Iran and Lebanon about the need to release all Western hostages, including other Britons: Brian Keenan, Jack Mann and Anglican church envoy Terry Waite.

''We very much hope that these statements turn out to be the first movement towards the freedom of the hostages,'' a spokesman said.

McCarthy, 33, was en route to Beirut airport April 17, 1986, after completing a 32-day assignment in Lebanon with Worldwide Television News when he was abducted by gunmen.

His family and friends said the only reliable news they have had of him was came a group of French hostages released in May 1988 said he was alive.

Since his disappearance, Jill Morrell, the fiancee with whom he planned to buy an apartment in London, and his family have fought for his freedom.

Morrell formed a group called the Friends of John McCarthy, which applies public pressure to seek the release of McCarthy and other hostages held in Lebanon.

They marked his fourth anniversary in captivity by unveiling a new poster and television commercial that will be used to keep his detention in the British public's eye.

Members of the group said the pro-release statements in Iran gave some grounds for optimism. McCarthy's kidnappers are presumed to be the Iranian-backed Hezbollah faction.

''It does seem as if there is a different atmosphere in Tehran,'' Morrell said. ''It does look quite encouraging. As such it has been all words and

no action. We do feel the government here should be encouraging the Tehran government in what it has been trying to do.''

Sympathizers attended a church service in Fleet Street. Foreign Office Minister William Waldegrave was present, and McCarthy's father, Patrick, who last June pleaded on Lebanese television for his son's release so his mother could see him before she died of cancer.

A group later went to the Iranian Embassy, where they stood in silence, some blindfolded and in chains, to protest the suffering of the captives. Among them was former French hostage Jean-Paul Kauffman.

In Lebanon, newspapers printed messages in the hope that somehow, somewhere, McCarthy may read them.

''We think constantly of the long time you have spent in Beirut and hope that 1990 will see you safely home again,'' said Patrick McCarthy. ''Our thoughts and prayers are with all the Lebanese families who suffer the agony of missing their loved ones who are held hostage. With love from us all.''

Morrell wrote that ''the longer this goes on, the more determined I am to see you back home. Hang on and do not lose hope.''

A note from the Friends of John McCarthy said their plan was to close the office after welcoming him home.

McCarthy had been instructed to leave Lebanon, his first foreign posting, because of the risk to Westerners due to an American bombing raid on Libya launched from military bases in Britain.

#90107u1105 04/17/1990 ~United Press International
RANGOON, BURMA (APRIL 17) UPI - Burmese ushered in their new year Tuesday with little of the revelry that has marked past years, apparently because they feared violating a stringent curfew and a ban on political demonstrations.

Burma's military government, which crushed pro-democracy demonstrations in a 1988 crackdown that left an estimated 1,000 dead, imposed the strict regulations leading up to May elections.

Despite the ban on political activity, members of one political party, the opposition National League for Democracy, took advantage of the holiday to perform songs and dances in Rangoon that were mostly euologies for Burma's old multi-party democratic system, crushed by General Ne Win in a 1962 coup.

The party members performed from the back of a truck decorated with streamers and an oversized guilded bamboo hat, which is the National League for Democracy's election symbol.

Because political demonstrations or demonstrations that disturb the peace have been banned, Western observers speculate it will be unlikely that May's election will be a fair contest. Most opposition leaders - including the head of the National League for Democracy - are in jail.

None of the dozens of other political parties attempted to publicize themselves during the four day water festival, which ended Tuesday with the ushering in of the Burmese new year.

Rangoon's Sule Pagoda, which is usually the main site of the water festival celebrations, was strangely quiet and almost deserted this year. Many people were shot there during the 1988 supression of the democracy movement.

But in the tradition-bound country-side, villagers celebrated the festival by performing charitable deeds, splashing each other with water and

releasing live fish into lakes and streams.

#90107u1107 04/17/1990 ~United Press International

BOSTON (APRIL 17) UPI - About one in 3,000 teenagers who applied for military service tested positive for the AIDS virus, indicating the infection may not be as rare among young people as previously thought, scientists said Tuesday.

Tests of more than 1.1 million teenaged military applicants found the prevalence of human immunodeficiency virus (HIV) highest among non-whites who lived in densely populated, urban areas known to have high rates of AIDS, said Col. Donald Burke, of Walter Reed Army Medical Center in Washington.

Burke and colleagues who studied the results of data collected between October 1985 and March 1989 concluded that ''HIV is a real and immediate threat to teenagers in the United States.''

Although only 421 teenagers were among more than 100,000 AIDS cases reported to the federal Centers for Disease Control in Atlanta, the number infected with HIV is unknown, Burke said.

Since late 1985, all applicants for military service have been tested for HIV during routine medical examinations. The results indicate infection rates may be accelerating in some groups of teenagers and slowing in others, Burke wrote in the Journal of the American Medical Association.

Among the teenagers tested, 393 were found to have HIV. The infection rates in women and men were comparable, which the researchers found in ''sharp contrast'' to the nine times greater ratio of males to females among adult AIDS cases.

The study said the discrepancy might be due to underdiagnosis of AIDS among young women. Another explanation might be that young men with HIV do not apply to the military in representative numbers.

If either hypothesis is true, the ''prevalence of HIV infection among U.S. teenagers in the civilian population may be substantially greater'' than one in 3,000, Burke's report said.

HIV-infected teenagers in the study came from 200 counties in 41 states and from the District of Columbia. The states with the greatest numbers were California, New York and Texas, while the state with the highest rate was Delaware, at more than one per 1,000.

Nine states had no HIV positive applicants - Alaska, Colorado, Maine,

Montana, North Dakota, New Hampshire, Rhode Island, South Dakota and Wyoming.

The study found that in the District of Columbia, Baltimore, and parts of New York City, the HIV rate among teenaged applicants was more than two in 1,000. By contrast, the rate in an eight-state area in the north-central United States was only one in 25,000.

The overall infection rate was six times higher among blacks than whites, and three times higher in Hispanics than in whites, Burke found.

The study said statistics indicate that ''adolescents typically have little understanding regarding risks of infection with HIV.'' It concludes that ''intense'' educational efforts may be needed to halt HIV spread in teenagers.

BOSTON (APRIL 17) UPI - The Bank of New England Corp., whose enormous portfolio of troubled loans is threatening to put the company out of business, may be shedding many of those loans into a separate unit.

James R. Dorsey, a company spokesman, Tuesday declined to comment on a published report to that effect but said, "I hope to have a (press) release out describing some of these issues later."

The company had $2.2 billion in nonperforming assets at the end of 1989 and a loss of $1.12 billion for the year, both attributed to the region's faltering real estate market.

The new entity probably will take on at least $1 billion in troubled loans the Wall Street Journal said Tuesday in a story attributed to banking industry officials.

Although details are not yet worked out, the new entity could resemble so-called good bank-bad bank programs set up in recent years by other troubled banking companies, the Journal said. It quoted unnamed officials as saying Bank of New England hopes to raise investment money from outside investors to set up a separately capitalized unit. However, the unit might also simply be a separate division within the company.

But by setting up such a bad - or collecting - bank, Bank of New England could remove the loans from its own balance sheet and improve its financial health, thus allowing it to raise funds at a lower price.

#90107u1136 04/17/1990 ~United Press International

WASHINGTON (APRIL 17) UPI - Gerald Bull's name was not well-known outside the secretive world of arms research. News that the Canadian was found dead in Brussels with five bullets in his head and back received scant U.S. notice.

Yet, Bull was a world figure - ''a Canadian von Braun-type'' - in development of long-range artillery guns and in recent years had been working with several Third World countries, including Iraq, a former U.S. colleague said.

Charles Murphy, an American who in the 1960s helped Bull produce the world's longest artillery weapon, said in an interview that Bull loved his work and was ''somewhat bitter'' at having served a U.S. prison term.

Like German rocket scientist Wernher von Braun, Bull would work ''with anyone'' as long as it allowed him to continue his research, Murphy said. He added that in recent years Bull worked with China, Spain, Yugoslavia, Iran and Iraq.

''(With) his contacts with Iraq, he may have been involved in the design or making of big guns,'' said Murphy, who is now chief of the launch and flight division of the U.S. Army's Ballistic Research Laboratory in Aberdeen, Md.

''Apparently he irritated somebody and they shot him.''

Bull was found shot to death in his Brussels apartment March 22 and, because of his work with Iraq, suspicion focused on Israeli or Iranian agents.

Three weeks later, Bull's name was linked to crates of Iraqi-bound steel pipe that British authorities seized in Britain last Thursday on suspicion it was part of a 40-yard-long gun.

Britain's customs officials said the weapon could be used to fire nuclear or chemical shells long distances, though Iraq and the British manufacturing firm denied that the cargo was part of a weapon.

An unidentified customs official told The Times newspaper in London they also found a Bull manual that ''describes precisely what we have got ... what it will fire, the length of the barrel, everything. We are now absolutely certain that it is not only a gun, but a gun made according to a Bull design.''

Bull, in fact, had already produced such a gun.

In the early 1960s Bull and Murphy were leaders of a joint Canadian-U.S.

program, the High Altitude Research Project, or HARP, that attempted to develop a big artillery gun as a means of helping boost missiles into space.

Bull then was a professor of engineering at McGill University in Montreal, which was sponsoring half the project.

Together, Bull and Murphy produced a gun 120 feet long, which is listed by the Guinness Book of World Records as the longest ever built. It fired a 185-pound projectile 112 miles in a test in Arizona on Nov 19, 1966.

But interest waned and funding for the project stopped in 1967, Murphy said. Bull, however, continued his research, leaving McGill University to set up his own company on the U.S.-Canadian border, where for 10 years he held mostly U.S. defense contracts.

He was later convicted of illegal arms exports to South Africa and spent about five months in the U.S. federal prison at Allentown, Pa.

''He ended up somewhat bitter over what he thought was a dirty deal and moved to Brussels to set up his own company there (called Space Research Corp.),'' said Murphy, who kept in contact with Bull as a friend.

''I knew he traveled to Baghdad,'' Murphy said. ''He had business there.''

''He was dynamic,'' Murphy said of Bull. ''He was a Canadian von Braun-type. He could push people to accomplish things they didn't think they could do.

''Early in his career he characterized the ones (scientists) in Ottawa as 'cocktail scientists,' as not having much to do. He did have that technique to antagonize people who he felt were useless.''

Murphy said that even if Ball had been making a long gun for Iraq that could send nuclear or chemical shells as far away as Israel, such a weapon ''would be very vulnerable'' to aircraft strikes because of its ''fixed location.''

As for who killed Bull, Murphy - who attended Bull's funeral - said the newspapers in Belgium were speculating it was Israel.

''If he was dealing with Iraq, you could say it was anyone who hates Iraq - and that involves a number of countries,'' Murphy said.

#90107u1166 04/17/1990 ~United Press International
WASHINGTON (APRIL 17) UPI - Three groups pushing for public funding of congressional races announced a $1 million effort Tuesday to bolster changes for the campaign finance reform that is the most radical and appears least likely to succeed.

Representatives of the three self-styled public interest groups - Public Citizen, Citizen Action and the U.S. Public Interest Research Group - said the effort included television, radio and print ads scheduled to begin running this week, as well as citizen organizing efforts in 27 states.

''Our founding fathers would undoubtedly be shocked if they knew how distant Congress has grown from the people it is supposed to represent,'' said Joan Claybrook, president of Public Citizen. ''They would be outraged if they knew that money emblazoned with their images ... is being used by influence peddlers in attempts to secure favors from members of Congress.''

The main target of the three groups and other similar organizations are political action committees, which they argue are inappropriately influencing Congress with campaign contributions.

They believe that voluntary public financing of congressional campaigns - similar to the system used in presidential contests - is the only way to

appropriately reform the system. With the House and Senate showing signs of acting on some form of campaign finance bill, they are increasing their push.

However, a complete shift to public financing is the reform item with probably the smallest chance of passage.

For the past several years, congressional advocates of campaign finance reform have proposed plans, only to see them die in a Senate fight over public financing. Generally, Republicans who have access to more money oppose the change.

This year, because Congress has become sensitive to public complaints about its campaigns, there is new talk of a compromise, although it would appear likely than any final bill would not have complete public funding.

Claybrook argued Tuesday that while other reform steps such as spending limits are important, ''campaign reform without public funding cannot be called real reform.''

The ads prepared by the groups ask people to call a 900 telephone number - at $5 per call - to receive information on how to push for public financing.

#90107u1171 04/17/1990 ~United Press International
HARARE, ZIMBABWE (APRIL 17) UPI - A Zimbabwean businessman and a South

African university professor kidnapped by Mozambican rebels in February have been freed, family sources said Tuesday.

The release comes amid efforts to bring the government of Mozambique President Joaquim Chissano and the Renamo guerrilla movement to the negotiating table for the first round of direct talks aimed at ending the country's 15-year civil war.

Businessman Dudley Searle, 40, and David Stephenson, 46, a professor of hydrology at Johannesburg's University of the Witwatersrand, were kidnapped by Renamo rebels on Feb. 16 near the town of Chimoio in the central Mozambican province of Manica.

Searle's family said the two men had been turned over to the Zimbabwean military at the border and were en route Tuesday to Harare.

A representative of the right-wing Renamo guerrilla movement in Lisbon said the two had been released Monday.

Renamo has been fighting Mozambique's Frelimo government since shortly after the nation became independent from Portugal in 1975. The bitter civil war, in which as many 700,000 have been killed, has left the southeast African country dependent upon foreign aid to feed many of its 15 million people.

The guerrilla movement has kidnapped a number of foreigners during the war.

WASHINGTON (APRIL 17) UPI - President Bush, who braved rain and 35 mph winds to play golf in Bermuda during the weekend, is suffering from a cold, the White House said Tuesday.

Press secretary Marlin Fitzwater said that Bush has had a cold for several days, even before he traveled to Bermuda Friday for a meeting with British Prime Minister Margaret Thatcher.

''He's taking cold medicine,'' Fitzwater said. He did not elaborate.

Fitzwater said the president's voice is still ''a little raspy'' but he is getting better.

Bush leaves Thursday on a four-day trip to Florida with a side journey to Birmingham, Ala. He plans to meet with French President Francois Mitterrand on Key Largo, Fla., Thursday and do a lot of fishing during the weekend.

#90107u1211 04/17/1990 ~United Press International
WASHINGTON (APRIL 17) UPI - Rural America, already hobbled by a high poverty rate, would see few benefits - and might be punished - under three proposals to change tax laws, a report said Tuesday.

The report by the Center on Budget and Policy Priorities said the income gap between rural and urban residents widened in the decade ending in 1988. Because of that, it said, policies that benefit wealthy taxpayers ''also tend to benefit urban residents disproportionately - and broaden the gaps between rural and urban Americans.''

Nearly one-fourth of the U.S. population lives in rural areas. The latest Census Bureau report on poverty rates listed a rural rate of 16 percent, compared to the U.S. average of 13.1 percent.

It its report, the Center said the vast majority of rural Americans have low or moderate incomes while only 11 percent earn enough to rank among the most affluent 20 percent of Americans. By contrast, 23 percent of urban dwellers fit into the top bracket.

The report said government statistics show that ''between 1979 and 1987, per capita income in rural areas fell from 77 percent to 73 percent of per

capita income in urban areas.''

Proposals to reduce the capital gains tax, expand tax breaks for Individual Retirement Accounts or allow tax-free interest on long-term savings would bring few benefits to rural America, the center said, since the benefits primarily would go to wealthy taxpayers.

Congress has yet to act on the three proposals this year.

President Bush has described a capital gains tax cut as ''a policy that will put more money into the little guy's pocket.'' He said last year the tax cut would be a boon to farmers because they could keep more money from sale of assets, such as land.

The Center said the lion's share of benefits from such a tax cut would go to wealthy urban dwellers. All but about 5 percent of the benefits from allowing larger tax-deductible IRA contributions would go to the top income bracket, as would most benefits from the administration's proposed Family Savings Account, which would allow tax-free interest on money deposited for at least seven years.

If Congress offsets those tax changes - all of which would mean smaller federal revenues - by cutting programs or failing to target wealthy taxpayers, ''the net effect almost certainly will be to transfer income and resources from low and middle-income households to upper-income households,'' the report said.

''This, in turn, will likely result in a transfer of income and resources from rural to urban areas,'' it concluded.

AUSTIN, Texas (APRIL 17) UPI - Weakening real estate markets across the United States drove banking industry profits down 34 percent last year, said a study issued Tuesday by a leading bank analysis firm.

Sheshunoff Information Services Inc. said national profits slumped to $15.8 billion.

Unprofitable banks were concentrated in six states, led by New York, Texas and Arizona. Losses in those states, respectively, were $3.1 billion, $567 million and $491 million.

Money center banks accounted for a large share of the 1989 decline, Sheshunoff Information Services said. Of the 44 U.S. banks with assets of more than $10 billion, 11 lost money last year, according to the report.

Among the 10 largest U.S. banks, the seven based in New York, with combined assets of $508.2 billion, lost $3.7 billion. Their losses stemmed heavily from increased provisions for losses on Third World loans.

The other three banks, all in California and with combined assets of $186.6 billion, had 1989 earnings of $2.0 billion.

Analyst Alex Sheshunoff warned of future problems stemming from ''speculative excesses'' in banks' in involvement real estate and leveraged buyouts.

Sheshunoff said U.S. bank lending rose by $127 billion in 1989, two-thirds of which was for real estate purposes. Real estate lending now accounts for 38.8 percent of outstanding loans, against 28.6 percent in 1984.

But, he said, tighter regulation is in effect ''pulling the punch bowl away from the party,'' slowing expansion of property loans.

Last year, bad loans ''rose precipitously'' in the Northeast. Net charge-offs - bad debts minus recoveries - rose 77 percent in the region to $8.7 billion, more than a third of the $22.7 billion national total.

Nonperforming real estate loans - those at least 90 days past due or not accruing interest - more than doubled in eight northeastern states, rising 504 percent in Connecticut and 233 percent in Massachusetts.

But Arizona had the most severe real estate loan problems, with 11.9 percent of loans nonperforming. Texas was next, at 10.5 percent, followed byMassachusetts, at 7.0 percent, and Connecticut, at 6.4 percent.

The report said that although overall income fell, 88 percent of the nation's 12,707 banks turned a profit last year, earning $24.5 billion. But the other 12 percent lost a total of $8.7 billion.

In 1988, 86 percent of 13,066 U.S. banks had profits totaling $28.3 billion. The unprofitable 14 percent lost $4.3 billion.

California banks had the largest 1989 profits, at $3.4 billion. Illinois banks ranked second, at $1.8 billion.

Sheshunoff concluded: ''The industry as a whole remains solid,'' with a $204.7 billion equity capital foundation. Nonperforming loans totaling $61.6 billion were offset by $52.9 billion in loan-loss reserves, he said.

#90107u1230 04/17/1990 ~United Press International

LONDON (APRIL 17) UPI - Prime Minister Margaret Thatcher will probably

visit Johannesburg this year, despite black nationalist leader Nelson Mandela's insistence that she go to South Africa only when apartheid ends, her spokesman said Tuesday.

''The prime minister will judge when she goes to South Africa and obviously the objective will be to dismantle apartheid,'' Thatcher's spokesman said. ''Mr. Mandela can also help in this process.''

Thatcher's plans are not final but she is expected to go to Johannesburg this year, he said.

The spokesman had no comment on the concert nor criticism of Thatcher's policies by Mandela, who is scheduled to return to Britain next month to meet Thatcher.

Mandela told more than 70,000 rock fans at an anti-apartheid concert Monday, plus a television audience estimated at 1 billion, that the fight against the white minority government should be intensified with various means, including sanctions.

''Reject any suggestion that the campaign to isolate the apartheid system should be wound down,'' Mandela said. ''It is only those that support apartheid who argue that the Pretoria government should be rewarded for the small steps it has taken.''

Thatcher eased economic sanctions against the South African government of President Frederik de Klerk Feb. 23 because it made reforms, including releasing Mandela Feb. 11 after 27 years in prison and legalizing the African National Congress.

Labor leader Neil Kinnock condemned Thatcher's stand Tuesday, saying it left Britain ''almost alone in the world democracies in giving succor to the apartheid regime.''

Mandela also told reporters Thatcher should not visit South Africa while apartheid laws remain in place.

The live telecast of the concert event reached 26 nations and gave Mandela an extraordinary opportunity to galvanize opposition against Pretoria. Mandela refused to meet Thatcher this trip but did not personally criticize her, saying he wants her as an ally rather than an enemy.

Other officials bridled at Mandela's comments, arguing they, too, want to transform South Africa into a multi-racial democracy but through different tactics.

Foreign Office Minister William Waldegrave said Thatcher would only visit South Africa when a state-of-emergency is lifted and ''real progress''

made toward solving the racial conflict.

''We thought (Mandela) was wrong only in the following respect - we felt some symbolic response had to be made to de Klerk,'' Waldegrave said. ''Of course, some sanctions remain in place. I don't think we are seriously at odds (with Mandela).''

Britain lifted a ban on new investment in South Africa and removed all obstacles to tourist, cultural and scientific exchanges. Mandela objected to London's solitary response.

''There are some in this world who wish to support the South African government by giving it rewards,'' he said at Wembley Stadium. ''But we, representing the overwhelming majority of people in our country, come to you for support, which we need now more than ever before.''

#90107u1270 04/17/1990 ~United Press International

LONDON (APRIL 17) UPI - Firecrackers were the latest weapon used in a psychological warfare Tuesday against seven convicts who refused to end their siege at Strangeways Prison despite deteriorating conditions within the wrecked jail.

Prison officials threw firecrackers to disturb the sleep of the holdouts on the 17th day of the standoff, and resumed an old tactic of firing water cannons at the prison in Manchester, 200 miles northwest of London.

Convicts retaliated by setting fires inside the prison, which were doused without causing major damage, and mocking the authorities.

Paul Taylor, who claims to have started the protest, danced on the rooftop of the central rotunda from which prisoners control entry to the prison's five main branches.

Prison governor Brendan O'Friel was steadfast in his plan to end the longest jail siege in Britain through negotiation, rather than force that could result in injuries to prisoners and guards.

Food poisoning prompted three inmates to surrender Monday.

Rebellious inmates have been able to press on with their occupation because they stockpiled food from stores and a kitchen when the uprising began.

But lack of refrigeration has apparently caused food poisoning, and prompted prison governor Brendan O'Friel to advise the remaining seven inmates to also surrender, rather than succumb to illness.

The uprising began April 1 as a protest of overcrowding and poor conditions, and sparked disturbances in 10 other facilities housing members of Britain's 45,000-strong inmate population.

Scores of inmates and prisoners have been injured and one prisoner left dead in the outbursts, which have inspired public debate about the need to reform the nation's prisons. There have been numerous unverified reports of other deaths inside the occupied areas of Strangeways.

#90107u1325 04/17/1990 ~United Press International

ISLAMABAD, PAKISTAN (APRIL 17) UPI - The pro-Soviet Afghan government has dispatched a massive convoy carrying weapons and food to its troops fighting rebels in southern Afghanistan, Western diplomatic sources said Tuesday.

They said the convoy of about 150 tanks and 1,000 trucks left the western air base of Shindand during the weekend for Kandahar, 270 miles southwest of Kabul and one of Afghanistan's largest cities.

Fierce fighting has been reported in Kandahar Province in the past few weeks between troops and U.S.-backed Moslem guerrillas fighting the communist government in Kabul since 1978.

The guerrillas, who are based mostly in Pakistan, have had little military success despite the withdrawal of Soviet troops in February last year and need a victory to boost their contention they are still capable of overthrowing the government of President Najibullah.

A government convoy, consisting of more than 1,000 vehicles, last reached Kandahar in September after a journey of several weeks from Shindand during which it was subjected to fierce guerrilla attacks.

In another development, the sources said Afghan authorities have detained the chairman of the Afghan Academy of Sciences, the chairman of Kabul University and the police chiefs of the eastern cities of Jalalabad and Khost in connection with last month's coup attempt.

The sources, quoting diplomatic sources, said the authorities have also begun detaining friends and relatives of the leaders of the revolt.

The government has said it has held more than 600 people for alleged involvement in the March 6 coup attempt, which was led by then-Defense Minister Gen. Shahnawaz Tanai and supported by Moslem guerrilla leader Gulbuddin Hekmatyar.

Tanai and about 20 other generals fled to Pakistan on March 7 when the revolt failed after a day of heavy fighting in Kabul between rebel troops and those loyal to Najibullah.

The government last month expelled Tanai and six other officials from the ruling Politburo for alleged involvement in the plot.

The sources earlier said two of those expelled have been executed. But they later retracted the statement and said at least one of the two had been seen alive recently and that the report of the executions could not be confirmed.

#90107u1342 04/17/1990 ~United Press International

ATLANTA (APRIL 17) UPI - The Rev. Ralph David Abernathy, who fought for civil rights alongside his friend Martin Luther King Jr. during the 1960s, died Tuesday in a hospital at the age of 64.

Abernathy, who was criticized last year by many for discussing King's extra-marital affairs in his memoirs, entered the hospital March 23 for what doctors called a ''low sodium condition.'' He had been treated for strokes in the past, family members said.

Officials at Crawford Long Hospital, where Abernathy was undergoing treatment in the intensive care unit, would release no immedate details on his death.

Abernathy, a Baptist minister whose grandfather was a slave, was treated at Crawford Long for a stroke in 1986.

Abernathy was King's closest friend and associate until King was assassinated in 1968, and helped King found the Southern Christian Leadership Conference.

Abernathy caused a furor in the civil rights community last fall with a controversial autobiography, ''And the Walls Came Tumbling Down,'' which referred to King's alleged extramarital affairs.

Shortly after its publication in October, King's Ebvenezer Baptist Church called for a boycott of the book and some members of the civil rights community called on Abernathy to retract statements they say tarnished King's reputation.

Abernathy defended the book, saying his claims about King already were widely known and had been included in at least two other publications.

Referring to King as his ''dearest friend'' and a man he ''dearly loved,''

Abernathy insisted that omitting the passages about ''my friend's weakness for women'' would have made his book less credible.

Abernathy spent almost all of his adult life fighting for what he considered just causes that needed immediate action. He was active in countless protest demonstrations and often was arrested for his participation in those encounters.

Ralph David Abernathy was born March 11, 1926 in Linden, Ala., and grew up on his parents' farm. He finished his undergraduate work and received his bachelor's degree from Alabama College in 1950 and a master's degree in sociology in 1951 from Atlanta College.

Abernathy decided at an early age to join the clergy and in 1948, at age 22, was ordained a Baptist minister. He became pastor of the First Baptist Church in Montgomery, Ala., where he became a close associate of King.

In 1957, King, Abernathy and several other black clergymen formed the Southern Christian Leadership Conference to boost their struggle for full civil rights for blacks in the South.

As an associate of King, Abernathy was committed to non-violence and maintained a Gandhi-like demeanor even during the worst confrontations with police in various areas.

The first major civil rights confrontation involving Abernathy was in Selma, Ala., a demonstration that resulted in passage in 1965 of the Voting Rights Act.

King was assassinated in Memphis, Tenn., on April 4, 1968, and shortly thereafter Abernathy assumed the fallen leader's position as president of the SCLC. He held that job for more than a decade, although at one time he became disenchanted and attempted unsuccessfully to resign.

Abernathy guided the SCLC into areas beyond civil rights, mainly in the economic spheres where he mounted an assault on poverty and unemployment.

He also put the power and reputation of the SCLC behind other controversial movements. Abernathy supported the grape pickers' boycott led by Carlos Chavez in California and backed the anti-war protests of acitivists in Harrisburg, Pa., and Chicago.

Abernathy promoted and led protest marches in 1969 in Charleston, S.C., where hospital workers went on strike after union organizers were fired. He also led a voters' registration drive in Greene County, Ala., that year.

In the beginning of Richard M. Nixon's first term, Abernathy was a strong supporter of the president but eventually had a falling out that generated

a feeling of disillusionment because of the adminstration's disinterested attitude toward school segregation. Abernathy also objected to Nixon's nomination of Clement Haynsworth and G. Harrold Carswell to the U.S. Supreme Court.

In 1971 Abernathy helped organize the People's Coalition for Peace and Justice and led a mule team march on the White House to protest the plight of poor people - black and white.

Although Abernathy became inactive in the later 1970s, he ran unsuccessfully for the Georgia congressional seat vacated by Andrew Young when President Carter appointed him U.S. ambassador to the United Nations.

#90107u1389 04/17/1990 ~United Press International

WASHINGTON (APRIL 17) UPI - Witnesses told a House panel Tuesday that the government should stress treatment for drug addiction, with Philadelphia Mayor Wilson Goode saying it is better to save lives than to rescue bankrupt thrift investors.

In testimony to a House Government Operatins subcommittee, drug treatment experts agreed that treatment works, but they raised questions about the government's financial commitment, what kind of treatments work, and whether female addicts are receiving adequate services.

Goode, who is co-chairman of the U.S. Conference of Mayors' drug task force, criticized the federal government for failing to list the drug crisis above the savings and loan bailout in funding priorities. While about $10.5 billion is being spent on the nation's drug war, about $50 billion has been approved for the thrift crisis.

''Can't we find $50 billion to rescue our young people?'' Goode asked. ''The lives of young people are more important than the investors in these savings and loans.''

Goode said ''too many people are giving lip service '' to the war on drugs. He said more resources must be spent to ''find a way to stop the killing'' and urged the government to funnel money directly to the cities to circumvent the ''bureaucratic'' state level.

Subcommittee Chairman Rep. John Conyers, D-Mich., agreed with Goode that the balance is tipped incorrectly in favor of putting addicts in prison rather than in treatment programs.

''It is this emphasis on law enforcement that is most harshly felt in the African-American and Hispanic comunities. Increasingly, it has become apparent that the focus of the drug strategy must be on reducing demand.

Prevention, education and treatment need far greater emphasis and are clearly cost-effective,'' Conyers said.

Robert Newman, president of Beth Israel Medical Center in New York, told about his facility's ''success story'' with methadone maintenance treatment for heroin addicts, including heroin-cocaine abusers.

But Conyers, acknowledging the accomplishments of methadone, noted there is a ''whole market on the streets for methadone.''

Newman acknowledged that such a black market exists but contended the buyers use the substance for treatment.

Conyers exclaimed, ''People buying it on the streets are not buying it for treatment ... (but) to get high. Dr. Newman, give me a break. I didn't just start out here and neither did you.''

Thomas Kosten, acting director of Yale University's Substance Abuse Treatment Unit, said methadone treatment for heroin addicts is ''clearly better than needles and AIDS,'' and said more work is needed to develop similar therapies for cocaine dependence.

Kosten also said treatment on demand can only be effective if enough money is spent to provide addicts with comprehensive treatment to allow them to re-enter society.

The experts testified more research needs to be conducted on the types of treatment that will produce the best results, especially for crack and cocaine dependency.

Dooley Worth, a New York City medical anthropologist, said an untapped research area concerns women addicts.

''Today, women are one of the fastest growing populations of individuals seeking treatment for drug dependency. The lack of knowledge about their pathways into addictions, the influences on their drug careers, their treatment options and outcomes is no longer acceptable,'' Worth said.

#90107u1400 04/17/1990 ~United Press International

LONDON (APRIL 17) UPI - Stock prices closed slightly lower in light trading Tuesday on the London International stock exchange as investors showed signs of worry over inflation and a weaker British pound.

The blue-chip Financial Times 100-stock index, which gained 6.6 points Thursday, closed off 7.6 points at 2,214.5. The narrower top 30 industrial average lost 4.7 points to 1,736.3.

Volume amounted to around 254 million shares, compared with 325 million shares changing hands on Thursday.

Analysts, noting the low volume, said large institutional investors remained sidelined after the long Easter break and were looking for signs to draw them back into the market.

Markets in London were closed Friday and Monday for the Easter holiday.

Market watchers said weakness in the British pound helped to send prices lower. In London foreign exchange trading, the pound ended the day against the U.S. dollar at $1.6340, compared with $1.6425 last Thursday.

Analysts also noted investors showed signs of concern over the political fortunes of the British government, with polls showing the ruling Conservative Party could be defeated in next month's council elections.

On the corporate front, British & Commonwealth Holdings PLC, a financial service company, was suspended at the opening of trading at 85 cents a share after calling in an administrator to deal with ''major problems'' at computer leasing subsidiary Atlantic Holding PLC.

The company said that banks have promised support and will maintain their credit lines to the parent.

The news, however, unsettled the banking sector, analysts said.

Barclays Bank fell 17 cents to $9.02 and Midland Bank lost 13 cents to $5.20.

Among the some day's other widely traded stocks, insurance company Commercial Union lost 8 cents to $7.58 after issuing a warning on first-quarter results stemming from storm damage claims.

General Accident fell 11 cents to $16.10 in sympathy.

B.A.T Industries fell 11 cents to $11.58 on uncertainties over Hoylake Investments Ltd.'s bid.

Elsewhere in Europe, stock prices on the Frankfurt Stock Exchange ended slightly lower in sluggish trading.

The closely watched German Stock Index, which gained 24.40 points last Thursday, slipped 3.82 points to 1,914.35.

Traders said prices eased amid the absence of major market-affecting news.

#90107u1419 04/17/1990 ~United Press International
DALLAS (APRIL 17) UPI - American Express Publishing Corp., a unit of American Express Co., announced an agreement Tuesday to acquire D magazine a publication about the Dallas-Fort Worth, Texas, area, for an undisclosed price.

The monthly magazine, founded 15 years ago, is published by Southwest Media Corp. and has an audited circulation of 102,000, the announcement said.

The magazine has a "special character and sense of the Dallas-Fort Worth Metroplex, and we are purchasing Southwest Media Corp. with the intent to maintain D magazine's heritage and sense of community," said Thomas O. Ryder, president of American Express Publishing.

Ray L. Hunt, Southwest Media's chairman, said he would have preferred to keep the magazine. "However, in order for D magazine to continue to grow and to meet its full potential, I felt it needed to become part of a larger publishing operation," Hunt said.

He said the magazine had received offers from other parties in the past, but his company did not respond to them. He said American Express first expressed an interest two years ago.

Ryder said his company plans no major staff changes in the magazine. He said Ruth Miller Fitzgibbons, the editor, and her staff "are one of the major attractions in this purchase." American Express Publishing owns six consumer magazines, including New York Woman, Food & Wine, Departures, and Travel & Leisure.

"The purchase of D magazine fits with our overall publishing strategy," Ryder said. "We want to invest in city magazines around the country that have strong ties to the community and its economy."

#90107u1434 04/17/1990 ~United Press International
MOSCOW (APRIL 17) UPI - The Soviet Union said Tuesday it was cutting natural gas supplies to Lithuania because the republic ignored Mikhail Gorbachev's ultimatum to rescind independence legislation or face a partial boycott.

Lithuanian President Vytautas Landsbergis told British radio he had not expected such a ''brutal'' move from Gorbachev, but that it would not weaken the republic's resolve.

''We can survive in poor conditions,'' Landsbergis told Independent Radio News in London. ''We survived in war conditions, in terrible postwar conditions, without any gas, without any oil. ... We will survive.''

A telegram from the Soviet Western Trans Gas company to the Lithuanian gas company said Moscow had ordered the supply of natural gas to the republic ''sharply curtailed'' beginning Tuesday.

The move was the first sign Gorbachev was carrying out his threat Friday to cut off key raw materials to Lithuania if the republic's leaders did not rescind independence laws by Sunday.

The telegram was read in the republic's parliament as the legislators were debating a response to Gorbachev's ultimatum. A Lithuanian government spokesman said the response would likely not be voted on until Wednesday, but stressed the republic would not rescind its independence declaration.

Lithuania's deputy prime minister, Romualdas Ozolas, in an interview before the reduction of gas supplies was announced, said if Moscow ''cut the tap,'' there would be serious problems in less than a month.

''Natural gas (for heating) will disappear in 20 days, and the situation with electricity is the same,'' Ozolas said.

Lithuania has been talking to Scandinavian and other Western countries about helping out if Moscow cut off energy supplies, but Western industry analysts said Tuesday there had been no indication of any plans to help Lithuania replace the Soviet gas.

The republic depends on the Soviet Union for oil, gas, metal, chemical products, cotton and timber.

The official Soviet news agency Tass, in a dispatch that did not mention the curtailment of gas supplies, said Landsbergis told the Parliament Tuesday, ''There is headway toward dialogue despite difficulties.''

Tass went on to say, however, that Landsbergis added that demands to cancel Lithuania's independence laws were ''impractical'' and aimed at postponing talks on secession indefinitely.

Feb. 24 elections in Lithuania were dominated by the Sajudis nationalist movement that promised to work for secession from the Soviet Union, and the new parliament declared independence at its first meeting March 11.

Since the declaration of independence, the parliament has passed dozens of laws asserting the sovereignty of the republic, which was annexed by Moscow in 1940 as part of a secret pact between the Soviet Union and Nazi Germany.

Gorbachev on Friday gave Lithuania two days to return to the status quo of March 10 or face a cutoff of supplies, but Lithuanian legislators ignored the ultimatum over the Easter weekend.

In Washington, President Bush said he was watching to see if shipments were actually cut off to Lithuania and considering ''appropriate responses.'' He did not specify how the United States might respond.

''Clearly these announcements are contrary to the approach that we have urged and that others have urged upon the Soviet Union,'' Bush said. ''I would simple repeat that what we need is dialogue, discussion and a peaceful resolution of this great difficulty there.''

On Monday, Lithuania sought clarification of Gorbachev's threat and demanded a meeting with Soviet officials in Moscow but showed no signs of compromising over the declaration that reasserts the republic's pre-World War II sovereignty.

Lithuanian Prime Minister Kazimiera Prunskiene said after a Council of Ministers meeting Monday night ''there are some questions on which there is a possibility and necessity for agreement,'' but the central question of independence was not open for compromise.

She pointed out that if Gorbachev cut off supplies to Lithuania, he also would be hurting the Russian-speaking minority in the republic. Moscow has repeatedly expressed concern about what would happen to Russians in the republic if it was allowed to secede.

-30- 4512

#90107u1450 04/17/1990 ~United Press International

KATMANDU, NEPAL (APRIL 17) UPI - Prime Minister-designate Krishna Prasad Bhattarai met Tuesday with King Birendra and later indicated an opposition-led Cabinet would be installed Thursday in an interim government authorized by the monarch.

''I will cooperate with the Cabinet,'' the king, who recently promised reforms after two months of bloody pro-democracy demonstrations, was quoted as telling Bhattarai during the 90-minute meeting.

In other developments, the Nepal Students Union, a student wing of the Nepali Congress Party, Tuesday organized a huge rally in Katmandu, the Nepalese capital, to mourn those who died in the democracy movement. Witnesses estimated about 40,000 people participated in the rally.

At least 53 people died in a wave of pro-democracy protests that began Feb. 18, paralyzing the capital and prompting crackdowns by troops and

police trying to control crowds at times as large as 200,000.

Monday, Birendra bowed to opposition demands by authorizing newly legalized opposition parties to form a government, the first in 30 years not set up by the monarch of the Himalayan nation of nearly 19 million people.

The king also dissolved Parliament, officially lifted a ban on political parties and accepted the resignation of Prime Minister Lokendra Bahadur Chand.

Opposition leaders driving toward multi-party democracy met Tuesday to discuss Cabinet nominations.

Bhattarai, a former political prisoner who spent 14 years incarcerated after being dismissed as chairman of Parliament, was expected to send a list of the Cabinet ministers to the king Wednesday.

The prime minister-designate, an official of the newly legalized opposition Nepali Congress Party, indicated the 11-member Cabinet would be installed Thursday.

Bhattarai said the Cabinet would include four representatives from the socialist Nepali Congress party and three from the United Left Front alliance of seven communist parties. The Nepali Congress party also will nominate two independents, while the king will choose two representatives.

''I want to nominate two persons who will tune up with you and they will not impede the functioning of the government,'' the king was quoted as telling Bhattarai. Bhattarai said the king ''appeared to be very happy'' with the outcome.

Respected Nepali Congress leader Ganesh Man Singh, 75, a leader of the seven-week democracy movement who has been negotiating between the king and the opposition, was present at the meeting at the palace.

Bhattarai also said he would write to Indian Prime Minister V.P. Singh about a 13-month-old Indian trade boycott and partial blockade of landlocked Nepal. The measures have blocked oil and other supplies, causing a recession in the mountainous kingdom - one of the world's poorest nations.

''Mistakes have been (made) from both sides. But the impasse must go.'' said Bhattarai.

Bhattarai, who was speaker of the Parliament when it was dissolved in 1960 by the king's father, said after his nomination Monday that elections would be held within a year for Nepal's first balloting under a

multi-party system in three decades.

In 1959, the Nepali Congress Party was elected by an overwhelming majority in Nepal's first general elections. But King Mahendra dismissed the legislature in December 1960 and introduced the partyless panchayat form of government dominated by the royal palace.

Birendra assumed the throne when Mahendra died in 1972. The Himalayan kingdom is home to eight of the world's highest peaks, including 29,028-foot Mount Everest.

Bhattarai Monday promised to introduce a one-person, one-vote system. He also said his government would repeal all draconian security laws, which allow the government to detain people for months without reason, and form a constitution drafting committee immediately.

Bhattarai also said the king, who has wielded absolute power, ''was very receptive and welcomed the idea of (becoming) a constitutional monarch.''

In another development Tuesday, doctors and other medical workers called off a ''relay'' hunger strike at Bhattarai's request. They had protested abuse of medical professionals by the police during the democracy movement.

#90107u1452 04/17/1990 ~United Press International

MINNEAPOLIS (APRIL 17) UPI - Honeywell Inc. said Tuesday it had net income of $90.1 million, or $2.29 a share, in the first quarter ended April 1, up from $62.9 million, or $1.46 a share, in the same period of 1989. Sales for the latest period were $1.53 billion, up from $1.43 billion in the year-ago period.

The earnings included $18.1 million, or 46 cents a share, from the sale of Yamatake-Honeywell shares. Earnings from discontinued operations totaled $6.7 million, or 28 cents a share.

Honeywell also declared a regular quarterly dividend of 68.75 cents per share, payable June 11 to shareholders of record as of May 25.

"Honeywell's first-quarter results reflect continuing strong market conditions in our industrial systems and commercial flight systems, as well as the progress we are making in our profit improvement plan," said James Renier, chairman and chief executive officer of the Minneapolis company. "We are confident about our outlook for the balance of the year."

#90107u1454 04/17/1990 ~United Press International

WASHINGTON (APRIL 17) UPI - The Supreme Court ruled Tuesday that the First Amendment guarantee of freedom of religion does not protect those who use drugs as part of religious ceremonies.

The court's 6-3 ruling came in a case from Oregon involving two drug abuse counselors who sought unemployment benefits after they were fired for using peyote during American Indian religious ceremonies. They claimed the First Amendment protected their use of the drug.

While the court rejected that argument in a ruling by Justice Antonin Scalia, it did add that the Constitution does not bar states from granting such protections if they wish.

Scalia noted that a number of states, including Arizona, Colorado and New Mexico, had made exceptions to their drug laws for sacramental use of peyote. But he added that just because an exception exists does not mean ''that it is constitutionally required.''

''It may fairly be said that leaving accommodation to the political process will place at a relative disadvantage those religious practices that are not widely engaged in; but that unavoidable consequence of democratic government must be preferred to a system in which each conscience is a law unto itself or in which judges weigh the social importance of all laws against the centrality of all religious beliefs,'' he wrote.

Scalia concluded that the state could indeed deny unemployment benefits. However, the two plaintiffs have long since collected the benefits and Oregon officials Tuesday did not know if they would attempt to get the money back.

Scalia was joined in his ruling by Chief Justice William Rehnquist and Justices Byron White, John Paul Stevens, Sandra Day O'Connor and Anthony Kennedy.

In dissent, Justice Harry Blackmun, joined by Justices William Brennan and Justice Marshall, questioned the state's motives in the case. They said that the state has made no effort to criminally prosecute the two men for their use of peyote.

He labeled the state's interest ''symbolic preservation of an unenforced prohibition,'' which, he added, ''cannot suffice to abrogate the constitutional rights of individuals.''

Craig Dorsay, who represented Alfred Smith, an American Indian, and Galen Black, a non-Indian, said the ruling is a threat to all religions, and in fact a number of religious groups, including the American Jewish Congress, supported the two.

''We're obviously disappointed in that part since it is in our mind a threat to all religions,'' he said. ''It means that the state could outlaw mainstream religions or religious freedom.''

Oregon Attorney General Dave Frohnmayer said he was not surprised and that ''from the beginning, this has been a case about unemployment benefits. ... We've all along insisted that the state is not required to pay people to use illegal substances, no matter what their religious beliefs.''

The peyote case originally came before the court in 1987. It involved Smith, a Klamath Indian and a member of the Native American Church, and Black, who participated in ceremonies of the church.

The two, drug counselors employed by the Douglas County Council on Alcohol and Drug Abuse Prevention and Treatment, were fired for eating peyote, a cactus button containing the hallucinogen mescaline, which is illegal in Oregon.

The drug is used by members of the Native American Church as part of a religious ceremony that lasts from sundown Saturday to sunrise Sunday.

As part of their employment with the council, both men agreed to avoid all substance abuse. However, both ingested peyote at religious ceremonies in 1983 and 1984 and were fired from their jobs.

JERUSALEM (APRIL 17) UPI - A Jerusalem District Court Monday overturned an injunction barring the eviction of 150 Jewish settlers who moved into the Christian Quarter of the OlKsalem, youths attacked a 28-year-old Palestinian woman with an ax, critically wounding her, police said. Palestinian sources said the woman, who was struck on the neck, was a suspected collaborator.

More than 300 women held a sit-in at the International Red Cross Office in Gaza City to protest conditions in Israeli prisons.

WASHINGTON (APRIL 17) UPI - Congress, which returns from its Easter holiday Wednesday, is headed for a period of all-out partisan warfare over the budget, campaign finance reform, anti-crime measures and other legislation, with no cease-fire in sight.

Democrats, without support from the Republicans, are ready to go it alone

on the fiscal 1991 budget, working on the assumption that some time later in the year there will have to be an accommodation with the White House.

Similarily, the Democrats, having failed so far to reach any agreement with the Republicans, plan to push their plan for campaign finance reform and see if they can crack previously solid GOP opposition.

There are, however, some bright spots for Congress in the weeks ahead, with the possibility of final action on child-care legislation and strong progress on the clean air bill.

The Senate and House have approved child-care measures and negotiators will have to work out a compromise. The Senate has approved a clean air bill and House action is now scheduled for early May.

Far more pressing, at least in the view of President Bush is final action on a money bill to help Panama and Nicaragua. And this proposal could lead to an all-out fight on the question of foreign aid.

Before the recess, the House approved, as part of a $2.4 billion emergency supplemental appropriations bill, $420 million for Panama and $300 million for Nicaragua. Despite repeated entreaties from Bush, the Senate failed to act.

The Senate Appropriations Committee is scheduled to meet later this week on the emergency money bill and there is serious opposition within the panel and in the Senate to Bush's request.

Senate Democratic leader George Mitchell, in a letter to Secretary of State James Baker, has asked for a long-term plan for helping the Central American nations before making a commitment. Other influential senators consider the request excessive and some want to shift part of the money to countries in Eastern Europe.

After weeks of private meetings, the House and Senate Budget Committees are expected to open public debate this week on the budget resolution, which sets spending limits and savings levels and determines how much revenue needs to be be raised.

The chairmen and key members of both panels have been meeting privately for weeks laying the groundwork for the open sessions.

Budget resolutions, which Bush does not sign or veto, are blueprints Congress uses to meet the Gramm-Rudman balanced budget law's deficit reduction target.

The deficit target for fiscal year 1991, which begins Oct. 1, is $64 billion, down from $100 billion in fiscal 1990.

The House Budget Committee holds its first open session on the budget resolution on Wednesday and Chairman Leon Panetta, D-Calif., is expected to propose as a starting point for debate a plan that cuts Pentagon spending by $11.5 billion next year and raises $13.9 billion in revenues.

The Senate Budget Committee, under Chairman James Sasser, D-Tenn., may start work on its budget resolution later in the week. Sasser, who initially proposed a Pentagon spending cut of $20 billion, recently proposed a $15.2 billion cut in fiscal 1991.

Negotiations between the White House and Congress, which began early last year, may not take place this year until after the House and Senate complete work on their budget resolutions.

Despite weeks of negotiations, Republicans and Democrats have failed to reach an agreement on campaign finance reform, although efforts are expected to continue.

The major sticking point, on which the Republicans refused to budge two years ago, is the Democrats' demand for voluntary spending ceilings with some form of public financing for a candidate running against an opponent who does not abide by the ceiling.

BY UNITED PRESS INTERNATIONAL

(APRIL 17) UPI - Krishna Prasad Bhattarai, the former journalist who was designated prime minister of Nepal's new opposition-led government Tuesday, spent 14 years behind bars and participated in two popular revolts to bring democracy to the Himalayan kingdom.

In 1950, he was a young commander in the revolution that overthrew the ruling Rana family, ending a 104-year-old dynasty. In past weeks he has been a sage advisor in pro-democracy demonstrations that put an end to King Birendra's party-less system of government.

The 65-year-old bachelor, an avid reader who delves into philosophy and poetry, has been jailed numerous times, serving one nine-year stretch in the 1960s under Birendra's father.

But this week the triumphant Bhattarai is expected to form a democratic government in the poverty-stricken Himalayan kingdom of 19 million, which was the inspiration for novelist James Hilton's idyllic paradise, Shangri-La.

Bhattarai, a Hindu Nepalese who was born in Benaras in northern India, became active in student politics at Benaras Hindu University, where he organized Nepal's first student's association.

He joined the Nepal Democratic Congress, a forerunner of the pesent Nepali Congress Party, in 1950, the year the Rana family was ousted and Birendra's royal Shah family returned to the throne.

Bhattarai was commander of revolutinary forces that captured the eastern Nepalese district of Udaipur during the fighting.

In return, the 26-year-old Bhattarai was appointed speaker of the Shah's first advisory assembly, becoming the youngest speaker of any Nepalese legislature.

But as the Shah kings began to consolidate power, the relationship between Bhattarai and the throne soured.

Bhattarai turned to journalism and edited several newspapers and magazines including the Nepal Pukar, the official newspaper of the Nepali Congress Party during the late 1950s.

He became the first president of the Nepal Journalists Association, visiting the Soviet Union and United Kingdom on press trips.

Bhattarai remained active in party politics and in 1959 was elected to Nepal's Parliament during the kingdom's brief foray into democracy.

King Mahendra, father of the present king, dissolved the Parliament in 1960, consolidating power in his Himalayan kingdom and setting himself up as an absolute monarch.

Bhattarai spent the next nine years in prison, followed by shorter stints in prison that brought to 14 the number of years he spent behind bars for his outspoken opposition to the throne.

He was appointed acting president of the Nepali Congress Party in 1977, a position he still holds.

WASHINGTON (APRIL 17) UPI - Some members of the National Society of the Daughters of the American Revolution plan to stay away from a scheduled speech to the group by Iran-Contra scandal figure Oliver North, a spokeswoman said Tuesday.

Jane Hemphill, public relations director, said the group's offices have

received some calls from members upset that North was selected to address the annual ''national defense evening'' Wednesday at the invitation of conservative Phyllis Schlafly.

North, who was convicted last year for his part in the Reagan administration arms-for-hostages scandal, was scheduled to deliver a speech titled ''Trust, Commitment and Family,'' Hemphill said.

''We are aware of Mr. North's being a controversial figure,'' Hemphill said. ''Our organization has withstood the test of controversy.''

Hemphill said that despite the complaints she expected a good turnout for the event at Constitution Hall during the group's annual five-day Continental Congress meeting.

''There are members who will wish to hear him as well as those who wish not to hear him,'' she said.

Reading from a prepared statement, Hemphill also stressed that the 200,000-member organization is ''neither sponsoring, nor endorsing Mr. North'' officially and would not be paying North's speaking fee.

''During Continental Congress, any chairman with the responsbility of a program selects her own entertainment and speakers,'' according to the statement.

Hemphill said North was invited to speak at the event by Schlafly, the anti-Equal Rights Amendment activist from Illinois who is also the organization's national defense chairman.

Schlafly, in town for the convention, said ''individual members'' of the group are paying North ''a modest honorarium'' for the speech. North's usual speaking fee is about $20,000, but Schlafly said, ''we're not paying him anything like that.''

Schlafly also scoffed at dissent over her choice of speaker.

''We're inundated with people who want tickets,'' she said. ''There will be about 3,500 people there and we've heard from maybe five who didn't like it.''

North, a retired Marine lieutenant colonel and ex-staff member of the National Security Council, was convicted May 4, 1989 of aiding and abetting the obstruction of Congress, destroying official documents and accepting the illegal gift of a $13,800 home security system. He was given a three-year suspended prison sentence July 5, fined $150,000 and ordered to serve two years probation and perform 1,200 hours community service work.

EAST BERLIN (APRIL 17) UPI - West Germany's Deutsche Bank AG and East Germany's Deutsche Kreditbank AG, the largest banks in their respective countries, Tuesday signed a letter of intent to join forces in a new institution.

Spokesmen said Deutsche Bank will provide training facilities, know-how, and an organizational scheme for the new entity, which is to be a universal bank on the West German model. That means it will not only take deposits and write loans but also offer insurance and investment services.

Deutsche Kreditbank, which has 150 branches and about 9,500 employees in East Germany, will provide general facilities and sites for the establishment of retail banking branches. The arrangement will in effect give Deutsche Bank an instant branch network in East Germany. The two institutions released no information on the financial terms of the agreement in principle.

The move ended months of speculation over the Frankfurt-based Deutsche Bank's plans for East German representation. With interests in most major West German industries and strong political influence, Deutsche Bank is regarded as West Germany's premier financial institution.

Deutsche Bank was slower off the mark than some of its rivals in moving into the opening East German market. Dresdner Bank, founded before World War II in Dresden, today part of East Germany, was the first West German bank to open offices in the former communist state. But Tuesday's deal positioned Deutsche Bank to play a dominant role in East-zone banking.

Officials of the East German bank said that despite the signature of the letter of intent, they would continue to pursue talks with other West German financial institutions, including Dresdner Bank.

Deutsche Kreditbank has been an independent body only since April 1. Prior to that, it was a subdivision of East Germany's monolithic State Bank, a central bank that provided commercial and retail services as well.

#90107u1537 04/17/1990 ~United Press International
MANAGUA, NICARAGUA (APRIL 17) UPI - A delegation of Contra leaders arrived Tuesday for talks with President-elect Violeta Chamorro and representatives of the outgoing Sandinista government over a time-table for the Contras' disarmament.

The delegation arrived amid repeated demands by President Daniel Ortega that the Contras disarm before April 25, when his Sandinista government transfers power to Chamorro's 14-party coalition National Opposition Union.

The national Sandinista Workers Union joined in the disarmament call Tuesday, and union Secretary-General Lucio Jimenez declared a nationwide strike if the Contras fail to set down their arms by April 25.

But the head of the Contra delegation, Oscar Sobalvarro, known as Commander Ruben, indicated that the Contras would not be able to disarm prior to Chamorro's inauguration.

''The process will take time,'' he said in a telephone interview. ''On April 18, the Contras who are still in Honduras will set down their arms. But the demobilization of all the Contras will take longer.''

It is not known how many Contras remain in Honduras. Most of the estimated 10,000, U.S.-backed Contra troops are thought to be in the mountains of Nicaragua.

Sobalvarro said he would urge Chamorro to gradually disarm the Sandinista army as well as the Contras.

''Dona Violeta is the mother of both (the Contras and the armed forces). She has to find a formula to disarm the two brothers without a problem,'' Sobalvarro said.

He said that in this week's discussions - if the causes of the civil war are shown to have disappeared - then the resistance will put down their arms.

''There is a compromise whereby the Contras will put down their arms,'' he said. ''But we need to advance a process whereby the military will disarm.''

Sobalvarro and his delegation arrived aboard a small U.N.-chartered plane from Tegucigalpa Tuesday morning and met first with Catholic Archbishop Miguel Obando y Bravo, then with Chamorro.

Sobalvarro said there was no set limit on how long the delegation would stay in the capital.

Another member of the delegation, Aristides Sanchez, said he is optimistic about the talks but criticized Ortega for remarks he made Monday in which he promised to renew the civil war if the Contras fail to disarm.

''Nicaragua has had eight years of civil war, and it is our hope and belief that the civil war is now over,'' Sanchez said.

Vice President-elect Virgilio Godoy criticized both Ortega's comments and Jimenez's call for a strike.

''This is part of a destabilization plan by the Sandinista Front to create problems for the new government in its transition to power,'' Godoy said.

''We are very close to peace, but very close to war,'' Ortega said Monday, and he warned that if the Contras fail to disarm by the 25th, it would lead to a resumption of wide-scale confrontation and a genuine civil war.''

Another Contra faction, representing some 2,000 Miskito Indian rebels from Nicaragua's Caribbean coast, began their disarmament Monday when more than 250 rebels turned in their arms in Honduras, leaders of the group said.

Chamorro was elected Feb. 25 in a surprise victory over Ortega, who has promised a peaceful transition to Chamorro's National Opposition Union, or UNO, after more than a decade of Sandinista rule.

#90107u1544 04/17/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (APRIL 17) UPI - President Frederik de Klerk, in the clearest indication of his position in advance of talks on ending South Africa's racial conflict, rejected black majority rule Tuesday and declared power sharing as the only solution ''fair to all.''

In an address to a joint session of Parliament, De Klerk unveiled the philosophical underpinnings of his vision for a new constitution that would prevent the country from falling ''prey to a section of the population at the expense of the rest.''

De Klerk reaffirmed any new constitution will be submitted to a referendum.

He also lashed out at both the right-wing Conservative Party for stirring white hysteria and the African National Congress for its ''continued commitment to armed struggle.''

His address during the annual budget debate came in advance of preliminary negotiations with the ANC on May 2, followed by a European visit that includes meetings with British Prime Minister Margaret Thatcher and President Francois Mitterrand of France.

''While we are honest and genuine in our quest to create equal opportunities for all, we are not prepared to destroy existing rights or allow them to be destroyed,'' the 54-year-old De Klerk said, referring to the country's 5 million whites.

''Those who enjoy full political rights at present are not prepared to bow out apologetically from the stage of history.''

Declaring majority rule ''particularly attractive'' to the 28 million black majority, but ''unacceptable'' to the minority, De Klerk said he believed a power-sharing arrangement could be reached during the negotiations.

''Sterile ideological debate has to be replaced by discussions founded in reality,'' De Klerk said. ''If the quest by anyone is for victory before negotiation, negotiation becomes meaningless.''

The ANC, which has agreed to send a delegation to meet De Klerk on obstacles standing in the way of formal negotiations, has insisted on ''common and equal citizenship'' and protection of the individual through a bill of rights.

Sufficiently vague to leave room for compromise, De Klerk said key elements in a new constitution should include ''a vote of equal value for every adult citizen,'' a bill of rights to protect ''collective'' and individual values, the ''requirement of consensus on controversial matters'' and an independent judiciary.

''Power sharing differs from majority rule,'' De Klerk said. ''It is fair to all because nobody is able to grab all the power and dominate the others, even though everybody has the vote.

''It is possible to achieve such a just and safe system through negotiation because it is sensible and fair to all,'' he added. He dismissed right-wing aspirations for an exclusively white homeland in South Africa as having ''no practical value.''

It was De Klerk's second major speech to parliament in Cape Town since his Feb. 2 unveiling of a sweeping racial reform program that included lifting a 30-year ban on the ANC and other organizations and releasing Nelson Mandela from 27 years imprisonment.

Having previously affirmed his commitment to abolishing racially discriminatory laws, De Klerk made no specific references to the ''pillars of apartheid'' such as the Group Areas Act regulating where people live on the basis of race.

De Klerk said ''good progress'' had been made in the past two months in clearing obstacles standing in the way of formal talks, but said the ANC's ''continued commitment to armed struggle, even if it were merely rhetorial... constitutes a further obstacle.''

''In preliminary talks with the ANC, which have to be distinguished from

constitutional negotiations, the government will strongly state this point of view,'' he said.

''We insist on an unequivocal commitment to peaceful solutions, which include the cessation of violence and of preaching the armed struggle.''

The ANC has refused to formally declare a suspension of its limited guerrilla war until De Klerk creates a ''climate conducive'' to negotiations. Among its demands are the release of all political prisoners the lifting of a nearly 4-year-old state of emergency, the suspension of all political trials and amnesty for exiles.

The government is expected to submit legislation this week that would empower De Klerk to grant amnesty to clear the way for the return of five exiled ANC members named to the 11-member delegation led by Mandela to meet De Klerk.

#90107u1563 04/17/1990 ~United Press International
NEW DELHI, INDIA (APRIL 17) UPI - The United States and the Soviet Union are quietly trying to reduce the threat of war in South Asia, pursuing high-level efforts to cool rising tensions between India and Pakistan fueled by the uprising in Kashmir, diplomatic sources said Tuesday.

The sources indicated that while the superpower initiatives are going on independently of each other, Washington and Moscow are sending the same messages of a need for restraint as part of a larger goal of pursuading the two rivals to start a dialogue.

The contacts by the superpowers with India and Pakistan have taken place in the four concerned capitals at the level of ambassador and above, and have been aimed at pursuading the rivals to halt barrages of bellicose pronouncements before frictions grow more critical, the sources said.

''They are quietly talking to both sides. There will be more of that and maybe at higher levels,'' said one well-informed source.

Said another: ''American and Soviet diplomats have expressed their view that the two sides start a dialogue.''

Prime Minister V.P. Singh has repeatedly rejected any kind of dialogue unless Pakistan halts its alleged arming and training of Moslem separatists engineering the violent popular uprising for independence of India's side of the divided Kashmir region. India controls two-thirds of Kashmir.

India contends that Pakistan is formenting the insurrection in Kashmir as part of a plan to realize its long-standing claim to the predominantly Moslem region.

The two countries went to war for Kashmir in 1948 and 1965 and also battled for the western Himalayan region during a 1971 conflict, which first erupted over Bangladesh.

Pakistan denies it is arming separatists in India, but it has enraged New Delhi by openly advocating the cause of Kashmiri self-determination.

The more unmanageable the uprising has grown and the further New Delhi's options have decreased, the greater the political pressure has risen for Singh and his minority government to take a tougher stance, fueling belligerent warnings to Pakistan and frequent reaffirmations of Indian military prowess.

Pakistan Prime Minister Benazir Bhutto, who is facing turmoil in her native province of Sindh and an opposition determined to topple her shaky minority government, has matched Indian verbal bellicosity, contending that Islamabad was prepared to fight for 1,000 years for the cause of Kashmir.

The diplomatic sources said that neither military, particularly the much smaller forces of Pakistan, are keen for a war.

But, they said there are fears that given the level of tension and hostility, the slightest provocative incident on the border could spark a conflict that would carry severe consequences for both sides.

WASHINGTON (APRIL 17) UPI - New York brokers Donaldson, Lufkin & Jenrette Securities Corp. will return to its customers $5.6 million the company earned with unauthorized transactions with its clients's securities, the SEC said Tuesday.

DLJ and Michael Dreitlein, an executive with the company, did not admit or deny the findings contained in a SEC New York office's order instituting public administrative proceedings against them and imposing sanctions.

The SEC order finds that from January 1982 to April 1988, Donaldson, Lufkin & Jenrette executed for its own benefit unauthorized and undisclosed transactions with its customers' securities, thus violating antifraud provisions of the Exchange Act.

The SEC said that under the order the brokerage consented to a censure and the return to its customers of $5.6 million which it earned through the unauthorized and undisclosed transactions, plus interest.

The $5.6 million, which will be put into an escrow account, represents the $5.9 million in credits the brokerage generated through its unauthorized transactions with clients' securities, less $300,000 of claims wich the brokerage paid to customers in connection with tender offers, mandatory redemptions of convertible securities and offers to exercise expiring rights of warrants that took place between January 1982 and April 1988, the SEC said.

Dreitlein consented to a 45-day suspension from association with any SEC-regulated brokerages and an 18-month prohibition from having supervisory responsibilities over any broker-dealer's reorganization department.

#90107u1575 04/17/1990 ~United Press International

REDDING, CA (APRIL 17) UPI - A bomb exploded harmlessly Tuesday at the same Greyhound depot where a striking driver was crushed by a bus last month, the only fatality in the six-week-old Greyhound walkout.

The 1:22 a.m. PDT explosion occurred against the south wall of the depot's brick and cement maintenance building, about 50 feet from the passenger terminal, police officer Bill Horton said. The blast caused no injuries, no serious damage and no interruption of bus service, he said.

Police found a second, undetonated explosive device at the site, but it was safely disarmed by specialists of the Shasta County Sheriff's Department. "Officers were out there investigating a minor disturbance between strikers and bus people when the explosion went off," Horton said. "There were no threats, and nobody is in custody. An investigation is continuing."

Police refused to describe the bomb, citing security reasons, but a witness said the devices were plastic pop bottles filled with some type of explosive. "It sounded like a mortar, said Jerry Lovett, a striking driver who was picketing outside the depot when the bomb exploded. "(There was) a lot of smoke, but there was no damage. We went over there and looked at it and there was absolutely no damage, just a lot of plastic all over the parking lot."

Horton said private security guards have been posted at the 24-hour terminal since the strike began on March 2 and police have been on hand as needed to prevent violence.

Veteran driver Robert Waterhouse, 59, was crushed against a terminal wall and killed on the second day of the strike. He was among pickets who were attempting to prevent buses driven by non-union drivers from leaving and coming in to the area.

Following an investigation of the incident, Shasta County District Attorney Stephen Carlton announced April 5 that no criminal charges would be filed against substitute driver Theodore Graham Jr., 42, of Portland, Ore.

Meanwhile, a civil lawsuit against Graham and Dallas-based Greyhound Lines has been transferred from Shasta County to U.S. District Court in Sacramento. The suit seeks $50 million on behalf of Waterhouse's family, and $100.5 million for Paul Anderson, another striking driver injured when his pickup truck collided with a bus driven by Graham.

Anderson seeks $50 million in damages in connection with the accident and $50.5 million in damages from an allegedly slanderous statement about it by Greyhound Chairman Fred Currey.

Negotiations in the labor dispute have been suspended with Greyhound managment officials saying they will not return to the bargaining table until there is at least one week without any violence.

Shots were fired at a Greyhound bus in Alabama, and maintenance workers found a bullet lodged in the radiator of a bus in Missouri in violence Monday. No injuries were reported in either incident.

Greyhound spokeswoman Ann Wheat said there have been 30 shootings nationwide involving Greyhound since 6,300 union drivers and 3,000 other

union employees walked off their jobs in a contract dispute.

#90107u1596 04/17/1990 ~United Press International

NEW YORK (APRIL 17) UPI - NBC was the top network for the 1989-90 television season, it was a split decision between ''The Cosby Show'' and ''Roseanne'' for No. 1 series, and there was a mysterious dropoff in general television viewing, according to end-of-season figures released Tuesday.

The 30-week prime time season ended Sunday, Apr. 15 with NBC way out in front, posting its fifth consecutive win with a 14.6 rating and a 24 share according to the A.C. Nielsen Co. ABC was second with a 12.9 rating and a 21 share and CBS was third, with a 12.2 and a 20 share.

In evening news, ABC's ''World News Tonight'' with Peter Jennings was the new champ, with a 10.9 rating, with ''CBS Evening News'' with Dan Rather demoted to second with a 10.0 rating. ''NBC Nightly News'' with Tom Brokaw was third with a 9.9 rating.

The question of which show was on top of the list was a matter of whether or not you counted a ''Roseanne'' episode broadcast outside of its regular time period. NBC and ABC called the win for ABC's ''Roseanne,'' while CBS gave it to NBC's ''The Cosby Show.''

''It's no surprise,'' said Bob Niles, NBC vice president, research, in announcing the season-end statistics at a news conference.

The three-network share of homes using television - HUT levels - was down from the 1988-89 figure of 67 percent. NBC gave this season's three-network HUTs as 65 percent, while David Poltrack, CBS senior vice president, planning and research, gave the figure as 66 percent.

Poltrack, at his news conference, went on to reveal a decrease, particularly in daytime, of overall homes using television.

He called the decline ''unprecedented and unexplained'' and said CBS was pressing Nielsen for more data in an effort to find to what extent the dropoff is real and to what extent a matter of statistical sampling. The day parts hardest hit by the decline were daytime and evening news, and it occurred almost entirely in the second half of the season.

The top new program for the season that aired six or more times was ABC's ''America's Funniest Home Videos,'' which had a 20.9 rating and a 32 share.

''Twin Peaks'' on ABC won as most-watched made-for-television movie. Top miniseries of two or more parts was ABC's ''Small Sacrifices.'' The

most-watched theatrical movie was ''Lethal Weapon'' on NBC. The Academy Awards on ABC won as top entertainment special.

Poltrack said the most popular form for network prime time programming continued to be sitcoms, which took up 23 percent of the schedules, although sitcom ratings were off 1.2 rating points compared to the previous year. The only form to gain over the previous season was actuality program, which improved 1.9 rating points thanks to ''Videos'' and NBC's ''Unsolved Mysteries.''

Outside of prime time, CBS was the daytime winner, with ''The Young And The Restless'' topping the chart. In morning programming, ABC's ''Good Morning America'' was top-rated, with NBC's ''Today'' show falling off after Deborah Norville replaced Jane Pauley. CBS was third.

In late night, NBC's ''Tonight'' remained on top, and on Saturday morning, ABC was the big winner with the top four kidvid shows. The No. 1 show was ''Slimer & Real Ghostbusters II.''

For the final week of the season, ABC tied NBC, both receiving an 11.9 rating and a 20 share. CBS had an 11.0 rating and a 19 share.

''Twin Peaks,'' in its premiere show in its time period opposite ''Cheers'' and ''Grand'' on NBC, came in 13th. ''Cheers'' held onto its audience despite the competition, but ''Twin Peaks'' won the second half hour against Grand.''

In the evening news ratings, ABC's ''World News Tonight'' with Peter Jennings continued in first place with a 9.8 rating and a 20 share. ''CBS Evening News'' with Dan Rather seesawed back into second place with an 8.6 rating and an 18 share, while ''NBC Nightly News'' with Tom Brokaw dropped to third with an 8.3 rating and an 18 share.

Each ratings point represents about 921,000 households and a share is the percentage of TV sets tuned to a particular show.

The top 10 regular series for the 1989-90 season, according to the A.C. Nielsen Co., were:

1. (virtual tie) Roseanne (ABC)

The Cosby Show (NBC)

3. Cheers (NBC)

4. A Different World (NBC)

5. America's Funniest Home Videos (ABC)

6. Golden Girls (NBC)

7. 60 Minutes (CBS)

8. Wonder Years (ABC)

9. Empty Nest (NBC)

10. NFL Monday night football (ABC)

The top 10 programs for the week ending Sunday, Apr. 15, were:

1. Roseanne (ABC)

2. Cheers (NBC)

3. America's Funniest Home Videos (ABC)

4. The Cosby Show (NBC)

5. Coach (ABC)

6. A Different World (NBC)

7. Cheers special (NBC)

8. Golden Girls (NBC)

9. Empty Nest (NBC)

10. Unsolved Mysteries (NBC)

#90107u1599 04/17/1990 ~United Press International

WASHINGTON (APRIL 17) UPI - Amid criticism from some European officials, President Bush convened the White House climate change conference Tuesday by calling for more research to resolve the ''raging debate'' over global warming and find the best ways to cut ''greenhouse'' emissions.

In welcoming remarks to officials from 17 countries, Bush sounded familiar themes in emphasizing ''the many uncertainties'' about global warming and warning against hasty pollution control measures that might needlessly damage economic growth, especially in developing nations.

To illustrate the confusion over the issue, Bush cited a recent television talk show where two scientists disagreed over whether studies had

confirmed a warming trend was occurring because of the buildup of carbon dioxide and other heat-trapping industrial pollutants in the atmosphere.

''Two scientists, two diametrically opposed points of view,'' Bush said. ''Where does that leave us? What we need are facts.

''I know there is a debate raging out there,'' he said. ''This conference provides an opportunity to sort out the science on this complex issue and to work from what we know on the many uncertainties that remain.''

Bush said reductions in carbon dioxide emissions had to be achieved in a way that would not retard global economic growth essential to pay for costly environmental cleanup.

''In a climate of poverty and continued economic struggle, protecting the environment becomes a far more difficult challenge,'' he said. ''There is no better ally in the service of our environment than strong economies.''

The president's speech drew criticism from some European delegates who said Bush's cautious approach was holding up international action on global warming.

They said industrialized nations - particularly the United States, which is the world's largest emitter of carbon dioxide - had to show leadership on emission reduction if there was to be a concerted world effort to address the problem.

''If we do not act, you cannot expect the developing nations to act on their account,'' said Laurens Jens Brinkhorst, director general of the environment for the European Community.

Klaus Topfer, the West German environment minister, issued a tough statement saying Bush was stating the obvious in calling for more research and that global warming might be worsening while the world waited.

''It goes without saying that additional, more intensive research is urgently needed,'' he said. ''Gaps in knowledge must not be used as an excuse for worldwide inaction.''

Topfer said he soon would submit a proposal to his government calling for West Germany to reduce its carbon dioxide emissions by 25 percent by the year 2005, largely through greater energy efficiency.

Other European officials, while generally praising Bush's emphasis on economics, expressed irritation that the conference agenda was dominated by U.S. officials and U.S. viewpoints. They noted that only one foreign delegate, a Polish official, was scheduled to speak at the conference's open sessions.

''It's a pity that the agenda does not permit ministers to express the differing views of their governments,'' said Hubert Curien, France's minister for science and technology.

Bush received a warmer response from delegates from developing nations, who agreed with the president's insistence on balancing environmental protection with economic development.

Marcilio Marques Moreira, Brazil's ambassador to the United States, said, ''We do agree with the so-called 'no regrets' policy. We should not take any measures that would aggravate the problems of developing nations.

''Poverty is still a major stumbling block,'' he said. ''It is not only a problem of a better life, it is a matter of life.''

In a speech to the conference, Jan Janowski, deputy prime minister of Poland, stressed the same point, saying that because of his country's anemic economy, ''we are not able to take up obligations to reduce emissions of carbon dioxide.'' He called on the United States to provide financial and technological assistance for emission reduction.

Topfer said industrialized nations should consider taxing themselves, perhaps through a fee on carbon dioxide emissions, to create an international fund to help developing nations.

#90107u1607 04/17/1990 ~United Press International

CHICAGO (APRIL 17) UPI - Aggressive buying and light country movement supported the grain market Tuesday.

Closing prices were higher on the Chicago Board of Trade with the

exception of wheat.

Early profit-taking in corn and soybeans gave way to commercial and professional buying. December corn made a contract high of $2.68 1/4 and closed with a gain of 2 1/2 cents on the day. Country movement was light as farmers remain bullish on the market and anticipate higher prices. Additional support came on news that Romania will be in the market Wednesday for corn.

Soybeans followed corn and soybean oil to higher levels. Active demand for oil resulted in a number of contract highs amid indications of tight supplies for the balance of the marketing year.

Wheat futures gave up their early gains and were mostly lower. Nearby May was down 5 3/4 cents in light trading while new-crop wheat was pressured by favorable growing conditions in much of the Wheat Belt.

At the close, corn was up 1 3/4 to 3, soybeans up 4 1/2 to 6, wheat off 1/4 to 5 3/4 and oats up 4 to 5 1/4.

-30- 1253

#90107u1627 04/17/1990 ~United Press International

(APRIL 17) UPI - Game designer Chris Crawford has given computer simulation fanciers an Earth Day present - an opportunity to save the world from itself.

Balance of the Planet, officially released Sunday to mark Earth Day 1990, is a real brain-teaser and a valuable educational experience.

A few hours struggling with the environmental problems of the world in Balance of the Planet is worth a graduate course in environmental studies. Yet the intricate cause-and-effect relationships between policies, activities and the environment are so clearly and simply explained that the game would be appropriate for junior high school students.

''I wanted to make people think about their world, and I believe this game does it,'' said Crawford. ''Nature is a delicate balance and the objective of the game is to restore balance, to balance economic and environmental needs, to take a holistic approach to the planet.''

To say Balance of the Planet is complicated would be an understatement.

Creating the game was a monumental undertaking for Crawford and the finished product is a realistic simulation of the environmental problems facing the world. Wrestling with those problems in Balance of the Planet is no less frustrating than it would be in the real world.

There are no simple solutions or quick fixes. Decisions often involve tradeoffs: a move that could ease starvation could increase the incidence of skin cancer. Almost anything you do to curb pollution will have economic repercussions.

Balance of the Planet makes you United Nations High Commissioner for the Environment, with far-reaching powers to tax activities that affect the environment and subsidize programs beneficial to the environment.

You control 10 taxes.

The beef tax can be a tool for dealing with world hunger. Taxing beef could help curb starvation because cattle make inefficient use of grain that could better be used to feed starving people. It takes 10 calories of grain to make a single calorie of beef.

Cattle also cause environmental disruption, including deforestation, and create methane, which contributes to global warming, the so-called greenhouse effect.

Then there is the so-called CFC Tax levied on chlorofluorocarbon, which contributes to global warming and eats away at the Earth's protective ozone layer, allowing penetration of ultraviolet rays that cause skin cancer and other problems.

You also control taxes on coal, fertilizer, heavy metals, logging, natural gas, nuclear energy, oil and pesticides.

Revenue from the taxes are funneled into a dozen subsidies. Subsidies include the Debt for Nature, a program under which developed nations cancel Third World debt in return for protection of tropical forests in Third World nations.

There also is a program to provide wood stoves to people in undeveloped areas. The stoves make more efficient use of fuel wood, promoting conservation and easing deforestation.

Other possible subsidies include basic research, bioresearch, coal research, dam use, family planning, nuclear research, oil research, recycling, solar energy and solar energy research.

At each turn, you decide which taxes to raise or lower and which programs to subsidize. Then you choose the execute policies option and find out how you did.

You receive points for biodiversity, the quality of life, the health of forests and lakes, the abundance of marine life and sustainability - the ability to sustain the socio-economic system you create with renewable

resources rather than such finite natural resources such as fossil fuels and groundwater.

You lose points for pollution - radiation, radioactive waste, pesticides and heavy metals - and for deaths from falls (people working on their solar panels), floods, lung disease, skin cancer and starvation.

Each scoring category is backed up by a series of screens explaining the environmental issues that affect the score. In all, there are some 150 explanatory screens.

Balance of the Planet is winnable, though it is likely to take quite a few tries before you have a successful outing. And your score is likely to go down on the first turn - the effects of lingering problems. Don't despair. Keep an even hand and things will improve.

A game lasts nine turns, ending in the year 2035 with a summary of your achievements and failures. No matter what the score, players will learn a good deal along the way and develop a better understanding of the world.

My only criticism of the game is a minor one: adjusting tax rates and subsidies is time-consuming because each tax and subsidy has its own screen. But the game is well worth the time.

Though designed specifically for Macintosh computers, Balance of the Planet is available for IBM compatible systems.

Software: Balance of the Planet, distributed by Accolade, 550 S. Winchester Blvd., San Jose, Calif., 95128: System requirements: Macintosh or IBM-compatible system with hard disk. IBM requires CGA graphics capability). Retail price: $49.95; Write protection: no; Reviewers evaluation (on scale of 1to 5) 4 - highly recommended.

CLEVELAND (APRIL 17) UPI - Cleveland Browns owner Art Modell underwent successful double bypass heart surgery Tuesday at the Cleveland Clinic.

Modell, 64, was operated on by Dr. Floyd Loop, chairman of the clinic's board of governors.

''Mr. Modell is out of surgery and doing well,'' Loop said.

Modell, who has owned the Browns since 1961, underwent quadruple bypass heart surgery following a heart attack June 12, 1983.

New York Giants owner Wellington Mara, Modell's long-time friend, flew to Cleveland Monday night to be with the family. He was to fly back to New York Tuesday afternoon.

DALLAS (APRIL 17) UPI - A.H. Belo Corp., which owns The Dallas Morning News and several television stations, Tuesday reported first quarter earnings of $2.8 million, or 14 cents a share, up from $2.4 million, or 12 cents a share, in the same period of last year.

Revenues for the quarter rose 7.6 percent to $97.9 million from $91.1 million last year. The company's outstanding shares for the quarter were 19.4 million, down about 500,000 from the prior due to the repurchase of stock by the company.

Belo's publishing revenues, principally from the Morning News, were $56.3 million, up 5.1 percent from the $53.6 million last year. The improvement was credited to increases in classified advertising, particularly in the automotive and employment categories.

Broadcast revenues improved 11.1 percent to $41.6 million from $37.4 million in the first quarter of last year. Belo's television stations in Dallas and Houston provided all of the gains derived from political advertising for the gubernatorial primary elections.

Despite the improved performance, company Chairman Robert Decherd said the revenue gains were counter to national trends and "it is impossible to determine whether these national trends will eventually affect our primary markets in the Southwest."

#90107u1679 04/17/1990 ~United Press International
WASHINGTON (APRIL 17) UPI - The administration told Congress Tuesday that the United States will not rejoin the United Nations Educational, Scientific and Cultural Organization on grounds the agency is inefficient and biased.

The United States, Britain and Singapore withdrew from UNESCO in 1984, citing its bureaucracy, its lack of a focussed agenda and its attempt to influence the world's journalists by creating a ''New World Information and Communication Order.''

In the decision to remain out of UNESCO, the State Department cited evidence that the agency ''has never been more poorly managed than at present.''

Assistant Secretary of State for International Organizations John Bolton, said that 70 percent of the UNESCO budget is spent on ''the top-heavy staff in Paris'' and only 7 percent of the UNESCO funding goes toward

eliminating illiteracy, one of the main purposes of the organization's existence.

Although other U.N. specialized agencies are also swayed by politics and international disputes, Bolton said, UNESCO ''is the worst.''

UNESCO Director-General Federico Mayor said in a statement released from UNESCO headquarters in Paris that the report ''failed to take full account of the changes in the program,'' including structural and management reforms announced in February.

Mayor said he believed the U.S. action ''may make more difficult the implementation of UNESCO's reform process.''

A reorganization plan that was supposed to trim UNESCO's bureaucracy has added 33 staff positions at an annual cost of $6 million, the State Department said.

If there has been any reform, it has resulted partly from pressure the United States has been able to bring in from the outside, the department said in a report.

''The leverage we retain as a sought after non-member in some instances is greater than we would wield simply by being one vote among 161 others,'' the report read.

Since U.S. dues to UNESCO would run about $50 million annually, the report said, President Bush would have to assure the American taxpayers that the money would be well spent.

''Regrettably, UNESCO at this stage does not possess the characteristics of a well managed and focused organization that would enable the president to give such assurances,'' the report read.

UNESCO, with a permanent staff of about 4,000 people, was meant to stimulate progress in education, science, culture and communication.

According to the United Nations, ''It encourages international cooperation in these fields by bringing experts together, by serving as a clearinghouse for pertinent materials and by providing assistance to member states.''

In practice, according to past U.S. investigations, that has meant printing and distributing vast quantities of unread works such as the collected speeches of North Korea's Kim Il-sung or poems by African politicians.

Although UNESCO has said that it is improving, the State Department report

said there is no evidence that reform has taken place.

''A renewal of U.S. membership at this time would require that we accept promises of change in lieu of real reform,'' it said.

In addition to other complaints, the U.S. report said that UNESCO has permitted the Palestine Liberation Organization, which has observer status to exercise undue influence and that UNESCO has expended much time in passing anti-Israeli resolutions.

ence that reform has taken place.

''A renewal of U.S. membership at this time would require that we accept promises of change in lieu of real reform,'' it said.

HARARE, ZIMBABWE (APRIL 17) UPI - In a move certain to anger President Robert Mugabe, Zimbabwe's church-run human rights organization published a half-page advertisement in the pro-government press Tuesday urging the government to abandon its one-party state plans.

The Roman Catholic Commission for Justice and Peace, the country's main human rights watchdog, published the advertisement on the eve of Zimbabwe's 10th anniversary celebrations and amid the arrival of a number of heads of state operating a one-party system.

The anniversary marks the end to the British-designed independence constitution for former white-ruled Rhodesia, and Zimbabwean experts are devising changes to the British blueprint.

The advertisement follows Mugabe's assertion that his party's landslide victory in national elections last month was a firm mandate to turn Zimbabwe into a one-party state whenever the government wanted and not necessarily subject to a referendum.

''We believe that a one-party system of government ends up benefiting chiefly the people already entrenched in powerful positions,'' it said, urging the ruling ZANU-PF to scrap the plans and continue a system that allows ''real freedom of choice.''

''We believe that the freedom to vote for a political party of one's own choice and the freedoms of association, assembly and speech are fundamental rights,'' it said.

The commission also called for the abolition of ''all repressive legislation,'' including the laws that allow the continued state of emergency.

For reasons that were not explained, Mugabe and ZUNU-PF did not make the one-party state plan an issue during last month's election although the proposal has been a cornerstone of ruling party policy.

Sources close to the government say the one-party state issue was purposefully played down as a result of events in Eastern Europe and because the mere suggestion of it being introduced would severely inhibit the flow of desperately needed foreign investment.

#90107u1727 04/17/1990 ~United Press International

(APRIL 17) UPI - Citicorp said Tuesday that its first-quarter earnings plunged 56 percent to $231 million, or 60 cents a share, against $529 million, or $1.52 a share, in the year-ago quarter, because of rising consumer and real estate loan losses and a downturn in the world commercial banking market.

Despite the decline, Citicorp's board of directors hiked the quarterly common stock dividend to 44.5 cents from 40.5 cents, speaking of "the outlook for ... continuing long-term revenue and earnings momentum."

The largest U.S. bank reported "continued record results" in its consumer business, largely built around credit cards, which spun off $270 million in profits, up 26 percent from $214 million in the year-ago quarter.

Quarterly net interest income was $1.79 billion, down from $1.82 billion in the year-ago period - in part because no interest was paid on Brazilian loans compared with the $66 million received in the year-ago quarter.

Non-interest income was $1.68 billion, against $1.66 billion in the year-ago quarter. Fees and commissions rose 14 percent from the year-ago quarter to $1.19 billion, "primarily due to continued momentum in the credit card business" and global consumer business, Citicorp said.

Expenses rose to $2.5 billion, compared to $2.245 billion in the same period in 1988. Citicorp said this was in large part due to investments in its credit card and branch businesses around the world.

It continued to carry heavy costs of establishing the "information business" which the bank's chairman, John Reed, sees as central to Citicorp's future as a global, technology-driven consumer bank. The bank had a $42 million loss on information services, up from $36 million in the year-ago quarter.

Citicorp had net loan writeoffs of $679 million in the quarter. This included $338 million in consumer charge-offs and $135 million in commercial write-offs - an increase of $99 million over the year-ago quarter. Commercial charge-offs mostly stemmed from real estate and leveraged deal losses.

The bank added $570 million to loan-loss reserves, up $212 million from the year-ago quarter, mainly to cover the increased writeoffs. That included a $58 million provision to bolster commercial loan loss reserves "in light of the uncertain environment, particularly in real estate."

Revenues from Citicorp's global finance area were off sharply, with profits of just $40 million compared to $173 million in the year-previous quarter for the developed economies of North America, Japan and Europe. Finance operations in developing countries yielded earnings of $115 million, compared to $113 million in the year-ago quarter, Citicorp said.

SANTA MARGHERITA LIGURE, ITALY (APRIL 17) UPI - Police raided a Riviera resort villa Tuesday and freed an 8-year-old girl who had been kidnapped outside of her Verona home in January, Italy's interior minister said.

The kidnapping of Patrizia Tacchella, whose captors had reportedly demanded $16 million from her rich father, had created a furor in Italy, where six other kidnap victims are in the hands of gangs.

''Patrizia Tacchella was freed by a coordinated action of Carabinieri (regional) and state police in a villa at Santa Margherita Ligure,'' Interior Minister Antonia Gava said in a statement. ''No ransom was paid and three people have been arrested.''

He said the little girl was ''in good condition.''

Patrizia, daughter of prosperous sportswear manufacturer Imerio Tacchella, vanished Jan. 29 while she was walking through a fog to a supermarket near her home to buy chocolate.

Reports said later that kidnappers had demanded a $16 million ransom from her father, who is known as the ''king of jeans''.

In several poignant television appeals, Tacchella, 48, urged his bespectacled daughter to ''keep calm.''

The Tacchella case especially outraged Italians because of Patrizia's young age, but the kidnap-for-ransom gangs have become an increasing threat to wealthy families. One of the victims kidnapped by the gangs, 20-year-old Carlo Celadon, has been held in captivity since January, 1988.

While the other kidnap victims are believed held in the southern region of Calabria, investigators had believed for some time that Patrizia was being held somewhere near Genoa, on the Italian Riviera.

Scores of police searched the area in February and again last week.

Police said they raided the villa around 6:30 p.m., freed Patrizia and arrested three people guarding her. Their identities were not immediately disclosed.

After a medical examination by a police doctor, the little girl was driven in a police car to her home outside of Verona where she was reunited with her parents.

TORONTO (APRIL 17) UPI - A Canadian court has ordered Robert Campeau, chairman of embattled Campeau Corp., to repay $22.7 million to the Bank of Montreal after failing to file a defense for defaulting on interest payments due last fall.

The Supreme Court of Ontario ruling followed the filing of a statement of claim by the Bank of Montreal on Jan. 19. The court's decision gives the bank the right to seize the 425,000 common shares of Campeau Corp. and $14.5 million principal amount of 7.5 percent debentures that were pledged as collateral.

A spokesman for the bank declined to comment Tuesday on what action it would take, saying it was a legal matter between the bank and a customer.

The spokesman said a statement of default was issued by the court April 10.

Campeau originally borrowed $21.2 million in mid-1987 to buy the securities. The amount sought includes overdue interest totalling $1.45 million. Campeau also has come under pressure from at least two other Canadian banks.

In early January, the National Bank of Canada seized control of 29 percent of Campeau Corp.'s outstanding common shares after Campeau defaulted on a separate loan.

On Feb. 8, the Bank of Nova Scotia filed suit in the Ontario Supreme Court against Campeau for defaulting on about $10.4 million in personal loans and interest payments.

Campeau's U.S. subsidiary, Federated Stores Inc. filed for Chapter 11 bankruptcy protection on March 30, about 2 1/2 months after Federated Department Stores Inc. and Allied Stores Corp. filed for similar protection.

The U.S. holdings were burdened with billions of dollars in debt after Campeau took over the retailers in two separate back-to-back hostile takeovers.

TAIPEI, TAIWAN (APRIL 17) UPI - The government plans this summer to lift a 40-year ban and allow journalists from mainland China to report from the island province - as long as they renounce any communist affiliations - it was reported Tuesday.

Taiwan's Government Information Office has approved a proposal by the ruling Nationalist Party to lift an official ban on journalists from the communist mainland, the China Times Express newspaper said.

The lifting of the ban will not come before the end the Taiwan's National Affairs Conference, a major meeting to address national reform and Taiwan's policies toward China scheduled for late June.

The report said journalists visiting from China will be required to renounce their membership in communist organizations, which Taiwan's government has considered seditious since the Nationalists were routed by Chinese Communist forces in the civil war that ended in 1949.

The communists on the mainland and the Nationalists on Taiwan both assert that they are the legitimate rulers of all China.

Some reporters from China have visited and even worked in Taiwan in recent years, but their travels were informal and not officially sanctioned by the government.

Taiwan last year began permitting reporters from Taiwan to travel to China to cover news events as one step in a gradual expansion of unofficial contacts across the Taiwan strait.

In a related development Tuesday, a cabinet-level task force on affairs in China recommended passage of regulations that would enable mainland Chinese to apply freely to visit Taiwan, regardless of their political background.

''The new regulations would allow our Chinese compatriots who have participated in seditious activities or organizations to visit Taiwan without being punished,'' said task force member Ma Ying-jeou.

#90107u1770 04/17/1990 ~United Press International

WASHINGTON (APRIL 17) UPI - Attorneys for Charles Keating, former chairman of the failed Lincoln Savings and Loan Association, produced a government memo Tuesday showing federal examiners miscalculated the thrift's net worth by $60 million.

"Obviously, I find this error, if verified, most distressing - not because it changes my view of Lincoln and what has and will have to be done, but because of how Lincoln will use it," wrote Alvin Smuzynski, a senior regulatory official with the Office of Regulatory Affairs, a division of the Federal Home Loan Bank Board.

The memo, dated Feb. 17, 1989, less than two months before the government seized the Irvine, Calif., thrift, was addressed to the regulators in charge of overseeing the examination of Lincoln.

Attorneys for Lincoln said the memo is significant because regulators ordered Lincoln to operate under government-issued supervisory directives after finding the thrift to be undercapitalized. The directives limited the types of transactions the thrift could make.

"It now appears that the examiners did make a significant ($60 million) error in their calculation," the memo said. Lincoln claimed a net worth of $250 million at the end of 1988, but government extimates placed the thrift's net worth at about $140 million, the memo said.

In a letter to senior thrift regulators, Peter Fishbein, a Lincoln attorney, said the thrift was not undercapitalized and should not be subjected to the government's supervisory directives for savings institutions in danger of failing.

In an interview, Kevin O'Connell, who supervised the government's examination of Lincoln, discounted the memo and said the mathematical error was never verified. "There was no mistake by examiners," he said. "The gentleman either can't add or he's a liar," responded Keating outside the courtroom.

Keating is testifying during a pre-trial hearing on a government motion seeking to dismiss a suit he filed last May seeking to regain Lincoln from the regulators who now run it.

Regulators have estimated that protecting Lincoln's depositors from losses could cost taxpayers as much as $2.5 billion, a figure Keating disputes. The government also has filed a $1 billion fraud and racketeering suit against the Arizona executive.

In other developments, Keating's attorneys produced a 1985 letter from Alan Greenspan, then a private economist and now chairman of the Federal Reserve Board, urging regulators to grant Lincoln an exemption from stricter direct investment rules.

Greenspan wrote that denial of an exemption "would work a serious and unfair hardship on an association that has, through its skill and expertise, transformed itself into a financially strong institution that presents no foreseeable risk to the Federal Savings and Loan Insurance Corp."

Keating's attorneys attribute the demise of Lincoln to a "vendetta" by regulators incensed over Keating's opposition to the direct investment rule.

#90107u1809 04/17/1990 ~United Press International

DETROIT (APRIL 17) UPI - Sales of domestically made vehicles during early April fell 11.3 percent from relatively strong year-ago levels, automakers said Tuesday, but modest gains in buyer incentives helped move the market from its lackluster performance in March.

Sales of domestically built cars alone during the latest April 1-10 period fell 13.3 percent from a year ago when measured by sales per day. Light truck sales declined 7.7 percent.

The annual sales rate for domestically built cars - the most common measure of industry performance - was 6.8 million cars during the period, compared with 7.7 million last year, when another round of buyer offers jumpstarted the market.

"This is the highest selling rate since early February," said industry analyst Ronald Glantz, of Dean Witter Reynolds' San Francisco office. "Buyers are responding to a modest improvement in buyer incentives."

But Glantz, who expects retail car sales to remain at the current pace through April, also cautioned that fleet orders may also be responsible for any increases.

"In this market, a fleet order of 5,000 cars or so can mean the difference between a higher or lower market in a single ten-day selling period," he said.

The eight companies, General Motors Corp., Ford Motor Co., Chrysler Corp., American Honda Motor Co., Nissan Motor Manufacturing U.S.A., Toyota Motor Sales U.S.A., Mazda Motor Manufacturing (USA) Corp. and Mitsubishi Motor Sales of America, Inc. reported combined sales of 163,507 cars and 98,864 trucks in the United States during the period. This compares with 188,608 cars and 107,127 trucks sold in the year-ago period.

The daily selling rate of 32,796 vehicles compares with 36,967 vehicles per day for the same period last year. There were eight selling days this year, the same as in the year-ago period.

So far in 1990, the firms have sold nearly 1.87 million cars, down 2.5 percent from the 1.89 million units sold in the comparable 1989 period when measured by sales per day. Year-to-date light truck sales were 1.1 million units, 0.5 percent below year ago levels.

Sales of GM's domestically made cars during early April slipped 13.6 percent, while its light truck sales rose 2.2 percent. Second-ranked Ford posted a 20.7 percent slump in car sales and a 9.3 percent decline in truck sales.

Chrysler's car sales fell 29.2 percent, with analysts saying it is suffering from the lack of a subcompact car since ending output of its Omni and Horizon models in February. Chrysler's light truck sales including minivans and Jeeps fell 24.9 percent when compared with the combined total a year ago.

Among the smaller companies reporting sales of U.S.-built cars, Honda posted a 17 percent gain. Toyota's sales soared 98.8 percent from relatively low volumes a year ago.

Nissan reported a 5.9 percent decline in sales of its U.S.-built cars, while its domestically made compact truck sales rose 14.2 percent from low year ago levels.

Mazda sold 3,139 of its new MX6 coupes and 626 sedans produced at its Flat Rock, Mich. assembly plant, as against 977 cars a year ago. Mitsubishi reported sales of 1,485 Eclipse cars built at its joint venture plant with Chrysler in Illinois, as against 511 a year ago.

ASHEVILLE, NC (APRIL 17) UPI - A blind man with a strong faith said God called him to walk the rugged and sometimes treacherous 2,126-mile Appalachian Trail alone to bear witness to people he meets along the way from Georgia to Maine.

''I don't know why God wants me to do this, I just accept it,'' Bill Irwin a 49-year-old hiker, blind since he was 28, said during a rest at a hiker stop on the trail Monday.

''There are times when I wanted to cry when I was so tired and cold. I was absolutely miserable. This is a tremendous test of faith,'' he said.

If Irwin is able to complete the journey on foot, he will possibly be the first blind hiker in the United States to accomplish the feat.

He has had some close calls and once almost slipped over the side of a steep ravine, but he got out of it by clinging to a small sapling.

Twice he almost got hypothermia.

''I must have fell 50 or 60 times the first few days,'' he said, ''but I've gotten better and now it may be only a couple of times.''

Irwin, carrying a 60-pound pack with food and other supplies, including chow for his guide dog Orient, manages fives miles every three hours.

Other than his guide dog, he is making the trip alone.

On the trail, it requires slow and careful navigation to avoid a misstep that could mean death.

Orient, his two-year-old German Shepherd, learned not to stop at every three-inch step-up as he would if they were walking back in his hometown of Burlington, N.C.

Since leaving Spring Mountain, Ga., five weeks and 250 miles ago, Irwin has faced serious injury and death on sharp drops, rubble and narrow ledges along the trail.

Sighted people have little trouble with these obstacles, but for a blind person, they are formidable challenges.

If injured along the way, Irwin might have to wait hours and even days before help arrived.

On the trail, Orient leads and Irwin follows, probing every inch of the way with his ski pole. He has to interpret every pause and and slight change of direction that his dog makes.

The two have been rained and snowed on, and one day it took Irwin until 3 p.m. to thwaw out his shoes and socks.

''There are thousands of steps a day that could be fatal,'' he said. ''I have to concentrate at least 100 percent where I'm walking. There is no whistling in the woods and kicking up my heels. By the end of the day, I'm physically, mentally and emotionally exhausted.''

Irwin prepared for the hike by walking four or five miles a day and taking a week's training course. Before the trail, he had never hiked.

He makes it clear he is not on the hike out of a love for nature and the peace of being alone in the wilderness.

''I'm on a mission,'' he said.

He said God made it increasingly obvious to him last summer that He wanted Irwin to make the trek.

Irwin recalled his narrow escape earlier on the trail.

''I put down my pole and there was not anything there. I started to slip that way and grabbed a sapling right next to me. It was a miracle. That was the strongest witness you can find.

''I know the Lord won't let anything happen to me that he doesn't want to happen. If I get sick or hurt, if I'm not able to finish, it will be tough. But I won't be disappointed because I know He did it for a purpose.''

CAIRO (APRIL 17) UPI - Saudi Arabia was prepared Tuesday to cut back its oil production in an effort to stop the plunge in world prices if Kuwait and the United Arab Emirates would do the same, an oil industry source said.

Oil ministers of the three members of the OPEC cartel met in Jeddah to discuss the current situation in the world oil market, state-owned Riyadh Radio reported.

"Saudi Arabia wants the United Arab Emirates and Kuwait to reduce output and stick to their OPEC quotas," a gulf-based oil industry source said in a telephone interview. "The Saudis have also indicated they are willing to reduce their own production if the others do," the source told United Press International.

The oil industry sources said the meeting would try and hammer out ways of reducing crude production after a sharp decline in world oil prices that saw the value of world crude drop by about 14 percent over the last ten days.

The three are members of the 13-nation Organization of Petroleum Exporting Countries that pumps more than a third of the world's crude and attempts to support higher world prices by limiting the cartel's output.

Saudi Arabia is OPEC's largest producer. Kuwait and the UAE are the most flagrant violators of the individual quotas imposed by the cartel. Their overproduction has been blamed for the recent plunge in world oil prices.

OPEC has set a target price of $18 a barrel average for seven Mideast crudes. Indonesia's mines and energy minister Ginandjar Kartasasmita was reported as saying in Jakarta that the price now stood "at $15.20 a barrel a drop of nearly $3 from last week."

The cartel in November set a collective output ceiling of 22 million barrels a day for the first six months of 1990. Output has recently averaged nearly 24 million barrels daily as a result of overproduction by Kuwait and the UAE.

The UAE refused to accept a new quota at the November meeting. While accepting a quota, Kuwait later made clear it would not abide by the limit

as long as the average price of the seven OPEC crudes remained above the $18 a-barrel target.

The gulf-based oil industry sources said Saudi Arabia called the meeting to discuss how to reduce output and restore price stability. Saudi officials on Monday denied reports that they themselves had dramatically exceeded their OPEC quota.

"The big question now is to ensure everyone accepts the need to slow down production and prevent a major glut," the gulf-based oil industry source said.

Saudi oil minister Hisham Nazer, UAE oil minister Mane Saeed Otaiba and Kuwaiti oil minister Sheikh Ali Khalifa al Sabah would only hold one session, but did not say how long it would last, Riyadh Radio reported.

WASHINGTON (APRIL 17) UPI - Researchers have found a way to transfer genes into corn cells, offering a way to introduce valuable traits, such as disease resistance, into corn and related crops, the government said Tuesday.

The Agriculture Department, which announced the result jointly with Monsanto Co., said plant biotechnologists had faced more difficulty in transferring genes into corn and other so-called monocot plants than with dicots, such as tomatoes.

Molecular biologist Micheal Fromm and co-researchers at an Agricultural Research Service laboratory in Albany, Calif., were among the first to transfer new genes into corn, the department said.

A number of other methods are being explored to reduce crop losses on corn one of the major grain crops in the United States. Farmers grew 7.5 billion bushels of corn last year. For example, one firm is developing a genetically engineered plant vaccine against the corn borer, an insect pest.

The Research Service experiments, which were partly funded by Monsanto, involved use of a ''gene gun'' that fired two marker genes into specially cultured batches of corn genes. The cells were subsequently nurtured into fertile corn plants, which have produced a new generation of corn seedlings, now growing in the greenhouse, that contain the marker genes.

''Since less than one in a million cells receive marker genes, it took years to overcome all the obstacles,'' Fromm said.

The obstacles included the techniques to introduce the new genes, locate cells that received the genes and then propagating the cells into mature plants that would pass on the genes.

Monsanto researchers developed the corn cell cultures used in the experiments.

Fromm said the research should help pave the way for introducing desirable traits, such as disease or insect resistance, into corn or monocot plants such as wheat, oats, barley and rice.

Robert Fraley, director of plant science technology for Monsanto, said the successful experiments marked an advance in scientific understanding of cereal crops.

In the experiments, the researchers used that allowed corn cells to grow despite the presence of an inhibiter. It was linked to the second gene, which caused the cells to glow, which allowed scientists to identify cells that accepted both genes.

(APRIL 17) UPI - A telegram saying Moscow plans to cut natural gas supplies to Lithuania was read in the Lithuanian parliament today, as lawmakers were debating a reponse to Mikhail Gorbachev's ultimatum. A spokesman for the Baltic republic says the Lithuania Supreme Soviet will NOT vote on a response until tomorrow... but the spokesman says Lithuania stands firm is its resolve NOT to rescind its declaration of independence.

President Bush told reporters at the White House this morning that he will order what he terms ''appropriate responses'' to any Soviet economic embargo on Lithuania. Bush spoke during a photo-taking session.

Officials in West Germany say one pilot was killed and at least 20 people were injured today when two Canadian Air Force jets collided in flight and crashed over the West German city of Karlsruhe . The 20 people injured are believed to be civilians. One pilot ejected from his jet and landed by parachute near a highway. Officials say several buildings in the city center were on fire after the crash.

President Bush is meeting at the White House this morning with Honduran President Rafael Leonardo Callejas. The two are expected to discuss the coming change of leadership in Nicaragua and the dismantling of the Contra rebel forces. Callejas also is expected to raise the issue of U-S aid to

his nation.

#90107u1936 04/17/1990 ~United Press International
WASHINGTON (APRIL 17) UPI - Federal prosecutors ordered 173 banks in 22 states to turn over financial records on accounts into which they said nearly $400 million in Colombian drug profits were deposited, the Justice Department said Tuesday.

The government sought to freeze more than 75 percent of the 754 accounts pending forfeiture proceedings. The biggest states involved in the crackdown were Florida and New York, where authorities said most of the cocaine cartel operatives live.

The money, generated from street sales of cocaine, was first deposited into U.S. banks, the Justice Department said. In addition to the 22 states the move involved banks in the District of Columbia.

Of the $400 million, all but $50 million was then transferred abroad. It was subsequently returned to the United States to finance activities by the Medellin cocaine cartel, the Justice Department said.

The cartel needed the money in the United States for ''ongoing business expenses'' such as the purchase of aircraft, working capital, payroll for workers and the purchase of real estate, automobiles and other assets, the department said.

A key to the crackdown was cooperation by the new Panamanian government following the Dec. 20 U.S. invasion, said Peter Djinis, a trial lawyer in the Justice Department's criminal division.

Justice Department officials made it clear that they do not know how much money remains in the accounts, if any, but that some $400 million dollars was deposited ''as of early 1989.''

After they obtain the account information from the 173 American banks, investigators will follow the financial transactions through the international banking system, Djinis said.

Because of the enormous security problems from holding huge amounts of cash outside financial institutions, Djinis said, ''You have to leave the money in the international banking system.''

The institutions include Bank of America, Chase Manhattan Bank, Chemical Bank, Manufacturers Hanover Trust, Wells Fargo, Bank of Tokyo, CitiBank, Mellon Bank, Bank of New England, Bank of Boston, Bank of New York and Bankers Trust Co.

Of the 173 banks, 87 are in Florida and 53 in New York. In addition to Florida and New York, the banks are located in Arkansas, Arizona, California, Connecticut, the District of Columbia, Georgia, Illinois, Kansas, Louisiana, Massachusetts, Michigan, Missouri, North Carolina, New Jersey, Ohio, Oklahoma, Pennsylvania, South Carolina, Tennessee, Texas and Virginia.

The latest crackdown is part of Operation Polar Cap, announced in early 1989. It is the largest drug money laundering operation ever conducted by U.S. law enforcement agencies and involves $1.2 billion in drug money originally deposited into U.S. banks.

The $400 million that authorities began trying to trace Tuesday is a portion of the original $1.2 billion in drug-related financial transactions. The government is coordinating its legal activity in Atlanta where a federal grand jury indicted members of the Medellin cartel in March 1989.

The Justice Department credited the governments of Panama, Colombia, Uruguay, Luxembourg, Switzerland, Canada, Austria and Britain with providing bank records.

Treasury Secretary Nicholas Brady said the move ''is one of the most significant law enforcement undertakings involving bank account seizures in U.S. history.''

Attorney General Dick Thornburgh said, ''Money is the drug traffickers' life blood. If we can seize it or disrupt its flow, we can strangle their operations.''

Djinis said the money was originally generated by cocaine sales on American streets; it was deposited in U.S. banks, moved abroad and then eventually returned to the U.S. ''through a labyrinth of procedures.''

He said ''we are not at this time suggesting'' that the 173 banks knew the nature of the money that was retransferred from abroad.

In Miami, a U.S. Customs Service official, John Hensley, indicated that some banks ''may be culpable'' and arrests might be made. But Djinis said, ''We have no evidence right now that would lead us to file criminal charges against any of the banks. At this point the entire focus is the accounts and we have been assisted tremendously in our investigation by the banks.''

(APRIL 17) UPI - The Federal Reserve Board says total output at the nation's factories, mines and utilities climbed seven-tenths of one percent during March. The increase was powered by a surge in motor vehicles and parts. The Fed report also shows that U-S industry ran at 83 and one-third percent of capacity last month, up four-tenths of one percent. The March report uses 1987 as its base year for calculations.

In London today, the family and friends of British journalist John McCarthy marked the fourth anniversary of his capitivity in Lebanon. They planned a church service, a new media campaign and a protest outside the Iranian Embassy. McCarthy was kidnapped by Moslem extremists while he was on the way to Beirut airport on April 17th, 1986. He had just completed a 32-day assignment in Lebanon with Worldwide Television News.

Some environmentalists complain that Earth Day is too commercial, so they plan to boycott 20th anniversary celebrations. In the words of a spokesman for the group Earth First!- ''Earth Day has become the Christmas of the environmental movement, paying homage with a consumer orgy.'' The group known for its battles to save Northern California redwoods declared Humboldt and Mendocino counties as Earth Day ''free zones.''

#90107u2074 04/17/1990 ~United Press International
WASHINGTON (APRIL 17) UPI - Ion Mihai Pacepa, former head of Romanian intelligence under the ousted Ceausescu regime, said Tuesday that the communist-run intelligence service remains for the most part intact.

Pacepa, who defected to the West in 1978, told a group of reporters Tuesday that the Romanian Securitate had 20,000 ''operational officers''

when he was its acting head in 1978. He said the number in 1989 was probably much higher, perhaps as many as East Germany, which has acknowledged a security force of 40,000 officers.

But, Pacepa said, the Romanian Ministry of the Interior announced in February that only 3,700 security officials had been dismissed after the overthrow of the Ceausesco government.

''That leaves some 17,000 at least in place,'' he said. ''The people I have talked to in Romania tell me it's 'business as usual.'''

Pacepa is a former lieutenant general who was close to Ceausescu and has accused him, in a book written in the United States, ''Red Horizons,'' of ordering the execution and beatings of political opponents.

He said the Romanian intelligence and military were heavily infiltrated by the Soviet KGB and he was ordered by Ceausescu to set up a special unit to make sure the Romanian president would not be overthrown by the Soviets.

Although a hard-line Communist, Ceausescu frequently differed with the Soviets, and pulled his forces out of the Warsaw Pact.

Pacepa, who was also Ceausescu's chief bodyguard, said the Romanian Securitate is made up of five bureaus or directorates. He said Directorate No. 1, the largest agency, is in charge of ''domestic counterintelligence '' keeping track of dissidents and nationalists. ''It's still there,'' he said.

Directorate No. 2 is in charge of ''counter-sabotage,'' he said, adding that ''it includes a huge army of informants.''

WASHINGTON (APRIL 17) UPI - John Dunne was sworn in as the government's civil rights chief Tuesday, filling a top Justice Department job that had been vacant for more than a year.

Dunne was sworn in by Attorney General Dick Thornburgh, a personal friend for more than 20 years who pushed Dunne's nomination over several candidates being considered by the White House.

Dunne praised civil rights leaders for not attacking him for a ''lack of technical credentials'' in the field and giving ''me the benefit of the doubt.''

Dunne, 60, spent his career in the New York state Senate, then resigned in the middle of his 12th term after a failed bid for majority leader.

He won Senate confirmation despite his lack of experience in civil rights law, a vote against busing to achieve racial integration and his membership in clubs that refused to admit women. Dunne resigned from the clubs and said his busing vote was a mistake.

The job as assistant attorney general for civil rights is ''the fondest dream of any lawyer,'' Dunne said, promising ''to vigorously enforce'' civil rights laws ''without fear or favor.''

If current civil rights laws prove inadequate, Dunne said he would seek new legislation.

One of his first major challenges will involve a dispute over proposed civil rights law legislation to reverse six 1989 Supreme Court rulings that narrowed the scope of employment discrimination cases. It is sponsored by Sen. Edward Kennedy, D-Mass., but the Bush administration favors a more limited bill that would alter only two of the rulings.

In his remarks, Dunne said a key priority of the Justice Department must be to ensure ''racially and ethnically fair'' use of census data that will lead to political reapportionment across America.

Dunne also noted a ''startling increase'' in the ''underclass'' in the United States, and a need to toughly enforce fair housing laws, campaign ''against hate-mongers,'' and provide the disabled with full access to jobs and housing.

Former Sen. Birch Bayh of Indiana, a liberal Democrat who has been one of Dunne's law partners, attended the ceremony, along with many civil rights leaders.

William Lucas was President Bush's first nominee for the Justice Department job. He was rejected by the Senate Judiciary Committee because he had limited legal experience and did not seem to understand several Supreme Court rulings involving civil rights.

Lucas, who is black, was opposed by most civil rights organizations. Dunne

who is white, was acceptable to many civil rights groups.

The Justice Department job remained vacant for more than a year while the administration searched for a candidate acceptable on Capitol Hill.

At the end of the swearing-in ceremony, an aide passed a note to Thornburgh, who asked the audience to pray silently for Rev. Ralph Abernathy, who died Tuesday of cardiac arrest. Abernathy, who was 64, fought for civil rights with Martin Luther King Jr. during the 1960s.

LOS ANGELES (APRIL 18) UPI - The head of Security Pacific Corp., the nation's fourth-largest bank holding company, announced plans Tuesday that could result in its expanding operations nationwide by the end of the decade.

''We think we can bring our ability to do business into many new markets

'' said Robert Smith, chief executive officer and president, during Security Pacific's annual shareholders meeting at the company's downtown Los Angeles headquarters. ''This should be one of our highest priorities.''

Smith told shareholders that management is considering various strategies to expand its customer base during the 1990s and that by the end of this year Security Pacific will have permission to operate in 28 states.

Currently, the company has banks in Alaska, Arizona, California, Nevada, Oregon and Washington.

But Smith did not specify how such an expansion would occur - through mergersand acquisitions or otherwise - or what states Security Pacific might enter.

In an interview after the meeting, Smith said competition for customers is increasing because of the easing of restrictions on interstate banking. He also said Security Pacific needs to increase its customer base to keep costs down on operations, which are among the most diverse in banking.

''We believe that you need a certain 'critical mass' of business to provide customers access to capital markets,'' Smith said. ''We think we have the formulas, expertise to take what we do very well in California to other markets.''

Security Pacific has been mentioned recently as a potential merger partner for Chemical Bank and troubled First Interstate Bank, which is attempting to restructure itself and has said it wants to stay independent.

But Smith said that while such a combination is possible, it is not likely to occur soon, despite potential cost savings that could be generated through a merger with First Interstate, which has extensive Western operations.

''We're always looking for ways to make two plus two equal five, but we have no interest in getting into a bidding contest or doing anything on an unfriendly basis,'' Smith said.

He also said the company is actively exploring buying assets of thrifts that have been seized by regulators.

Smith told shareholders they should expect earnings, which posted a 12 percent gain in 1989, to increase by about 6 percent this year because of a slowing economy. Security Pacific's first quarter earnings were $188.4 million, a 5 percent increase over the year-ago quarter.

#90107u2173 04/17/1990 ~United Press International
(APRIL 17) UPI - Lithuania's refusal to take back its declaration of independence apparently has resulted in the first economic measures from Moscow. A telegram from the Soviet gas company today informed members of the Lithuanian Supreme Soviet that gas supplies to the nation will be sharply cut back, beginning today. Earlier, a Lithuanian official said a gas cutback would result in serious problems in less than a month.

President Bush said the United States is considering ''appropriate responses,'' after the Soviet Union notified Lithuania of plans to sharply curtail natural gas supplies. Bush says he is watching the situation in Lithania very, very closely and waiting to see if the Soviet announcements are implemented. Bush made the comments at a White House photo session with the visiting Honduran president.

The government wants to freeze about 75 percent of funds in more than 750 bank accounts where an estimated 400-Million dollars in Colombian drug profits were deposited. The Justice Department says prosecutors ordered 173 banks in 23 states to turn over financial records on accounts where money from street sales of cocaine was stashed. Government lawyers say the money was ultimately used to finance Medellin drug cartel activities.

Honduran President Rafael Leonardo Callejas arrived at the White House this morning for a meeting with President Bush. During a picture-taking session at the start of the Oval Office meeting, Bush described Callejas as an ''esteemed guest.'' Callejas is making his first visit to the United States as president of the economically impoverished Latin American country.

#90107u2175 04/17/1990 ~United Press International
NEW YORK (APRIL 17) UPI - The unsecured creditors of Eastern Airlines would receive less than seven cents on the dollar if the carrier were to begin liquidating immediately, an attorney for Eastern said Tuesday.

If liquidation began Aug. 1, after the sale of Eastern's Latin American routes to American Airlines, its unsecured creditors would receive 14.3 cents on the dollar, Eastern said at a hearing in U.S. bankruptcy court. The unsecured creditors rejected Eastern's most recent offer to pay them 25 cents on the dollar.

The hearing was held to consider the unsecured creditors' request for a trustee to oust Eastern's management and seek a buyer for the airline, and on Eastern's request to use $80 million in proceeds from asset sales to fund operations through midyear.

The creditors requested a trustee after the collapse of a March 27

agreement with Eastern that would have paid them 50 cents on the dollar. Eastern reneged on the tentative deal, citing lower-than-anticipated revenues.

A liquidation evaluation plan prepared by Eastern showed unsecured creditors would receive 6.7 cents on the dollar if liquidation were immediate, said Eastern bankruptcy attorney Zack Clement.

Eastern has argued throughout the hearing, which began Friday, that the creditors' request for a trustee is a thinly veiled attempt to liquidate the airline. Eastern's attorneys argue that appointment of a trustee would due to a loss of public confidence in the carrier, force its liquidation.

U.S. Bankruptcy Court Judge Burton Lifland would not allow the liquidation evaluation plan to be admitted into evidence. He has repeatedly called evidence regarding liquidation irrelevant, noting the hearing is being held to consider appointment of the trustee and use of the asset-sale proceeds. "It's not on anybody's agenda today," Lifland said. "It's certainly not on the court's agenda."

He also would not allow Eastern to introduce into evidence an internal document of the creditors, which Eastern's attorneys claim illustrates the creditors intention to liquidate the airline.

Eastern's creditors, who are owed some $980 million, say they have lost faith in Eastern's management's ability to run the carrier. Eastern has lost $1.2 billion since filing for bankruptcy last March, and missed several financial projections by hundreds of millions of dollars.

Lifland also admonished Eastern for repeatedly revising the financial projections it has been using in arguing for use of $80 million from asset sales.

Eastern first said it needed the money by April 12, then changed the date to this week, and most recently said it could continue until the end of the month without those funds, Lifland said. "Based upon the emergencies portrayed to this court, so far I haven't seen the true emergency," he said.

Eastern has already received permission from the court to use $320 million in asset sales proceeds since filing for bankruptcy protection in March 1989. Eastern has reached a tentative agreement to sell its Latin American routes to American for $350 million.

Appointment of a trustee would not affect the Department of Transportation's decision on whether to approve the sale, according to testimony by Jim Garrity, assistant U.S. attorney, at the hearing.

If a trusteee is appointed, however, the Department of Transportation may decide that its "expedited" consideration of the sale is no longer necessary, he said.

Elliot Seiden, a vice president and attorney for Eastern's parent, Texas Air Corp., testified that any delay "would be tantamount to disapproval because of Eastern's financial position."

George Brennan, Eastern's vice president for marketing, testified that a trustee was likely to spell the end of Eastern. "I believe most consumers and most travel agents will perceive appointment of a trustee as a negative.

He added that such an appointment would also "add more uncertainty to Eastern's future, and really question whether Eastern will be here in whole or in part."

Phil Bakes, Eastern's president, and Frank Lorenzo, chairman of Texas Air, were also listed among Eastern's witnesses.

#90107u2196 04/17/1990 ~United Press International

NEW YORK (APRIL 17) UPI - The stock market closed mixed Tuesday in one of the lightest trading days of the year after bouncing back from an early decline tied to some bad news about March inflation.

The Dow Jones industrial average, which rose 11.26 Monday, gained 2.71 to close at 2765.77.

Among broader market gauges, the New York Stock Exchange composite index lost 0.03 to 188.91 and Standard & Poor's 500-stock index fell 0.06 to 344.68. The price of an average share was unchanged.

Declines led advances 840-659 among the 1,993 issues crossing the NYSE tape. Big Board volume was 127,990,000 shares, compared with 142,810,000 shares traded Monday.

Analysts attributed the rebound more to an absence of selling than a surge of buying. "Institutions just don't have any compelling reason to engage in across-the-board selling," said Ralph Bloch, senior vice president and chief market analyst at Raymond, James & Associates in St. Petersburg, Fla. "Most have enough cash on hand. There's no reason to do any serious dumping," he said.

The Dow industrials were down more than 21 points just after the opening on a Labor Department report that higher housing and clothing costs pushed inflation at the retail level up 0.5 percent in March to an annual rate of

5.2 percent. Economists had expected a 0.2 percent overall rise in consumer prices.

"The market managed what would have been very bad news very easily," said Hugh Johnson, chief economist at First Albany Corp. in Albany, N.Y. "Two things helped us manage the bad news easily. Volume was low and the breadth of declines over advances was not wide (during the early sell-off). Second, the bond market stabilized in late trading," he said.

Bonds had been down about 1 1/4 points after both the inflation news and a separate report that industrial production rose 0.7 percent in March as output of motor vehicles and parts surged. An increase of 0.2 percent in industrial output was expected. Treasuries had recovered some ground to post losses of about one point in late trading.

On the trading floor, NCR was the most active issue, plummeting 5 3/8 to 65 3/8 after reporting first-quarter earnings that were a disappointment to the market, below year-earlier levels and analysts' estimates. IBM followed, up 1/4 to 111 1/8 after surging Monday on a surprisingly strong earnings report.

United Telecommunications was third, down 1/4 to 39 7/8 after reporting a rise of more than 40 percent in net income for the quarter. Per-share earnings were below most estimates.

Among the other blue chips, AT&T added 1/8 to 42, American Express gained 3/4 to 29 3/8 after reports saying some analysts are hoping the company has positioned itself for a strong performance next year by boosting its investment in Shearson Lehman Hutton, Philip Morris was up 1/2 to 42 7/8, and Eastman Kodak was down 5/8 to 39 7/8.

Elsewhere, Interlake, which makes materials for the auto and aerospace industries and whose stock soared in early April, plunged one to 12 5/8. The climb is said to have been sparked by a favorable article on the company in a market newsletter.

And Great American Bank surged 7/8 to 4 5/8. The troubled thrift reported a large loss for the fourth quarter and the year, but the Office of Thrift Supervision approved a plan calling for the infusion of about $350 million in capital, reports said.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 157,577,870 shares, compared with 173,641,160 shares traded in the previous session.

Prices closed sharply lower in moderately active trading on the American Stock Exchange. The Amex Market Value index fell 2.26 to close at 354.72. Declines led advances 335-240 among the 834 issues traded. The price of an

average share lost eight cents. Composite volume totaled 15,697,300 shares, compared with 16,223,700 shares traded Monday. B.A.T. Industries led the Amex issues, up 1/16 to 11 13/16.

The National Association of Securities Dealers composite index lost 1.28 to 435.42.

#90107u2221 04/17/1990 ~United Press International

NEW YORK (APRIL 17) UPI - Worse-than-expected inflation news left the dollar mixed in uninspired New York currency dealings Tuesday, although some players were poised for a dollar rally on forthcoming trade figures.

Currency traders said the dollar declined on news that U.S. inflation at the retail level rose by 0.5 percent in March. Separately, the Federal Reserve said industrial production picked up by 0.7 percent.

The inflation news could have bolstered the dollar, said Jim Merrill, senior international economist with McCarthy, Crisanti & Maffei, because the Fed would be less likely to bring down interest rates. Lower U.S. rates could send global capital to other markets and currencies.

Foreign exchange adviser Earl Johnson of the Harris Trust & Savings Bank in Chicago said, however, that market participants chose to look at the inflation news in a negative light and sold the U.S. currency. "The numbers were terrible, much worse than expected," Johnson said.

In mid-afternoon New York trading, the dollar was quoted at 1.6775 West German marks, slightly off from 1.6780 Monday. Against the Japanese currency, the dollar was changing hands at 159.77 yen, up from 159.35 yen.

One reason for the quiescent market was that players awaited important economic news due for release Wednesday morning. The U.S. trade deficit was expected to narrow in February from January's $9.3 billion shortfall, with market forecasts ranging from $7.5 billion down to just $4.5 billion.

Trade deficit improvement tends to help the dollar. One reason is that as the deficit narrows there is less need for U.S. monetary authorities to seek a weaker dollar to discourage imports and boost exports.

But Johnson warned that high expectations could lead to disappointment and a weaker dollar. "With that kind of sentiment, it has to be 7.5 (billion dollars) or better to give the dollar much support," he said.

He said the Soviet-Lithuanian confrontation, in which Moscow cut off natural gas supplies to the breakaway Baltic republic, was "in the background" but not actively influencing currency rates.

Other dollar rates: 1.4900 Swiss francs, unchanged; 5.6375 French francs, up from 5.6365; and 1,232 Italian lire, unchanged. The British pound moved up to $1.6360 from $1.6325.

In Europe, the dollar also rose on U.S. trade hopes. It closed in Frankfurt at 1.6800 marks, up from the previous closing price of 1.6725 Thursday, and also advanced in Zurich, to 1.4920 Swiss francs from 1.4820.

In London, the pound eased to $1.6315, against $1.6425. Traders said the pound slipped on fears the increasingly unpopular Conservative government may lose local council elections next month.

The dollar advanced in Paris and Milan to 5.6490 French francs against 5.6295 and to 1,235.10 Italian lire against 1,230.50 Friday.

In Tokyo earlier, Lithuanian tensions and anticipated improvement in the U.S. trade picture boosted the dollar to 159.83 yen from 159.42 Monday.

Republic National Bank in New York closed cash gold at $375.25 an ounce, off from $375.50 Monday. The New York Commodity Exchange settled gold at $375.20, unchanged. In Zurich, gold fell to $374.20 an ounce from $375.10 last week, while in London it declined to $374 an ounce from $375.25.

Republic closed cash silver at $5.11 an ounce, up from $5.08. Comex spot silver rose to $5.093 an ounce from $5.059. Silver in Zurich fell to $5.10 an ounce from $5.15. London silver slipped to $5.07 an ounce from $5.11.

TORONTO (APRIL 17) UPI - Unicorp American Corp., as a result of a 1989 year-end loss of $97 million, is negotiating with its bankers to waive and extend payments on $112 million in loans, a spokesman said Tuesday.

James Leech, president of Unicorp Canada Corp., the parent company, said Unicorp American is up-to-date on its interest payments and that the banks have not called the loans.

But Leech added the 1989 losses resulted in Unicorp American having breached debt-to-equity requirements under terms of its loans.

Unicorp American's two assets are real estate holdings in the United States and the Lincoln Savings Bank.

Unicorp American's 1989 losses increased signficantly from $9.6 million in losses in the year earlier.

The company's 1989 results included a $68 million charge for estimated losses from the sale of its real estate properties and a $11.4 million provision to cover its final obligation in the sale of its shares in CityFed Financial Corp.

Leech said Unicorp American is negotiating with its bankers to waive compliance and to extend the maturity of its senior credit facility due to expire in August.

The company is also negotiating to secure additional funds to continue its operations for the next 12 months, Leech said.

Leech said unless the negotiations prove successful, the company's outside auditor will state in its report on the 1989 results that ''there is substantial doubt about Unicorp American's ability to continue as a going concern.''

Negotiations on a deal between Unicorp American and Coscan Inc. involving the U.S. properties are continuing despite the filing of a class action suit against Unicorp Canada and its chairman by a shareholder, Leech said.

Unicorp Canada is a management holding company with interests in energy, financial services and merchant banking.

MOSCOW (APRIL 17) UPI - The Soviet Union has decided to join Interpol, the worldwide clearing house for crime information, official newspapers reported Tuesday.

The newspapers, Izvestia and the Government Informer, said the Soviet Interior Ministry will organize a bureau of Interpol in Moscow and will also send ministry employees to work in the agency's French headquarters.

Interpol, the acronym for the International Criminal Police Organization, serves more than 100 member nations, providing information about international criminals and helping to apprehend them.

It functions mostly through the cooperation of police agencies in the member countries.

WASHINGTON (APRIL 17) UPI - A space probe exploring the evolution of the universe has produced a ''disturbing'' lack of evidence to explain the uneven distribution of galaxies through the cosmos, scientists said

Tuesday.

While preliminary data from the Cosmic Background Explorer, known as COBE, continues to support the ''big bang'' theory of the universe's creation, the information gathered so far has failed to explain its current ''lumpy'' formation.

''The smoothness is disturbing us a lot. At this point we're beginning to expect little warts and dimples to appear,'' said David Wilkinson, a professor of physics at Princeton University.

Wilkinson spoke at a news conference at an American Institute of Physics meeting about the latest results from COBE, an ultra sensitive satellite launched in November 1989 on a two-year mission.

The $160 million orbiting space probe was designed to answer fundamental questions about the formation and evolution of the universe by collecting data about faint radiation left over from the big bang explosion.

Scientists theorize the universe exploded into existence 15 billion years ago in a hot, dense fireball that instantly began expanding in all directions.

During the news conference, scientists from NASA's Goddard Space Flight Center in Greenbelt, Md., and the University of California at Berkeley said the data collected so far by COBE appears consistent with those theories.

''It's astonishingly consistent with the big bang theory,'' Wilkinson said.

The NASA scientists also released a new color photograph of the Earth's home galaxy, the Milky Way, based on a composite of data collected by COBE.

''This thing that he gave you is spectacular. I mean that's wonderful,'' said Wilkinson of the image. ''My God, it's as though you were in Andromeda taking a picture of our galaxy.''

But COBE has failed to find any traces of significant energy release after the first huge explosion. That is inconsistent with the current ''lumpy'' state of the universe, with its massive clusters of galaxies and giant dark voids.

The researchers stressed, however, they have barely begun to sift through the huge amount of data the satellite is collecting. Years of data collection and analysis will follow and is expected to yield revolutionary findings, they said.

''One year or two years from now, if those pictures are still looking

smooth at the accuracies we'll have then, then there's real trouble. Then there's real big trouble,'' said Wilkinson.

#90107u2252 04/17/1990 ~United Press International

WASHINGTON (APRIL 17) UPI - The National Council of Churches filed a friend-of-the court brief in the Supreme Court Tuesday supporting the Hare Krishnas in a court battle with the mother of an ex-member of the sect.

The brief, in which the mainline Protestant and Orthodox church group was joined by other churches, Hindu groups and civil rights organizations, said the case ''may be the most important single religious liberty case ever filed in this court. The survival of a whole religious movement may be at stake.''

On Monday, the Supreme Court announced it would extend Justice Sandra Day O'Connor's temporary stay of a California court order until it decides whether to hear the Krishna appeal or not.

The Krishnas - formally known as the International Society of Krishna Consciousness - are appealing an order by a California state court that they pay more than $5 million to Marchia George and her daughter, Robin, as punitive damages and as compensation for ''emotional distress.''

To enforce the judgment, the state court ordered the immediate sale of Hare Krishna temples and ashrams (monastaries) throughout the country.

''Multimillion dollar suits for punitive damages and emotional distress have become the principal instrument of religious persecution in America '' said James Hamilton, general secretary of the 32-denomination church council. ''Lawyers inflame juries to hatred of unfamiliar religions and then ask them to award millions of dollars for emotional distress.

''Suppose an Episcopal priest made a mistake in a counseling relationship '' he added. ''Suppose the priest improperly revealed a parishoner's confidences ... And suppose the victim sued the church for severe emotional distress and got a court order to sell Episcopal churches all over the country.

''That would be major news; we would think it terrible that innocent Episcopalians were losing their houses of worship,'' Hamilton said. ''But that is what is happening to Hare Krishnas. We must defend for the Hare Krishnas the same religious liberty we claim for ourselves.''

The brief asks the court to impose constitutional limits on lawsuits against churches. Focusing on the free exercise clause of the First Amendment, the brief argues ''churches need additional protections that

take into account the role of religious speech, the history of religious persecution, the risk that jurors may be among the persecutors (and) the special nature of religious property.''

''Just as this court has created special protections for unpopular political movements, it may have to create special protections for unpopular religions,'' the brief said.

The case arose when Robin George entered a Krishna ashram while still in high school. Fearing her parents would forcibly remove her, she asked local Krishna leaders to hide her from her parents. At one point when she returned home, her parents destroyed her Hindu scriptures and chained her to the toilet. She escaped and returned to the ashram but was eventually returned to her parents whenthe police threatened to intervene.

The California courts found that her period of hiding caused her parents to suffer emotional distress and her father to die of his pre-existing heart disease.

''None of these amici approve the conduct of certain Krishna officials who attempted to deceive ... Marcia George,'' the brief said. ''But the First Amendment does not permit the destruction of an entire faith because of the misconduct of a few individuals.''

(APRIL 17) UPI - President Bush told the White House conference on global climates today that more facts are needed before taking action to reduce ''greenhouse'' emissions. Delegates from 17 countries are attending the meeting. Bush says that more research is needed before the international community can agree on economic steps to reduce emissions of carbon dioxide linked to global warming.

The ''Teenage Mutant Ninja Turtles'' remain at the top of the heap this week in the box-office rankings. The turtles have taken in an astounding 72-point-nine-Million dollars in just three weeks. The movie made 14-Million at the turnstiles during the weekend alone. Capitalizing on the turtles craze, C-B-S announced this week that the Ninja Turtles will be an animated Saturday morning T-V show.

WASHINGTON (APRIL 17) UPI - The Federal Trade Commission said Tuesday it has charged Collectors' Guild Ltd. Inc., the nation's largest mail-order dealer in art objects, with selling about $5 million in fake works attributed to Salvador Dali.

The FTC noted that the New York company, in peddling its wares to customers, portrayed the fake art as ''sound investments'' that could appreciate substantially in value.

The Federal Trade Commission asked a federal court in the Southern District of New York to issue a permanent injunction prohibiting the Collectors' Guild from making misrepresentations in the sale of its art, and to order the company to pay redress to consumers.

There was no immediate comment from the company's headquarters in New York.

According to the complaint, Collectors' Guild ''falsely claimed that the Spanish artist Salvador Dali played a substantial role in the creation and production of its prints.''

In fact, the agency said, ''Dali did not play a substantial role in the prints' creation or production.''

According to the commission, Collectors' Guild also claimed that the market value of its Dali lithographic reproductions is comparable to their sale prices, while ''most of the prints have a substantially lower market value than their prices, which range from $150 to $975.''

Commission official Michael McCarey said that ''as many as several thousands of persons bought the litographs, for about as much as over $5 million, between 1984 and 1988.''

The complaint charged that Collectors' Guild ''falsely claimed that its Dali prints were sound investments that customers could reasonably expect to increase substantially in value over time.''

According to the agency, consumers can not expect the prints to appreciate because they are simply ''reproductions'' of Dali art, and not lithographs attributable to the artist.

The complaint names Collectors' Guild Ltd. Inc., its parent company, Collectors' Guild International Inc., its former president, Max Munn, and art dealer J. Robert LeShufy.

According to a company employee, the current president of the company is Lewis Meyers.

The agency noted in a press release that the complaint is not a finding or ruling that the defendants have actually violated the law, and that the case will be decided by the court.

#90107u2280 04/17/1990 ~United Press International
NEW YORK (APRIL 17) UPI - ''The Hogan Family'' will switch networks from NBC to CBS next fall, CBS announced Tuesday.

This is the show that started life on NBC on March 1, 1986, as ''Valerie '' starring Valerie Harper.

Harper, who currently has a show on CBS, left ''Valerie'' in a dispute with the producers in the fall of 1987, and she eventually won a large settlement in a law suit over the matter.

The show continued on NBC as ''Valerie's Family,'' with the Valerie character killed off and Sandy Duncan moving in to mother Valerie's two kids.

In June 1988, the title of the show was changed to ''The Hogan Family.''

This season, CBS introduced a new show called ''City'' starring Harper, and scheduled it to run opposite ''The Hogan Family.'' After a good beginning, ''City'' failed to overtake ''Hogan,'' which consistently won the time period.

Now ''Hogan'' is moving to CBS.

The announcement was made by Jeff Sagansky, president of CBS Entertainment who said:

''One of my first goals in rebuilding the network's prime time strength is addressing our needs in the 8 o'clock time period. Bringing a hit series

like 'The Hogan Family,' which is a proven winner with kids and teens, to the CBS prime time shcedule gives us a strong base on which to start building an evening.''

He made no comment on the fate of ''City.''

NEW YORK (APRIL 18) UPI - Robert Freeman, the former head of arbitrage at the investment banking firm of Goldman Sachs & Co., was sentenced Tuesday to serve four months of a one-year jail term and ordered to pay $1 million in fines.

Eight months of the sentence were suspended.

Judge Pierre Leval in federal court in Manhattan also ordered Freeman to serve 20 months of probation following his four-month jail term and to perform 300 hours of community service during probation. The $1 million fine must be paid within 30 days. Freeman, who faced a maximum five-year jail term and a maximum $1.68 million fine, had pleaded guilty in September to one felony count of insider trading on information not available to the public.

Leval, in a soft but firm voice, also ordered that Freeman surrender June 19 to an institution to be designated by the Bureau of Prisons. At the request of Freeman's attorneys, Leval recommended a prison facility in Pensacola, Fla.

''Arbitrageurs think themselves authorized to disregard the law,'' Leval said. ''These practices seriously undermine the integrity of the marketplace.''

Arbitrageurs are responsible for making profits on stock transactions. One of their strategies involves buying stock in a company that is the target of a takeover attempt, which usually drives up share prices.

Freeman had admitted to using inside information provided by Martin Siegel an investment banker at Kidder Peabody & Co., about the 1985 takeover bid for Beatrice Cos., a leading U.S. food company, by Kohlberg Kravis Roberts & Co.

Freeman bought shares in Beatrice for himself and Goldman Sachs after he received inside information from Siegel that KKR was actively pursuing its bid.

Freeman's attorney argued that the former arbitrageur should not serve a jail term because he already had suffered enough from his highly

publicized arrest at his Goldman Sachs office in February 1987. Two of Freeman's colleagues, Richard Wigton and Timothy Tabor, were arrested at the same time and Wigton was handcuffed.

The charges against the three were dismissed later and prosecutors were blamed for acting without enough evidence. But new charges were brought up against Freeman after Siegel implicated him. Siegel, who has pleaded guilty to two felony counts, has not been sentenced yet.

Leval justified Freeman's sentence, which was considered relatively severe saying it was based on ''the nature of the individual, the nature of the crime, and the need of appropriateness and the need for deterrence.''

The judge said he received on Freeman's behalf ''a very large collection of letters which showed a person of very considerable worth.''

Leval, however, pointed out that he had to hand down a tough sentence. ''Insider trading has become the watchword of arbitrage because enormous sums are at risk,'' he said.

#90107u2332 04/17/1990 ~United Press International

ANCHORAGE, Alaska (APRIL 17) UPI - Sea otters rescued from the Exxon Valdez oil spill that have been returned to the wild and tracked for eight months have fared badly, according to research released Tuesday.

Of 45 otters fitted with radio transmitters, 23 survived, and the others are dead or missing, a mortality rate much higher than normal, researchers said at a symposium sponsored by the U.S. Fish and Wildlife Service.

Exxon objected to these findings being used to suggest that half of the 195 released otters died. An Exxon spokesman reported that the oil company spent $18.3 million retrieving dead otters and rescuing living ones from an oily death.

The 11 million-gallon Exxon Valdez oil spill on March 24, 1989, the nation's worst, devastated wildlife in Prince William Sound and the Gulf of Alaska.

Fully 1,016 otter carcasses counted last year. About 360 live oily otters were captured for treatment; 195 survivors were released, and of the 45 tagged, 23 are known to be alive, according to the federal wildlife agency. More dead otters have been found this spring by crews examining oily shores. The actual otter death toll is unknown.

The Exxon Valdez spill was the first affecting sea otters and represented the first attempt at rescuing the furry sea mammals that came to symbolize

the animal suffering caused by spill.

Scientists at the three-day symposium were to present 46 papers and conduct workshops intended to examine last year's otter rescue, share what was learned and recommend what should be done if there is a next time.

But scientists were muzzled by lawyers concerned that research may reveal evidence in pending criminal and civil cases against Exxon.

''Legal restraints affect the shape of the symposium,'' said Walter Stieglitz, regional director of the U.S. Fish and Wildlife Service, outlining what scientists were allowed to say in what has become a familiar restriction against open scientific exchanges.

State and federal officials have offered to pool scientific data if Exxon does, but the company so far has refused.

This is the first forum on otters since the spill, drawing scientists involved in rescues and research. But the Justice Department had to approve release of new data, such as the study tracking otters, Stieglitz said.

A review of symposium papers indicates that scientists question the wisdom of the rescue effort because of the poor otter rehabilitation record and because rescued otters may have carried disease back into the wild.

Some scientists suggested that lightly oiled otters may have fared better left alone than undergoing further stress of captivity.

Although the healthiest of the rescued otters had radio transmitters surgically implanted in them so scientists could track them upon release, their ''mortality and missing rates are much higher than those normally observed for adult sea otters in normal populations,'' according to findings by researchers from the Prince William Sound Scienter Center, the Fish and Wildlife Service and the University of Minnesota.

''These data suggest that, despite the tremendous amount of money and energy that was directed toward the treatment and care of these animals, many or all of the sea otters that were released from (rescue) centers were not rehabilitated,'' said Charles Monnett, Lisa Rotterman, Cece Stack and Daniel Monson in their paper.

They recommended that ''future policies focus on preventing otters from becoming oiled, rather than trying to treat them after oiling has occurred. This focus is especially recommended in light of the recognition of the stress and disease risks associated with bringing a wild animal into captivity.''

Exxon spokesman Joe Tucker, who said Exxon spent $18.3 million on otters after the spill, warned against extrapolating mortality figures from the tagged otters, saying, ''The ones that were tagged had a lot more stress on them. That could have been a factor in the deaths.''

Stieglitz said such extrapolations were part of spill damage assessment.

Although otters were endangered at the turn of the century and are still threatened off California, Alaska has a thriving population. Keith Bayha of the Fish and Wildlife Service said his agency had to pressure Exxon into action at times. But he also noted that the spill did not threaten the species and that the main motivation behind the rescue was America's strong emotional attachment to otters and public demand that something be done to save the oily creatures.

#90107u2366 04/17/1990 ~United Press International

RENTON, WASH. (APRIL 18) UPI - The Boeing Co.'s plans to add a $100 million assembly building and a six-story garage at its Renton plant have been put on hold as a result of a decline in orders for the 707 aircraft, company officials said Tuesday.

Boeing's Commercial Airplane Group division will instead convert an aging 707 assembly building at its 310-acre Renton plant for use as a 737 assembly line.

The planned assembly building and garage were part of a $300 million plant expansion blueprint, the rest of which is still moving forward. Boeing disclosed the Renton expansion plan a year ago.

Tom Macnamara, who as director of facilities for the Renton division manages 70 buildings covering about 7 million square feet, said the conversion will begin next spring, when the last 707 is completed.

The first of Boeing's big jetliner family, the 707 has been out of commercial production for a number of years and recently has been produced solely for military Advanced Warning and Control System planes and the Navy's E-6, used for submarine communication.

Macnamara said the last AWACS orders came in three years ago from Britain and France. He said while more orders were expected from Japan and Pakistan, those haven't materialized. The last E-6 will be completed later this year, he said.

In contrast, Boeing has a backlog of 935 737s and 359 757s, both of which are made in Renton. Conversion of the 707 facility will eventually provide space for four more 737 line positions, Macnamara said.

In order to reduce the backlog, production of the 737 will increase from 14 planes to 17 a month by the middle of this year, and production of the 757 will increase from five planes a month to seven.

Macnamara said the 900 employees working on the 707 will move over to 737 and 757 production as the line is phased out.

''If more orders come in for the 707 and the space is needed, we'll build the new building and its garage,'' Macnamara said, noting that Boeing has five years to complete the new assembly building under terms of an environmental impact statement issued by the city of Renton.

Site work already is underway on a 52,500-square-foot addition on the south side of the 737 assembly building, and another addition, a 16,000-square-foot complex for wing cleaning, sealing and painting, is to be constructed nearby.

#90107u2367 04/17/1990 ~United Press International

WASHINGTON (APRIL 17) UPI - Flag burning should not be protected as free speech, the Justice Department told the Supreme Court Tuesday, because it is ''a physical, violent assault'' on the ''shared experiences of the American people.''

The Supreme Court agreed earlier this month to decide the constitutionality of an anti-flag burning law enacted by Congress last year - and to issue a ruling before its summer recess.

The court decided to hear the case on an emergency basis, guaranteeing that the case will be decided in time to become an issue in the fall congressional elections.

Solicitor General Kenneth Starr, representing the Bush administration, told the Supreme Court in his legal brief filed with the court Tuesday that ''physical destruction of the American flag, the unique symbol of the nation, constitutes a violent assault on the shared values that bind our national community.''

Starr argued that, ''The First Amendment does not prohibit Congress ... from removing the American flag as a prop available to those who seek to express their own views by destroying it.''

Under the Flag Protection Act of 1989, the Justice Department said, ''Congress and the president - the nation's elected representatives - have now spoken with one voice: the physical integrity of the flag of the United States, as the unique symbol of the nation, merits protection not

accorded other national emblems.''

The administration's legal brief said, ''Flag burning is, by its nature, a physical, violent assault on the most deeply shared experiences of the American people, including the sacrifices of our fellow citizens in defense of the nation and the preservation of liberty.''

The administration argued, ''It is the physical assault and accompanying violation of the flag's physical integrity - not robust and uninhibited debate - that occasion the injury that our society should not be called upon to bear.''

The administration compared flag burning to activity not necessarily protected by the First Amendment, such as obscene materials and defamatory statements.

Burning the flag, the administration argued, is ''anathema to the nation's values.''

The anti-flag burning law was passed in anger because of a June 1989 Supreme Court ruling in a Texas case that burning the flag as a political protest is a constitutionally protected form of free speech.

The 5-4 ruling sparked a controversy that saw President Bush push for an amendment to the Constitution. Instead, Congress passed the Flag Protection Act, although supporters of the amendment warned that a law would not protect the flag.

That argument gained strength Feb. 21 when a federal judge in Washington state struck down the new law in a case that involved an October 1989 protest outside a post office in Seattle that included flag burning. On March 5, a federal judge in the District of Columbia reached a similar decision in a case dealing with an Oct. 30, 1989, flag burning outside the Capitol.

In last year's case, two of the court's most conservative members, Justices Antonin Scalia and Anthony Kennedy, joined with three of the most liberal to rule against the Texas law.

The composition of the court has not changed since the Texas ruling. To win the case, the government must persuade one member to change his vote less than a year after the ruling.

#90107u2379 04/17/1990 ~United Press International

WASHINGTON (APRIL 17) UPI - President Bush warned the Soviet Union Tuesday that the United States is considering ''appropriate responses'' if

the threats of an economic embargo against Lithuania are implemented.

Bush made the remarks during a picture-taking session at the start of a working visit with Honduran President Rafael Leonardo Callejas in the Oval Office.

Reading from notes, Bush told reporters, ''Obviously we're watching the situation very, very closely and we're waiting to see if the Soviets announcements are implemented.

''Clearly those announcements are contrary to the approach that we have urged and that others have urged upon the Soviet Union and we are considering appropriate responses if these threats are implemented,'' he said.

''And I'm going to leave it right there, but I would simply repeat that what we need is dialogue, discussion and a peaceful resolution of this great difficulty there,'' he added.

Last Friday, at a joint news conference with British Prime Minister Margaret Thatcher, Bush said he was ''deeply disturbed'' over a two-day ultimatum issued by Soviet President Mikhail Gorbachev that the Lithuanian republic rescind independence legislation or face a partial economic boycott.

The Soviet Union said Tuesday it was sharply curtailing deliveries of natural gas to Lithuania because the republic ignored the ultimatum.

A telegram from the Soviet Western Trans Gas company read in the Lithuanian Supreme Soviet said the supply of gas to the republic would be ''sharply curtailed'' beginning Tuesday in response to a government order.

Later in the afternoon, the president met with Senate Democratic leader George Mitchell and other congressional leaders, who just returned from a fact finding mission to Moscow. They said Bush did not reveal the course of action he is considering.

''We did not make any specific recommendations,'' Mitchell said. ''There are several areas that are now the subject of discussions between the United States and Soviets - they involve agreements on taxes and investments, the environment and a number of other areas. The administration ought to consider reviewing the status of those discussions and making a judgment as to what action it will or will not wish to take as the situation goes.''

''The president has said it was unwise to speculate in advance on what might occur.''

Bush also met Tuesday with Senate GOP leader Robert Dole and other senators about the Middle East. Afterward, Dole told reporters they did not discuss Lithuania but, ''Obviously there are things we can do in Congress, things that the administration can suggest with reference to trade agreements ... if things get out of hand.''

''But again, as far as I am concerned, as a Republican leader, they would be in consultation with the administration, with President Bush. And so far he had made no specific recommendations.''

There was no immediate reaction to the curtailment of gas supplies, but earlier Lithuania's deputy prime minister, Romualdas Ozolas, said if Moscow ''cut off the tap'' there would be serious problems in less than a month.

''Natural gas (for heating) will disappear in 20 days, and the situation with electricity is the same,'' Ozolas said.

Lithuanian President Vytautas Landsbergis, in an interview Tuesday with CNN, said said he has had no contacts with Bush, but said if given the chance he would ask him to strengthen his position toward Moscow.

''I will ask Mr. President Bush for a very clear position as to Soviet Union's dealings against our country,'' Landsbergis said.

''This very clear position would state that the Soviet Union has no rights in Lithuania - no consitutional or lawful right - and all dealings of such kind would be considered as forms of aggression,'' he said.

Bush declined to amplify his own comments Tuesday and refused to take any questions.

He said that he was speaking on the subject because so many questions had been put to White House press secretary Marlin Fitzwater following the Moscow bulletin.

On Monday, Fitzwater said, ''We obviously have been reviewing all of our options over the last several weeks but we believe the best plan at the moment is not to speculate on what course of action we might take.''

Western leaders have warned Gorbachev there would be an adverse impact if there is a military crackdown on Lithuania and the president has ordered his key advisers to prepare a list of options the United States could take if Gorbachev followed through with his threats.

One primary option would be for the United States to discontinue U.S.-Soviet trade talks.

The trade pact would clear the way for lowest-possible tariffs on Soviet exports to the United States on a Most-Favored-Nation basis and has been under negotiation and targeted for completion by next month's superpower summit.

Another option would be to cancel or postpone the May 30-June 3 superpower summit between Bush and Gorbachev to be held in Washington.

The president also could put on hold the nuclear arms talks in Geneva and other negotiations regarding conventional arms.

The United States has never recognized the annexation of Lithuania, Estonia and Latvia in 1940 through a Nazi-Soviet pact.

At the same time, Bush has tried to tread lightly and despite entreaties by Lithuania and Lithuania-American groups he has refrained from according Lithuania de facto diplomatic recognition, apparently in order to give Gorbachev more time to sort out his political dilemma.

#90107u2395 04/17/1990 ~United Press International

EAST BERLIN (APRIL 17) UPI - Residents of the East German city of Karl Marx Stadt began voting Tuesday in an emotion-packed referendum to decide whether the city will revert back to its original name of Chemnitz.

The 23,000 residents of the industrial center in southern East Germany have until Friday to return referendum ballots to the local authorities. Ballots will be publicly counted on April 23.

The ballot was preceded by often emotional calls for the city to be given back its old name of Chemnitz, which many East Germans already use in preference to Karl Marx Stadt.

Repudiation of the name is widely expected.

In May 1953, the communist leadership stripped the city of the name under which it had been founded more than 700 years ago. Textbooks used under the former East German government say the renaming of the city was meant to honor ''the glorious tradition and achievements of the city's workers.''

Residents were never asked whether they wanted this honor. Many did not seem to welcome it. When the so-called ''Initiative Chemnitz'' was established last November, 50,000 letters of support poured in withing a few weeks.

Frank Werner Heine, one of the founders of the movement to change the name said that ''this was a clear yes for the referendum.''

The movement argues that the arbitrary imposition of Karl Marx's name on the city contradicts the view of the the father of communism himself. They say Marx opposed any form of personality cult.

Members of the movement say it is more in keeping with the tenor of Marx's theory to return the traditional name of Chemnitz to the city.

The name Chemnitz comes from the Slavic ''Kamenici,'' meaning ''stony river.'' In 1127, a Benedictine monastery was founded on the site of the present city and in 1165 a village began to expand on the banks of the river Chemnitz. In the 18th and 19th centuries, the city became the business and manufacturing center in the state of Saxony.

#90107u2403 04/17/1990 ~United Press International

WASHINGTON (APRIL 18) UPI - The Federal Aviation Administration announced Tuesday it has reached agreement with the British Airports Authority to install a device to detect explosives at London's Gatwick Airport.

The system, known as Therman Neutron Analysis, or TNA, is supposed to detect explosives hidden in checked luggage and trigger an alarm.

''TNA cannot guarantee security,'' FAA administrator James B. Busey said. ''But it is the latest and best technology that we have and it is a needed weapon in what is a growing arsenal in the struggle against terrorism.''

The accuracy of the detection device has been questioned.

The device, which is the first of its kind to be used at an airport outside the United States, is expected to be delivered to Gatwick in early May and be in place in time for the peak summer travel season, the FAA said.

U.S. aircraft departing Gatwick for this country will have first priority in using the device, and next will be other airlines leaving Gatwick bound for the United States.

The device is the third of six the FAA is buying from Science Applications International Corp. of Santa Clara, Calif. It will be operated by the British Airports Authority with the assistance of the manufacturer.

The first device, installed last September at the TWA international terminal at New York's John F. Kennedy International Airport, has screened about 58,000 bags, the FAA said.

The second device was installed in February at the Pan American terminal

at Miami airport and is expected to begin screening luggage this month.

Although Busey said the device cannot guarantee security, ''it is the latest and best technology that we have and it is a needed weapon in what is a growing arsenal in the struggle against terrorism.''

The effectiveness of the device was questioned in a report by NBC News on April 13. The network reported that seven months of testing at JFK yielded mixed results as simulated 2-pound bombs escaped detection 7 percent of the time and explosives of up to a pound were not caught 25 percent of the time.

The federal government determined that a bomb of barely more than a pound could, under the right circumstances, destroy a passenger jet, NBC reported.

Installation of the bomb-detection device in London culminates an agreement in principal reached last year between the U.S. transportation secretary and the British secretary of state for transportation.

#90107u2479 04/17/1990 ~United Press International

TRENTON, NJ (APRIL 17) UPI - Last week's fatal shooting of a black teenager by a white Teaneck police officer will be investigated by a state grand jury away from ''the tensions, pressures and emotions of the local scene,'' state Attorney General Robert Del Tufo said Tuesday.

The Apr. 10 death of Phillip Pannell, 16, sparked a night of unrest last week when a memorial march turned violent. Pannell's family and black leaders have called for the appointment of a special prosecutor, saying the youth was shot in cold blood.

''The tragedy has understandably sparked controversy and community concern '' Del Tufo said. ''Mindful of the volatile and somewhat polarized nature of the situation, I have decided that the ongoing results of the investigation should be presented to a state grand jury sitting in Trenton rather than to a Bergen County grand jury.''

A county grand jury had been scheduled to start questioning witnesses Tuesday. Officer Gary Spath has been suspended with pay pending the outcome of the investigation.

The state investigation, scheduled to begin early next week, should take several weeks because of the large number of witnesses involved, Del Tufo said. Acting Bergen County Prosecutor John Holl and his first assistant, Dennis Calo, will continue to head the investigation.

''It is my belief that the investigation of the matter by the state grand jury will facilitate a calm, deliberate, incisive and thorough review of the facts in an atmosphere somewhat removed from the tensions, pressures and emotions of the local scene,'' Del Tufo said.

While the Teaneck police department charges that Pannell had a gun in his pocket when he was shot, witnesses say the youth was running away and was unarmed. Police officers had been called to the scene by a report that a teenager was brandishing a gun.

Spath could face murder or manslaughter charges if the grand jury determines the shooting was not justified, or lesser charges like official misconduct.

The shooting and the unrest the following day damaged Teaneck's reputation as a peacefully integrated community.

Township Attorney Martin Cramer said he thought the way the investigation is conducted is more important than who does it. ''It's in everybody's interest that it just be fair,'' he said.

At Pannell's funeral Monday, the Rev. Herbert Daughtry of New York and other black leaders denounced the killing as racist.

#90107u2497 04/17/1990 ~United Press International

(APRIL 17) UPI - Moscow apparently is making good on its threat to cut off supplies to Lithuania. The Soviet Union says it is sharply curtailing deliveries of natural gas because Lithuania ignored an ultimatum to withdraw independence legislation. Lithuanian officials earlier said such a cut-off would mean serious problems in less than one month.

In Albany, New York... Soviet Ambassador Gennady Gerasimov warned the United States NOT to endorse Lithuania's push for independence from the Soviet Union. He told an audience of business and government leaders that an endorsement by the United States would be similar to telling Canada how to handle French separatists in Quebec.

It's the 17th day of a prison stand-off in Manchester, England, and today officials fired water cannons in an effort to force convicts to end the stalemate. They also tossed firecrackers into the Strangeways Prison to disturb the sleep of the seven convicts who refuse to end their siege.

Two Canadian Air Force jets collided today over a city in West Germany, killing one pilot and seriously injuring one civilian. Rescue officials earlier said that 20 people on the ground were injured. Police say burning wreckage slammed into buildings in the center of Karlsruhe the city and

near a zoo, setting several houses on fire. The city was declared a disaster area.

NASA says repair work on the shuttle Discovery is going so well that the next attempt at launch might be moved up one day to next Tuesday. That's if a new power steering unit that was installed during the weekend checks out in a test tonight. The first attempt at launch was scrubbed last Tuesday because of a faulty steering unit.

-30- 1856

#90107u2518 04/17/1990 ~United Press International

LIMA, PERU (APRIL 18) UPI - The party of rising candidate Alberto Fujimori Tuesday welcomed Mario Vargas Llosa's decision to stay in the Peruvian presidential race after a week of reports that he might bow out from the campaign.

Fujimori's Change 90 party issued a statement commending the novelist's decision to ''reconsider his initial proposal'' whereby the two candidates would decide between themselves on the new president rather than facing another round of voting.

Fujimori, 51, and Vargas Llosa, 54, finished neck-and-neck in general elections April 8, and will face each other in a runoff to be held late May or early June.

Before all the election returns were in, Vargas Llosa had contacted Fujimori and suggested publicly that they find a way to avoid a battle in the second round of the two-stage election process.

Fujimori, an agronomist and former university president, refused to make a deal with the novelist, saying such a move would circumvent the rights of the people to decide their own leader.

He did meet with Vargas Llosa for 13 minutes last week, but details of their discussion was not disclosed.

Change 90's statement said the two candidates represent ''two totally different options.'' Although Vargas Llosa is a political newcomer, it said he heads a group of parties that already have governed Peru, while the Change 90 Party is new and independent.

Fujimori failed to show up for a news conference Monday night where he was supposed to announce his platform. His absence was attributed on indigestion.

His wife, Susana, said the party's stategy for the runoff campaign ''was a secret.''

Vargas Llosa heads a center-right coalition of parties called the Democratic Front that proposes implementing a ''shock'' economic program to halt inflation in Peru, including cuts in government spending, freeing of foreign exchange and slashing subsidies.

Inflation rose 2,775 percent in 1989.

Vargas Llosa met Tuesday morning with his government and economic advisors reportedly to discuss forming a more detailed economic plan to be released within the next two weeks.

Fujimori has said he plans to fight drug trafficking by helping farmers who grow coco leaves, the main ingredient in cocaine, change their crops.

He also said Peru would pay its foreign debt to creditors, but would not sacrifice its development to do so.

The two candidates face a country polarized by political violence.

More than 18,000 people have been killed in Peru in political violence since the Maoist terrorist organization Shining Path made its first attack in 1980.

Gunmen shot and killed a provinicial mayor and the former president of a national social security group Tuesday, officials said.

The body of Felipe Santiago Salaverry, former president of the Peruvian Social Security Institute, was thrown out of a moving car in front of the summer branch of the University Sports Club in Lima Tuesday, police said.

Salaverry had been shot four times and ''was beaten in the head with a blunt object consistent with the ferocity demonstatrated by the terrorists'' of Shining Path, Police Chief Gen. Oswaldo Diaz Salvador said.

Diaz said police agents immediately searched the area around the club, but had not yet arrested any suspects.

In the Andean city of Chiquian, located 130 miles north of Lima, a group of about 100 armed attackers went on a three-hour rampage Tuesday morning, killing the mayor, Luis Jaime Garcia of the governing Aprista party, and dynamiting three banks and post offices, police said.

#90107u2546 04/17/1990 ~United Press International

UPLAND, CA (APRIL 17) UPI - A series of aftershocks to a Feb. 28 earthquake jolted parts of Southern California Tuesday, including a

moderate shaker that frazzled nerves but caused no damage or injuries.

In all, four sizable aftershocks to February's earthquake hit the area Tuesday, the largest of which struck at 3:22 p.m. and measured 4.6 on the Richter scale, authorities said.

That shaker was centered 3 miles west of Upland, a San Bernardino County city about 36 miles east of downtown Los Angeles, said Hall Daily, a spokesman for Caltech Seismology Laboratory in Pasadena.

The quake's epicenter, the same as two of the three aftershocks that preceded it Tuesday, indicated that the aftershock zone to February's 5.5 quake was moving southeast. Like the main quake, the aftershocks were all the product of the San Antonio fault.

Upland Assistant City Manager Mike Matlock said he was sitting at his desk in City Hall when the 4.6 aftershock hit.

''It was strange,'' he said. ''The floor felt like it sunk 3 inches and came back up. It was a hard jolt but not a very long one.''

On Upland's Main Street, shopkeepers and customers ran out of storefronts, asking each other in excited tones, ''Did you feel it? Did you feel it.''

While Upland City Hall and other buildings were slightly damaged by the February quake, Matlock said no buildings were damaged by Tuesday's aftershocks.

There was no damage reported in Pomona, another foothill community hit hard by the February quake, but there were reports of ''lots of frazzled nerves,'' city spokeswoman Janine Marek said.

Daily said the aftershocks had appeared to be diminishing, both in number and force, over the past several days, as is normal after a major quake.

But Tuesday's shakers, coupled with two others reported early Monday, indicate that ''the area is still very active.''

The first aftershock to hit Tuesday measured 3.4 on the Richter scale and struck at 1:47 a.m. It was centered 6 miles northwest of Upland, where earlier aftershocks were centered.

Shortly after 7 a.m., two more aftershocks shook the area 3 miles west of Upland. At 7:12 a.m., a 3.3 magnitude aftershock hit. A 2.6 magnitude aftershock followed at 7:19.

The first aftershock Tuesday was felt in Ontario, where it shook the airport tower, officials said.

February's 5.5 quake was centered where two major faults converge in the San Gabriel Mountains. The temblor was the strongest in Southern California since the October 1987 Whittier quake.

#90107u2559 04/17/1990 ~United Press International

PENSACOLA, FL (APRIL 17) UPI - The lightning quick F-14 Tomcat jet fighter, made familiar to millions of people in the movie ''Top Gun,'' became the latest exhibit at the National Museum of Naval Aviation Tuesday.

A 21-ton Tomcat was hoisted atop a huge steel pylon outside the national museum Tuesday, making it the only F-14 on public display and one of the few operational aircraft exhibited anywhere.

''It's extremely rare to put an operational aircraft on public display,'' said retired Rear Adm. George Furlong, executive vice president of the Museum Foundation and the first Tomcat air wing commander. ''We're excited to be distinguished as the only museum in the world to have an F-14 on display.''

The twin-engine, two-seat F-14, built by Grumman Aerospace Corp., is one of the nation's premier fighters. It became operational in 1973 and costs about $40 million per model. It can fly at Mach 2, climb to 30,000 feet in one minute and carry a 7-ton payload.

The Tomcat on display is ''Prototype Number 5,'' one of 12 prototypes of the jet that were used as test vehicles in the 1970s. The one acquired by the museum first flew in 1971, and was still flying into the early '80s.

The jet, outfitted with casings for air-to-air missiles, is painted with the black and yellow markings of Fighter Squadron 21, based at NAS Miramar

in San Diego, Calif.

It arrived in Pensacola on the USS Inchon in January 1989. Volunteers have been refurbishing the aircraft since then.

A steel structure was placed in the engine compartments to connect with the pylon, which is anchored by a 4,500-pound steel-reinforced foundation buried eight feet underground.

It will be officially unveiled May 10 to coincide with the fourth annual Naval Aviation Symposium, ''Carrier Aviation: Past, Present, Future,'' sponsored by the United States Naval Institute in Annapolis, Md., and Naval Aviation Museum Foundation.

#90107u2818 04/17/1990 ~United Press International

PANAMA CITY, PANAMA (APRIL 18) UPI - Savings accounts in Panamanian banks that have been frozen for more than two years will be unfrozen April 25, the government announced Tuesday.

Vice President Guillermo Ford, who is also minister of planning and the economy, said at a news conference that about 500,000 savings accounts with a value of about $270 million will be unfrozen.

''The banking system has normalized, at least as far as savings accounts are concerned,'' Ford said.

About $730 million in fixed-term accounts in Panamanian banks will remain frozen, Ford said. Banking analysts are investigating how soon such accounts could be freed.

Panama's banking crisis began in March 1988 when banks closed for two months and all accounts were frozen because of a run on funds sparked by worsening relations between the United States and Panama.

A month earlier, the U.S. government froze Panamanian assets in the United States to pressure former military ruler Manuel Antonio Noriega after he ousted President Eric Arturo Delvalle.

Confidence in the local banking system plummeted, a situation made worse nd by rumors that the government would issue its own paper currency. Panama uses U.S. currency.

#90107u2903 04/17/1990 ~United Press International

(APRIL 17) UPI - The Soviet Union acts against Lithuania... the Justice

Department moves against Colombian drug money... civil rights leader Ralph Abernathy is dead... and another effort to change campaign laws. Those stories and more, next from U-P-I.

Soviet President Gorbachev apparently is carrying out his threat to cut supplies to Lithuania, now that the republic has defied his order to withdraw independence legislation.

A telegram from the Soviet gas company to the Lithuanian gas company says that Moscow ordered the supply of natural gas ''sharply curtailed'' beginning today.

Lithuania's President Landsbergis told British radio today that he had NOT expected such a ''brutal'' move from Gorbachev. But he said it would NOT weaken the republic's resolve to push for independence.

Landsbergis said that Lithuanians can survive ''in poor conditions.'' He said they survived ''in war conditions, in terrible post-war conditions, without any gas, without any oil,'' and they will survive now.

In Washington, President Bush said he is watching to see if gas shipments actually are cut off to Lithuania. He said he's considering ''appropriate responses,'' but he did NOT specify.

The government moved today to freeze alleged Colombian drug money that's been deposited in American banks.

Federal prosecutors ordered 173 banks in 22 states and the District of Columbia to turn over financial records on some 754 accounts. Officials say about 400-Million dollars in drug money was deposited in those accounts ''as of early 1989.''

Authorities say the money was generated from cocaine sales on American streets. The Justice Department says it was used to finance activities of the Medellin drug cartel, such as buying aircraft, real estate and cars.

The biggest states involved in the crackdown are Florida and New York, where authorities say most of the cocaine cartel operatives live.

The funds were in some very well-known banks, including Bank of America, Chase Manhattan Bank and CitiBank.

-30- 2209

#90107u2917 04/17/1990 ~United Press International

CHICAGO (APRIL 18) UPI - Members of the Chicago Mercantile Exchange Tuesday overwhelmingly endorsed a proposal that if approved by federal regulators, would make it the only U.S. futures exchange to enact dual

trading limitations.

The membership voted 76 percent in favor of the proposal to ban dual trading, the practice of trading for a customer and a proprietary account, in the ''mature liquid'' contract months of all the actively traded products of the Exchange.

The proposal, which was unanimously approved by the CME's Board of Governor's last month, now goes to the Commodity Futures Trading Commission for federal approval.

The reform measure was the offshoot of the Special Committee to Review Trading Practices, which was formed in the wake of a two-year FBI investigation at CME and the Chicago Board of Trade.

The federal investigation resulted in the indictments of 47 traders and a clerk on charges ranging from racketeering to lying to federal investigarors.

The proposal approved by CME members Tuesday will be offered to the CFTC as an alternative to its proposal for a complete ban on dual trading in certain selected contracts during a pilot period.

-30- 1372

#90107u2940 04/17/1990 ~United Press International

(APRIL 17) UPI - The Reverend Ralph Abernathy... a close friend of the late Martin Luther King and a long-time civil rights activist... died today in Atlanta at age 64.

Officials at Crawford Long Hospital said Abernathy was undergoing a lung scan this morning when his blood pressure began dropping and his heart stopped.

He entered the hospital on March 23rd for what doctors called a ''low sodium condition.'' Family members say Abernathy had been treated for strokes in the past.

Abernathy was King's closest friend prior to King's assassination in 1968. In 1957, he helped King found the Southern Christian Leadership Conference.

Abernathy caused an uproar in the civil rights community last fall with a controversial autobiography that mentioned King's alleged extramarital affairs.

Abernathy defended the book, titled ''And the Walls Came Tumbling Down,'' saying that if he omitted mention of his friend's known ''weakness for women,'' it would have made the book less credible.

The current head of the S-C-L-C, the Reverend Joseph Lowery, said Abernathy's death was unexpected. He said- ''A stalwart soldier in the army of justice has fallen.''

New reports from the government show more indications of a slowing economy.

Rising mortgage rates are given as the reason for a nine-point-three percent drop in construction of new single-family homes and apartments last month. It follows a seven-point-one percent drop in February.

The March decline was the worst in more than one year. And it came as the issuance of new building permits dropped to their lowest level since October of 1982. The permits are the first step taken toward future construction.

At the same time, inflation was up on the consumer side of the equation last month.

The one-half of one percent increase would put retail prices up five-point-two percent if carried out for an entire year. Two-thirds of the March increase came on higher housing and clothing prices.

Mixed in with all of this is word that average weekly earnings for March were up to 343 dollars 23 cents. That breaks down into an average hourly wage of nine dollars 92 cents.

#90107u2980 04/17/1990 ~United Press International

PANAMA CITY, PANAMA (APRIL 17) UPI - Panama and the United States signed an accord Tuesday establishing a wide-ranging program to fight drug trafficking and drug consumption in Panama, the U.S. Embassy announced.

Under the one-year agreement, signed by U.S. Ambassador Deane Hinton and Panama's vice minister of government and justice, Ramon Lima, Panama will receive $465,000 in U.S. funds.

The money is earmarked to help Panama reduce consumption, cultivation and trafficking of drugs, the embassy said in a statement.

Drug education and the reduction of money laundering through the Panamanian banking system are also primary goals of the agreement, the statement said.

The agreement calls for the United States to supply equipment and transportation for special Panamanian anti-drug police units to carry out operations and investigations.

In the past 10 years, drug trafficking and money laundering in Panama flourished because the country's bank secrecy laws allow customers to hold unnumbered accounts.

Former military chief and de facto ruler Manuel Antonio Noriega is awaiting trial in Florida on charges of drug trafficking and money laundering.

In 1988 and 1989, Panama was one of the few countries that did not receive certification by the United States as a nation working with the U.S. government to combat drug trafficking, a measure required for countries to become eligible for most U.S. foreign aid programs.

The government of Guillermo Endara received U.S. certification earlier

this year after signing an agreement in January to work with U.S. officials in the fight against drugs.

-30- 1820

#90107u2986 04/17/1990 ~United Press International

(APRIL 17) UPI - The Supreme Court ruled today that the First Amendment guarantee of religious freedom does NOT protect people who use drugs as part of religious ceremonies.

The court ruled 6-3 in an Oregon case involving two drug abuse counselors who were fired for using peyote during American Indian religious ceremonies. The counselors sought unemployment benefits, claiming the First Amendment protected their use of the drug.

The court rejected that argument, but added that the Constitution does NOT prohibit states from granting such protection if they wish.

Justice Antonin Scalia, writing for the majority, noted that a number of states already allow sacramental use of peyote. But he said that does NOT mean such allowances are ''constitutionally required.''

The two plaintiffs have been collecting unemployment benefits for some time. Oregon officials say they haven't decided if they will try to get the money back.

Public interest groups are launching a one-Millon-dollar fight to radically reform financing rules for congressional races.

A sweeping campaign will open later this week with T-V, radio and print ads. The coalition hopes to gain wide support for a plan to publically finance congressional campaigns.

The reform will target public action committees, which coalition members say inappropriately influence Congress with campaign contributions.

In recent years, congressional advocates of campaign reform have proposed similar plans, only to see them die on the Senate floor. But continuing public complaints have made Congress more sensitive to the idea of public-funded reform and may force a compromise this time around.

The ads prepared by the groups ask people to call a 900 telephone number... at five dollars a call... to receive information on how to push for public financing.

-30- 2013

#90107u3218 04/17/1990 ~United Press International

(APRIL 17) UPI - Lithuania's president today called Moscow's order to cut natural gas shipments to the republic a ''brutal'' move. The reduction comes after Lithuania defied the Kremlin's order to withdraw its independence legislation.

President Bush met at the White House today with the new president of Honduras, Rafael Leonardo Callejas. They discussed the democratic reform taking place in Central America and urged contiuned U-S aid for the region's economic recovery.

A new study by the state of New York says nearly one in five college women shows signs of alcohol dependency. The study by the Division of Alcoholism Abuse says drinking by college women age 23 or younger is twice that of their non-college peers.

More violence in the Greyhound strike. A bomb exploded today at the same Greyhound depot in Redding, California, where a striking driver was killed by a bus last month. Police say today's blast caused NO injuries and NO serious damage.

South African President Frederick de Klerk has rejected any idea of black majority rule as a solution to his country's racial conflict. He says his vision for a new South Africa includes constitutional ''power sharing.''

In Nicaragua, Contra leaders are preparing to meet President-elect Violeta Chamorra to discuss a timetable for Contra disarmament. A delegation of Contra leaders arrived in Managua today.

Massachusetts Congressman Barney Frank says he will run for re-election even though the House ethics committee has yet to rule on its investigation into his relationship with a male prostitute. Frank said he announced his intentions in order to meet a May 8th filing deadline.

Officials in New York City say actress Greta Garbo's body has been cremated secretly, according to her wishes. A spokesman for Campbell's Funeral Chapel says the cremation took place at an undisclosed time and place. Garbo died onSunday in New York of kidney disease.

-30- 2110

#90107u3368 04/17/1990 ~United Press International

(APRIL 17) UPI - Moscow apparently is standing by its threat to cut supplies to rebellious Lithuania. The Soviet Union said today it's reducing shipments of natural gas to the republic because Lithuania refuses to cancel independence legislation. In a report that did NOT mention the gas reduction, the Soviet news agency Tass said Lithuania's President Landsbergis told his Parliament- ''There is headway toward dialogue'' with Moscow, ''despite difficulties.''

Congress returns from its Easter Break tomorrow to begin what is expected to be a long and ugly all-out partisan war. The expected battles will be over the 1991 fiscal budget, campaign finance reform, anti-crime measures and other legislation. President Bush is adding fuel to the fiery agenda. He's trying to push through a more than one-half-BILLION-dollar aide package to Panama and Nicaragua.

For the second consecutive day, Oklahoma teachers stayed out of the classroom as part of a demonstration for education reform and higher salaries. The teacher walkout started yesterday and is scheduled to continue through Friday, with daily rallies and picket lines encircling the state's capitol. Nearly 350-thousand students... 60 percent of all students... stayed home as well.

''A stalwart soldier in the army of justice has fallen.'' That's what Southern Christian Leadership Conference head Joseph Lowery said today following the death of the Reverend Ralph Abernathy. The civil rights pioneer died today in Atlanta of cardiac arrest, at age 64. He was a close friend of the late Dr. Martin Luther King Junior and helped him found the S-C-L-C in 1957.

Democratic reform took another step forward in Nepal today. The new prime minister-designate met with the king and later said a Cabinet led by the opposition will be installed on Thursday. The new Cabinet is part of an interim government authorized by the king following two months of bloody pro-democracy demonstrations.

#90107u3678 04/17/1990 ~United Press International

(APRIL 17) UPI - Moscow says it's sharply cutting natural gas supplies to Lithuania, a move the republic's president calls ''brutal.'' But President Vytautas Landsbergis says Lithuania will survive, and so will its push for independence. In a report by the Soviet news agency Tass, Landsbergis says demands for cancellation of Lithuania's independence laws are ''impractical'' and are aimed at postponing talks on the republic's secession.

The Justice Department says 400-Million dollars in Colombian drug profits was deposited in accounts in 173 U-S banks, and the government is taking steps to freeze those accounts. Federal prosecutors ordered the banks, most in Florida and New York, to turn over financial records on the accounts. A Customs official in Miami says some of the banks ''may be culpable,'' and arrests might be made.

A witness at the Manhattan fraud trial of Imelda Marcos tesfified the former Philippines first lady and her husband kept Swiss bank accounts

registered under false names. The revealing documents allegedly were discovered at the Marcos' palace shortly after the couple fled the 1986 revolution. Imelda Marcos is charged with plotting, along with her late husband, to divert money stolen from the Philippine treasury into investments around the world.

Hundreds of fighters from two rival Shiite Moslem groups today battled in the streets of at least five heavily populated neighborhoods of west Beirut. Authorities also report intermittant clashes in Christian east Beirut, where opposing forces have engaged in heavy fighting since January 31st. The latest fighting for control of Lebanon's divided Christian and Moslem communities has left at least 13 people dead and 47 wounded.

#90107u3960 04/17/1990 ~United Press International

(APRIL 17) UPI - Natural gas apparently is still flowing from the Soviet Union to Lithuania, despite a telegram from Moscow saying the supply would be cut. A Lithuanian government spokeswoman says the republic's oil supplies apparently also are threatened. She says an oil refinery in Lithuania got a call from Moscow... saying oil supplies would be cut off tomorrow. The moves are the Kremlin's response after the Baltic republic defied an ultimatum to cancel independence laws.

President Bush says he's watching the situation in Lithuania ''very closely'' to see if the Soviet threats are carried out. He says the United States is considering ''appropriate responses,'' but he did NOT specify. Bush added that what is needed now is ''dialogue, discussion and a peaceful resolution'' of the situation. His comments came during a picture-taking session at the White House prior to a meeting with the Honduran president.

Civil rights leaders Joseph Lowery, Charles Evers and others mourned the loss of the Reverend Ralph Abernathy, who died in Atlanta today at age 64. Lowery, head of the Southern Christian Leadership Conference that Abernathy co-founded in 1957, called him ''a stalwart soldier in the army of justice.'' Evers, the brother of assassinated activist Medgar Evers, said Abernathy will ''be greatly missed.'' Philadelphia Mayor Wilson Goode called him ''one of the greatest civil rights leaders in the country'' and said his death is a ''loss for America.''

South African President Frederik de Klerk today gave a clear indication of his position as he prepares for next month's talks aimed at ending the nation's racial conflict. In a speech to Parliament, he admitted a majority rule is ''particularly attractive'' to the country's 28-Million blacks, but is ''unacceptable'' to the white minority. De Klerk, who previously unveiled a sweeping racial reform program, says a power-sharing arrangement is the only solution ''fair to all.''

#90107u3975 04/17/1990 ~United Press International
(APRIL 17) UPI - The First Amendment guarantees freedom of religion. But the Supreme Court today said the Constitution does NOT protect those using drugs as part of religious ceremonies. The court's 6-3 ruling stems from an Oregon case involving two drug abuse counselors. The two sought unemployment benefits after they were fired for eating the hallucinogen peyote as part of American Indian religious ceremonies in 1983 and l984. The court decided the state could, indeed, deny unemployment benefits.

John Dunne officially became the Justice Department's civil rights chief today. The 60-year-old Dunne spent his career in the New York state legislature and won Senate confirmation, despite his lack of experience in civil rights law. He was sworn in by long-time personal friend, Attorney General Thornburgh, who pushed Dunne's nomination to fill the post left vacant for more than one year.

In Dallas, the government scored a victory today against a company that produces so-called miracle drugs for baldness, impotence and weight loss. The Federal Trade Commission obtained court orders barring sale of the products made by Twin Star Productions of Scottsdale, Arizona. The firm had promoted Foliplexx as a baldness cure... Y-Bron as a cure for impotence... and Diet Patch for weight control. The products had been touted by celebrities including former President Reagan's son, Michael.

A spokesman for a Manhattan funeral chapel says the body of actress Greta Garbo was cremated at undisclosed time and place at the order of her family. Thus, the legendary movie star remained as private in death as she was in life. Garbo died Sunday at age 84 at New York Hospital of kidney disease. The Swedish film star retired from films in 1941 at the height of her career and went on to lead a reclusive life.

#90107u4125 04/17/1990 ~United Press International
(APRIL 17) UPI - The Soviets begin economic pressure against Lithuania... U-S considers ''appropriate responses''... civil rights leader Ralph Abernathy dies... and a possible link between heredity and alcoholism. U-P-I has it all, next:

Lithuania's President Landsbergis says he's confident Lithuania will survive, despite Moscow's statement that it's cutting off natural gas and possibly oil supplies to the rebellious republic.

Landsbergis told British radio today that Lithuanians have survived in poor conditions before, and will survive again. In an U-S interview , he

said- quoting here- ''the future is on our side.''

Moscow said it cut natural gas deliveries to Lithuania because the republic ignored an ultimatum to cancel independence legislation. A Lithuanian government spokeswoman says oil supplies reportedly will be cut off tomorrow.

Lithuania has been talking to Scandinavian and other Western countries about helping out. But Western industry analysts say there's NO indication of any plans to help replace curtained supply of Soviet fuel.

President Bush issued a warning to the Kremlin today, saying the United States is considering ''appropriate responses'' if Moscow carries out its threats of an economic embargo against Lithuania.

He says he's watching the situation in Lithuania ''very, very closely'' to see if Moscow's announcement of cuts in natural gas is implemented.

Bush declined to say what specific actions the United States might take. But Senate Democratic leader George Mitchell, who met today with Bush, said there are several potential agreements between Washington and Moscow that might be re-considered, depending on what happens.

Senate Republican leader Robert Dole also met with Bush today. He said they did NOT discuss Lithuania, but added- quoting- ''Obviously there are things we can do in Congress, things the administration can suggest with respect to trade agreements,'' for example.

One option U-S officials have mentioned is cancellation of U-S-Soviet trade talks.

-30- 2230

#90107u4153 04/17/1990 ~United Press International

(APRIL 17) UPI - Tributes are pouring in from across the nation for civil rights leader the Reverend Ralph David Abernathy, who died UNexpectedly today at age 64.

Reverend Joseph Lowery reacted by saying- quote- ''A stalwart soldier in the army of justice has fallen.'' Lowery is president of the Southern Christian Leadership Conference, the civil rights organization once headed by Abernathy and the late Martin Luther King, Junior.

Abernathy entered an Atlanta hospital March 23rd for treatment of low sodium. He died of cardiac arrest after his blood pressure dropped during a lung scan.

Martin Luther King the Third and other black leaders filed into the

hospital to comfort Abernathy's family.

National Democratic Party Chairman Ron Brown says- quote- ''America has lost a leader... and the Democratic Party mourns the passing of a devout and courageous man.''

Dr. William Gibson, who chairs the N-double-A-C-P's national board of directors, does NOT believe Abernathy's impact will end with his passing. In Gibson's words- ''Abernathy will continue as a symbol of the civil rights movement even in death.''

South African President Frederik de Klerk today unveiled the philosophical under-pinnings of his vision for a new constitution designed to end the nation's racial conflict.

In an address to a joint session of Parliament, de Klerk rejected black majority rule in South Africa and declared power sharing as the only solution ''fair to all.''

The speech came in advance of preliminary negotiations with the African National Congress next month. De Klerk says he believes a power-sharing arrangement could be reached during the A-N-C talks.

It was de Klerk's second major address to parliament in Cape Town since his February unveiling of a sweeping racial reform program. The movement included lifting a 30-year ban on the A-N-C and other organizations... and releasing black leader Nelson Mandela after 27 years of imprisonment.

But de Klerk also lashed out at the A-N-C for its ''continued commitment to armed struggle... and at the right-wing Conservative Party for stirring white hysteria. He also reaffirmed that any new constitution will be submitted to a referendum.

-30- 2406

#90107u4180 04/17/1990 ~United Press International

(APRIL 17) UPI - A delegation of Contra leaders arrived Managua today for talks with Nicaraguan President-elect Violeta Chamorro . Representatives of the outgoing Sandinista government also were present to discuss a time-table for disarmament of the rebels.

The delegation arrived amid repeated demands by outgoing President Daniel Ortega for the Contras to lay down their arms before April 25th, when his Sandinista government transfers power to Chamorro's 14-party coalition.

The national Sandinista Workers Union joined in the disarmament call.. threatening a nation-wide strike if the Contras fail to respond by April 25th.

But the head of the Contra delegation says ''the process will take time,'' indicating the rebels would NOT be able to disarm prior to Chamorro's inauguration. He also wants Chamorro to gradually disarm the Sandinista army, as well as the Contras.

The Bush administration took its case against flag burning to the Supreme Court today, arguing that destroying the Stars and Stripes should NOT be protected as free speech.

Solicitor General Kenneth Starr told the court that physical destruction of the American flag amounts to ''a violent assault on the shared values that bind our national community.''

The argument comes after the high court agreed earlier this month to decide the constitutionality of an anti-flag burning law enacted by Congress last year. That law was passed in anger after the Supreme Court ruled last June that burning the flag as a protest is a protected form of free speech.

President Bush has pushed for an amendment to the constitution banning flag burning, but Congress passed the Flag Protection Act instead.

Earlier this year, the new law was struck down by federal judges in Washington state and the District of Columbia, in two separate cases.

#90107u4215 04/17/1990 ~United Press International

(APRIL 17) UPI - The AIDS virus might be more prevalent among teen-agers than previously thought.

A federal study released today shows that about one in three-thousand teen-agers who applied for military service tested positive for the virus. The study by Colonel Donald Burke of Walter Reed Army Medical Center in Washington focused on about one-Million teen-agers who applied for military service between October 1985 and March 1989.

Burke and his colleagues say the results show that the H-I-V virus ''is a real and immediate threat to teen-agers in the United States.''

A separate study commissioned by Congress shows that the majority of scientists surveyed think the level of federal funding for AIDS research is about right.

The nation-wide survey of 138 scientists by the Office of Technology Assessment found that 46 percent thought the funding level was enough. 31 percent said it was too low, 18 percent said it was too high, and five

percent had NO opinion.

Scientists for the first time have found a link between a particular gene and the presence of alcoholism in individuals.

A study of tissue from the brains of 70 human cadavers concludes the gene- dopamine D was present in 77 percent of alcoholics and absent in 72 percent of NON-alcoholics. The report published in the Journal of the American Medical Association.

The gene is believed to influence how an individual's brain responds to alcohol... perhaps making drinkers need more alcohol to get a sense of pleasure.

The disovery provides strong new evidence the disease affecting 18-Million Americans is caused at least partly by heredity.

The findings could lead to better ways to identify the Millions of people at risk of becoming alcoholics and a greater understanding of the underlying causes of the disease. The study could also lead to new treatments and preventive measures.

Another study conducted by the New York state Division of Alcoholism and Alcohol Abuse reveals the drinking patterns and dangers among college women.

The research indicates drinking by college women aged 23 or younger is twice that of their NON-college peers.

The report says nearly one in five co-eds show signs of alcohol dependency. Substance abuse experts say problem drinking contributes to what they call a rash of health, sexual and financial problems.

#90107u4366 04/17/1990 ~United Press International

(APRIL 17) UPI - President Bush isN'T saying what the United States might do if Moscow follows through on its threat of an economic embargo against independence-minded Lithuania. All he would say today was he's considering ''appropriate responses.''

The Soviet Union said today it was sharply curtailing deliveries of natural gas to Lithuania because the republic ignored an ultimatum to repeal its independence laws. Oil supplies reportedly will be cut tomorrow.

A delegation of Contra leaders began talks today in Managua with members of Nicaragua's outgoing and incoming government. The rebels and the Sandinista Front immediately disagreed over the date for the rebels to

disarm.

Civil rights leaders are mourning the death of the Reverend Ralph Abernathy, who died today in an Atlanta hospital at the age of 64. Coretta Scott King... widow of Martin Luther King Junior... noted Abernathy's ''pioneering work in the movement'' which helped ''empower Millions of black voters.''

The Bush administration told Congress today the United States will NOT rejoin the United Nations Educational, Scientific and Cultural Organization... calling the agency inefficient and biased. The United States withdrew from UNESCO in 1984.

A series of aftershocks to an earthquake February 28th jolted parts of Southern California today, but caused NO serious damage or injuries. The shakers were centered near Upland, 36 miles east of downtown Los Angeles.

#90107u4555 04/17/1990 ~United Press International

(APRIL 17) UPI - Lithuania's President Landsbergis says he wants the United States to take a more definitive stand on Lithuanian independence. The comment came as Moscow made clear it apparently plans to carry through on its threat to cut off vital supplies to the rebellious republic. The Soviet Union said it's cutting natural gas because Lithuania defied an order to cancel its independence laws. President Bush says he's watching to see if shipments actually are cut off, and is considering ''appropriate responses.''

Talks between Contra leaders and members of Nicaragua's outgoing and incoming governments began today with a disagreement over the date for the rebels to disarm. Sandinista negotiators believe the disarming can be achieved by the April 25th inauguration of President-elect Violeta Chamorro. But the head of the Contras says demobilization of all rebels is NOT likley before the transition of power.

Diplomatic sources report the United States and Soviet Union are quietly trying to cool rising tensions between India and Pakistan. India contends Pakistan is triggering an insurrection in Kashmir state as part of a plan to realize its long-standing claim to the predominantly Moslem region. The source indicates Washington and Moscow are acting independently, but are sending one message- the need for restraint and dialogue.

President Bush opened the White House conference on climate change today by calling for more research on global warming and ways to cut pollution. He said there are ''many uncertainties'' about global warming, and he warned against hasty pollution control measures that might needlessly damage economic growth. Some European delegates criticized the speech...

saying Bush's cautious approach is holding up international action on global warming.

-30- 1975

#90107u4569 04/17/1990 ~United Press International

(APRIL 17) UPI - The former chairman of the failed Lincoln Savings and Loan Association today asked a federal judge in Washington, D-C, for permission to operate the Irvine, California, thrift under judicial supervision. Charles Keating says he could invest ''every ounce'' of his energy into the S-and-L... but NO money, because he's ''completely broke.'' Lincoln was seized last April by the government, which also filed a one-BILLION-dollar fraud and racketeering suit against Keating.

There was more damaging testimony today in New York in the racketeering trial of former Philippines first lady Imelda Marcos. A Philippine shipping official said he deposited 25-Million dollars over 10 years in accounts managed by a man prosecutors say was the ''personal Swiss banker'' for the Marcos family. The deposits went to a bank in Geneva, Switzerland. Marcos is accused of plotting, along with her late husband Ferdinand, to divert money stolen from the Philippine treasury into investments in Manhattan and around the world.

A 10-month-old boy who was orphaned in the San Francisco earthquake found a new home today- exactly six months after his parents were killed. A judge gave permanent custody of James Brown to Arthur and Tonia Lewis, ranchers from Chowchilla, California. They're cousins of the boy's mother. The decision came after family members met behind closed doors for two hours and ended their dispute over custody of the child.

A May 1st hearing has been scheduled so a Beverly Hills, California, judge can determine whether Zsa Zsa Gabor is abiding by the law. Gabor was sentenced to three days in jail and ordered to perform 120 hours of community service for slapping a Beverly Hills police officer during a traffic stop last June. If the judge learns she failed to comply, Gabor could be sentenced to additional jail time... which she's yet to serve anyhow, pending an appeal.

#90108b0006 04/18/1990 ~Business Wire

TOLEDO, OH (APRIL 18) BUSINESS WIRE - Dana Corp. today reported first quarter 1990 sales and earnings that were improved over the preceding quarter, but below the first quarter of 1989.

First quarter 1990 sales were $1.27 billion or three percent below the 1989 first quarter sales of $1.30 billion. Net income for the first quarter of 1990 was $23.1 million while earnings per share were $0.56.

Net income for the same period last year was $38.9 million and earnings per share were $0.96.

Net income and earnings per share for the first quarter of 1989 included the effect of the $15 million payment received in connection with the termination of a merger agreement. Offsetting the payment were expenses relating to the proposed merger and an increase in certain reserves. The net effect of these non-recurring items was to increase after-tax income by approximately $4 million, or ten cents per share for the first quarter of 1989.

Southwood J. Morcott, Chairman and Chief Executive Officer, said, ''Sales and earnings for this first quarter, while lower than a year ago, are better than reported for the final quarter of 1989. Making that comparison: sales were up 13 percent and net income increased 12 percent from the previous quarter.

''With the exception of the highway vehicle original equipment market, which was down almost 15 percent from the strong first quarter of 1989, the combined sales of components to Dana's other markets improved compared to the first quarter of last year. The weakness in the highway vehicle market was as we had forecasted it to be and affected our sales and earnings accordingly. We are, however, seeing signs that this market is beginning to improve as we move into the second quarter.

''Our objective during the past decade has been to balance the highway vehicle market with global growth in our other distribution and industrial markets. The continuing strength in these areas, plus the improvement we expect in highway vehicles, should improve results as the year goes on.''

#90108b0018 04/18/1990 ~Business Wire

SAN JOSE, CA (APRIL 18) BUSINESS WIRE - In a move designed to consolidate financing and streamline operations of its U.S. holdings, Rohm Co. Ltd., of Kyoto, Japan, announced a sweeping reorganization of its electronics companies.

Three previously independent subsidiary companies, Exel Microelectronics Inc., Rohm Corp., Irvine, Calif., and Rohm U.S.A. Inc., will now be combined into one company, to be known as Rohm Corp.

Rohm Corp., in turn, will be solely owned by a new holding company, Rohm U.S.A., that will control the new Rohm Corp. as well as Rohm Co. Ltd.'s existing interest in publicly traded EXAR Corp. and in Xetel Corp., a

surface-mounted board assembler located in Austin, Texas.

The new Rohm Corp. will be headed by Kozo Sato, chairman of the board of Rohm U.S.A., and managing director of international operations for Rohm Co. Ltd. Each of the new divisions will report directly to Sato and continue to be operated as independent divisions under the Rohm Corp. banner. Exel Microelectronics Inc. will now be known as Exel Microelectronics, a division of Rohm Corp.

Exel management, led by Todd Kobayashi will remain intact. In addition, Kobayashi is promoted to the board of directors of Rohm Corp. Points out Edwin Chow, Exel vice president and general manager, ''This move will strengthen Exel's efforts to sell into the high volume OEM market in the United States. We are already successfully selling in Japan, the Far East and Europe using the Rohm sales organization as well as Exel's own representative sales force.

''Now we can use Rohm's clout in the U.S. too. Since Rohm is already known as a successful billion dollar supplier of high volume, high reliability components to major OEMs world-wide, we gain greater access to high volume customers. Now that we are an official division of Rohm Corp. we have greater credibility and a solid financial commitment when pursuing high volume E2PROMs sales in the U.S.''

#90108b0032 04/18/1990 ~Business Wire

AKRON, OH (APRIL 18) BUSINESS WIRE - Myers Industries Inc. (AMEX:MYE) today reported all-time record performance for its first quarter ended March 31, 1990.

It is the 17th consecutive quarter of higher year-to-year net sales and 16th consecutive quarter of higher year-to-year net income and net income per share results.

For the first quarter of 1990, net sales of $45,250,507 were 5 percent higher than the $43,244,896 recorded for the same year ago period. Net income for the period was $1,994,617, a 24 percent increase over the same period last year when the company earned $1,606,032. Net income per share for the 1990 quarter was 30 cents, a 25 percent increase over the 24 cents per share earned in the year earlier period.

Stephen E. Myers, president and chief executive officer, said: ''We are encouraged by the company's performance in the first quarter of 1990 and are optimistic about the business outlook for the balance of the year.

''In 1990, the company will increase its capital expenditures to continue expansion of facilities for both manufacturing and distribution. We officially opened a Myers Tire Supply branch warehouse in Milwaukee, Wisconsin, during the first quarter. On May 1, 1990, we will open another branch warehouse in Nashville, Tennessee. This makes 38 locations in the United States and two in Canada,'' Myers said.

Myers Industries is a manufacturer of polymer and metal products used in material handling and small parts storage, tire repair and retreading, automotive and construction applications and a nationwide wholesale distributor of tire repair and service products.

#90108b0045 04/18/1990 ~Business Wire

SAN ANTONIO, TX (APRIL 18) BUSINESS WIRE - Valero Natural Gas Partners L.P. (NYSE:VLP) Wednesday reported first quarter 1990 net income of $5.4 million, or 27 cents per limited partner unit, compared to $4.6 million, or 24 cents per limited partner unit, for the first quarter of 1989.

First quarter 1990 partnership operating income of $19.9 million was higher than the $18.2 million reported for the first quarter of 1989. A decline in operating income from natural gas pipeline operations was offset by a large increase in natural gas liquids (NGL) operating income from $.4 million for 1989's first quarter to $5.0 million for the quarter

just ended.

NGL operations benefitted from the severe cold weather at the end of 1989 which dramatically increased prices for NGLs in January. Although NGL prices fell with the return of warmer weather, 1990's first quarter NGL operating income surpassed operating income from those operations for the entire year of 1989.

Following the December cold spell, the absence of virtually any cold weather throughout a large portion of the country during the first quarter negatively impacted natural gas prices and margins, resulting in a reduction in first quarter natural gas pipeline operating income from $17.8 million for last year's first quarter to $14.9 million this year.

It appears that the first three months of 1990 may have been the warmest first quarter in the past 50 years with average heating degree day accumulation in the partnership's major market cities 40 percent below normal for the first three months of the year.

Valero Natural Gas Partners L.P. owns a 7,100-mile intrastate network of natural gas transmission and gathering lines throughout Texas, purchases and sells natural gas to distribution companies, electric utilities, other pipelines and industrial customers throughout the United States, and provides gas transportation services to third parties.

The partnership also owns 11 gas processing facilities and markets natural gas liquids to refineries, petrochemical plants and domestic fuel distributors.

#90108b0050 04/18/1990 ~Business Wire

IRVINE, CA (APRIL 18) BUSINESS WIRE - Homes stayed on the market longer during the last six months of 1989, as prospective homebuyers in 14 south Orange County communities did more comparison shopping than during the first half of the year, according to a year-end survey released Wednesday by Grubb & Ellis Residential Brokerage Services (NYSE:GBE).

In the majority of communities surveyed however, buyers found average sales prices to be higher than during the first six months of the year.

According to the study, the average number of days homes were on the market prior to being sold in the 14 south Orange County markets polled was 79 days for the last six months of 1989, up from 58 days during the first six months of the year. For the same period a year ago, that

figure stood at 54 days.

However, officials of Grubb & Ellis noted that these figures varied widely within the 14 communities surveyed and ranged from a low of 55 days in Newport Beach to a high of 121 days in San Clemente.

Homes sold fastest in the Newport Beach area, even though the area posted the second-highest average sales price of the communities surveyed. Homes in Newport Beach stayed on the market an average of 55 days and the majority of homes sold were in the $500,000-$600,000 range, the study noted.

According to the study, homebuyers found higher average sales prices in the majority of communities surveyed during the second half of 1989.

Biggest gains in price for the time period were reported in Laguna Beach/South Laguna, where the average sales price rose from $481,111 during the first six months of 1989 to $625,841 by yearend.

Another coastal community, Capistrano Beach, reported the next largest price gain, with the average sales price increasing from $280,000 during the first half of 1989 to $352,000 by the end of the year.

Grubb & Ellis officials noted that average sales figures can sometimes be skewed by extremely large or small transactions. To provide a better picture of the communities in its survey, the firm has begun tracking median prices as well as average sales prices and will report both in the future.

In the majority of the 14 communities surveyed, the greatest percentage of homes were sold for between $200,000 and $300,000. Homebuyers were able to find the lowest average sales prices in Rancho Santa Margarita at $166,000 and El Toro at $185,000.

#90108b0057 04/18/1990 ~Business Wire

SACRAMENTO, CA (APRIL 18) BUSINESS WIRE - McClatchy Newspapers Inc. (NYSE:MNI) reported first quarter earnings of $2.4 million, or 8 cents per share, compared to $4.85 million, or 17 cents per share, in the first quarter of 1989.

The company cited as major contributors to the decline a weakening of advertising linage, particularly in the month of March, at most of its newspapers; startup losses from a newsprint mill partnership; and costs associated with the acquisition of six newspapers bought Jan. 1 in South Carolina.

Revenues rose 9.4 percent to $95.1 million compared to $86.9 million in 1989. Advertising revenues increased 9.4 percent to $74.8 million, and circulation revenues increased 11.9 percent to $17.1 million. Excluding the new South Carolina operations, total revenues grew 5.1 percent to 91.4 million, reflecting a 4.9 percent gain in advertising revenues and an 8.4 percent rise in circulation revenues.

Operating income was $6.6 million compared to $8.1 million in the 1989 quarter. The decline in operating income was largely due to new depreciation and amortization expenses and advertising revenue weakness in some markets. However, operating cash flow (operating income plus depreciation and amortization) was unchanged at $14.2 million for both quarters.

Erwin Potts, president and chief executive officer of McClatchy, said the first quarter performance was below company expectations, primarily be1/2 doing almost as well as expected in January and February, but March took a sudden dive. We're still analyzing what happened and will have to trim some costs if things don't turn up in April.''

McClatchy is one of five newspaper companies in partnership with a Canadian newsprint manufacturer to produce newsprint at a newly constructed mill in Usk, Wash. The mill began operating in December of 1989 and is expected to incur operating losses for several years.

Headquartered in Sacramento, McClatchy Newspapers Inc. operates 11 daily

newspapers, eight non-daily community newspapers and a group of senior citizen tabloids in California, Washington, Alaska and South Carolina.

Three daily newspapers, The Beaufort Gazette, The (Hilton Head) Island Packet and The (Rock Hill) Herald, and three non-daily newspapers, the Clover Herald, Yorkville Enquirer and Lake Wylie Magazine, located in South Carolina were acquired on Jan. 1.

DFW AIRPORT, TX (APRIL 18) BUSINESS WIRE - AMR Corp. parent company of American Airlines Inc., Wednesday (April 18) reported a first quarter net loss of $19.3 million for the period ending March 31, 1990, down from last year's first quarter net earnings of $101 million.

AMR's loss per share (both primary and fully diluted) was 31 cents compared to earnings of $1.60 (both primary and fully diluted) per share a year ago. Revenues for the three-month period amounted to $2.7 billion, a 9.7 percent increase from the $2.5 billion earned in the first quarter a year ago.

''We were very disappointed with our first quarter results,'' said Robert L. Crandall, AMR chairman and president. ''Although the first quarter is always weak, this is the first loss that the corporation has reported in the last nine quarters; our results can only be called unsatisfactory.''

A major portion of the year-over-year deterioration can be attributed to higher fuel costs; additionally, labor costs and other expenses were up, and as a result, unit costs were up 8.7 percent. Conversely, unit revenues were flat due to the company's inability to raise prices.

AMR's operating loss for the first quarter was $8.2 million, down from last year's operating income of $156.7 million. Operating expenses grew to $2.7 billion from $2.3 billion, a 17.5 percent increase over the same period last year. American's yield (the average amount of revenue earned per passenger mile) was 12.73 cents in the first quarter of 1990, the same as in 1989.

''Cargo volumes are strong,'' Crandall said. ''Cargo continues to show double-digit growth--primarily due to the increasing service quality and the good job being done by our people.

''The growth of passenger traffic in the international markets -- particularly Europe, the Caribbean and Asia -- was outstanding, but growth

in domestic markets was weak, and the domestic load factor declined year over year,'' Crandall added.

American flew 17.5 billion scheduled passenger miles in the first quarter compared with 16.2 billion passenger miles a year ago. American's available seat miles increased from 27.0 billion to 29.2 billion. Overall this quarter's load factor of 59.9 percent was unchanged from the same period in 1989.

The first quarter break-even load factor of 60.6 percent represented a 5.8 point increase from a year ago when the break-even load factor was 54.8 percent.

LOS ANGELES (APRIL 18) BUSINESS WIRE - MagneTek Inc., a leading manufacturer of electrical equipment, Wednesday announced the results of the company's fiscal 1990 third quarter and first nine months, which ended March 31, 1990.

Revenues for the quarter were $286,495,000, compared to $247,439,000 in the third quarter of fiscal 1989. Net income was $11,012,000 or 47 cents per share, up from $7,465,000, or 37 cents per share, in the comparable period in 1989.

Revenues for the first nine months of fiscal 1990 totaled $774,156,000 against $704,237,000 last year. Net income for the nine months amounted to $22,198,000, or 93 cents per share, up 65 percent from $13,486,000, or 62 cents per share in 1989.

Commenting on the results, MagneTek President Frank Perna Jr. noted that sales, profits, profit margins and new order bookings continue well ahead of last year's pace. He said that sales and profits of MagneTek's Ballasts & Transformers business segment are improving primarily as a result of increased demand for energy-saving lighting ballasts and consolidation of the results of MagneTek Electric, Waukesha, Wis., acquired from Asea Brown Boveri in the third quarter. Motors & Controls segment sales and profits have also improved, Perna observed, largely because of resurgent fractional horsepower motor sales and continued strong growth in sector operations serving the electric utility industry.

Perna remains optimistic about the outlook for the full fiscal year, which ends June 30, noting that MagneTek's second half has traditionally been its strongest revenue and profit producing period.

Founded in 1984, MagneTek manufactures lighting ballasts, transformers, motors, generators, drives and controls, and provides electrical equipment repair and rebuilding services to utilities and industrial customers. The company operates 50 manufacturing and service facilities throughout North America and overseas, and employs some 14,000 associates. Listed on the New York Stock Exchange (MAG), MagneTek recorded sales of $962 million for its fiscal year ended June 30, 1989.

VALENCIA, CA. (APRIL 18) BUSINESS WIRE - The Newhall Land and Farming Co. (NYSE/PSE:NHL) Wednesday declared a regular quarterly cash distribution of 20 cents per partnership unit, payable June 4, 1990, to limited partners of record May 4, 1990.

The Newhall Land and Farming Co. has paid uninterrupted quarterly dividends and distributions for 54 years. This distribution represents the 218th consecutive quarterly payment.

Newhall owns and is developing one of the most valuable, large landholdings in the United States -- Valencia, a master-planned community that is twice the size of Manhattan and only 30 miles from downtown Los Angeles.

VALENCIA, CA. (APRIL 18) BUSINESS WIRE - The Newhall Land and Farming Co. (NYSE/PSE:NHL), at its annual information meeting of unitholders Wednesday reported net income of $13.1 million, or 34 cents per partnership unit, for the first quarter ended March 31, 1990.

For the year earlier quarter, net income was $8.4 million, or 21 cents per unit. Revenues totaled $49.3 million, compared with $36.2 million for the three months ended March 31, 1989. Results for the 1989 first quarter have been adjusted for the 2-for-1 unit split effective January 29, 1990.

Thomas L. Lee, chairman and chief executive officer, told unitholders the increase in first-quarter net income was due to record first quarter home closings and the sale of two land parcels for $7.4 million.

Residential home sales continued as the primary contributor to earnings. During the quarter, escrows closed on 162 homes compared with 106 closings in the first quarter of 1989. ''Single family homes and condominiums priced below $250,000 are selling fairly well,'' Lee said, ''while home sales in higher priced categories are weak. On March 31, 1990, 224 homes were in escrow. This compares with 443 homes in escrow or on reservation at the same time last year.

''In the company's Valencia Industrial Center, two parcels totaling 13.2 acres are scheduled to close escrow later this year for approximately $6.5 million. In Valencia Commerce Center, Newhall's newest business park development, 37.6 acres are in escrow awaiting final zoning entitlements and land development work.

''A 62.4-acre parcel was sold to the U.S. Postal Service for $26.8 million. Since land development work remains to be done, it will be accounted for on the percentage of completion basis and is expected to contribute to net income starting in the second half of this year as progress payments are received.

''While real estate sales have declined both nationally and in California, sales of Newhall's moderately priced homes are experiencing continued demand. With this activity and anticipation of further entitlements in Valencia Commerce Center, 1990 should be another successful year.''

Newhall owns and is developing one of the most valuable, large landholdings in the United States -- Valencia, a master-planned community that is twice the size of Manhattan and only 30 miles from downtown Los Angeles.

LOS ANGELES (APRIL 18) BUSINESS WIRE - Ruben F. Mettler, retired chairman of the board and chief executive officer of TRW Inc. received USC's School of Engineering 1990 award for Outstanding Acheivement in Engineering Management at a luncheon held Wednesday at the Hyatt at the Los Angeles Airport.

USC honored Dr. Mettler as a pioneer in bringing a systems engineering perspective to upper management within the space and satellite communications sector. He was cited for his ''extraordinary talent and vision for managing technological change (that) have brought him personal distinction along with worldwide recognition for TRW's products and information services.''

Mettler, who retired from TRW in December of 1988 with 33 years of service including eleven years as chief executive officer, was president and chief operating officer of the company from 1969 to 1977. He remains as a member of the board of directors, a position he has held since 1965.

He joined the Ramo-Woolridge Corp., later named TRW, in 1955 where he was a leading participant in the nation's ballistic missile and early space programs.

Mettler's contributions to business, education and science have included roles as chairman of The Business Roundtable, the National Alliance of Business and chairman of the President's Task Force on Science Policy. He was elected to the National Academy of Engineering in 1965. He is currently a member of the Institute of International Economics and the International Academy of Astronautics.

Gregg E. Brandow, president of Brandow & Johnston Associates, a consulting structural engineering firm, was also honored at the luncheon with the Engineering Alumnus Award for Outstanding Achievement.

Cleveland-based TRW Inc. is an international company that provides high-technology products and services to the space and defense, automotive and information systems markets. The company's 1989 sales totaled more than $7 billion.

WASHINGTON (APRIL 18) BUSINESS WIRE - US Sprint Wednesday announced that it will provide basic and enhanced 800 service for the Internal Revenue Service Taxpayer Assistaram.

The value of the services over the 10-year life of the contract is estimated at more than $450 million, which will result in the largest service order to date under FTS2000, the government's new telecommunications service.

The IRS is one of the largest 800 service users in the country. The taxpayer assistance service handles over 60 million calls a year from the general public in all 50 states.

David Gergacz, chief operating officer of US Sprint's government network systems division, said, ''These enhanced 800 features are examples of the state-of-the-art technologies that FTS2000 can offer government agencies and the taxpayers they serve.

''Taxpayers using the 800 service can enjoy the benefits of an all-digital all fiber-optic network, and the agency can benefit from US Sprint's commitment of top quality service to its customers.''

Robert Walker, chief of the switching systems branch of the IRS, said, ''The majority of our voice traffic already has been moved to the US Sprint network and the service has met all expectations and requirements of the contract. Our internal 800 service is also up and running on the new network and the transition was flawless.''

The General Services Administration awarded 40 percent of the FTS2000 contract for its new Federal Telecommunications System to US Sprint in December 1988. The IRS's enhanced 800 service is an example of the new expanded features to existing services available under FTS2000, such as videoconferencing, facsimile and data.

The old federal telephone system provided only voice services. US Sprint will complete its transition of voice traffic onto its all fiber-optic network by the end of this month.

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company headquartered in Kansas City, Mo.

CLEVELAND (APRIL 18) BUSINESS WIRE - Forest City Enterprises Inc. President Albert B. Ratner announced Wednesday that the company has completed an analysis of the current value of certain of its investment real estate.

Ratner stated that historically the company's results have not reflected the true values of its real estate. Accordingly, a current-value analysis was undertaken to enable its shareholders to have a better understanding of the company's performance and the value of its real estate portfolio.

The current-value analysis included a revaluation of completed properties that have been operating for 12 months or more using a variety of valuation techniques commonly employed in real estate appraisals. Real estate not revalued includes projects under development, land held for development or sale and completed rental properties open for 12 months or less.

The company engaged Landauer Associates Inc., a leading New York real estate appraisal firm, to review its results. After performing its analytical procedures, Landauer issued a letter stating that they are in substantial agreement with the aggregate value estimated by Forest City.

The revaluation equity of Forest City's investment real estate estimated on a pre-tax basis as of Jan. 31, 1990, is as follows.

#90108b0148 04/18/1990 ~Business Wire
SALT LAKE CITY (APRIL 18) BUSINESS WIRE - Alta Gold Co. (NASDAQ:ALTA), a diversified precious and base metals mining and production company headquartered in Salt Lake City, has released audited consolidated results of operations for the nine months ended Dec. 31, 1989.

The report is a consolidation of financial data of Alta Gold's predecessor

companies, Pacific Silver Corp. and Silver King Mines Inc., which were merged on Nov. 24, 1989, with Alta Gold Co. as the survivor. Since Alta Gold is now on a calendar reporting basis, the company's auditors, Arthur Andersen & Co. elected to conclude 1989 financial statements at the end of nine months to provide a clean start for Alta Gold.

Dan S. Bushnell, chairman and chief executive officer, said, ''We welcome the addition of Authur Andersen & Co. and the recommended changes in accounting practices, which will provide our company with added strength and stability.''

Commenting on the changes in accounting procedures implemented by the company, Bushnell said, ''The changes have adversely affected our Current Assets, Stockholders' Equity and Income Statements for 1989 from a purely accounting perspective, and are not the result of any substantive changes in Alta Gold's operations.''

Regarding current assets, $6,245,000 was removed from this classification and has now been shown as ''Restricted Cash Deposits,'' which are on deposit with Mase Westpac Inc., the New York gold bullion banking institution, to insure against potential future margin calls.

Stockholders' equity was affected by the accounting changes when $17,500,000 was removed, representing the 1,588,422 shares of company stock which are held in escrow for Echo Bay Mines Ltd. in connection with the 1988 formation of the Alta Bay Venture.

As per the escrow agreement, Alta Gold has the right to redeem these shares at no cost and have them cancelled on the books since the gold reserves at the Robinson District near Ely, Nev., have reached 1 million ounces. As a result, $9,531,000 worth of this stock, based on fair market value, has been shown as ''Redeemable Stock'' and does not appear as Stockholders' Equity.

Alta Gold's income statement was affected in three ways, said Bushnell. First, management elected to follow the general industry practice of expensing grass roots exploration, rather than capitalizing such work as in the past. The change in policy resulted in $7,622,387 being charged as ''Operating Costs and Expenses,'' thus reducing current income. Projects now in place will be free of the amortization burden of these costs in the future.

In addition, current income was further reduced by $4,200,000 because cash received from the company's hedging program has been shown as deferred until the hedging program is completed.

The company also wrote down $2,524,062 from unrecovered exploration and development costs on three base metal properties, which represents the

only real economic loss for the company during 1989.

Bushnell said, ''Although the changes in accounting practices have negatively impacted the financial statements at this time, it is believed that these changes will produce favorable results of future reportings for the company.''

Commenting on the progress and future prospects of Alta Gold, he said, ''1989 was a year of milestone accomplishments for us, and a year of start-up with the associated trials and tribulations.''

He reflected on 1988, when the company had one gold mining operation, and the fact that four new mines were added last year. Since most mine development and leach pad construction continued well into winter, production from the new facilities was delayed.

During last year, the company also added a world-class base metal underground mine, the Ward Mine located near Ely, which will produce zinc, copper, silver and lead. To process the stockpile of 100,000 tons of ore, Alta Gold remodeled the idled Taylor Mill which began operations in April of this year.

Also last summer, the company reactivated a copper-silver mine in Idaho near the Oregon border. Last year, Alta Gold entered into a joint venture with Salt Lake City-based Mining Services International to construct a sodium cyanide manufacturing facility near Winnemucca, Nev., and that facility is scheduled for opening this spring.

''With all that activity,'' said Bushnell, ''we were still able to complete the merger of Pacific Silver into Silver King, and to successfully settle litigation with Kennecott which resulted in a purchase option paving the way for Alta Gold and our joint venture partner, Echo Bay Mines, to acquire the 12,000-acre Robinson District by next December. Clearly, the work we accomplished in 1989 created a very solid foundation for continued growth.''

He indicated that, despite the typical winter curtailment of open pit mining activities in Nevada, due to weather during January and February, production projections are expected to be met. Alta Gold anticipates the production of gold at an annual rate of 112,000 ounces; 23,000,000 pounds of zinc; 3,000,000 pounds of copper; 1,500,000 pounds of lead and 300,000 ounces of silver for 1990.

KANSAS CITY, MO (APRIL 18) BUSINESS WIRE - Oppenheimer Industries Inc. (AMEX:OPP) Wednesday announced that it has signed a definitive agreement for the sale of a potentially controlling interest in the company to a group composed of Wespac Investors Trust III and U.S. Real Estate Advisors Inc.

In the initial step of a two-step transaction, Oppenheimer Wednesday sold 825,000 shares of stock to Wespac for a note in the amount of $825,000 which matures on May 31, 1990, and is secured by certain properties owned by Wespac.

At the same time, four of the seven directors on the board of Oppenheimer resigned, and the Wespac/USREA group appointed four of its own representatives, one of which will take office after delivery of a notice to company stockholders as required by rules of the Securities and Exchange Commission.

In the second step, which is expected to be completed after receipt of the approval by Oppenheimer's stockholders (which is anticipated by June 15, 1990), approximately 3.8 million additional shares of Oppenheimer stock will be issued to Wespac and USREA, conditioned upon Wespac and USREA providing an additional $1.175 million of secured notes and obtaining a new $10 million line of credit for Oppenheimer.

In that transaction, USREA will also receive options to acquire approximately 6.3 million shares at an exercise price of the lower of $1 per share or the average market price for a period prior to the closing of the second step.

In June 1989 Oppenheimer announced a restructuring plan to divest itself of all holdings except the 380,000 acre Armendaris Ranch in central New Mexico, and to concentrate its efforts on obtaining resources for the development of the lakefront portion of that property.

Wespac is a California Real Estate Investment Trust. USREA, a California-based real estate advisory company, is the owner of 49 percent of Wespac.

PASADENA, CA (APRIL 18) BUSINESS WIRE - Beverly Enterprises Inc. (NYSE:BEV) Wednesday announced operating results for the first quarter of

1990.

For the three months ended Mar. 31, 1990, revenues were $501,887,000, compared with $511,101,000, reported for the first quarter of 1989. The decrease in revenues was primarily due to the sale of the company's homes in Michigan and Iowa.

Net income for the first quarter of 1990 was $682,000, or 1 cent per share compared with a net loss of $9,359,000, or 18 cents per share, in the same period a year earlier. Included in the first quarter 1989 operating results were pre-tax restructuring charges of approximately $8,081,000.

Beverly Enterprises is a long-term health-care company operating nursing facilities, pharmacies, retirement living centers and home health centers. Its mission is to be the provider of choice in the communities where it operates, by delivering high-quality health-care services that meet the unique needs of each of those communities.

AUSTIN (APRIL 18) BUSINESS WIRE - HealthVest (ASE:HVT) Wednesday announced that it has reduced the net carrying value of certain leased properties and mortgage loans by $127.4 million at Dec. 31, 1989.

The company is in the process of finalizing its annual financial statements, but expects to record a net loss for 1989 of $116.8 million. After this reduction, HealthVest's shareholders' equity will be $69.6 million, or $6.46 per share. The trust will file its 10-K as soon as possible after the completion of the preparation of its financial statements.

The majority of these properties are either leased to or mortgaged by Healthcare International Inc. The reduction in carrying value was primarily attributable to operating problems of Healthcare which led to partial non-payment of rent and interest due to HealthVest.

The amount of the reduction was determined based on a review of new appraisals of these properties and revised operating projections, among other factors.

HealthVest and Healthcare are currently operating under a 120-day standstill agreement which ends on June 30, 1990. Pursuant to this agreement, Healthcare is making partial rent and interest payments of approximately 70 percent of contractual amounts.

HealthVest also announced that David L. Whelan and Elliot H. Weir Jr. have resigned as trustees.

HealthVest is a self-administered Real Estate Investment Trust (REIT) that invests in income-producing health care-related properties including psychiatric, general health and rehabilitation hospitals, skilled nursing facilities, retirement centers, medical office buildings, medically oriented fitness centers and facilities offering other related health care products and services.

HOUSTON (APRIL 18) BUSINESS WIRE - National Convenience Stores Inc. (NYSE:NCS) Wednesday announced improved third-quarter sales and earnings, affirmed the continuation of the company's stock repurchase plan and announced the declaration of its third-quarter common stock dividend.

Sales for the third quarter ended Mar. 31 were up 4 percent to $249,302,000, compared with $239,318,000 for the third quarter of fiscal 1989. Net earnings for the quarter were $383,000, or 2 cents per share, vs. a loss of $7,460,000, or 33 cents per share, for the third quarter of last year.

Results for the third quarter this year included an extraordinary gain of $6,587,000, or 30 cents per share, from the company's recently completed exchange offer. Also included was a loss of $6,204,000, or 28 cents per share, from operations.

He noted that same-store merchandise sales for the third quarter were down about 2 percent, but this was more than offset by higher gross margins. However, gasoline margins for the quarter were considerably below the levels experienced earlier in the fiscal year.

For the nine months of the current fiscal year, NCS posted sales of $782,323,000, down slightly from the $786,583,000 for the first three quarters of the last fiscal year. For the nine months ended Mar. 31, 1990 NCS recorded a profit of $7,122,000, or 32 cents per share, compared with a loss of $8,177,000, or 37 cents per share, for the like period in 1989.

The board of directors for NCS affirmed the continuation of a company share repurchase program.

The board of directors declared a common stock dividend of 8 cents per share relative to the Mar. quarter, payable on May 4 to shareholders of record on April 30. Shareholders will also be receiving a check for 1 cent per share on April 23 relative to a redemption of the company's Series C preferred stock that was done in the process of adopting a new shareholder rights plan.

The two payments together equal the company's normal 9 cents per share common stock dividend.

NCS is one of the largest operators of convenience stores in the United States, currently operating 1,094 specialty convenience stores in four Sunbelt states under the name Stop N Go.

PASADENA, CA (APRIL 18) BUSINESS WIRE - Countrywide Mortgage Investments Inc. (NYSE:CWM) Wednesday announced unaudited earnings of $2,354,000, or 17 cents per share, based on 13,645,000 weighted average shares

outstanding, for the first quarter ended March 31, 1990.

In addition, the company's board of directors declared a cash dividend of 17 cents per share for the quarter, payable May 18, 1990, to shareholders of record on April 27, 1990.

The comparable year-ago quarter produced net earnings of $2,675,000, or 20 cents per share, based on 13,645,000 weighted average shares outstanding.

For the immediately preceding quarter ended Dec. 31, 1989, net earnings were $2,176,000, or 16 cents per share, based on 13,645,000 weighted average shares outstanding. A cash dividend of 16 cents per share was paid for this preceding quarter.

Countrywide Mortgage Investments Inc., a real estate investment trust, invests in fixed- and adjustable-rate, single-family, first-lien residential mortgages, mortgage securities and other related investments. Countrywide Mortgage was sponsored by Countrywide Credit Industries Inc. (NYSE:CCR), which, through its subsidiaries, Countrywide Asset Management and Countrywide Funding Corp., provides management services and a source of mortgage investments.

SAN DIEGO (APRIL 18) BUSINESS WIRE - TeleSoft, one of the world's largest providers of software engineering products and services, Wednesday announced TeleUSE, the industry's most advanced user interface management system.

Available now, TeleUSE is a state-of-the-art system for the interactive creation of OSF/Motif user interfaces. Using TeleUSE, software developers can significantly reduce the time, effort, and cost they expend on creating user-friendly Unix software.

TeleUSE is an integrated set of interactive tools for designing, implementing, and evaluating standardized graphical user interfaces, such as Motif, independently of the application code. By separating the interface code from the application code, TeleUSE enables developers to create software that is easier to use and easier to maintain.

TeleUSE frees the software developer from having to learn the details of

OSF/Motif and the underlying X Window intrinsics toolkit.

Instead, the TeleUSE screen layout editor lets software developers interactively create user interfaces using a what-you-see-is-what-you-get (WYSIWYG) approach to ''paint'' the static screen layout on today's graphics workstations using ''building block'' interface objects such as buttons, scroll bars, pop-up menus, and dialogue boxes.

A robust set of dialogue management functions, including a unique, rule-based dialogue language -- the D language -- model the runtime behavior of the user interface. From the D language, the developer has access to the extensive library of useful functions for dynamically changing the user interface at runtime. The interface can then be easily tested and modified interactively without concern for the associated application code.

Together, the TeleUSE screen layout editor and dialogue manager let developers focus on the design, aesthetics, and usability of the user interface while interactively and iteratively developing it.

Accounting for 60 percent of the program code for most applications, a graphical user interface is responsible for a program's ''look and feel.'' A standardized graphical user interface, such as the Open Software Foundation's Motif, allows users to switch among several different computers with little or no training.

TeleUSE is marketed, sold, and supported directly by TeleSoft. Additionally, DEC has selected TeleUSE for its Digital Distributed Software Program with TeleSoft providing technical support to end users. TeleSoft is also part of the independent software vendor (ISV) programs of both DEC and Data General.

TeleSoft is the leading international provider of software engineering products and services supporting standards such as Ada, X Windows, and SDL and a systems supplier and integrator for the telecommunications, aerospace/defense, and other technical computing markets.

#90108b0626 04/18/1990 ~Business Wire

SAN JOSE, CA (APRIL 18) BUSINESS WIRE - Hercules Corp.'s management has signed an agreement to sell its wholly owned subsidiary, Semi-Gas Systems

of San Jose, to Nippon Sanso of Tokyo.

Semi-Gas is a manufacturer of high-purity gas distribution and control systems sold to semiconductor manufacturers. Nippon Sanso is the largest supplier of industrial and speciality gases in the Japanese market and one of the five largest industrial gas companies in the world, with 1990 forecast revenues of 177,000 million Yen. The price paid by Nippon Sanso is estimated to be $23 million.

Nippon Sanso is pursuing an aggressive overseas strategy with investments primarily focused in the Pacific Rim and United States. The Semi-Gas acquisition fits Nippon Sanso's strategy of being a major supplier of specialty gases and equipment to semiconductor manfacturers and complements its earlier purchase of Matheson Gases' U.S. operations. Dataquest believes that Nippon Sanso's long-term strategy is to enter the U.S. bulk gas market through an acquisition.

Hercules originally bought into Semi-Gas as a means to market its gas purification resins. Semi-Gas is part of Hercules' Electronic & Printing Products (E&PP) business; this group comprises four unrelated businesses.

In 1989, under pressure to shore up its balance sheet and raise working capital, Hercules management announced the sale of E&PP. They were not successful in selling E&PP as a unit, so management is breaking the businesses out and selling them individually. To date, Semi-Gas is the only one of the four businesses sold.

Hercules was advised by Goldman Sachs, and the last round of bidding included four groups: BOC Group, Nippon Sanso, a Semi-Gas management team and Union Carbide. Dataquest estimates that Hercules' total investment was less than $10 million, so shareholders should be very pleased with the $23 million sales price. The hefty premium paid over the company's book value would indicate that the bidding was fierce.

The strong interest generated by the sale of the company is attributable to two factors. First, Semi-Gas is a recognized leader in gas cabinet market share and technology within the semiconductor industry.

Second, the industrial gas companies recognize that gas cabinets are an essential component of the on-site mangement of cylinder gases at semiconductor fabs and therefore are willing to pay a premium to position themselves in this market.

SEMATECH is the only Semi-Gas customer expected to be impacted by the sale. Semi-Gas has a contract with SEMATECH to mangage the gas cabinets and cylinder gases at SEMATECH's Austin, Texas, facility in conjunction with Union Carbide.

Because of the sale, Dataquest believes that SEMATECH's management will cancel the Semi-Gas contract because the company no longer fits the domestic supplier criterion.

#90108b0627 04/18/1990 ~Business Wire

HONOLULU (APRIL 18) BUSINESS WIRE - Wayne E. Jack, chairman of the board and president of FirstFed America Inc. (ASE:FFA), the holding company for First Federal Savings and Loan Association of America, Wednesday announced fiscal 1990 second-quarter and six-month financial results.

Jack was positive about the company's earnings performance when he indicated that if approximately $432,000 of non-recurring expenses incurred in connection with the proposed acquisition of the company by Bancorp Hawaii Inc., were excluded, FirstFed America's net income for the second quarter of fiscal 1990 would have exceeded the company's net income for the second quarter of 1989.

Net income for the second quarter ended March 31, 1990, was $2,012,000, or 52 cents primary earnings per share, compared with $2,152,000, or 57 cents primary earnings per share, for the like three-month period in fiscal 1989.

Six-month net income was $4,143,000, or $1.08 primary earnings per share, compared with $5,231,000, or $1.38 primary earnings per share, in the like period a year ago. Jack stated that FirstFed America's net income for the first six months of fiscal 1990 was less than the comparable fiscal 1989 period due in part to non-recurring expenses of $630,000 incurred in connection with the proposed merger with Bancorp Hawaii.

In addition, an after-tax gain of approximately $855,000 in fiscal 1989 in connection with the sale of Federal Home Loan Mortgage Corporation participating preferred stock, also contributed to the net income for the first six months of fiscal 1989 being greater than the like period in fiscal 1990.

Net interest income for the second quarter and first six months of fiscal 1990 showed an increase of $497,000 and $679,000, respectively, over the comparable periods of fiscal 1989 due to a general decline in the level of savings interest rates, which positively impacted the interest rate spread.

At March 31, 1990, stockholders' equity grew to $100.8 million, or $27.55 per share, compared with $92.5 million, or $25.32 per share, at March 31, 1989. The company's strong capital base continues to be one of the

healthiest in the thrift industry and represented 11.2 percent of total assets at March 31, 1990.

First Federal Savings and Loan Association of America operates 26 full-service offices located throughout the six major populated islands of Hawaii. Additional offices are operated by its other wholly owned subsidiaries, First Savings and Loan Association of America with three offices in Guam and one in Saipan and FirstFed America Bank, A Federal Savings Bank, in Logan, Utah, with two offices in northern Utah.

#90108b0632 04/18/1990 ~Business Wire

HONOLULU (APRIL 18) BUSINESS WIRE - Bancorp Hawaii Inc., the parent company of Bank of Hawaii and its principal subsidiary, Hawaiian Trust Company Ltd., reported strong earnings for the first quarter of 1990.

Earnings for the quarter were $22.5 million, up 24.9 percent from last year. On a per share basis, fully diluted earnings were $1.35, adjusted for the 10 percent stock dividend declared on March 28, payable to shareholders of record April 12.

Bancorp Hawaii remains the largest Hawaii-based institution with assets of $8.6 billion, up 30.6 percent from 1989. Loans increased to $4.9 billion, up 21.7 percent from last year. Deposits were up 33.1 percent to $7.3 billion.

Stephenson also noted that the quarter's results were positively impacted by the strong performance of several subsidiaries: Bancorp Finance of Hawaii, Bancorp Finance of Hawaii-Guam, and Bancorp Leasing of Hawaii.

On Jan. 8, 1990, Bancorp entered into a definitive agreement to acquire FirstFed America Inc., parent company of First Federal Savings & Loan Association of America. Finalization of the acquisition is still dependent upon approval by the shareholders of FirstFed and the appropriate regulatory authorities.

On March 28, Bancorp's board declared a 10 percent stock dividend payable May 4, 1990, to shareholders of record as of April 12. The stock dividend will bring Bancorp's outstanding shares to 16.6 million shares. ''We believe the 10 percent stock dividend will enhance shareholder value. We want to put more stock in shareholders' hands to increase value for them '' said Stephenson.

In the latest ranking by the financial industry newspaper, American Banker

Bank of Hawaii rose to 49th in deposits among the top 300 U.S. commercial banks from 60th place in 1988 and to 69th in assets from 77th. In addition, Bancorp Hawaii Inc., was also selected as the top overall performance winner for 1989 among the nations top 100 bank holding companies in Paine Webber's latest bank performance review.

Bancorp Hawaii is the largest financial organization in Hawaii, with nearly 80 offices throughout the state, Asia and the Pacific. Its principal subsidiaries are Bank of Hawaii, First National Bank of Arizona, and Bancorp Finance of Hawaii and Bancorp Finance of Hawaii-Guam.

Hawaiian Trust Company Ltd., and Bancorp Leasing of Hawaii are the principal subsidiaries of Bank of Hawaii. Bank of Hawaii has offices in Hawaii, the Pacific Basin, Tokyo, Hong Kong, Singapore, Seoul, Manila, New York and Nassau.

#90108b0641 04/18/1990 ~Business Wire

RAHWAY, NJ (APRIL 18) BUSINESS WIRE - Merck & Co., Inc. Wednesday announced that earnings per share for the first quarter of 1990 were $1.03 an increase of 20 percent over the first quarter of 1989.

First quarter net income increased 19 percent to $403.8 million. Sales for the quarter were $1.8 billion, up 12 percent from the same period last year.

In the human and animal health products segment of Merck's business, results for the first quarter reflected strong sales gains by 'Mevacor', 'Vasotec', 'Zocor', 'Pepcid', 'Losec', 'Prinivil' and ivermectin. Pediatric vaccines, led by 'M-M-R' II (Merck's combination vaccine for measles, mumps and rubella), also contributed to quarterly sales gains.

'Mevacor', Merck's cholesterol-lowering agent, continues its outstanding performance. It continues to grow and now holds 57 percent of the U.S. market for lipid-lowering agents and has been prescribed for more than 1.4 million patients. Extensive clinical studies and experience confirm the excellent safety and effectiveness profile of 'Mevacor'.

'Vasotec', Merck's angiotensin converting enzyme (ACE) inhibitor for reducing high blood pressure and treating congestive heart failure, is being sold in all major markets, and continues to grow very well. It has surpassed both of its major competitors to become the leading branded product in the antihypertensive market in the U.S. in number of

prescriptions and in purchases.

'Zocor', Merck's second cholesterol-lowering agent, is experiencing strong sales gains after introduction in Sweden in 1988 and in the United Kingdom France, Italy, Holland, Switzerland and New Zealand in 1989.

'Pepcid', an H2-receptor antagonist for treatment of duodenal and gastric ulcers, is growing rapidly in the U.S. and maintaining its market share against strong competition abroad.

'Losec', the first of a new class of gastrointestinal drugs called acid pump inhibitors, was introduced in the United States in the fourth quarter of 1989. It is indicated for short-term treatment of symptomatic gastroesophageal reflux disease (GERD) in patients who respond poorly to conventional medical treatment and for confirmed severe erosive esophagitis. 'Losec' has also been approved for use in treating a serious acid-related disorder called Zollinger-Ellison syndrome. It is licensed to Merck for U.S. marketing by AB Astra, the research-based Swedish firm.

Merck & Co., Inc., is a worldwide research-intensive health products company that discovers, develops, produces and markets human and animal health products and specialty chemicals. The Company has over 34,000 employees, 17 research centers, and manufacturing facilities in 18 countries.

#90108b0647 04/18/1990 ~Business Wire

CUPERTINO, CA (APRIL 18) BUSINESS WIRE - Tandem Computers Inc. (NYSE:TDM) Wednesday announced that revenue for the second quarter of fiscal 1990, which ended March 31, rose to $451,357,000, a 24 percent increase over the $363,388,000 recorded in the second fiscal quarter of 1989.

Net income for the quarter grew 59 percent to $26,827,000, or 25 cents per share, compared with $16,858,000, or 17 cents per share, earned in the same quarter of the previous year.

For the six months ended March 31, revenue increased to $887,776,000, compared with $755,673,000 achieved in the year-ago period. Net income grew to $57,562,000, or 53 cents per share, compared with $48,153,000, or 48 cents per share, posted in the first six months of fiscal 1989.

Commenting on the quarter, Tandem President and Chief Executive Officer

James G. Treybig said, ''We achieved substantial growth in both revenue and profits this quarter. However, our second fiscal quarter tends to be a difficult quarter to predict, especially this year given the number of new products being introduced, marketed and manufactured. We did not do as well as we hoped, but we recorded strategic successes that will contribute to good year.''

''We continue to feel positive about the year,'' Treybig concluded. ''Our new products have gone into production as planned, have been well-received by customers, and we are winning strategic orders. We continue to manage expenses tightly and remain watchful of currency changes. We look forward to the second half of our year.''

Tandem Computers manufactures and markets computer systems and enterprise networks for the online transaction processing market. Its headquarters are at 19333 Vallco Parkway, Cupertino, CA 95014. The phone number is 408/285-6000.

#90108b0655 04/18/1990 ~Business Wire

STAMFORD, CT (APRIL 18) BUSINESS WIRE - American Fructose Corporation Wednesday reported first quarter 1990 net income of $3,941,000, or, $.41 per share, compared to $4,362,000, or $.46 per share in 1989. Net sales for the first quarter of 1990 were $42,153,000 compared to $44,821,000 in 1989.

The decline in sales from quarter to quarter was attributable to lower unit sales volumes of corn starch and lower by-product revenues. High fructose selling prices and volumes were slightly ahead of a year ago.

In addition to the lower overall sales, higher operating costs offset the benefit of lower corn costs and contributed to the lower level of net income in 1990.

#90108b0665 04/18/1990 ~Business Wire

STAMFORD, CT (APRIL 18) BUSINESS WIRE - American Maize-Products Company Wednesday reported first quarter 1990 income from continuing operations of $3,267,000, or $.49 per share, compared with $4,028,000, or $.61 per share in 1989. Net income for the 1989 quarter was $2,138,000, or $.32 per share, which included losses from discontinued operations of $1,890,000, or $.29 per share. The lower income from continuing operations was primarily due to a lower ownership interest in the earnings of American Fructose Corporation and a higher effective tax rate in 1990.

Sales from continuing operations were $115,181,000 in 1990 compared to $119,118,000 in 1989. The principal reason for the decline in sales in the quarter was lower unit sales volumes in the Company's Corn and Tobacco businesses.

MILPITAS, CA (APRIL 18) BUSINESS WIRE - Octel Communications Corp. (NASDAQ/NMS:OCTL) and Hewlett-Packard Ltd. -- strategic partners in bringing high-performance voice processing equipment to Europe -- Wednesday announced four new telephone switch integrations for Octel's line of Aspen voice processing systems sold as the Voice Processing System (VPS) series under the H-P label in the United Kingdom.

Hewlett-Packard Ltd. is Hewlett-Packard Co.'s U.K. subsidiary.

The Octel Aspen, Aspen Branch XP and the Aspen Maxum will now integrate with the GPT iSDX, the Ericsson MD110, the Mitel SX2000 and the Philips Sopho 1000 and 2500.

With these integrations, Octel continues its long-standing commitment to its domestic and international customers to integrate with as many different telephone switches as possible. Providing integration of Octel systems with a variety of switches gives increased flexibility to large organizations with many sites and many types of telephone switches.

Full integration of a voice processing system with a telephone switch occurs when three criteria are met: external and internal callers are forwarded directly to a personal greeting if the line is busy or if there is no answer; subscribers receive message waiting notification when messages are received in the mailbox through a message waiting light or other message waiting feature; and callers may choose to return to a designated extension for assistance when forwarded to the system.

Octel Communications was founded in 1982 and has headquarters in Milpitas.

TROY, MI (APRIL 17) BUSINESS WIRE - Ameritech Publishing announced today it will publish directories made from 100 percent recycled paper in six selected markets, including one in each state in its Great Lakes region.

The directories will be distributed in Blue Island, Ill.; Kokomo, Ind.; Charlevoix, Mich.; Massillon, Ohio; and Stevens Point, Wis. A sixth directory made with 100 percent recycled paper will be published in the Eastern Pennsylvania/Southern New Jersey market for Ameritech's line of specialized industrial directories.

The paper recycled to manufacture the directories includes paper from 44,000 outdated Ameritech PagesPlus directories. Distribution will take place during May and June.

''This project clearly demonstrates that our company is serious in its commitment to address environmental issues,'' said Gary Drook, president and CEO of Ameritech Publishing.

''We believe publishing directories on 100 percent recycled paper on this scale is a leadership move in the directory industry,'' said Drook. ''We are far from the day when economics and paper-making technology in this part of the world will allow us to print all directories on recycled paper but we are taking an important step in the right direction with this trial. We expect to learn a lot from the project.''

The paper used in the directories was manufactured by FSC Paper Co. in Alsip, Ill.

The company's latest recycling project is the latest in a history of recycling projects initiated by Ameritech Publishing. These include a project beginning last December in which nearly 47,000 used directories were collected and recycled into tissue and insulation in the cities of Green Bay, Manitowoc and Fond du Lac, Wis. Also, in March, Ameritech Publishing published 20,000 copies of a directory containing 30 percent recycled paper in Watertown, Wis.

In addition, Ameritech Publishing as a member of the Yellow Pages Publishers Association has joined efforts with other publishers to implement programs to minimize the industry's landfill contribution. The Yellow Pages Publishers Association recently announced the formation of an Environmental Committee to coordinate these efforts.

Ameritech Publishing Inc. provides more than 450 Ameritech PagesPlus white and yellow directories for the Bell companies in Illinois, Indiana, Michigan, Ohio and Wisconsin. The company, a wholly-owned subsidiary of Chicago-based Ameritech, also provides another 92 directories in 16 states through its subsidiary, Old Heritage Advertising and Publishers Inc., publishes the Ameritech Industrial Purchasing Guide and is involved in foreign directory publishing.

#90108b0672 04/18/1990 ~Business Wire

ATLANTA (APRIL 18) BUSINESS WIRE - In about five years, some of the network equipment that AT&T (NYSE:T) sells to telephone companies will switch communications signals as pulses of light rather than electricity, producing a dramatic increase in those systems' capacity.

AT&T said such equipment would be based on ''free-space'' photonics, so that light pulses would not need to be guided by glass fibers. It would employ many of the same technologies as the experimental digital optical processor that AT&T Bell Laboratories first demonstrated in January.

For some time now, telephone networks have used fiber optics to carry calls from central office to central office. But within the central office, those signals must still be converted to electrical impulses to direct the call to the dialed number.

Networks based completely on photonics would be able to route calls to their destinations many times faster than those of today. They would operate at speeds measured in trillions, rather than millions, of bits per second.

Such networks could provide hundreds of thousands of facsimile connections video conferences or high-speed data networks, and thousands of high-definition television channels, all within seconds.

''We can see the light at the end of the tunnel, and it's more like five years off -- not twenty,'' said William B. Marx Jr., president of AT&T

Network Systems.

Marx said the company would first put the technology to work in its high-speed transmission systems, followed by its switching systems.

A prototype photonic switching device is on display here Wednesday in AT&T's exhibit at SUPERCOMM '90.

#90108b0675 04/18/1990 ~Business Wire

HARTFORD, CT (APRIL 18) BUSINESS WIRE - United Technologies Corp. (UTC) Wednesday reported higher first-quarter earnings, primarily as a result of strong performances by Pratt & Whitney and Otis, according to Robert F. Daniell, chairman and chief executive officer. For the quarter, net income increased almost 9 percent to $134.5 million or $1.01 a fully diluted share, compared to first-quarter 1989 results of $123.7 million or 95 cents a share. Revenues for the period were $4.8 billion, compared with $4.5 billion in the first quarter last year.

Daniell said strong results from Pratt & Whitney and Otis more than offset lower operating results at Carrier, UT Automotive and the Flight Systems segment. ''The corporation's diversity, large aftermarket businesses and international presence continue to be its greatest strengths, particularly when some segments of the U.S. economy are soft,'' he said.

UTC's business backlog reached a record $21.2 billion on March 31, up from a record backlog of $18.2 billion on the same date a year earlier. In the quarter Pratt & Whitney announced $3.1 billion in commercial engine orders including options. The Power segment's quarterly operating income grew to $251 million from $179 million a year earlier, primarily due to higher spare parts sales, continuing cost reduction efforts and lower spending on research and development.

Flight Systems reported a loss of $11 million for the quarter, compared to operating earnings of $12 million a year ago. Sikorsky and Hamilton Standard had lower profits because of less favorable product mix and reduced royalty income.

The Building Systems segment earned $92 million, compared to $76 million a year earlier. Otis' strong international operations were responsible for most of the improvement. Carrier's results declined as a result of weak demand for heating, air conditioning and ventilation equipment in the North American market.

The Industrial segment's operating profits declined to $16 million from $53 million. The decline was due largely to production of fewer automobiles and light trucks in North America as manufacturers reduced dealer inventories.

United Technologies provides a broad range of high-technology products and support services to the aerospace, building systems and automotive industries.

NEW YORK (APRIL 18) BUSINESS WIRE - ASARCO Incorporated (NYSE:AR) Wednesday announced that Freeport-McMoRan Inc. has acquired the 50 percent interest in the Santa Cruz joint venture from Freeport-McMoRan Gold Company and that Asarco is withdrawing its previously announced lawsuit against Freeport, Minorco S.A. and related entities.

The Santa Cruz Project is a joint venture formed in 1977 between Asarco and Freeport, each of which owns half of the joint venture.

The joint venture is engaged in a research project supported by the U.S. Bureau of Mines and 75 percent funded by the U.S. government to test the feasibility of novel in-situ mining technology for the extraction of copper from a deep underground copper deposit.

#90108b0680 04/18/1990 ~Business Wire

PHOENIX, AZ (APRIL 18) BUSINESS WIRE - Phelps Dodge Corporation today reported consolidated net income of $111.3 million ($3.20 per common share) for the first quarter of 1990, compared with 1989 first quarter net income of $165.9 million ($4.52 per common share). Per share amounts reflect average shares outstanding on a fully diluted basis for the respective periods.

Sales were $642.6 million in the first quarter of 1990, compared with $743.3 million in the corresponding 1989 period. This decrease resulted principally from lower average realized copper prices and reduced sales of wheels and rims. Phelps Dodge Mining Company reported sales of $337.5

million in the first quarter of 1990, compared with sales of $423.5 million in the 1989 period. Phelps Dodge Industries reported sales of $305.1 million in the first quarter of 1990, compared with sales of $319.8 million in the 1989 first quarter.

During the 1990 first quarter, Phelps Dodge Mining Company recorded earnings from operations of $140.5 million, compared with $220.3 million in the first quarter of 1989. This quarter to quarter decrease in earnings resulted from lower average realized copper prices offset somewhat by higher sales volumes. The New York Commodity Exchange spot price per pound of copper cathode averaged $1.12 in the 1990 first quarter compared with $1.43 in the cor- responding 1989 period.

Phelps Dodge's share of mine production was a record 132,200 tons of copper for the first quarter of 1990. This compares with 129,100 tons in the corresponding 1989 period. Phelps Dodge's cop- per sales from mine production were also a record 137,400 tons in the 1990 first quarter, compared with 127,500 tons in the cor- responding 1989 period.

Phelps Dodge Industries recorded earnings from operations of $37.5 million in the 1990 first quarter, compared with $43.1 million in the 1989 first quarter. The 1990 earnings for the first quarter reflect continued good product demand for the group's foreign opera- tions and the inclusion of the results of Hudson International Con- ductors, acquired in November 1989. The 1990 first quarter earnings also were affected by lower sales of wheels and rims for trucks and trailers, lower sales and reduced margins in the domestic magnet wire business and reduced carbon black margins.

Phelps Dodge is North America's largest producer of copper. The company is also the world's second largest producer of carbon blacks, the leading North American fabricator of wheels and rims for medium and heavy trucks, a major manufacturer of magnet wire and specialty conductors, and has investments overseas in mines and wire and cable manufacturing facilities. The company's operations are located throughout the United States and in twenty-two foreign countries.

#90108b0691 04/18/1990 ~Business Wire

NEW YORK (APRIL 18) BUSINESS WIRE - Philip Morris reports 1990 first quarter revenues and earnings. For the first quarter: operating revenues up 7.3% operating companies income up 18.0%, earnings before income taxes up 31.5%, net earnings up 31.4% and net earnings per share up 31.3% to $.84 per share.

Hamish Maxwell, Chairman of the Board and Chief Executive Officer of Philip Morris Companies Inc., Wednesday announced that consolidated operating revenues for the first quarter of 1990 were $11.4 billion, an increase of 7.3% over the $10.6 billion for the same period last year.

Operating companies income was $1.9 billion, an increase of 18.0% over the $1.6 billion in last year's first quarter. Earnings before income taxes were up 31.5% to $1.3 billion from $1.0 billion in the first quarter of 1989. Net earnings increased 31.4% to $775 million from $590 million for last year's period; net earnings per share for the quarter rose 31.3% to $.84 from $.64 for the first quarter of 1989.

Since January 1990, the company repurchased 5.7 million shares of its common stock under the 1989 stock repurchase program at a total cost of $221 million, an average price of $38.88 per share.

General Foods USA reported increased operating revenues in the first quarter of 1990 on higher volume, led by Entenmann's fat free and cholesterol free bakery lines, dinners and enhancers, and Post cereals.

Kraft USA reported higher operating revenues in the first quarter, although volume declined due primarily to the retail cheese and dry grocery businesses.

Kraft General Foods International's operating revenues and volume were up in the first quarter of 1990, after excluding the effects of the deconsolidation of certain subsidiaries.

Kraft General Foods Canada reported higher operating revenues and volume compared to the same period a year ago. Powdered beverages, desserts, cereals, and foodservice divisions performed well during the quarter.

Operating revenues for Oscar Mayer Foods increased in the first quarter of 1990. Although volume was down slightly, our new Lunchables lunch combinations continued to perform well in the first quarter.

Kraft General Foods Frozen Products operating revenues and volume were flat when compared to the same period a year ago.

Kraft General Foods Commercial Products operating revenues and volume were up in the first quarter of 1990, as increases were recorded from the five new broadline distribution centers within foodservice.

Philip Morris Companies Inc. has five principal operating companies: Philip Morris Incorporated (Philip Morris U.S.A.), Philip Morris International Inc., Kraft General Foods, Inc., Miller Brewing Company, and Philip Morris Capital Corporation.

Kraft General Foods, Inc. has seven operating units: General Foods USA, Kraft USA, Kraft General Foods International, Kraft General Foods Canada, Oscar Mayer Foods, Kraft General Foods Frozen Products, and Kraft General Foods Commercial Products.

Philip Morris Capital Corporation is engaged in financial service activities. Its subsidiary, Mission Viejo Company, is engaged principally in land planning, development, and sales in southern California and Colorado.

HOUSTON (APRIL 18) BUSINESS WIRE - Houston-based Nustar International Inc. Wednesday unveiled a new line of computer software products it said would sharply enhance the ability of businesses to develop and move information over electronic networks.

The Morse 2000 Information Server from Nustar was developed to help companies easily ''publish'' on-line information over telephone lines using desk top computers and other display devices including videotex terminals.

The software provides an efficient way to quickly develop, test, and electronically distribute a wide range of information, including internal corporate, sales and personnel, instruction and training, plus information and ideas for sales people.

Nustar said Morse 2000 gives corporate managers a new electronic communications tool to keep employees and customers informed about company policies, products, and services.

This new software product will help companies reduce the cost and simplify the job of training people, Nustar said.

Morse 2000 includes an Authoring System and a Server System. The Authoring System is used to develop and test the information services prior to moving them to the Server System which is typically connected to a local or national gateway or by a direct link to a set of dedicated telephone lines.

The Server can operate on a computer as small as a 386 PC running a Unix/Xenix operating system, permitting information providers to readily operate electronic services from their own premises.

The Authoring System runs on a standard MSDOS PC computer and features an ''object oriented'' development environment which includes an easy to learn command language and the ability to create on-screen navigation ''buttons.''

Nustar International is a private corporation that designs and markets software products and services for corporate and private users of telecommunications and information technologies.

     #90108b0698 04/18/1990 ~Business Wire

COLUMBUS, OH (APRIL 18) BUSINESS WIRE - Rax restaurants Inc. and The Procter & Gamble Co. announced Wednesday that the regional fast food chain will convert to a professional version of all-vegetable Crisco Oil for preparing foods in its 500 restaurants.

Rax is the first major restaurant chain to do so. Having evaluated various vegetable oils during the past year, Rax will begin serving foods prepared with Crisco Oil in May, converting from a cooking oil which contained a blend of animal and vegetable fats.

''Crisco has been America's trusted partner in cooking for nearly 80 years '' said Ira A. Hermann, president and chief executive officer, Rax Restaurants. ''We're delighted to offer Crisco Oil to our customers as part of our continuing commitment to providing excellent-quality foods.

''While Rax could have selected a generic brand of vegetable oil, we chose Crisco because we're committed to earning and keeping the trust of our consumers, who know Crisco Oil and use it in their own homes,'' Hermann added.

Rax's change in cooking oil is another innovation in a series of recent product introductions and changes by the restaurant chain. The salad bar, topped baked potatoes and grilled chicken are among other innovations pioneered by this chain, which specializes in roast beef sandwiches and salads.

''This is a first for our Crisco Oil, said Donald W. Campbell, vice president of P&G's Foodservice and Lodging Products Division. ''We do plan to offer this product broadly to other quality-conscious restaurants. Today, we're most pleased to have Rax as our first major restaurant partner for Crisco Oil because of the company's commitment to quality food and its responsiveness to what the consumer wants -- a commitment we

share.''

According to the National Restaurant Association, four out of every 10 meals in the United States today are eaten or prepared outside of the home.

As a pure vegetable oil, Crisco Oil contains no cholesterol. Over the past 30 years, Crisco has become one of America's most popular cooking oils. A recent survey of consumers using a major vegetable oil brand showed Crisco Oil is highest rated for overall excellence.

Rax Restaurants Inc., is based in Columbus. Rax owns, operates, develops and franchises restaurants featuring roast beef sandwiches, specialty sandwiches and salads. Founded in 1977, Rax has more than 500 company-owned and franchised stores in 29 states. Rax is a publicly held company traded over the counter under the symbol RAXR.

Procter & Gamble makes and markets a wide range of products for consumers and institutional use worldwide. P&G is a leading supplier of food, beverage and cleaning products for the foodservice industry.

#90108b0707 04/18/1990 ~Business Wire

SAN FRANCISCO (APRIL 18) BUSINESS WIRE - Citing concern over the financial condition of some of its retail customers who have employed excessive financial leverage, McKesson Corp., the nation's leading distributor of pharmaceuticals and health and beauty aids, Wednesday announced that it is increasing reserves for customer accounts receivable.

The reserves will be charged against earnings in the past fiscal year ended March 31. Results for the year will be announced next week, the company reported.

McKesson said that today's action was the result of an intensive two-month review of the credit status of its larger retail accounts triggered by recent concerns regarding the financial condition of companies in the retail industry.

In addition to the increase in reserves, McKesson reported that results of its Armor All Products subsidiary in the fourth quarter ended March 31 were disappointing.

Consequently, McKesson's fully diluted earnings per share from continuing operations in the fiscal fourth quarter ended March 31 will be down significantly from the 59 cents reported in the like period a year ago and results for the full year will be down modestly from the $2.14 reported in the prior fiscal year.

For the first nine months of the year McKesson reported per share earnings of $1.73, up 12 percent.

In a joint statement, Alan Seelenfreund, the company's chairman and chief executive officer, and Rex R. Malson, president and chief operating officer, said, ''McKesson's decision to increase its reserves reflects a concern on our part that some of our retail customers have employed excessive leverage in recent years and are using their suppliers to supplement their bank credit lines.

Given the narrow margins inherent in the distribution business, the risk-reward ratio for McKesson to act as an unsecured creditor in those situations is not consistent with prudent business practices.''

In discussing Armor All, which is 83 percent owned by McKesson, Seelenfreund and Malson said fourth quarter sales and earnings were far below expectations. On March 12 Armor All (NASDAQ:ARMR), the leading supplier of automotive appearance products, announced that earnings for the fourth quarter and full year would be down substantially from the year-earlier periods.

#90108b0724 04/18/1990 ~Business Wire

LOS ANGELES (APRIL 18) BUSINESS WIRE - Occidental Petroleum Corp. NYSE:OXY) Wednesday announced net income of $108 million (37 cents per share) on sales of $5.2 billion for the first quarter of 1990, compared with net income of $67 million (24 cents per share) on sales of $5.1 billion for the first quarter of 1989.

The results included extraordinary losses of $2 million (1 cent per share) in 1990 and $9 million (3 cent per share) in 1989, which resulted, in both years, from the early extinguishment of debt.

In announcing the results, Dr. Armand Hammer, chairman and chief executive officer said, ''We are particularly pleased with the increases in earnings of the oil and gas and natural gas transmission divisions which more than offset the decline in the chemical division's earnings.''

Occidental's oil and gas divisional earnings for the first quarter of 1990 were $100 million, compared with $35 million for 1989. The 1990 results reflected higher worldwide crude oil prices, higher domestic natural gas and natural gas liquids prices and the resumption of production from the U.K. North Sea Claymore and Scapa fields, partially offset by reduced domestic crude oil and natural gas volumes.

The 1990 results also reflected a $36 million (pretax) gain from the settlement of a claim against Venezuela for the 1975 nationalization of Occidental's commercial block, a substantial reduction in costs due to the domestic oil and gas restructuring implemented in late 1989, a $16 million benefit from a lower income tax allocation due to the reversal of certain tax reserves and a $13 million (pretax) write-off of certain receivables.

Chemical operations reported divisional earnings for the first quarter 1990 of $186 million, compared with $282 million for 1989. The 1990 earnings reflected lower margins in petrochemicals and polymers and plastics, primarily reflecting lower sales prices industry wide.

Partially offsetting the lower prices were lower plant fixed costs in electrochemicals, higher volumes in polymers and plastics and lower production costs in agricultural products. First quarter 1990 earnings also benefited by $14 million from a lower income tax allocation due to the reversal of certain tax reserves.

Natural gas transmission operations reported increased divisional earnings

for the first quarter of 1990 of $94 million, compared with $61 million for 1989. The 1990 first quarter earnings reflected lower operating costs, a rate refund and a $12 million benefit from a lower income tax allocation due to the reversal of certain tax reserves, partially offset by lower sales volumes.

Divisional earnings from agribusiness operations, conducted by Occidental's 51 percent owned subsidiary IBP Inc., were $14 million in the first quarter of 1990, compared with $13 million in 1989.

The coal division reported divisional earnings for the first quarter 1990 of $4 million, compared with earnings of $3 million in 1989.

The Internal Revenue Service has completed audits of Occidental and certain of its subsidiaries through 1985. As a result, certain income tax reserves are no longer deemed necessary and are being reversed in 1990 the effect of which is being reflected as a reduction of the effective tax rate applied to each quarter. Most of the benefit recorded in 1990 first quarter earnings has been allocated to oil and gas, chemicals and natural gas transmission operations.

As previously disclosed, the 1989 unallocated corporate items included a pretax charge of $36 million for a charitable contribution to The Armand Hammer Museum of Art and Cultural Center.

#90108b0725 04/18/1990 ~Business Wire

ROTTERDAM, THE NETHERLANDS (APRIL 18) BUSINESS WIRE - Van Ommeren Ceteco (VOC), the international transport, trading and tank storage group, announced Wednesday that its revenues in 1989 totalled Dfl 1,876.2 million ($983.0 million)(a) (1988: Dfl 2,409.6 million).

Operating profit totalled Dfl 123.0 million ($64.4 million) (1988: Dfl 156.2 million). Net profits were Dfl 37.2 million ($19.5 million) (1988: Dfl 54.6 million), in line with earlier announced expectations. Earnings per share amounted to Dfl 2.53 ($1.33) (1988: Dfl 3.71).

It is proposed that the dividend for 1989 be set at Dfl 1.95 per share ($1.02) (1988: Dfl 1.95); Dfl 0.50 was paid in September 1989 as an interim dividend.

Roughly Dfl 465 million ($ 243.6 million) of the decline in revenue was due to lower volumes of meat trading and trade with the People's Republic of China.

The operating profit from the Transport division rose by about 40 percent to Dfl 57.1 million ($29.9 million) due to improved performance of the dry cargo fleet. Results from Inland Tank Shipping, Agencies and NVO (Non Vessel Operating) Transport were also substantially better than in 1988.

Operating profits from the Tank Storage division remained high at Dfl 52.3 million ($27.4 million) despite low utilization of mineral oil storage capacity at terminals in Northwestern Europe. Results from liquid chemicals and edible oil products were reasonably good.

The operating profits of Dfl 10.1 million ($5.3 million) reported by the Trading division were adversely affected by additional provisions to cover the losses incurred on disposal of the company's Australian meat trading interests, falling exchange rates for Latin American currencies, disappointing sales of consumer durables in Venezuela and the reorganization of offices in Beijing and Hong Kong.

Although exchange rates had a relatively limited effect on overall net profits, other items in the 1989 results were more seriously effected by currency fluctuations. In Latin America, for example, revenues and operating profit were depressed by Dfl 100 million and Dfl 15 million respectively.

Currency translation differences also led to a charge against equity of almost Dfl 30 million ($15.7 million) most of which related to activities in Latin America.

For 1990 VOC expects to see a measurable improvement in net profits. The precise degree of this improvement is difficult to predict at this time due to a number of circumstances, particularly exchange rates.

The Group's annual report will be published on April 27 and its Annual General Meeting will take place on Tuesday, May 15, at its Rotterdam offices.

VOC's shares are listed on the stock exchanges in Amsterdam, Brussels, Frankfurt, and Hamburg and trade in ADR form in the US. VOC may be accessed on the Reuters Equities 2000 service under the symbol OMMN.AS and on Quotron under the symbol OMREN.EU.

#90108b0736 04/18/1990 ~Business Wire

OAKLAND, CA (APRIL 18) BUSINESS WIRE - The Clorox Company (NYSE/PSE:CLX)

Wednesday reported third-quarter net earnings, all from continuing operations, of $38,352,000, up 7 percent from earnings of $35,839,000 from continuing operations in the year-ago January-March quarter.

Earnings per share from continuing operations were 70 cents for the just-ended third quarter, up 9 percent from 64 cents a year ago. Net earnings for the year-ago quarter were $38,432,000, or 69 cents per share, which included 5 cents per share from the Olympic paint and stain business that was sold last September.

Third-quarter net sales for continuing operations were up 14 percent to $386,913,000 from $340,146,000 for the like period last year.

Net earnings from continuing operations for the first nine months increased 6 percent to $111,280,000, or $2.02 per share, from $104,771,000 or $1.89 per share earned by continuing operations in the year-ago period.

For the year-ago nine months, net earnings included the results of the Olympic business and were $105,315,000, or $1.90 per share, to which Olympic contributed 1 cent per share.

The nine months' net sales for continuing operations were up 11 percent to $1,049,423,000 from $942,685,000 for the year-ago period.

Total shipments of the company's grocery store products were a third-quarter record. Overall bleach sales were strong. Volume for Clorox liquid chlorine bleach was about even with the year-ago quarter when volumes reflected the heavy introductory sales of Lemon Fresh Clorox liquid bleach.

Shipments of the company's two color-safe bleaches, dry and liquid Clorox 2, showed good growth following restaging by way of improved formulas and new packaging graphics. Shipments of Hidden Valley Ranch bottled salad dressing and K.C. Masterpiece barbecue sauce also were up strongly for the quarter despite heavy competitive activity.

New product activity remained at a high level during the quarter. Take Heart, a new line of bottled low-fat, no-cholesterol salad dressing in five flavors, was introduced nationally. The new dressing positions the company in what is expected to become the fastest-growing segment of the salad dressing market.

The company also introduced Professional Strength Liquid-plumr drain opener, a thick, visco-elastic product that is particularly effective on tough clogs.

Introductory spending continued for Clorox detergent and for Control cat litter, both of which are in distribution in about half of the country.

Clorox's chairman and chief executive officer, C. R. Weaver, said that in view of the continued heavy investment spending on new products, third-quarter earnings progress was very satisfactory.

Investment spending for new products and for test market activities will remain high during the balance of the fiscal year. Nevertheless, the company expects to record good fourth-quarter results.

CLEVELAND (APRIL 18) BUSINESS WIRE - First Union Real Estate Investments (NYSE:FUR) announced Wednesday its financial results for the first quarter of 1990

Net income totaled $5.1 million, or 30 cents per share, for the first three months of 1990 compared to $5.1 million, or 29 cents per share, during the same three months of 1989.

Capital gains, which are included in net income, totaled $1.2 million, or 7 cents per share, during the first quarter of 1990 compared to $907,000, or 5 cents per share, for the like period in 1989. Capital gains in each period resulted from prior year installment sales.

First Union Real Estate Investments is a self-administered equity real estate investment trust specializing in the ownership of regional enclosed shopping malls, downtown office buildings and multi-family complexes located throughout the United States. The Trust's shares are traded on the New York Stock Exchange, providing shareholders the opportunity to participate in real estate ownership while maintaining investment liquidity.

#90108b0748 04/18/1990 ~Business Wire
NEW YORK (APRIL 18) BUSINESS WIRE - The Dun & Bradstreet Corp. reported Wednesday first-quarter earnings per share of $.60, down 22 percent from $.77 a year ago.

The company said that the first-quarter decline was due in part to a decrease in revenue at U.S. Credit Services and a substantial increase in costs relating to the company's repositioning actions at that division.

First-quarter results also were adversely affected by the absence of revenue and income resulting from the expiration of Donnelley Directory's sales-agency contract with Chesapeake & Potomac Telephone Company (C&P).

The company continues to anticipate that 1990 earnings per share will be in the range of $2.80.

Net income in the first quarter was down 23 percent to $110,310,000 from $143,303,000 a year ago.

First-quarter operating revenue increased by 8.5 percent to $1,150,038,000 from $1,059,780,000 in the first quarter a year ago. Adjusted for the impact of the acquisition of Management Science America (MSA) in December 1989 and the divestiture of Thomas Cook Travel USA in April 1989, revenue growth for the quarter was 4 percent.

First-quarter operating costs, selling expenses and administrative expenses increased to $981,259,000 from $834,960,000, in part due to the impact of the acquisition of MSA, repositioning actions at U.S. Credit Services, and accelerated investment at Nielsen Marketing Research.

Operating income in the first quarter of 1990 decreased by 25 percent to $168,779,000 from $224,820,000 in the first quarter a year ago. The decline in operating income was mainly attributable to lower income at U.S. Credit Services and the absence of income resulting from the expiration of Donnelley's sales-agency contract with C&P.

The Dun & Bradstreet Corporation is the world's largest marketer of business information and related services, with worldwide operating revenue of $4.3 billion in 1989.

#90108b0755 04/18/1990 ~Business Wire

MURRAY HILL, NJ (APRIL 18) BUSINESS WIRE - C.R. Bard, Inc. (NYSE-BCR) Wednesday reported sales totalling $195.2 million, net income of $9.2 million and earnings per share of 17 cents for the quarter ended March 31, 1990.

These results are all lower than the first quarter a year ago and reflect the impact of Bard's temporary withdrawal from the balloon catheter segment of the U.S. angioplasty market.

Net sales of $195.2 million compare with $197.2 million in 1989, a decline of 1 percent. Domestic sales were $137.9 million, down 6 percent; international sales were $57.3 million, up 14 percent.

Net income for the quarter was $9.2 million or 17 cents per share, compared with $21.3 million or 38 cents per share a year ago, down 57 and 55 percent respectively. The first quarter 1990 figures are after a charge of $3.3 million or 6 cents per share to cover costs and expenses associated with the withdrawal from the U.S. market of Bard's over-the-wire balloon angioplasty catheters.

''This is a disappointing beginning to 1990,'' said George T. Maloney, Bard's President and Chief Executive Officer, ''but we should not overlook the strength of our other product groups which make up more than 85 percent of total sales. Surgical products turned in a strong performance for the quarter, benefiting in part from our June 1989 acquisition of Catheter Technology Corporation.''

Mr. Maloney continued, ''We are working with the FDA to regain approval of our balloon catheters for the U.S. angioplasty market. Unfortunately, we cannot predict when these approvals may be received. We were encouraged, however, to learn recently that the FDA has scheduled an advisory panel meeting to review a balloon angioplasty catheter. While we have not been notified in writing, we believe that it is the New Probe which will be reviewed, and we are making preparations to attend the panel meeting.''

Mr. Maloney also noted, ''We are continuing our commitment to research and development investments -- targeted to increase around 20 percent in 1990 -- as new and improved products are important to our future.''

PALATINE, IL (APRIL 18) BUSINESS WIRE - Square D Company Wednesday reported net earnings per common share of $1.09 for the first quarter 1990 the same as a year ago, with sales and net earnings from continuing operations down about 1 percent from the first quarter of 1989. Jerre L. Stead, chairman, president and chief executive officer, said sales were $396.5 million for the period ended March 31, 1990, down 1.3 percent from $401.7 million in 1989. He said net earnings from continuing operations were $27.1 million, down 1.4 percent from $27.5 million a year earlier.

''We expected a slowdown in the first quarter and actually did a bit better than we anticipated,'' said Stead.
